Olmsted Brothers, Brookline, Mass. NOV 14 9 20 AM -24

Gentlemen:

Subject: Administration Building-Morehead State Normal School.

Replying to yours of the 7, relative to the location for the new unit, Morehead State Normal, the building was located and the work started when the writer was in Morehead, several weeks ago.

for the surpose of locating same and the location was thoroughly discussed. The location selected waried somewhat from what we would liked to have had, but the argument put up by the Committee, that Hodson Heall would remain for a great many years and that they did not desire to place the building to the rear of Hodson Heal, counted them of the new location.

ing the location as shown on the nan (which you will remember was the location proposed by us originally instead of the one shown on your preliminary sketch) the entire Committee was better satisfied to change location and approved the arrangement shown on sketch dust received from you.

out up in favor of same. We do not believe it will materially affect he ultimate layout as the road can be swerved in front of this building without hurting it any.

We do not see where the slight change in orientation will affect the arrangement of buildings

#2--Olmsted Brothers--11-11-24.

or roads to any material degree, and feel that very satisfactory results can be obtained.

Yours very truly,

JOSEPH & JOSEPH
