new - 1st town note

Olmsted Brothers,
Architects,
Brookline, Mass.

Gentlemen:

Your letter of November 25th reached this office during my absence therefrom.

At the last meeting the Board of Regents of the Morehead State Normal School accepted your plans as a basis for the location of buildings, sewers, waterways, etc governing the layout of the Morehead Normal School grounds.

It is true the building now under construction was located somewhat differently from the precise location given by your firm. This was done because the construction committee thought it wise to do so. It does not interfere, in my judgment, in any way with the scheme outlined by your artist.

The Board of Regents may find it necessary to slightly change the location of other buildings, but no changes will be made that will in any way disfigure or change the general plan you have made.

Very truly yours,

McHenry Rhoads
Superintendent Public Instruction
