PREFACE

The Annual Report of Research and Creative Productions of Faculty and Staff represents a compilation of information as submitted to the Research and Creative Productions Committee by faculty and staff members. The committee has made no effort to assess the artistic or scholarly merit of the entries. The formatting of the entries follows discipline standards.

Only publications, professional meeting presentations, published abstracts, art exhibits, performances, compositions, and research and creative production grants awarded between January 1, 2006, and December 31, 2006, were included in this Annual Report. References to entries forthcoming by being published, performed, or exhibited in 2007 were excluded.

Although all external grants are meritorious, this publication only features research and creative production grants. All external grants are recognized in the annual MSU Today, Focus Edition, published by the Division of University Relations in conjunction with the Division of Academic Affairs, Office of Research and Sponsored Programs and the Research and Creative Productions Committee.

A MESSAGE From The PROVOST

Dear Academic Colleagues and Friends,

I continue to be impressed by the quantity and quality of research and creative production represented in this Annual Report. It provides an impressive statement about scholarship at Morehead State University, illustrates a full range of scholarly activity and provides testimony to the commitment of our faculty to the university's goal of "Academic Excellence and Student Success."

We see the *scholarship of discovery* by faculty in the sciences and the fine arts. Others are pursuing the *scholarship of integration* with a focus on such issues as "web user styles in e-commerce" and marketing trends in online sport education. Still others are engaged in the *scholarship of teaching* by investigating the effectiveness of such teaching strategies as the use of simulations to teach probability in the math classroom and the use of software to motivate students. Of particular interest, with our current emphasis on both civic engagement and undergraduate research, is the increased activity in the *scholarship of application*, illustrated by the efforts of faculty and students to apply their expertise to address environmental, social, cultural and other issues within the region.

This report emphasizes the degree to which scholarship, teaching and learning are interdependent. While the product or outcome of any form of scholarship is important, of equal importance are the process of scholarship and its contribution to student learning. Without question, a faculty member's active engagement in scholarship enhances his or her own expertise within the discipline and maximizes the potential for teaching and student learning to be relevant and current. At the same time, active engagement in scholarship ensures that the faculty member has an understanding of, and an appreciation for, the research and creative production process—a passion for asking questions, knowing what questions to ask and understanding how to secure valid and reliable answers. Perhaps of most importance to the teaching and learning process, active engagement in scholarship provides an opportunity to instill that passion for inquiry, scholarship and creative production within students—a prerequisite to lifelong learning. To that end, the increased frequency of student-faculty collaboration in research is both impressive and commendable.

To the faculty and staff cited in this report, I wish to express my appreciation for your contribution to the mission of Morehead State University. As a result of your efforts, new knowledge or works have been created, existing knowledge has been integrated in a more meaningful and useful form or applied to meet the needs of our region, and student learning has been enhanced. Our students, our institution and the region we serve are better because of your efforts. Thank you.

I wish also to express my gratitude to the staff in the Office of Research and Sponsored Programs for their continued and tireless support of your efforts and the University's mission. If you have not thanked an RSP staff person lately, now would be an appropriate time to do so.

Michael R. Moore
Provost and Executive Vice President
