MOREHEAD STATE TEACHERS' COLLEGE OPENED WITH BIG ENROLLMENT OF NEW PUPILS

Normal Students Are Back On Job With Many Old And New Ones Ready For Fall Semester—President Payne And Board of Regents Very Successful In Bringing Educators Of High Standing.

The Morehead State Teachers' College opened Monday and by Wednesday afternoon the enrollment had far surpassed that of any previous year since the beginnings of the institution in 1923. The growth of the school has been gradual and each succeeding year sees the coming of students from sections of Kentucky that heretofore has been untouched. The coming of new students from these sections of eastern Kentucky only speaks as to how the school has entrenched itself in the educational system of the state and to the people whom it will serve.

Many of the former students are enrolling for advanced work and have returned bringing new students with them. The enthusiasm of both old and new students promises to make this season an outstanding one.

From year to year the curriculum has been widened to meet the growing needs not only in the preparing of teachers but to take care of those who are contemplating taking up premedical or prelegal work. The second semester of this year will bring about the doubling of the number of courses now being offered. Additional members have been added to the faculty to handle various phases of specialization work.

President J. Howard Payne has been very successful in bringing to the Morehead Teachers' College outstanding educators of high scholastic standing and experience in filling the positions for the coming year. Through his efforts the standing of the school has been raised to the level of the best teacher training institutions in the state. Men and women of advanced degrees have been added to the faculty which will give the school a higher rating with the various associations in accrediting colleges. The school is now recognized by the Southern Association and Kentucky Association of Colleges.

Recently, the Board of Regents let the contract for the building of a library that will care for the needs of the institution for years to come. Its architecture will be in keeping with that of the other buildings on the campus which is the admiration of all who visit the school. This will add strength to the work being offered in making it possible to add to the present library thousands of volumes which will broaden the reading material in each department.

When one looks into the future, it will be a matter of only a few months when a splendid training school will be in the process of construction and completion. With the splendid training school faculty the school now has and with the addition of other members, this department will be one of the outstanding divisions of the school.

Morehead is proud of its school and its development. Morehead welcomes the students back to the campus, and also welcomes the old and new members of the faculty to our city and the citizens of the community desire to lend their constructive hand in the betterment of the school and community that any patron in the state will feel safe in sending his children among us for their educational and moral uplift.

REV. A. R. PERKINS IS RE-APPOINTED HERE

Through an omission in the last issue of the News no mention was made of the re-appointment of Rev. A. R. Perkins as pastor of the Methodist Church here. Rev. Perkins will be in Morehead for at least another year, much to the joy of his congregation and to the complete satisfaction of other citizens of the community to whom he has endeavored himself during his stay here.

Rowan County Has Chance For Forest

A representative of the Forest Service section of the State Department of Agriculture was in Morehead this week for the purpose of looking over this section of Kentucky with a view of establishing a National Forest here.

While he was not in a position to state definitely what would be done, he was greatly impressed with the possibilities of this section for that purpose.

The establishment of a National Forest would mean a great deal to Rowan county in the future as it would be the basis of a reforestation program and the eventual re-establishment of the lumber industry which for years was practically the sole industry of Rowan county.

Warriors Lose Second Game

The Mt. Sterling Reds evened the series at one all, Sunday by defeating the Haldeman Warriors 6-4, before a record crowd of the season. It was a pitchers duel between Rhodes of Lexington, who did the twirling for the Reds and McKinnis was on the mound for the Warriors. Both pitchers were in brilliant form, and pitched good ball throughout the game, with McKinnis holding the Reds to one run in the first and Rhodes to one in the second.

It was a pitchers duel between Rhodes of Lexington, who did the twirling for the Reds and McKinnis was on the mound for the Warriors. Both pitchers were in brilliant form, and pitched good ball throughout the game, with McKinnis holding the Reds to one run in the first and Rhodes to one in the second. Rhodes was the victor in the fourth, when Carter hit a hot single past Carter. He recovered the ball, but Carter had already made second, McKinnis scored on Fugate's error, and scored on Fugate's error, and scored on Fugate's error.

CHURCH OF GOD HAS FALL REVIVAL

Our Fall Revival will begin September 17th at the Church of God. We have secured Rev. W. L. McCree from Ashland for our Evangelist. A good all around minister that will put to come and hear. So come be with us and let's all have a Soul Saving Meeting.

THE DESERT MOON MYSTERY

By Kay Cleaver Strahan
As amazing and entertaining as any mystery story you ever read. Its characters are remarkably real and convincing. Its plot perfect, its climax and denouement as revealing as a flash of lightning. A masterpiece of detective fiction.

WILL APPEAR IN SERIAL WEEKLY IN THE ROWAN COUNTY NEWS

The President's Greeting

It is with unusual pleasure that we welcome the student body of 1929-30 to the campus of Morehead Teachers College. You come from many different parts of our State. We hope that you will find mental stimulation, social enjoyment, and physical well-being. In the name of the Board of Regents and the faculty of Morehead Teachers' College, I bid you God-speed as you enter upon this new year of study and advancement.

J. HOWARD PAYNE, President.

FOOTBALL IS PART OF MOREHEAD

COLLEGE FOOTBALL

This is the day and the hour of the floating pigskin, piggins in the shape of footballs, propelled by lusty feet, spike shoed. Which may be more or less poetical but which is only another way of saying that the boys now have footballists. This is becoming especially notable around the Morehead Teachers' College which, while the prospects for the coming season could be brighter, is still in the running and will have a representative team in the field.

The past summer has seen a number of changes in the Morehead Teachers' College, not the least of which is their entrance into the West Virginia Athletic Conference, with its continent rules. One of these is the elimination of under-graduates from athletic sports. Heretofore Morehead has played boy ranking under freshmen on the football team. This year these are eliminated. The result is that, with the season about to open, the team is only beginning to get started. However, before it is over, the boys who represent Morehead, will undoubtedly make a good showing.

Carroll, Counts, Riddle, Laughlin, Kerschner, and Lewis and a few new men will give a good account of (CONTINUED ON LAST PAGE)

HIGH SCHOOL FOOTBALL

The Black Cats who for the first time are disputing themselves on the football field, bid fair to make a little history for themselves during their first year, if the practice sessions are any indication of quality. They have a hard schedule before them, according to Roy Holbrook with every game scheduled against teams that have played for several years and, ordinarily, they would scarcely be expected to win any of their games. They may not win any, but, if they do not, the other team is doomed to learn that they have played football after each game.

Practices have been being held daily and already the team is beginning to take on the semblance of a football machine. Morehead will have one of the heaviest high school teams in the state and, while weight is not the only requirement, it helps, especially if its in the line, with a fast back field. Many of the boys are showing real quality, with some of them giving indication of developing into stars of the gridiron.

As stated before, this will be the first year that the local school has engaged in football as a school sport. However, the citizens of Morehead are familiar with the game from the (CONTINUED ON LAST PAGE)

Welcome From The Churches

SERIES OF MEETINGS AT THE FIRST CHRISTIAN CHURCH

September 30—October 11, 1929.
Rev. A. C. Brooks of the Christian Church at Mt. Sterling will preach for us during the meeting. There will be special music at each service and we want to make much of the congregational singing. Mr. Brooks is a splendid speaker and I am sure who ever hear him will be profited.
The people of the other churches and of the whole community are invited to attend these services. There will be a welcome for everyone. Break an old habit and form a new one! Start going to church.

Morehead, Kentucky, September 19, 1929.
To the Faculty and Students,
Morehead Teachers' College and Normal School.

The Editor of the Rowan County News has very graciously opened the columns of the News to me to write you a word of welcome.

I believe you can be assured that everyone in Morehead and Rowan County is happy to have the school in our midst and the opportunity of mixing and mingling with the faculty and students in our community to have this educational institution in our midst.

You are a fine part of our community life and we want to do everything possible to make it a happy experience for you while you are here.

The Churches of Morehead are doing everything possible to make their programs measure up to student standards. We cooperate in every way possible to build our interests to fit into the interests of the school. I cannot speak specifically for the other Churches, but you will see their announcements. The Methodist Church has a special class devoted to the Students and extend a cordial invitation to any student who does not have Church home in Morehead. The class is usually taught by a member of the Normal School faculty. Our closing sermon is 10:45-11:45. Morning

promptly so that any student desiring to get to Sunday dinner at the school will have ample time. The Epworth League is 6:15 P. M. This is our young people's organization. The evening sermon is 7:00 o'clock. We hope you will have a profitable year in Morehead and we want to assure you that everything possible will be done for you while here.

Sincerely,
A. R. PERKINS, Pastor
Methodist Church

STUDENT BODY AND FACULTY OF THE MOREHEAD NORMAL SCHOOL AND TEACHERS COLLEGE ARE ESPECIALLY INVITED TO ATTEND THE REVIVAL OF THE CHURCH OF GOD HERE IN MOREHEAD.

Our Evangelist, Rev. W. D. McCree of Ashland, Ky., will bring to us inspiring messages from God's Book. Special singing will be another feature of the services you will surely enjoy it.

A standing welcome is given to everyone. We want to see you there. COME!

Singing at 7:00.
Preaching at 7:15.
THE CHURCH OF GOD,
T. F. Lyons, Pastor.

TO THE COLLEGE STUDENTS AND FACULTY!

With the opening of the 1929-30 school year a fine group of students and faculty will gather in Morehead. These young people and their teachers are from Christian homes and among them all the churches of the town will be represented and they will want to affiliate with their respective churches and be a help and get a blessing from such contact while here.

All the churches will give them welcome. For the Baptist church we wish to extend to the students and faculty of the College a hearty invitation to join us in our Bible School, Church Worship and Young People's work.

You will be welcome and you will enjoy it and get a blessing if you will come.
M. E. STALEY, Pastor.

STATE HIGHWAY COMMISSION IS MADE UP OF HIGH QUALITY MEN, SAYS JUDGE EVANS

Judge T. A. E. Evans Makes Trip To Frankfort, Where He Meets State Highway Commission For Rowan County Benefit—Highway Funds Are Scarce, Reports Judge Evans.

Bud Hawkins Is Very Much Alive

Rumors have been persistent in Paintsville for the past few weeks, that Bud Hawkins, well-known showman had died in Tennessee from the effects of a snake bite he received while assisting in removing weeds from the site of his show. Harrowing tales have been told of the agonies suffered by the popular showman in the last throes of death from the bite of a cottonmouth moccasin snake. According to rumors Mr. Hawkins was bitten by the snake and died in convulsions ten minutes later.

Word received by friends in Paintsville prove there is no foundation to the report, and that Mr. Hawkins is very much alive and conducting his show as formerly. (Paintsville Herald.)

Local Power Co. Is Sold Again

According to a report published in the official organ of the Kentucky Utilities Company, the United Public Service Company with headquarters in Chicago, recently sold to the Middle West Utilities Company, the local properties of the concern will be handled by the Kentucky Utilities Company which is a subsidiary of the Middle West Utilities.

This places the local plant as well as all the cities and towns formerly owned by the United Service Company, in the hands of the Inland interests, which is one of the largest if not the largest utilities company in America.

According to information received at this office the present force operating the local office will continue in charge without change, with Mr. J. A. Holley as district manager.

PROF. R. L. HOKE ELECTED TO ASSOCIATION

Dr. Rex L. Hoke, of the Department of Education of the Morehead Teachers' College has received word of his election Associate of the American Psychological Association. His election came at the September meeting held in New Haven, Connecticut.

Requirements for membership in the association are that the candidate shall have a Doctor's degree in the field of psychology and shall have conducted research studies in the field.

RED CROSS DRIVE TO START SOON

The annual Red Cross membership drive will start this year officially on November 11, and will close November 28. Locally, Mrs. N. L. Wells, secretary of the Red Cross plans on receiving membership at once, as it will give the people more opportunity to enroll. She is hopeful of enrolling at least twice the number who took out memberships last year.

Every man, woman and child in Rowan county should be a member of the Red Cross. Remember what was done for this county last spring and the two succeeding years and join the Red Cross.

Dr. T. A. E. Evans, County Judge of Rowan county returned recently from a trip to Frankfort where he had spent some time before the State Highway Commission, discussing the prospects for the completion of roads and the letting of contracts in this county. Judge Evans brought back a high opinion of the quality and qualifications of the men who constitute the commission, especially of the commissioner from this district, Hon. James A. Scott and the Chairman of the Commission, Hon. Ben Johnson.

"After sitting through the major part of a day, with the members of the State Highway Commission," said Judge Evans, "and after listening to the million and one tales from the million and one delegations from various counties in the State, after hearing the stories, and pleas submitted, and then hearing the judicious and manifestly just decisions rendered by the Highway Commission, I can only admire the way in which the business of the State Highway Department is handled."

"From early morning until late delegations came, some with reasonable claims, some with claims and suggestions and ideas that in themselves were impossible and ridiculous. The members of the Commission gave ever delegation a hearing, regardless of the justice or reasonableness of the claim, and rendered their decisions in such a manner that everyone went away, if not satisfied, at least with the feeling that the best interest of the people of the state."

"People in this section fail to realize what the appointment of a man of Mr. Scotts calibre means to them in the construction and completion of the highways of this section. Particularly and complete of the citizens of Rowan county are Mr. Scott a debt which they will have difficulty in paying. He has done everything in his power, and a great deal more than we had any right to expect of him in furnishing this county with good roads. Rowan county owes him a particular debt in the recent action he obtained in getting the Midland Trail surfaced almost to the county line."

"It is true that at present the Highway Commission is handicapped and embarrassed by the lack of funds, with people from every section of the State clamoring for money with which to complete their road system. They are making the best of the situation and are certainly doing a remarkable work as rapidly as it can be done."

"Mr. Johnson, chairman of the Commission is another friend of Rowan county, who deserves much credit for the manner in which he has cooperated with me and with Mr. Scott in solving our problems. Mr. J. S. Watkins, State Highway Engineer who has visited this county, has also aided in the work."

"Last but not least, we are proud of our district engineer, F. S. Wilkey who is working hand in glove with us and throughout the district in putting over the plans of the Commission."

"I believe that the future road workers of this county are in capable hands and that Mr. Scott and the other members of the Commission will as soon as it is possible to release the funds and carry out the plans that have been laid down during the past years."

Mr. and Mrs. A. B. McKinney, son, Joseph and daughter, Elizabeth spent Sunday with relatives in Ashland. They were accompanied by their guests, Mr. and Mrs. W. F. Lykins and Mrs. Frances Kilgore of Grassy Creek, who remained in Ashland for a visit.

We Are Authorized To Announce W. F. KEELEY

as a candidate for Office of Jailor of Rowan County, at the November Election on the Liberty Ticket.

A Great Blessing To Morehead

The business life of Morehead centers around the Morehead State Teachers' College, a fact that is not difficult to see, by an observer. Hence it is easy to understand the hustle and bustle of this little city as the day for the opening of the college arrives.

Every business in Morehead profits by the location of the school here. Incidentally many of the businesses of neighboring towns profit likewise. But, because of the fact that Morehead is the home of the school, and the school activities center here, the local businesses profit most.

Every business man in Morehead welcomes the students back home, because to many, Morehead has become home. Many old faces are back, along with many new ones. To the old students, the business men of Morehead in this issue say, "Welcome back Home." To the new students, those who are making their first visit to our great school, they say, "We are glad to have you with us."

The business men of Morehead have but one ambition, to unite with the school authorities to make the coming year the great year in the history of the school.

We of Morehead believe in the Morehead State Teachers' College. We believe that it is not only the heart of Morehead, but the heart of Eastern Kentucky. We believe that it is the fountain from which the youth of Eastern Kentucky may drink

of youth and knowledge and future greatness for their section of the Commonwealth. It is rapidly becoming, as it should, become the center of educational accomplishment in Eastern Kentucky. Its students have gone out and are continually going out to better conditions in their own sections. They are having their influence for further progress in the entire Eastern part of the State.

So again the merchants and business men of Morehead extend a hearty welcome to every student of the Morehead State Teachers' College. They invite you to come in and get acquainted with them and to make yourselves at home in their places of business.

The "DESERT MOON MYSTERY"

By KAY CLEAVER STRAHAN.

After Margarita left the place from her visit of 1909, taking the twins with her. Sam went around for a week or two with his head locked to one side as if he was listening for something. I knew what he was missing, and I was not surprised when, one day, he told me he had decided to send to San Francisco and get a couple of children and adopt them.

He wrote to a big hospital in San Francisco and got in touch with a trained nurse who would be willing to come up and live on the ranch and take care of the two children. He had her go to an orphan's home and select the children and bring them with her when she came.

The nurse came early in September with two brown-eyed children named Vera and Alvin. Sam at once re-named them. John, he said, was the only name for a boy, and since the only name for a girl, but since my name was Mary, he would let the little girl have Martha, which meant, according to Sam, "Boss of the Ranch."

The nurse's name was Mrs. Ollie Richer. I don't know how old she was then. I don't know how old she is now. She never talked. I do not mean that she never chatted, or gossiped. I mean that she never said one word if she could possibly avoid it.

At the end of sixteen years of daily association with Mrs. Richer, that is, up to the time of the second murder on the Desert Moon, I knew exactly as much about her past life as you know at this minute. John, at that time, was nine years old. He was as bright and as up-standing, and as handsome, as any little fellow to be found anywhere.

CHAPTER II Arrivals at the Ranch It was three years after Mrs. Richer came to the ranch, bringing John and Martha, that Hubert Hand put in his appearance. He had got Mr. Indian Chait Chin, as everybody called him, to bring him and Rattail in his old surrey.

Sam and I, as was our custom, went walking down to meet him. He took off his hat to me, and said to Sam, "I wish to see the owner of this ranch."

"Nobody ever mistook me for a fairy before," Sam said. "But go ahead. Your first wish is granted. What are the other two."

Hubert Hand got out his card then. Besides his name it had "Clover Blossom Creamery," and the San Francisco address printed on it. Hubert Hand explained that he had an up-and-coming creamery business in San Francisco, but that his physician had told him that he had to live in a high, dry climate with plenty of sunshine and no fog.

He had, after inquiries and investigations, decided that the Desert Moon ranch, altitude seven thousand feet, sunshine three hundred and sixty-five days in the year, to say nothing of the marvelous view of the Great mountains, the hunting, the fishing, and the pure snow water, would fill all his requirements.

His proposition was that he start a creamery on the Desert Moon ranch, and supply the valley with ice cream, butter, and other dairy products. Sam had the ranch, the cows the big ice plant. Mr. Hubert Hand had the knowledge and the equipment. They could divide the profits.

"To sleep men, I guess there is nothing to talk about here, but in new contempt that they hold dairy farms. Sam was too much disgusted to swear very long.

"Laden, stranger," he said, "I wouldn't turn the Desert Moon into a place to sell milk around in if it the entire valley had to depend on Hongkong, China, for its ice cream cones. Forget it, and come in now and have some supper."

"By the way," he began, "trying to make it sound unimportant, when we had finished supper, 'I heard, in Telko, that you were something of a chess player.'

"I am, when I can get a game," Sam said. "But chess players, in these parts, are as scarce as hen's teeth."

"I had a little," Hubert Hand admitted modestly. Sam jumped up and got out his chess table.

Hubert Hand beat him the first game in about half an hour. They set up their men again. It took Hubert Hand over an hour that time to beat Sam, but he did it.

"Hill's," Sam said, at the end of that game. "You're hired."

"How do you do?" he said. "I sorted out, so I can get you all mixed up, when you were little tykes—couldn't tell one from the other."

"You won't have that trouble any more," said the one who had dodged at me. "I am Gabrielle, and that little puss is Danielle. People are getting so confused about us any longer."

The population of Rattail had come running to the depot, of course when the train stopped; and, at last, swarming his way among miles, families, and accomplices, and dogs, he met John.

"Lala!" exclaimed Gabrielle, when she caught sight of him. "Who is this picture-made thing coming toward us?"

John did look pretty fine, wearing his new corduroy suit and his shiny new leather puttees, and his new sixteen-dollar sombrero. He had even gone so far as to button up the collar of his brown flannel shirt.

"He," Sam answered, beaming with pride. "My boy, John."

"How thrilling!" chirped Gabrielle. "It is like living in a cinema, isn't it, Danny?" And she went, sort of skipping along the tracks, to meet him.

When they met, John gave her about the same attention, that messenger gives the ticket checker at the gate, in a city depot, when he sees the train he is trying to catch moving slowly toward the yards. He pulled off his hat with a bow, but he passed her, walking very fast, thought that he was so flustered that he did not know what he was doing.

"John!" I said, when he reached Danny and me, and stopped short. Like he had just been lassoed from the rear, "This is Danielle Cannizzano."

John dropped his hat in the alkali dust, his new hat, and reached out and took both of Danny's hands in his. Falling on his knees in front of her would not have been much of a show.

"I," he proffered, "I-I heard you laugh."

To me it barely made sense; but she seemed to find it interesting and important.

"Really?" she said, and sort of smiled full of meaning.

Rattail's population was beginning to close in around us. I pulled my hat down over my eyes. It was a relief to me, but I declare, if a freight train came along, passing those two off the tracks, they might be seen standing there yet, staring into each other's eyes.

"I," he proffered, "I-I heard you laugh."

To me it barely made sense; but she seemed to find it interesting and important.

"Really?" she said, and sort of smiled full of meaning.

Kiwanians Hear About Vacations

The Morehead Kiwanis Club had an interesting program for Monday evening. Each Kiwanian was to tell the high point in their experiences during their vacation. It was interesting to hear those who are not native Kentuckians talk about the interesting things they found during their visit to different parts of the State. Kiwanian Graves related the thrill he had in visiting "My Old Kentucky Home" and also the "Lincoln Memorial" at Hodgenville. While he was away he visited in Kentucky, Ohio, Alabama, Tennessee and Mississippi. He found the best roads in Tennessee of any state visited. Professors Peratt and Vaughan had the boyhood thrill of visiting a county fair. When they arrived, they seemed to have been transferred back to the thrills that came only once in a life time. Kiwanian Robert Young went to Pittsburgh and found prehistoric animals in the museum that an elephant would not make a sandwich. He also reported that he saw the University of Pittsburgh erecting a 37 story class room building.

Prof. Hollis wanted to see how well the Republicans are getting along with Muscle Shoals, so he went down and seemed to get along very well until the guide started telling how they took nitrogen from the air and what they made from it, then he admitted that man traveled deep enough in the book of knowledge teaching educational subjects at the Normal School. A new Kiwanian, Doctor Hoke, put Prof. Hagan in the back ground with a fish story from the banks of West Virginia stream. Rev. Staley had to travel through five capital cities to find that the beauty spot of all is to be found on the Midland Trail just as one leaves West Virginia. Doctor Staley is the traveling Kiwanian Sky-Pilot. One of the real interesting features to the club was Doctor Terrill went back to boyhood days and told how hard he had tried to win a Georgia peach and the pathetic note was that he did not win her. Prof. Hagan told of the new vocabulary he attained in his research work at the University of

Kentucky throughout the summer. He demonstrated to the club that he is possessor of at least three new words and I am sure he will pull them on the farmers of this county in the coming year. The last but not least, and claiming to be only one that actually stayed with the subject assigned was Kiwanian Jayne. Prof. Jayne was invited to the teachers association at Whitesburg and after the meeting he and other guests went to the point where Kentucky is divided or separated from Tennessee and Virginia. He really claims to have reached a high peak. It was so high the speaker said he could stand there and see the smoke from Lynch 65 miles away.

Morgan Bradley Injured in Wreck

Morgan Bradley of Grayson a brother of Senator S. M. Bradley of this city suffered a serious accident last Thursday when the car which he was driving skidded on a muddy road near Olive Hill and overturned. He was taken to the Baptist General Hospital at Ashland where it was found that he was suffering from a broken jaw, a broken nose and a slight fracture of the skull.

The News was unable to learn just how the accident occurred. It is supposed, however, that Mr. Bradley's car skidded in the mud and he lost control, the machine overturning.

According to information received at this office he is at present well on the way to recovery.

SCHOOL NEWS

Miss Emma Shader is here and ready to begin public school music. All pupils of the school will have music about twice a week.

Pupils are still coming in almost every day. Several new ones have enrolled recently in high school.

The enrollment is now more than eighty, while last year there were less than seventy during the entire year. Almost forty have entered in first

year high school. The classes will have to be divided into two sections to meet the state regulations.

Haldeman School

The total enrollment of the Haldeman Consolidated High School had reached 310 Monday afternoon; there are 287 in the grades and 32 in the high school.

Everybody is now ready for work as the text-book problem was ended by Mr. Mobley's ordering the books direct from the publishing companies. The most serious problem the school is now facing, however, is the over crowded condition in the primary grades; there is 112 pupils in the first grade alone. The Board of Education has partially corrected this condition by employing two extra teachers. The prospects are favorable for the best school year in the history of the Haldeman Con-

solidated High School. Mr. Tackett has been ill and unable to teach Monday and Tuesday, but was in school again Wednesday.

Have Your Scribbles Analyzed
The Yellow Pencil with the Red Band
Louise Rice, world famous graphologist, can positively test your talents, virtues and faults in the drawings, words and what notes that you scribble when "out in thought".
Send your "scribbles" or signature for analysis. Enclose the picture of the Mikado pencil, cut from a box of Mikado pencils, and ten cents. Address: Louise Rice, care of Eagle Pencil Co., New York City

HEADQUARTERS

OF THE TEACHERS COLLEGE STUDENTS

BLAIR BROS. And CO., through the past years has come to be known as the Store of Students. This store has acquired the name of being the place where the students make their headquarters, get their checks cashed, meet their friends. The old students know this and have already paid us visits since their return.

We are glad to have them back with us and renewing their acquaintances. We are also glad to welcome the new students, those who are making their first visit to Morehead. We want to extend to them a cordial invitation to drop in our Big Store and get acquainted. Look over our line of Up-to-the-Minute merchandise and if you like it we will be glad to dress you up. However, come in anyway. We want to meet you. Meet your friends here in our store.

We handle only high grade merchandise at Reasonable Prices. We are sure we can suit you, both Boys and Girls.

FASHIONS FOR THE LADIES

Our ready-to-wear department is teeming with beautiful garments which we want you to examine and try on. You will be agreeably surprised at the values we are offering at prices ranging from —

\$5.95 to \$16.75

Winter coats are now on display the latest New York styles, fur-trimmed. The best the market affords.

Hosiery supreme is the only way we can describe our beautiful line of hosiery in the latest colors, new attractive, the perfect weaves of silk. Prices range from —

.95c — \$1.45 — \$1.95

SHOES FOR THE LADIES

Our famous Craddock line of shoes are causing considerable comment, with their modern styles and colors. You can find any style of shoe in these standard lines of merchandise that will fit and at the same time prove the shoe for your foot. Prices range from —

\$2.75 to \$6.50

FOR THE MAN WHO KNOWS

We carry a complete line of clothing and overcoats for men and boys. To say the styles and weaves are attractive is to put it mildly. The man who knows and who cares about his personal appearance cannot do better than look over our line, compare prices. We are confident that he will invest his money in the famous HYDE-PARK \$25.00 Clothes at —

We carry the Ed V. Price and the Born lines of tailored to measure clothes for the man who prefers them; accessories for the men are to be found in abundance and variety. Showy ties, cleverly designed socks, Cooper made underwear, everything the well dressed man needs. And again our prices are right.

MEN'S SHOES

UPPER TRIPLET

By Beulah Williams
Mr. Edgar Butler of Flemingsburg, Ky., and Mrs. Alice Hardy of Ryan, Ky., surprised their many friends Saturday by quietly getting married at Flemingsburg. We wish them a very happy and prosperous life.

Leron Williams spent the week end with his grand parents, Mr. and Mrs. John Fite at Ribolt, Ky. Mrs. Beulah Williams had as dinner guests Sunday, Mr. and Mrs. Harve Gulley and children, Mrs. Sarah Adams and little grandson, Guy Planck.

The Sunday guests of Mr. and Mrs. W. M. Nickell were Mr. and Mrs. Jake Planck and Mrs. Willie McCormick.

Mr. and Mrs. Perry Riley of Stricklett, Ky., were the Sunday guests of Mr. and Mrs. W. M. Brown. Mr. and Mrs. Elmer Kinder and son, Junior spent Sunday with Mr. and Mrs. Ollie Stacy.

Rev. Eden and Ray, Furnace of Soldier, preached at Haldeman School House, Saturday night and Sunday. They were guests of Mr. and Mrs. James Brock Saturday night.

DRY CREEK NEWS

Born to Mr. and Mrs. Aaron Jennings, September 10th a fine boy, named James Ray.

Mr. and Mrs. Asby Smedley are on the sick list this week.

Mr. and Mrs. Harrison Ramey spent Sunday at Midland with Mr. and Mrs. Rome Oakley.

Miss Bertha Jennings of Hamm is staying with Mrs. Aaron Jennings.

Mr. and Mrs. Oscar Baldrige were visiting her parents at Minor Saturday and Sunday.

Mr. Willie Dehart of Slab Camp was visiting his daughter, Mrs. Eva Smedley, Sunday night.

Mr. William Skages, Miss Doshia Caudill and Miss Rosa Ramey were guests at W. T. Richardson, Thursday night.

There will be a pie supper at Dry Creek Saturday night, September 21. Everybody invited.

Mr. and Mrs. Willie Pettit, Mr. and Mrs. Emma Collins of Salt Lick were pleasant visitors her, Sunday.

ZILPO NEWS

Mr. and Mrs. Wesley Armstrong left Sunday, for Ironton, Ohio, to spend a few days with their daughter, Mrs. Valentine McKinney.

Miss Virginia Casey returned home Saturday after a visit with relatives in Ohio.

Mr. and Mrs. Robert McFarland were the Sunday dinner guests of their son, Mr. Everett McFarland.

Mr. Edd McFarland who has been employed in Muncie, Ind., came home Sunday to spend a few days with his parents, Mr. and Mrs. R. T. McFarland.

Miss Thelma Jones has returned home after visiting with her sister in Ashland.

Mr. and Mrs. Delago Hamm of Ashland, Ky., were the week end visitors of Mr. Bill Jones.

Mr. and Mrs. Deaton Alfrey from Mt. Sterling spent the week end with Mr. and Mrs. H. C. Alfrey.

Mr. Winford Adams is spending a few days with his grandmother, Mrs. G. Williams.

Mr. John Williams and family motored to Salt Lick, Sunday.

Mrs. Minnie Rose and Miss Hazel Wilson spent the week end at Farmers with their sister, Mrs. Alva Reynolds.

Mr. Newt Williams and family of Oklahoma are visiting Mr. George Williams.

BLUESTONE NEWS

Miss Mary Gullett spent the week end with Marie Everole.

Mr. and Mrs. Stallard Day of Lexington, Ky., are visiting Mr. and Mrs. Ward Elam.

Miss Etma Dugins spent the week end with Ruby and Edith Jones.

Mr. Shirley Barndollar of Akron, Ohio, is visiting Mr. Wilson Ramey.

Miss Hazel Wilson is visiting her sister, Mrs. Roy Reynolds.

Mr. and Mrs. John Gilkerson of New Castle, are visiting friends and relatives here.

Miss Pearl Jones spent Friday

with Mrs. L. L. Reynolds.

AMONG THE COUNTY AGENTS

Jesse French and Clarence Beeler, Hardin county farmers who are keeping records, reported an average profit per cow last month of \$9.35 and \$8.92, respectively.

A state-owned pulverizer crushed 2,500 tons of limestone in communities in Caldwell county where lime has been used. Eight thousand tons will be used in the county this year.

Logan county bankers cooperated in organizing a tour to the Western Kentucky Experiment Substation at Princeton. Eighty-eight farmers made the trip.

Thirty Allen county farmers made a tour of orchards, studying pruning and the control of borers. Seventy-five acres of young peach trees in the county, owned by 15 farmers, are being managed according to the best known practices.

Some red clover grown on marled land in Shelby county is yielding 4 bushels of seed to the acre.

Thirty-eight Madison county farmers drove into Bourbon county to study results secured from the use of crushed limestone on the land.

A third crop killing club with 26 members has been organized in Union county. The Pat Clements club estimates it has saved farmers \$5,000.

Fourteen Knott county farmers using commercial fertilizers and good seed corn report improved crop yields.

College Of Agriculture

The Garden STORAGE OF THE

"COOL" VEGETABLES

By John S. Gardner, Kentucky

Last week we discussed the general storage conditions the "cool" vegetables require; this week, and next, specific cases of "pit" and "trench" storage will be covered.

OUTDOOR "PITS"—Burying vegetables in pits, out of doors, is the simplest and generally the most satisfactory method of storage. The temperature can be held, ideally, and the proper humidity, as well; the latter, automatically, in fact. The great drawback attending the use of pits is that they are sometimes hard to open and still more difficult to close.

This can be gotten around by making their capacity no greater than to hold the amount of vegetables it is convenient to remove at any one time. The modified "storage cave" described last week may suit the average gardener better than a "pit."

A "pit" may be circular, or nar-

row and as long as needed for the amount to be buried. The location should be so chosen that surface drainage from it is assured in all directions. In addition it should be ditched around so that no ex-cavation need not be more than 9 inches.

The bottom is covered with a few inches of straw or leaves, and the edge lined in the same way. The vegetables, beets, carrots, turnips or white potatoes are piled in symmetrical fashion, into a cone or, in the long pits, a windrow, and completely covered with a few inches of litter. A cover of earth 6 inches thick is added, but the tip left uncovered. Over this opening are laid boards or tin to shed rain. These serve as a ventilator, through which may pass the moisture, called the "first sweat" given off by vegetables during the first month or so of storage. By Thanksgiving, the pile should be

entirely covered with earth, whose thickness now should be made 9 inches. Three inches more is added by Christmas, making 12 in. all, a thickness adequate for Kentucky winter conditions.

CABBAGE

Cabbage pits for home garden capacity are built narrow and long, and the bottom is 2 in. the best, and in the rest, one. The heads should be piled upside down, with the stems roughed, for cold storage travels through the stems. From such a pit 30 heads may be removed at a time and the pit reclosed.

If the heads failed to harden they may be stored in such a manner that growth may go on, as follows: Pile out or spade a trench 2 heads wide and about 6 inches deep. Lift the cabbage entire, and deposit it in the trench, not upright, but

(CONTINUED ON PAGE FOUR)

WEAK SPELLS

"I was so weak," says Mrs. Josephine Cockerell, of Baldock, S.C., "that I was not able to do anything."

"At certain times, I suffered dreadfully with pains in my back and sides. My head would hurt—felt like it would split open. Spells of weakness would last for weeks."

"I read of Cardui. I sent for a bottle and began taking it. My case was stubborn, and at times I almost lost hope, but I could see a little improvement. At last I began to feel much better. Then I improved rapidly. For the last year I have been in better health than I ever have been before."

"I give the credit to Cardui, for after I had given it a thorough trial, I got well."

Drive a Chevrolet Six!

—so Delightful to Drive!
The Chevrolet Six delivers its power with that smooth, even, velvety flow which characterizes the truly fine automobile. At every speed, you travel without the slightest annoyance from vibration. Equally delightful are its comfort and handling ease. Four long semi-elliptic shock absorber springs provide the road balance found in the finest cars. And the steering gear is equipped throughout with friction-free ball bearings.

—so Economical to Own!
Many people still do not appreciate how little it costs to own a Chevrolet Six. You can actually secure a Chevrolet Six for practically the same cash and monthly payments you would expect to make for any low-priced car. Furthermore, it is unusually economical to operate—better than 20 miles to the gallon of gasoline, with unusually low oil consumption. Come in for a demonstration today!

From the County Agent

SWEET POTATO STORAGE

Sweet potatoes have the reputation of being difficult if not impossible to keep. This reputation is only partly deserved and there are many things that the average farmer can do to lengthen the average keeping period of this vegetable. In the first place the seed should have been dipped and the slips grown and set out in new land. However, if the potatoes have been grown on new land, that is new to sweet potatoes, they should be dug carefully and handled in such way that they will not be bruised, cut or broken and placed where they will dry out well. They should be dried until they will show no wax or sap on being freshly broken. The temperature of the drying room should be kept high, up to 85 degrees, and

the air be kept changing constantly for the first three weeks after they are dug. After the potatoes are dug they should be kept where it is dry and a temperature of about 50 degrees can be maintained. The attic or upstairs is often a good place until very cold weather has come. Nothing but clean sound, well cured potatoes should be placed in storage as one faulty potato will start rot and cause heavy loss.

TOMATOES

When frost threatens, those fruits that have reached the "white" stage may be made to ripen if kept at about 50 degrees, but if the tomatoes are gathered left attached to the vine, in storage they will ripen with a much more natural flavor. This is true even of the relatively

green tomatoes, which can hardly be ripened in any other way.

BEANS

This same is true of beans; that is, if the entire vines are pulled, the beans retain their crispness and flavor for a much longer time than if they are removed from the vines.

THE TOBACCO SITUATION

At this time of the year there is always a question in the Kentucky farmer's mind about what will be the price of tobacco, when the market opens in December. It is impossible to say definitely whether it will be as good as it was last year or less, but there are certain factors which help to determine the price of tobacco that are known. The crop last year was short and the crop this year seems to be about the same amount, this would indicate that prices would be better this year than

last but the quality has a lot to do with the price and the quality of this crop is not definitely known and will not be determined until the tobacco is well cured and grading begun.

There are some good crops of tobacco in Rowan county and the owners of these should be sure that they are being well paid for their crop before accepting an offer to sell. This county fared better than some other parts of the State during July and August when rainfall is considered. Parts of the Bluegrass was very dry and some tobacco was burned so badly that it was not even cut and all was damaged so that the crop in the Bluegrass and section in Central and Western Kentucky is much shorter than it otherwise would have been. Good quality tobacco will undoubtedly bring very satisfactory prices when the market opens.

PEACH TREE BORERS

Peach trees should be treated at once for borers. It is far cheaper and much more effective to use paradichlorobenzene, commonly called P. D. B., now than to dig the borers out later. Treat the trees in the following manner. Scrape the grass and weeds from around the trees leaving the ground smooth three or four inches in all directions from the tree. Then draw in some fresh soil around the trunk of the tree so the ground level around the tree is an inch or two higher than that farther from the tree. The P. D. B. is then applied in a circular band entirely around the tree, not nearer than one inch farther away than three inches from the trunk. For trees from three to five years old $\frac{1}{2}$ to one ounce of P. D. B. is enough for one tree. For older trees one to one and one half ounces should be applied. For convenience in measuring have your druggist to give you a small box that will hold exactly $\frac{1}{2}$ ounce. On young trees one-third of an ounce is enough for yearling trees and three-eighth ounce is enough for two year old trees. This material can be obtained at the drug stores at Morehead or from concerns that sell spray material.

BACHES BRANCH NEWS

Mr. and Mrs. Robert Conn of Indiana are visiting relatives here and at Sand Gap.
Mrs. Julia Mabry, Mr. and Mrs. George Wilson of White Lake, Wis., were visiting relatives in this part of the county last week.

The Sunday guests of Mrs. Pearl Cox was Lucy Bledsoe, Vada Cox, Hazel Dehart and three children. Mrs. Lucy Bledsoe of Soldier, Ky. is visiting her parents, Mr. and Mrs. Johnnie Cook of this place.
Mrs. Laura Crose of Crick, Ky., was visiting her mother Saturday night and Sunday.

Home Canning Made Easy

By GRACE VIALL GRAY
Household Science Institute.

9 CANNING POINTS

1. Have all equipment in readiness before canning is started.
2. Pack products in jars or cans that will seal air tight. Spoilage in canned foods is frequently due to imperfect containers.
3. Pressure cookers are helpful in the canning of meat and all nonacid vegetables. The high pressure obtainable thus assuring perfect sterilization. Pressure cookers also save time and fuel.
4. If you live in the South, or in very high altitudes, or in the west coast states, get the time-tables for canning recommended by your state college. In these sections it is recommended not to use hot water for the canning of vegetables and meats but the pressure cooker.

OFFER \$5,025 IN PRIZES IN NATIONAL CANNING CONTEST

To send off a three-sided surplus of farm products in many sections and to impress more housewives with the economy and healthfulness of home canned foods, a National Canning Contest is now under way to find the best jar of canned fruit, vegetables and meat in the country. Two hundred and twenty-two cash prizes totaling \$5,025 have been hung up by the Sears-Roebuck Agricultural Foundation, including a grand prize of \$1,250 for the best jar of canned food entered in the contest. Any woman or girl is eligible to enter the contest, but entries must be in not later than October 1, 1929. Further information on the contest and free jar and entry blanks for sending in entries may be had by writing to James Williams, director, National Canning Contest, 925 S. Wabash Avenue, Chicago, Ill.

Packing Chicken in Jars.

170 degrees. Boiling fruit juice destroys the flavor.

8. Canning does not change poor products into good products so use good products to put into jars. And do not spoil good products by half-way methods of canning. Use the quickest, safest, and most efficient method of canning, which is the pressure cooker method.

9. Before storing canned products away in a cool dry place for winter use keep the jars under observation at room temperature for at least one week.

AGRICULTURAL NOTES

College Of Agriculture
CONTINUED FROM PAGE THREE
 reclining at an angle of 45 degrees. Cover with earth, making the covering about 4 inches to begin with, and adding about 2 inches more at Thanksgiving. Although ideal heads may not result, quite acceptable hardening will take place, and cabbage otherwise worthless will have been salvaged. Such a trench should be opened only from the end from which the cabbage plants lean.
 Next Week the Storeg of Celery will be discussed.

LIMED LAND CLOVER
MAKES BIG PROFITS

Eleven acres of red clover grown on limed and phosphated land returned \$71 an acre this year on the farm of C. M. Reynolds in Allen county, according to County Agent J. H. Atkinson.
 The field was limed and sown to clover in the spring of 1928. It previously had been treated with 200 pounds of phosphate to the acre. Mr. Reynolds cut 31 loads of clover hay that haled out 45,537 pounds, worth, at \$20 a ton, \$450. The second crop was threshed, returning \$282 worth of seed and \$50 worth of straw.
 The 35 tons of limestone used on the field cost \$87.50, and the seed cost \$58. Deducting the cost of the limestone, seed and threshing, Mr. Reynolds received \$626 for his labor. The same land had been yielding 7 to 8 barrels of corn to the acre.

"SELLS" LIMESTONE
VALUE TO FARMERS

"I have been such a believer in ground limestone that I fear I have caused myself much extra work and worry in trying to persuade a large number of farmers to use it," says County Agent C. M. Wade of Scott county, in his August report to the College of Agriculture of the University of Kentucky.
 "Last spring I was successful in obtaining the use of one of the state-owned limestone pulverizers, but I am having more difficulty than I anticipated in getting farmers to use it. I have spent nearly half of my time this month in an effort to show farmers that they have an opportunity that they cannot afford to pass up.
 "Thirteen farmers used the crusher and two others ordered a carload of lime dust from Frankfort. The 15 farmers have 687 tons of limestone to spread this fall."

HOUSE AND CULL
SAYS POULTRYMAN

"Pullets placed in the laying house before the fall rains and cold weather, set in will avoid roop and kindred troubles, points out V. M. Insko, Jr., of the poultry section of the University of Kentucky, College of Agriculture.
 "As soon as pullets begin laying, move them into clean laying houses," suggests Mr. Insko. "Prepare the laying house by sweeping the floors, cleaning off the dropping boards and spraying with a 5 per cent solution of stock dip. Be certain the house is clean.
 "Cull pullets closely, eliminating all that back-sick and all that are beefy or crow-headed. Such birds eat much feed and produce few eggs. Feeds a good laying ration, either grain and mash or an all mash. Keep oyster-shell and water before the birds. Since the egg is 66 per cent water, an abundance of water is necessary. Oyster-shell or limestone is necessary for best results in producing a rood, thick eggshell.
 "Allow pullets to run outside, especially during the warmer portion of the fall months. It is not necessary to keep the birds confined during the cold months; it is better to leave the small doors open so they may run out during the middle of the day. Keep them in the house during the early morning, so the eggs laid will not be dirty, but turn them out about 11 o'clock. Most eggs are laid before this time, so it will be possible to keep the eggs clean and in the best condition for market."

FEEDER CATTLE
MAY BE LOWER

Kentucky farmers may be able to secure good feeder cattle this fall at lower prices than prevailed during the fall of 1928. The present supply situation indicates a continuance during the next year of the general level of slaughter cattle

prices, according to the department of markets and rural finance of the Experiment Station of the University of Kentucky.
 Judging from the "Midsummer Cattle Outlook," issued by the United States Department of Agriculture there will be a smaller demand for feeders throughout the corn belt than during the past year, as corn prospects are not so favorable and feeding operations during last winter and spring did not prove especially profitable. Range and feed conditions in the Western states are much less favorable than for several years, and there will undoubtedly be feeder marketing of stockers and feeders from some of the sections.

Inspected slaughter of cattle during the first seven months of 1929 was 3 per cent less than in the corresponding months of 1928. The decrease was entirely in cows and heifers, slaughter of which was the smallest in seven years, but total market supplies for the year will be about the same as in 1928. Consumer demand for beef has shown a gradual annual increase since 1921. With continuation of the consumer's purchasing power and the relatively high price of other meats, no reduction in the demand for beef is expected during the remainder of the year.

The seasonal drop in prices for the better grades of fed cattle is expected to occur later this fall than last. The number of cattle on feed August 1 was less than a year earlier which will probably result in

higher average prices this fall. Prices next spring and summer are expected to be about the same as for the similar period of 1929.

COWS BRING \$1,250
DAILY TO COUNTY

Dairy products are bringing Ballard county farmers \$1,250 a day, according to County Agent L. C. Pace. A recent census showed that there are 6,000 cows and heifers in the county. There has been a 500 per cent increase in dairying in the county in the last five years.
 Many purebred bulls are being used, and more purebred females are being taken into the county every month. New dairy cattle barns are springing up over the county, and more attention is being given to growing grain, hay and pasture for cows. Four-H Dairy club members have been organized to interest and train future farmers of the county in the principles of good dairying.

KENTUCKY FARM
RADIO PROGRAM

The College of Agriculture will give the following farm radio program over the University of Kentucky remote control station of WHAS the week of September 23. Each program will begin at 12:30 central standard time.
 Sept. 23—Satisfactory Farm Drainage, E. G. Welch.
 The School Lunch, Miss Florence Imlay.
 Sept. 25—The Flock Management During the Autumn Months, L. J. Horlacher.

Home Sewage Disposal Systems, J. B. Kelley.
 Sept. 27.—What Farm Folks Are Asking, N. R. Elliott.

SCHOLARSHIPS FOR
4-H CLUB MEMBERS

Nine 4-H agricultural club members entered the College of Agriculture of the University of Kentucky this fall on scholarships given by men interested in the development of Agriculture. Honors of scholarships were John E. Huhn, Emil Van Almen, Theodore Ahrens and Henry Almadest, all of Louisville, and D. D. Slide, of Lexington. Messrs. Huhn and Van Almen jointly gave five scholarships. Mr. Ahrens gave two and Mr. Almadest and Mr. Slade one each.

The following boys and girls received scholarships: John Trumbo, Finchville; Ollie J. Price, Princeton; Douglas Skinner, Farmington; Robert Davenport, Bowling Green; Ray B. Wyatt, Cynthia; Miss Mildred Neal, Cattleburg; Miss Eva Shockley, Farmington; Roy Lee Roman, Jeffersontown, and Miss Lucille Wade, Roberts.

All are outstanding 4-H club members who have completed their high school education and are interested in studying agriculture and home economics. All were outstanding club members and students in high school.
 Last year 235 former 4-H club members were enrolled in the University of Kentucky, and 40 per cent of the students in agriculture and home economics had been club members.

Haven't Missed a Meal in Years

Nine out of ten with "stomach trouble" could be quickly rid of it by taking KARNAK. A few spoonfuls of KARNAK will put the vital spark back into every organ of the body. This BOTTLED ENERGY tones and attunes the whole human system. You'll like to eat once more—and you can eat the things you like. And KARNAK itself is a joy to take.

The same week you start this marvelous blend of pure herbs, roots, and barks—you'll feel like another person. You can't HELP it. It's natural and normal; for KARNAK tones and CLEANSSES stomach, liver, bowels, and even the blood. Give to children, too, instead of purgatives! A big bottle at any drug store.

A Region Favored for Industry

THE CHESAPEAKE AND OHIO traverses sections which are blessed with an unusual variety of natural resources.

A journey along its lines shows what a large number of different types of manufacturing establishments have found their raw materials and other desirable products and conditions close at hand. They are coming in increasing numbers to this favored territory.

Vast coal, oil and gas resources, immense waterpower development, proximity to markets, advantageous climatic conditions and a hospitable citizenship are some of the attractions that are resulting in widespread development and prosperity.

In all these factors and making them available for commercial benefit, stands this Company which provides an adequate and efficient transportation service. This is a necessary requisite. Industry is not able to thrive unless it is able to move its goods promptly and safely.

The whole facilities of this organization are devoted to promoting the welfare of the communities and States which it serves. Only as they prosper can this Company prosper. Their continued growth is a matter of our mutual interest and concern.

J. J. BERNET, President.

Cities Built With Cans

BENITO MUSSOLINI, dictator of Italy, recently promulgated an edict that the agricultural population of that country must remain on the farms. Mussolini is a benevolent and constructive dictator, and the edict is doubtless wise in a country where the canning business is small, and much of the food canned is used for export. But in this country, with its steady trend of population toward big urban centers, such an edict would arouse a howl of rage which would be heard from the Atlantic to the Pacific, and re-echo in Mexico and reverberate in Canada. But what has the canning industry to do with it? Practically everything. If safe, pure, nutritious foods were not available by the thousands of tons in a form in which they can be kept indefinitely and used when wanted, the big cities of this country could not exist.

Civilization's Advance
No less an authority than Dr. Milton J. Rosenau of Harvard University says in his book, "Preventive Medicine and Hygiene": "The art of processing foods depends upon the science of bacteriology. A more complete knowledge of the causes of decomposition and methods by which they may be prevented has enabled us to perfect the crude and primitive methods that have been in use from time immemorial, so that it is now possible to preserve certain foods practically indefinitely without in any way injuring their nutritive value or seriously interfering with their appearance or taste."
"The process of canning," he says on a later page, "discovered by Appert and afterward perfected through the work of Pasteur, has proven of inestimable benefit to mankind. It enables nourishing food of a perishable character to be kept and transported to great distances and to be used in localities where fresh foods are unobtainable. Without this method of preserving foods the pioneer and handicapped. Large army and navy maneuvers would be seriously impeded, and great metropolitan cities would be impossible. Wiley states that 'the winning of the West has been marked by the debris of the rusty can.'"

Canned Foods Are Safe
"The process of canning," says this same authority, "is practically synonymous with sterilization" and is, therefore, one of the best sanitary safeguards we have against parasites and the injurious products of putrefaction in foodstuffs.
"Canned foods are sterile foods and, therefore, generally safer than fresh foods. Fresh foods, of course, are to be preferred to those that have been sterilized, although many sterilized foods are more dangerous in the fresh state than after they have been exposed to a high temperature."
"Canned foods are not only safe, but are quite as nutritious as the original articles. The process permits us to have a well-balanced ration throughout the year—irrespective of season."

Canning Business the Bulwark
That's the explanation of the upbuilding of our great cities. When city dwellers are able to obtain in safe, sanitary and nutritious form practically the whole range of vegetables all the way from artichokes down through the alphabet to turnips and whole wheat, fruits all the way from apples to strawberries, fish and shellfish from anchovies to shrimps, meats from bacon to veal, ready-made entrees such as beef à la Mode, poufash, Hungarian style, chicken curry, chicken à la King and lobster, Newburg, a whole range of soups and such specialties as Boston brown bread, chili con carne, fruit butters, jams, jellies, marmalades, condensed and evaporated milk, buttermilk, molasses, puddings, salad dressings, syrups, spaghetti and tomato sauce, they stand in no danger of either malnutrition or starvation. If the canning business were suddenly swept out of existence, Mussolini's migratory edict would automatically enforce itself in this country, and a majority of city dwellers would have to go back to the land.

Warriors Lose Second Game

(CONTINUED FROM PAGE ONE)

was out Carter to Daugherty. Carter taking third on the play, Fraley bunted perfect. Carter, Fraley and Fraley was safe at first base. He took second on Clayton's sacrifice, and scored on Fugate's single past second. The Reds were unable to solve McKenzie's curves and register but one hit until the sixth when Rhodes singled and Stith also singled and Arnold was walked filling the bases and Daugherty drew an easy base on balls forcing in their first run. McCaw followed with a single scoring Stith and Arnold. McCaw scored on sacrifices by Wells and Richmond and the others went out in order, with the score heard reading Mt. Sterling 4, Haldeman 3. McKenzie first up in the last of the sixth slammed one of the most beautiful home runs far over the fence in center field tying the score at four all, neither side was able to forge ahead until the ninth when Carter first up hit a double his first hit of the day and scored on Barnes's single. Rhodes walked, Stith barked. Arnold sacrificed scoring Barnes. Arnold was out, Fraley to Carter. McCaw fled to Fugate; the Warriors went out. Clayton fled to center. Fugate fled to left. Day was out. McCaw to Daugherty and the game ended Mt. Sterling 6 and Haldeman 4.

Next Sunday the Warriors will go to Mt. Sterling for the third contest and final game of series.

The Box Score:

Mt. Sterling,	AB	R	H	PO	A	E
Stith, lf,	5	1	2	5	0	0
F. Arnold, 3b,	1	0	0	1	0	0

5 MILLION HOMES TONIGHT

There's peace in the household guarded by Castoria. Peaceful sleep for Baby. Quiet, untroubled rest for Mother. For a few drops of pure Castoria will quiet any fretful infant. Or put the little one back to sleep when there's an upset during the night.
Parents, don't try to do without good old Castoria! It isn't fair to the baby, and it makes things hard for you. You can't give Baby medicine meant for grown-ups—or shouldn't! Castoria is the only safe, reliable remedy. It acts as swiftly as an opiate or a narcotic, but contains neither. Castoria is purely vegetable. Give it whenever there's constipation, colic, diarrhea.
No less than five million modern mothers have come to depend on Castoria, or twenty-five million bottles were bought last year! Get yours today—don't wait for some night when it's needed, and the druggist is closed!

WITH EVERY PURCHASE OF \$5.00 WORTH MERCHANDISE.

One Pair Of House Slippers

These slippers are of good quality felt with leather soles. Remember you get one pair FREE with each \$5.00 Purchase.

BRAYFIELD DRY GOODS CO.

Head To Foot Outfitters For The Family

The AGRICULTURAL DEPARTMENT Conducted by PROF. H. C. HAGGAN, Of The Morehead State Normal School and Teachers College.

SEED CORN SELECTION

Each season, many farmers in Rowan county lose a golden opportunity of increasing their corn yields the following year by not selecting their seed corn at the proper time. At this season of the year, any farmer could well spend a few hours in looking over his corn field for those ears that show the proper type for his locality and if his time is recorded and a record made of the increased yield the following season, he would be surprised to learn that he had been paid at above \$5 per hour for his labor. These figures have been borne out by records carefully kept in many localities and by many farmers. It improves the corn yield little to say that it should be done and then pass up this opportunity. A farmer that means well and then fails to carry out modern practices will not fill his corn crib at the close of a season.

Increased costs of production as well as transportation and keener competition will soon drive out the farmer who is still following ancient practices. In other words it means this, a farmer living in Rowan county with an average corn yield of only 18 bushels per acre cannot hope to compete on the hog or livestock market with a competitor who has an average corn yield of 50 bushels per acre and properly feeds out his corn in turning out a finished product that the packer or consumer desires. It means that the farmer who will not properly produce a bushel of corn or lower his cost of production per bushel will have little interest in feeding a corn supplement in producing cheaper pork.

ROWAN COUNTY AS A CORN COUNTY

Rowan county is not a high producing corn section. It is estimated that in a normal season this section produces about 260,000 bushels and with an average acre yield of only 18 plus bushels. This low yield is due to many factors but one of the outstanding ones is poorly planted seed each season and seeded on poorly prepared seed beds. Often farmers are willing to spend money in the purchase of fertilizers to increase his corn yields and then turn around and select the poorest type of seed to go with it. In fact, it matters little how fertile a piece of ground devoted to corn production if the right kind of seed is not selected for its planting. Fertility, good seed, and proper methods of cultivation must go hand in hand. High yields cannot be had if any of these is like trying to fill a barrel with water when some of the staves are shorter than others. The height of the water cannot remain above the shortest stave before some of it is being lost. The highest yield of

corn cannot be had if there is a limiting factor as named above. Despite the fact that most of the soils of Rowan county are deficient in organic matter and fertility, much of this area can be made to produce higher yields with proper selection of seed corn. After gathering, it should be properly stored and tested in the spring. An ear of corn may test 100% germination and yet be a poor ear to use for seed due to its carrying root rot or some other disease. This will be discussed in a later article.

WHAT IS A GOOD EAR OF CORN?

The question is often asked, what kind or type of ear of corn should be selected for seed? This might be answered by many as seed that will grow but good seed corn should mean more than this to the farmer. Four factors might be considered, if well adapted to the climatic and soil conditions where it is to be planted.

1. It should be of a high yielding variety and from high yielding stalks of that variety.
2. The ear should be well matured and preserved from ripening time till planting time in a manner that will retain its full productivity.
3. It should be free from disease and insect injury.

WHEN TO SELECT CORN SEED

The best seed corn is obtained at ripening time and if there is an abundance of it, enough for two years should be selected to take care of a bad season that may follow. Twice as much seed should be selected than is needed to plant the corn area. This work should not be put off till husking time nor to select in the spring from the crib. Little can be told at this time that will lead to wise selection in increasing yields. The only proper way is to select from the stalk where it grew and the degree of maturity can easily be noticed. This should be done before the first heavy frost comes.

DESIRABLE CHARACTERS IN CORN

Among the desirable characters sought for in selecting a variety of corn that have been found to be hereditary are:

1. High yield.
2. Production of two good sized ears per plant, a larger number of small ears reduces the quality of the corn.
3. More complete covering of the tip by husk to keep out the rain and weevil, or other insects according to locality.
4. Tendency for the mature ear to turn downward thereby keeping out the moisture and preventing the husk from loosening up.
5. Medium sized stalk in many varieties.
6. Lower position of ear on stalk making it less liable to be broken down.

7. Ability of plant to stand up.
8. Long cylindrical ear with small cob and deep grain.
9. Hard flinty grains that show a medium indentation.
10. Uniform sized kernels and straight in a row.
11. The tendency to sucker is hereditary and more often not looked on with favor by many, but it is an indication of vigor and as such it is not so undesirable.

HOW TO SELECT

Go through the field at maturity with a picking bar and husk the ears from the stalks that have produced the most good corn without having any special advantages, such as excess moisture, space, or fertility. Avoid the large ears on stalks standing singly with an unusually amount of space about them. Preference should be given plants that have produced most heavily in competition with a full stand of vigorous plants. The plants should show indications of having produced heavily of sound, dry corn that will shell out good. A well balanced stalk bearing two long ears will usually be found to have produced as much grain as any other stalk. Both ears are equally valuable for seed, even though one may be smaller than the other.

Late maturing plants with heavy ears should be passed up because of their heavy sap. This heavy sap increases the harvest size and weight but often destroys the quality. Select those ears with medium shanks, well filled out at tip and butt and having grain of good size, compact, and true to type. A sound, well dried ear means that the variety will stand up under average conditions in a given locality.

After the corn is selected it should be stored immediately and not left over night in the stacks or in piles where heating is likely to take place. This can be done by placing in wood racks, on wires, on a hall tree or in some other way where no two ears will touch. The storage place should be in a place where there is little likelihood of heating or drying out too rapidly or freezing. Put in a place where it will be protected from mice or rats.

Selection of seed corn is only one stepping stone to success in higher corn yields but a very important one. This should be associated with growing the right variety, using high tested seed, have fertile soil, prepare good seed beds, cultivate carefully and often and save seed before heavy frosts come.

Select some seed this fall, take good care of it, test it, plant it in a good seed bed, give it the proper attention and cultivation and watch the difference in corn yields in Rowan county. There is no reason that corn yields cannot be increased at least five bushels per acre just with selecting better seed corn and applying no more fertilization than is now given.

Personals

Mrs. Maggie Vinon left Tuesday for a visit with her son in Huntington.

Miss Meriam Carter left the first of the week for Midway, where she will enter school for the year.

Mrs. H. C. Haggan has returned from Covington, where she has been visiting her sister.

Mrs. Cella Hudgins, Mr. John Hall and wife visited in Winchester the week end.

Bill Hodgins and Ernest Jayne enjoyed a fine camping trip last week. They caught some nice fish.

Miss Emma Shader, and Miss Marguerite Bishop have returned home from a visit at Niagara Falls, and other points of interest.

WANTED CUCUMBERS—Ripe or Green. Rowan County News. Sen. and Mrs. S. M. Bradley and Mrs. H. C. Willet spent Monday in Lexington.

Jack Wilson and sister, Miss Mary Griffith were business visitors in Mt. Sterling, Tuesday.

Mr. Murvel Crosley, Mr. and Mrs. Guy Snyder and their guest, Mrs. C. P. Jacob of Pennsylvania were visitors in Lexington, Tuesday.

Mr. and Mrs. C. N. Shively and Mr. and Mrs. J. C. Wells of Steubenville, Ohio, arrived Tuesday for a visit with their daughter and sister, Mrs. Robert Young and family. On Friday they will drive to Logan, W. Va., for a few days visit. Mrs. Young expects to accompany them to Logan.

Mrs. Luther Roberts and two children of Licking Union returned home Tuesday, after a visit with her Aunt, Mrs. Norman Wells.

Mr. and Mrs. T. A. Dudley moved this week into the Bank property that was recently vacated by Ernest Jayne.

Mrs. T. A. Dudley was called to Flemingsburg, by the illness of her aunt.

Mrs. Edith Proctor is moving this week to the Lester Hogge property.

Mrs. C. B. Daugherty spent the week end with her parents at Owingsville.

Dr. Staley is attending Association Meetings this week representing Mission work.

Mr. and Mrs. Dub Bellamy and Mr. and Mrs. Tilford Gevedon drove to Natural Bridge, Sunday for a day's outing.

John Bailey, who is teaching in Boyd county spent the week end with his aunt, Mrs. Mollie White. John is principal of the two-roomed school at Buchanan, Ky., teaching the 4th, 6th, and 8th grades.

Mr. and Mrs. Howard Lewis were Ashland visitors, Sunday. Their son, Jack, who has been working in Ashland during the summer returned with them and entered School here Monday.

Tom M. Trumbo returned Thursday from Grand Rapids, Mich., where he has been a patient for the last five weeks in the Ferguson-Droste-Ferguson Sanitarium.

Mrs. Elmer Meeks arrived Thursday from Middletown, Ohio, for a sojourn with her parents, Mr. and Mrs. John M. Trumbo.

Mrs. Prudie Nickell spent Sunday in Huntington with friends.

Mr. and Mrs. Jimmie Bean were Jackson visitors, Sunday.

Mr. and Mrs. W. F. Lykins and Miss Frances Kilgore of Crassy Creek arrived Thursday for visit with the latter's daughter, Mrs. A. B. McKinney and family.

C. Haggan, Superintendent. Every body invited. We will be glad to have the Normal Students with us. We have classes for all and everybody will be welcomed.

Morning Worship at 10:45. Subject "Prayer." Evening sermon will be "Young People's Meeting 6:45. Evening worship at 7:30. A Message to our People."

You are cordially invited to all the services of the Church. Come and bring your friends.

The pastor is spending some of his time the last two weeks in September making Missionary addresses at some of the Baptist Associations meeting in the State. Those Association meetings will continue thru out October.

METHODIST CHURCH, SOUTH

September 22, 1925.
Sunday School 9:45 A. M.
Morning Sermon 10:45 A. M., "Limitations."

Epworth League 6:15 P. M.
Evening Sermon 7:00 o'clock, "The Spirit of Enquiry."

Our Sunday School has a class for everyone. We have a College Bible Class for our Normal School people. The Epworth League will be in charge of Miss Loraine Sparks Sunday evening.

We would like to see all our people back with the services of the Church since vacation time is over, and we extend a cordial welcome to the Teachers and Students at the Normal School. We hope to be of every service to you while you are here.

FIRST CHRISTIAN CHURCH

September 22, 1925.
Bible School 9:45. We are all set for some real work this fall. The students are back with us. Prof. Roy Graves will teach the student class. All the other teachers are back from their vacations. Let's bring folks to our Bible School and have the best school we have had in years. Promotion day next Sunday. Special services in the Bible School.

Morning Worship 10:45.
Subject, "Real Culture." Special sermon welcoming the students for the Morehead State Normal.

Evening Worship 7:30.
Subject, "The Lost Sheep."
THE CHURCH WITH A MESSAGE.

College Team

(CONTINUED FROM PAGE ONE)

themselves and will make the team show up. Path is expected back within the allotted time, and the new material is beginning to place.

According to Coach Downing, athletic director and football coach, the schedule is not yet completed, owing to the fact that the school was not granted admission to a conference until late in July. However, six games with fast teams have been scheduled, five of them to be played in Morehead. Other games, especially one with Eastern are pending. It is not yet known whether that game will be arranged. If it is scheduled it will probably be in October.

A game with Sue Bennett is also pending as is one with the Transylvania freshmen.

The games that have already been scheduled are as follows:

October 19 Campbellville, here.
October 26 pending.
November 1 Salem, here.
November 9 Gelinville, here.
November 16 New River State, Montgomery, W. Va.
November 23 Morris Harvey, here.
November 23 is also Home Coming Day at Morehead and a big crowd of old students are already planning on being here for the day.

Altogether, considering the handy cap under which they have worked, the team this year bids fair to be much better than was expected at the outset.

High School Boys

(CONTINUED FROM PAGE ONE)

normal contests that have been played here during the past six years. It is true, however, that the city will naturally turn out in larger numbers to watch their own home town boys battle with the other fellow. Mr. Holbrook expects every able bodied man and woman to say nothing of the girls and boys, to attend every game and to help put the team over.

While the schedule has not yet been fully completed it appears certain that the first game will be played at Grayson against the strong Pritchard High School team. This team has played together for the past two years, and it would be a little too much, to expect of the Cats to ask them to defeat Pritchard. However, the Cats have their claws out and are going in to win. Whether they win or lose, Morehead is back of them. Morehead hopes they will win, but if they don't there is always another chance, for Grayson is scheduled for two games.

The complete schedule will be published in the next issue of the News.

Back the Black Cats. They are your own boys, and are entitled to your complete support and approval.

Voltage Increased On Local Lines

Surveys are well under way for three high tension power lines aggregating 114 miles to link the electric transmission systems of Kentucky Utilities Company and Kentucky Power and Light Company, at an estimated cost of \$507,000. B. E. Waltz, general manager of the latter company, announced Wednesday at Maysville.

Construction will start October 1 on a 66,000 volt line from Lexington to Maysville, a distance of sixty miles. Another 66,000 volt line will go thirty-three miles from Shelbyville to Carrollton. A 33,000 volt line will extend twenty-one miles from Mt. Sterling to Salt Lick near Morehead. The work will be completed early next spring.

The inter-connections will increase from 6,000 horsepower to more than 25,000 horsepower; the potential power supply of Kentucky Power and Light Company, which serves forty-eight communities in northeastern Kentucky, and combine the generating plant output of the two companies in central, northeastern and southeastern sections of the state. "Mr. Waltz explained.

Kentucky Power and Light Company, with headquarters at Maysville, is a subsidiary of United Public Service Company which was bought August 7 last by Middle West Utilities Company, Chicago, of which Kentucky Utilities Company, serving 230 communities, is a subsidiary. Kentucky Utilities Company now manages under contract agreement Kentucky Power and Light Company. Besides electric service the companies also operate gas, waterworks, transportation and ice utilities.

The Lexington-Maysville line will include installation of a 2,000 kilovolt-ampere substation at Millersburg and a 2,000 kilovolt-ampere substation at Maysville.

Six and a half miles of the present 66,000-volt line from Finchville to Shelbyville will be double-circuit. A 66,000 switching station and oil circuit breaker will be installed at Shelbyville local service. A 600 kilovolt-ampere substation will be installed at Carrollton.

The capacity of the Kentucky Power and Light Company's 22,000 volt line between Morehead and Salt Lick will be increased to 33,000 volts to conform with that of the new Mt.

Power for Kentucky Utilities Company's transmission system in central Kentucky is furnished directly by the Dix River and Kentucky River hydro-electric stations and the Pine-head, Carrollton and Augusta.

WE WELCOME STUDENT ACCOUNTS!

Now that you are back in school, you will need an account in a bank to take care of your finances.
