MEET TERRIBLE DEATH.

Grand Duke Sergius, Uncle of the Czar, Assassinated.

A Bomb Thrown Under His Carriage Exploded, Killing the Victim's Body Into Ghastly Fragments, Littering the Snow.

Moscow, Feb. 18.—Within the walls of the far famed Kremlin palace, and in the midst of the historical tower from which the terrible death watched the heads of his enemies fall beneath the ax on the famous Red square, and within a stone's throw of the great bell of Moscow, Grand Duke Sergius, uncle and brother-in-law of Emperor Nicholas, and the chief of the reactionary, met a terrible death.

The deed was committed by a single terrorist, who threw beneath the carriage of the grand duke a bomb charged with the same high power explosive which wrought Minister von Plehve's death. The missile was packed with shrapnel and fragments of iron and its explosion did the imperial victim's body to ghastly fragments, which strewn the snow for yards around the carriage.

The assassin belongs to the noted "fighting group" of the socialist-revolutionary party, which has removed other prominent officials and whose ranks it passed sentence of death upon Grand Duke Sergius. The grand duke knew that he stood in the shadow of death.

When the duke's carriage was in front of the courts of justice, where the walls of the triangle approach the Nikolai gate, a man clad in workman's attire stepped forward from the sidewalk and threw a bomb which he had concealed beneath his coat.

The explosion followed and a hail of iron pellets the grim stone walls of the archway and the gate of justice. A thick cloud of smoke, snow and debris arose. When it had cleared a ghastly scene was revealed.

The grand duke's head had been torn from his body and scattered to a shapeless pulp and the trunk and limbs were frightfully mangled. A finger bearing a high seal ring was found lying several yards away.

The crimson tint and sickening smell of blood were everywhere. Only a few fragments of the carriage remained. The horse, dragging the front wheels of the carriage, had dashed off, maddened with pain, to sink deep into the snow.

Police officials rapidly gathered, but before anything could be done towards collecting the scattered fragments of the carriage, the gate of justice had been closed.

DISASTER IN A MINE.

By an Explosion Over a Hundred Miners Were Entombed.

An Accumulation of Dust is Suspected To Have Exploded—The Class of Miners Employed Were the Best in the District.

Birmingham, Ala., Feb. 21.—By an explosion in the Virginia mines, about 18 miles southwest of Birmingham, more than a hundred union miners are entombed and it is believed that the entire number suffered an awful death. Scores of vigorous rescues are at work digging into the mine to relieve their friends and comrades on the inside.

The explosion is thought to have been caused by an accumulation of dust. It is also believed that as the entire quota has probably been killed, the destruction of the cause of the disaster will never be known.

The class of miners employed was the best in the district, and all belonged to the United Mine Workers of America. Since the strike has been on in the Birmingham district, many of the most intelligent and able miners of Pratt City and other important mining points have removed to the Virginia mines, so that the mines were being worked to their fullest capacity by the most skilled miners in the community.

President Woodrow Wilson, United Mine Workers, and National Committeeman W. R. Fairly, together with Joe Haller, district organizer, have left for the scene. President Flynn said before leaving that there were 125 men employed in the mine regularly, but as it was "wet day," he could not say whether the full quota was in the mine at the time of the disaster or not.

STANDARD OIL CO. The investigation of its methods will be thorough and far reaching.

Washington, Feb. 21.—Congressmen in regard to the investigation of the Standard Oil Co. have been urged by President Roosevelt.

President Roosevelt agreed Representative Campbell that all of the power of his administration necessary for the investigation of the Standard Oil Co. is being undertaken through the bureau of corporations into the affairs of the Standard Oil Co. to the end that the small structure, dealer and consumer alike shall have fair treatment and that at the same time no injustice shall be done to the Standard Oil Co. or any other concern.

The president realizes, says Mr. Campbell, that this is the most important investigation of the Standard Oil Co. which has been undertaken and he is going into it with the determination that it shall be as thorough and successful as the investigation of the Standard Oil Co. can make it. He wants nothing but exact justice and fair play, and it is determined to have that.

A BOILER EXPLOSION. Four Men Killed and 14 Injured. Three Seriously. Near St. Clairsville, O.

St. Clairsville, O., Feb. 21.—Four men are dead and 14 injured, three of them seriously, as the result of the explosion of a boiler in the mine shaft of the Standard Oil Co. near here.

The mine shaft, which has just been recently completed, has not been operated daily on account of installation of new mine machinery, but the employees reported every day to learn if their services were needed.

It was wet and cold and the men congregated in the boiler house, a temporary structure erected for the purpose of housing the boiler, which had been used in sinking the shaft and was still in use pending the installation of the new boiler.

Without a moment's warning the boiler exploded with a terrific report, hurling the men in all directions and blowing the building into fragments.

SECTIONARIAN SCHOOLS. No Part of Indian Appropriation Fund To Be Used For Their Support.

Washington, Feb. 21.—The Indian appropriation bill as agreed upon by the committee on Indian affairs and reported to the senate contains the following amendment offered by Senator Barn (Cal.):

"That no portion of the funds appropriated by this act, nor the principal nor interest of any Indian trust funds, monies in all by the United States for the benefit of any Indian tribe, shall be available nor be expended for the support of any sectarian or denominational school."

West Point Cadets. Washington, Feb. 21.—The war department announced that the battalion of West Point cadets which will be sent to West Point to participate in the inaugural parade will attend the inaugural ball.

WASHINGTON GOSSIP

PERSONALITY OF THE RUSSIAN AMBASSADOR.

MAN OF PECULIAR RESERVE

Indians' Needs and Abilities—Geromino Coming to Capitol to See Great White Father—Gentleman from South Carolina.

WASHINGTON.—The Count Cassini still holds the center of the diplomatic stage in Washington. Despite the reverses and troubles of the Muscovite government, he presides in Washington preserves his imperiousness and no one would guess from his placid exterior that everything was not lovely and promising at home.

The count's seat of the diplomatic corps, a position he has occupied since the death of the late Lord Pauncefote, the British ambassador, and he maintains the position with dignity and fills all the requirements, social and otherwise, in perfect style. He is deferential to all dignitaries in matters involving the etiquette of the corps, and when concerted action is necessary in any public function Count Cassini exercises the initiative and is accorded the respect and deference of his colleagues.

The nearest the count has come to exhibiting uneasiness or disturbed feeling was when a newspaper correspondent recently attributed to a high Russian official in this city expressions regarding the St. Petersburg trials of the internal affairs of Russia that virtually amounted to treason. Ordinarily impervious to newspaper attacks and criticism, Count Cassini could not stand for this, and he immediately characterized the reported interview as false.

Another feature of the inaugural parade will be the president's Rough Rider escort. The weather is fine and the escort will appear in blue army khaki trousers, campaign hats, blue polka-dot handkerchiefs around their necks, and their hands in their pockets on their saddles. This will be a wonderful contrast to the glittering troops of cavalry that have always accompanied the president's escort.

Count Cassini's Imperturbability. A situation of Count Cassini's self-possession and command of nerve, it is a favorite of the fall of Port Arthur. He looked up, allowed the monarch to drop out of his hand. "It is very regrettable," As Port Arthur was the ambassador's special pet, he having secured it as a gift from the Chinese government for Russia, the place being christened Port Arthur in honor of himself, his splendid self-control can be better appreciated.

Jersey School Superintendent Turns Up Lesson on Vermiform Inflammation.

Many a layman has been "stumped" in trying to master the intricacies of the vermiform appendix. But let everybody be heart, says the New York Sun in an article on the subject of public schools was visiting a grade while a lesson on the vermiform appendix was being given.

NEW ORLEANS WINE CELLAR. Fine After Dinner Tale That Lacked the Element of Geographical Experience.

A lady newly arrived in Washington, of great wit and a dash of wit, one night ago and amazed everybody by telling the story of a dinner at the Hotel de Ville, seeing the bottle or label, says a Washington correspondent of the New York World.

EFFLUX OF THE NEW GOLD.

World's Supply of \$328,500,000 a Year Is Quickly Distributed Among Nations.

No phase of the financial situation has attracted more attention in the forecasts of the coming year than the increased gold output of the world. Eight years ago this product footed up a trillion over \$200,000,000; in 1922 it rose to \$250,000,000, and in 1923 to \$254,500,000.

It tells pretty nearly everything that one does not care to know, and neglects to point to the location of an old-fashioned elder mill such as you used to know when you were a boy.

Down in the country it is different, and the answer is: "Sonny, hey you! You'll get your share of straw over there. Fill up your skin."

Principles of construction that architects have slowly worked out. Lord Avebury suggests, were adopted by plants millions of years ago. Some plant stems are round, others are triangular, others quadrangular, and so on.

Cur for Dyspepsia. A Parisian physician has founded a "mirth cure" for dyspepsia and receives a large fee for treating patients. He puts a number of them under a mirth cure, and they are cured. He says, "I don't know if it is in time they get laughing heartily and are made to keep it up for two hours a day. Two weeks of this treatment is said to cure the worst case of dyspepsia."

"Europeans." Occidentals are called "Europeans" in Japan, no geographical distinction being made between Paris, France, and Texas, or Rome, Italy, and Rome, Georgia. Europeans are just people who wear many kinds of strange clothes, who eat various marvellous foods with knives or forks or fish dishes; who sleep on beds and sit on chairs and do many other foolish and troublesome things.

Properly Described. A London editor has received from Berlin a printed notice of a new hair dye, described in English: "I deliver the hair dye from the fair to the deep, dark," the Berlin man says, "with a burst of candor, for which he cannot be sufficiently commended, he adds: 'It produces a natural color, and is thoroughly injurious.'"

BEAUTIFUL WOMEN

HOW THEY MAINTAIN THE CHARM OF THEIR SEX.

The Importance that Attaches to the Care of the Blood if One Wants Bright Eyes and a Clear Complexion.

Every sensible woman naturally wishes to appear attractive. She knows the value of bright eyes, delicate complexion and lively spirits. She knows also that good health is at the basis of her charms, and that good health is the source of good health.

Miss Mamie Conroy has a complexion which is the admiration of all who know her. Asked if she could make any suggestions that would be helpful to others less fortunate, she said:

"My complexion would not have pleased you, if you had seen it two years ago. It was then about as bad as it could be, and it gave me a great deal of dissatisfaction. If you want a good complexion you must take care of your blood, especially of the condition of your blood. My health was at that time completely broken down. I was nervous, had frequent headaches, a rapid pulse and a great deal of pain in that region. I suffered also from indigestion. It was clear that my blood was in bad condition, and I must look out for my liver, or else."

"It is hard to realize that, for there isn't the slightest trace of such blemishes now."

It was unfortunately quite otherwise then, and a long time passed before I found anything that gave me any relief. It became very weak and listless. The doctor's medicine did me no good, and I took a number of highly recommended tonics with very little result. As soon as I began to use Dr. Williams' Pink Pills for Pale People my complexion cleared up, and after I had taken two boxes there was not a sign of aimple left on my face. My checks became rosy, I gained flesh and have had perfect health ever since."

THE PORTSMOUTH HARBISON WALKER CO.

A Good Farm for Sale CHEAP.

A FARM of about 165 acres located 3 miles east of Olive Hill, Ky., has one good dwelling house and two tenant houses. Dwelling has barn, chicken house, crib, smoke house, cellar and all necessary outbuildings, well of everlasting water twenty feet from kitchen door. A1 garden under good palling. Plenty of water near the barn and barn lot. County road passing by house. 300 yards from railroad. One of the tenant houses is in tolerably good condition only, with barn, and the other a good house within thirty feet of county road and good crib, barn with hay loft opposite house across road. Well, never-failing sulphur spring only 30 yards from house.

Not five acres cleared land that can not be easily tilled. All good productive land and under reasonably good fences. Land fenced in manner to admit stock from almost every field to water easily. Plenty of good pasture, two good apple orchards apple, cherry and peach trees. A 3-foot vein of good coal open on place, with reasonably good haulway, has been mined for one year. The same mine underlies at least 100 acres of the farm. Title clear. In fact a first class farm in every respect. Prices reasonable and on reasonable terms.

Address,

Farm.

MEXICO NEWS.

FOLEY'S HONEY AND TAR
The children's safe, sure, & effective

LA GRIPPE—PNEUMONIA

So many people who have apparently recovered from an attack of La Grippe are stricken with Pneumonia. This is due to the fact that the Bronchial Tubes and Lungs are left weakened and unable to resist disease.

FOLEY'S HONEY AND TAR

not only cures La Grippe Coughs, and prevents Pneumonia, but strengthens the Lungs so they will not be susceptible to the development of serious lung troubles. Do not take chances with some unknown preparation that may contain some harmful drug when FOLEY'S HONEY AND TAR costs you no more and is safe and sure. Contains no opiates.

I had a bad case of La Grippe about two years ago which left my Lungs so weak that I have been doctored more or less every winter since until I used FOLEY'S HONEY AND TAR, which cured me completely and my Lungs are no longer weak.—J. H. BROWNING, D.D.S., Orlin, Ia.

Three sizes—25, 50, 75 Cts. The 25-cent size contains two and one half times as much as the small size and the 50-cent bottle contains six times as much. Refuse Substitutes.

G. VACHER, 157 Osgood St., Chicago, says: "My wife had a very severe case of La Grippe, and it left her with a very bad cough. She tried a bottle of FOLEY'S HONEY AND TAR and it gave immediate relief."
