## Pryor, Crosthwait, Crutcher Given Top Honors At Morehead State University Alumni Fete Banquet

An Antarctic explorer, a city superintendent of schools and a newspaper publisher were honored with the top awards presented Saturday, May 25, at the Annual Awards Banquet of the Morehead State University Alumni Association.

Receiving the fifth Distinguished Faculty Award given by the association was Dr. Madison Pryor, chairman of the Division of Biology in the Morehead School of science and Mathematics.

Recipient of the Distinguished Alumnus Award was Ted L. Crosthwait, superintendent of the Bardstown city schools, and W. E. Crutcher, publisher of The Morehead News, was named winner of the coveted Public Service Award.

More than 900 alumni and friends of the University attended the annual awards dinner in the Doran Student House during which more than 150 graduates of the University, who have distinguished themselves in the field of education and related professions in Kentucky were given special recognition.

Twenty-eight students—13 currently attending the University and 15 who are graduating from high school this spring also were awarded \$200 scholarships each for the 1968-69 school year. They are:

Malcom L. Cisco, Nathaneal T. Hall, Delores Lykins, Joyce Karen Swim, Josephine Thompson and Sandra Lee Workman, all of Morehead.

Nancy Sue Adkins and Karen Dance, Raceland; Robert Wayne Clifford, Cynthiana; David Anderson Collier, Jackson; Virginia Conley and Carolyn Magnifico, Paintsville; Jimmy Denniston, Hobert Owens and Janet Wilson, Mt. Sterling.

Pamela Early and Louie M. Stewart, Clearfield; Anne Elaine Leslie and Boneva Willis, Greenup; Anna Kay Lowe, Grahns; Marsha Gay Manley, Sharpsburg; Stuart A. Owens, Elizaville; Dorothy Owrey, Ashland; Pinkie Sparks, Mt. Olivet; Patricia Ann Weaver, Flemingsburg; James P. Economas, Lakeville, Mass.; Janet Enscoe, Springfield, Ohio, and Janet Ann Gordon, Mt. Orab, Ohio.

Presented by Dr. Mary Northcutt, winner of the Distinguished Faculty Award last year, Dr. Pryor has the distinction of being the only member of the Morehead faculty with an Antarctic glacier named for him.

A veteran of two trips into the Antarctic to do biological research, first with an American expedition in 1957-58 and again with a Russian expedition in 1961, he was honored by the Russians by having a newly discovered glacier named in his honor.

He has been a member of the Morehead faculty since 1964, and holds a bachelor of science degree from the University as well as a master's degree in education. He received his doctorate in zoology from the University of Tennessee in 1961. He is the son of Mrs. R. A. Pryor, 171

Arceme Street, Lexington.

Crosthwait holds bachelor and master degrees from Morehead and a master of science degree from the California Institute of Technology at Pasadena. He also holds an honorary doctor of human letters degree from Nazareth College of Kentucky.

Superintendent of the Bardstown city schools since 1956, he is a former teacher, principal and superintendent of schools in Rowan County, and presently is a member of the National Education Association.

He was presented by Billy Joe Hall, Mt. Sterling, winner of the Distinguished Alumnus award last year.

Crutcher has long been a strong supporter of the University and its programs as well as the Morehead community.

The campus newspaper, The Trail Blazer, is printed every two weeks during the school year in his plant. He was one of the leaders and most avid supporters of the Cave Run dam and reservoir program, now under construction at Farmers.

Crutcher was presented by Representative Sherman Arnett, winner of the Public Service Award last year and member of the Kentucky Legislature from Rowan and Bath Counties.

zoology in 1961 at the University of Tennessee.

His doctorate dissertation, entitled "Environmental Studies of Haillett Station, Antarctica," was based on more than 36 months of research work in the Antarctic, first with an Ohio State University expedition and again as the only American included on a 60-man Russian expedition.

An Antarctica glacier, Pryor Glacier, was named for him by the Russians in recognition of his work.

A graduate of Lafayette High School in Lexington, Dr. Pryor played four years of football at Morehead as a halfback and was given all-conference honorable mention one year.

The son of Mrs. R. A. Pryor, 171 Arceme Street, Lexington, is in great demand as a guest lecturer. He has spoken before the Artic Institute in Washington, the Royal Academy of Science in Wellington, New Zealand, the Royal Academy of Science in Melbourne, Australia, and the Institute of Polar Studies at Ohio State University.

He is a member of the Learned Societies, the Entomological Society of America and the American Institute of Biological Science.

## Dr. Madison E. Pryor A Natural For 1968 Faculty Recognition

By any criteria, Dr. Madison E. Pryor is a natural for the 1968 Distinguished Faculty Award.

One of the most respected teachers on the campus, Dr. Pryor has had a minimum of 12 scientific papers published in three different languages on three continents. He speaks three foreign language fluently—French, German, and Russian—and teaches Russian at the University in addition to his work as head of the Division of Biological Sciences in the School of Science and Mathematics.

Nationally recognized for his research work in the Antarctic, he is one of few American scientists who has written and had material published in Russian scientific journals.

A native of Lexington, Dr. Pryor

who is 39, received his A.B. degree from Morehead in 1951. In 1955, he received the B.S. degree in biology, and the following year the master of arts degree at the University. He received his doctorate in

## Ted Crosthwait Active In Community, School Affairs At Bardstown

The winner of the Alumnus of the Year Award presented by the Morehead State University Alumni Association this year, Ted L. Crosthwait, is a native of Morehead.

Superintendent of the Bardstown, Ky., city schools since 1956, he holds bachelor of science and master of arts degrees from Morehead State University. He also holds a master of science degree from the California Institute of Technology at Pasadena, Calif.

He also holds an honorary doctor of human letters degree from Nazareth College of Kentucky.

A prominent Bardstown civic leader, he is a member and past president of the Bardstown Kiwanis Club and Chamber of Commerce and of the Kentucky Association of School Administrators.

He also is a member of the mayor's advisory committee at Bardstown and is a member of the board of trustees for both the Kentucky Teacher Retirement System and the Stephen Foster Drama Association.

Married to the former Jean Maxwell Reger of Burkburnett, Texas, he is the father of two children, Karen, 23, and Kent, 18.

Mr. Crosthwait also is active in the

religious life of his community. He is a member of the Bardstown Methodist Church and currently is serving as vice-chairman of its Official Board, as a District Steward, as a member of the Louisville Conference Board of Education and is a trustee of Camp Kavanaugh.

Before moving to Bardstown, he held teacher, principal and county superintendent of schools posts in Rowan County. Later, he was director of purchases and contracts and director of instructional services for the Louisville city schools.

During World War II, he served as an instructor in Air Force technical

schools and as a staff weather officer with the Ninth Air Force. He holds the rank of lieutenant colonel in the Air Force Reserve.

A former vice-president of the Eastern Kentucky Education Association, he has served for two terms as president of the Morehead State University Alumni Association, as president of the Morehead Kiwanis Club and as president of the Morehead Chamber of Commerce.

He also is a former chairman of the Kentucky Professional Practices Commission for Education and holds the Lincoln Key Award of the Kentucky Education Association.

## W. E. Crutcher Strong Supporter Of M.S.U., City Of Morehead

The recipient of the 1968 Public Service Award, W. E. Crutcher, is one of the strongest and more loyal of the University's supporters.

Editor and publisher of the Morehead News, he supports the University's academic and athletic programs to the fullest.

A native of Louisa in Lawrence County, Mr. Crutcher came to Morehead in the early 1930's as a student writer on the campus newspaper of

what at the time was Morehead State Teachers College.

To help make ends meet in those depression-plagued years, he was the Morehead "stringer" for the "big city" papers in Huntington, Louisville and Lexington, reporting daily on happenings in the college and civic community. He has now accumulated 41 years in the newspaper field.

He married the former Darlene Miller of Morehead, and was happily married until Mrs. Crutcher's death in 1962.

To them were born two daughters, Mrs. Marilyn Franklin, who resides in Franklin, Ohio, and Mrs. Patricia Skaggs, who lives in Lexington. Both all graduates of Morehead State University.

A life-long Democrat, Mr. Crutcher has had wide experience in local, state and national politics. The Supreme Court Justice Fred M. Vinson of Louisa was a close friend of his and is given much credit by Mr. Crutcher for getting him enrolled at Morehead State Teachers College.

Another is Supreme Court Justice Stanley Reed, now retired and living in Maysville. An avid golfer, Mr. Crutcher is a member of the Maysville Country Club and is seen often "talking over old times" with the retired Justice.

Perhaps the most cherished of Mr. Crutcher's political experiences occurred in 1960 when he traveled on the plane with the late John F. Kennedy's successful presidential campaign.

On the local scene, he has been a

*MOREHEAD ALUMNUS*

long-time member of the Morehead Chamber of Commerce and was instrumental in getting the appropriations and authorizations necessary for the Cave Run Dam and Reservoir at Farmers, the routing of Interstate 64 near Morehead and the project to widen Triplett Creek through Morehead as a flood prevention measure.

He also is an active member of the Church of Christ.

"No one in the Morehead community has a greater love for Morehead and Morehead State University than does W. E. Crutcher," said Rondal Hart, director of alumni relations at the University.

"It is most appropriate that the 1968 Public Service Award be presented to him by the Alumni Association."

## Superintendents, Principals, Lawyers Get Special Recognition

Seventeen present and former school superintendents headed a list of more than 150 graduates of Morehead who have distinguished themselves in the field of education and related professions honored at the annual Alumni Meeting.

These were Eugene S. Binion, assistant superintendent, Elliott County; Charles Brown, superintendent, Fleming County; Mrs. Eunice Cecil, former superintendent, Rowan County; Roy Cornett, former superintendent, Rowan County; Ted Crosthwait, superintendent, Bardstown city schools.

William P. Eidson, superintendent, Boyd County; Mrs. Eunice Harper, superintendent, Raceland city schools; Glenmore Hogge, former superintendent, Bath County; E. G. Jones, superintendent, Montgomery County; Walton Jones, superintendent, Morgan County.

Clem Martin, assistant superintendent, Floyd County; Foster (Sid) Meade, superintendent, Lewis County; George Alice Motley, superintendent, Menifee County; Walter Powers, former superintendent, Gallatin Co.; Ernest Robinson, superintendent, Carter County.

Paul E. Sparks, assistant superintendent for business affairs, Louisville public schools; Roscoe Stephens,

former superintendent, Greenup County, and Luther Wright, assistant superintendent and co-ordinator of federal programs, Johnson County.

Twenty-eight school principals receiving recognition awards were: Garland L. Arnett, Salyersville; Sherman R. Arnett, Rowan County; Charles Banks, Wurtland; Raymond Benton, Ewing Elementary, Fleming County; Frank M. Bloss, Lexington Junior High; Howard R. Bowling, Pritchard; James Brammer, Tilden Hogge Elementary.

Lewis Campbell, Allen Elementary, Floyd County; William N. Collins, Carter; Eldon E. Davidson, Monticello; Ernestine T. Dickerson, Sandy Hook Elementary; Earl S. Duncan, Waggener, Louisville; Winston Hamilton, Mt. Sterling; Orville B. Hayes, Maysville.

Daisy S. Holliday, Salyers Elementary; Harlan Hopkins, Salyersville Elementary; Fred Madden, Fairview Junior High; F. L. Morris, Jr., Elliottsville Elementary; Ralph Musman, Newport Elementary; Leo H. Osborne, Warnoch Elementary, Greenup County; Everett T. Phillips, Grahm Elementary; Alvah S. Rawlings, Hillsboro Elementary; Conrad A. Rowland, Ezel; Glen Sparks, Olive Hill.

Mrs. Alpha Straub, Orangeburg Elementary; Hiram C. Walters, Menifee County; Elza Whalen, Jr., Mason County, and Glen S. Whitt, Morgan County.

Assistant Principals honored were: Paul H. Adams, Boyd County; and Edgar McNabb, Beechwood, as were former principals: Opal Brown, Elliott County; Helen K. Eakins, Garrison Elementary, and Graydon Rorman, Fleming County Elementary.

Eighteen coaches also were honored: Roy D. Adams, basketball, Waggener, Louisville; Jesse J. Adkins, basketball, Sandy Hook; Billy K. Anderson, basketball, Mt. Olivet Deming; Joe P. Blankenship, basketball, Menifee County.

Henry E. Cochran, basketball, Ezel; George W. Cooke, basketball, Fairview; Warren Cooper, basketball, Rowan County; Bobby F. Crager, football, Prestonburg; Carl Deaton, basketball, Greensburg; Jack Fultz, basketball, Olive Hill.

Mitchell Ghent, football, Fleming County; Bert Green, basketball, Olive Hill; Paul Ousley, football, Rowan County; Gary C. Salyer, basketball, Pritchard; Jesse B. Salyer, basketball, Flat Gap; Tom Sims, football, Mc-

Kell; Ewell Smoot, Jr., basketball, Bath County, and Woodrow Tolle, basketball, Maysville.

Morehead graduates who are members of the bar and who were honored include: Jarvis Allen, Prestonburg; H. Gene Baldridge, Ashland; Paul W. Blair, James E. Clay, George I. Cline, and Elijah M. Hogge, all of Morehead; John Chris Cornett, Hindman; Thomas M. Davis, West Liberty; W. Earl Dean, Harrodsburg; Lowell E. Howard, Louisville.

Y. E. Kennard, Olive Hill; Charles E. Lowe, Pikeville; Cordell Martin, Hindman; Clinton C. McGuire, Louisville; Alton S. Payne, Winchester; Herbert I. Rose, Ashland; Phillip K. Wicker, Frankfort, and Gene Arnold Wilson, Louisa.

## Order Of Flying Eagles Established

The first memberships in the "Order of Flying Eagles" were presented May 25 at the Annual Alumni Banquet at which time seven members were admitted.

Membership in the "Order" is open to any graduate who recruits a minimum of five alumni into the Alumni Association.

The feeling of the Executive Council in establishing this award was that many of our graduates work side by side with fellow alumni who are inactive in the Alumni Association. This new "Order" was to encourage discussion of Morehead State University and the Alumni Association and to help project the image of Morehead State.

Members who were accepted in the "Order" and presented their walnut desk set were:

Merl Allen, Gene Clark, Dr. John R. Duncan, Arlan Isaac, Lucien Rice, Harry Weber, and Anna Carter.

## Alumni Association Presents Mrs. Adron Doran Souvenir Album

Rondal Hart, Director of Alumni Affairs is shown presenting Mrs. Adron Doran a rustic souvenir album of all activities relating to Mignon Hall Complex, four residence halls for women. The Complex was named in honor of Mrs. Doran upon recommendation of the Alumni Association and Student Council and the album reflects all activities including construction of the Complex and ending with the Complex Dedication which was held in November.

The album was hand-made with leather engraved sketching of the Complex on the cover.

## Five New Members Elected To Alumni Executive Council

Five new members have been elected, five re-elected and six appointed by the alumni president to the Morehead State University Alumni Association's Executive Council for the 1968-69 school year.

Elected for two-year terms, beginning June 1, 1968, are Mary Alice Jayne, Morehead; Fred Johnson, Frankfort; Helen A. Northcutt, Morehead; Henderson Thompson, Waverly, Ohio, and Betty M. Todd, Lexington. They were elected by the membership.

Re-elected to two-year terms beginning at the same time are Anna Carter, Morehead; Joyce Chaney, Morehead; Hubert Counts, Olive Hill; Dorothy Walter, Cincinnati, and Don Young, Morehead.

Appointed to one-year terms by Alumni President Lucien Rice were John Harvey Fitch, Versailles; Larry Hillman, Trotwood, Ohio; Jerry Riddle, St. Petersburg, Fla.; Jim Johnson, Midland, Ohio; Dr. John R. Duncan, Morehead, and Harry Mayhew, Ball State University.

Currently serving two-year terms, ending May 31, 1969, are Merl Allen, Morehead; Marshall Banks, Morehead; Dr. William Blair, Paintsville; Roy Caudill, Morehead; Grace Crosthwaite, Morehead; Ted Crosthwaite, Bardstown; Dr. Paul Maddox, Campton; Roger Meade, Muncie, Indiana; Terry Wicker, Dayton, Ohio, Russell Williamson, Inez, and J. G. Gibson, Mt. Orab, Ohio.

In addition to President Rice, Zanesville, Ohio, the Alumni officers, whose terms will expire May 31, 1969, are:

Harry Weber, Louisville, first vice-president; Arlene Shadrach Tackett, Florence, second vice-president, and Rondal D. Hart, Morehead, executive secretary-treasurer.

## McNabb Named Charter President Of Alumni 'M' Club

Edgar McNabb, assistant principal and supervisor of Beechwood High School, Fort Mitchell, has been elected charter president of the newly-organized Morehead State University Alumni M Club.

The new group has been formed to project the image of the University

and to be of service to the athletic program. Making up its membership are former letter award winners in intercollegiate competition while at the University. Plans are for the group to meet annually.

Other officers elected were: Overton C. Evans, vice-president, Mt. Sterling, and John Collis, secretary, Morehead.

Rondal D. Hart, executive secretary-treasurer for the Alumni Association, will serve as treasurer for the organization.

While at Morehead, McNabb earned eight letters in athletics: football, (1928-30), basketball (1929-31) and baseball (1929-31). He was a member of the first basketball team ever to represent the University.

A farm implement dealer in Mt. Sterling, Evans attended Morehead from 1931-34, lettering twice in both football and basketball.

Collis, who played football during the 1946-49 seasons, is manager of the University Book Store in the Doran Student House.

No announcement has been made as to the next meeting of the Alumni M Club, although it will be sometime in the fall.

The Morehead "Eagle" Greeting Guests at the Annual Banquet and acknowledging the complete renovation of Doran Student House.

Alumni..... Break out of that  
shell and help support Morehead  
State University and your  
Alumni Association

## An Editorial . . . . .

Our universities are experiencing a frightening example of mass neurosis, evidenced in the recent student takeovers of buildings on campuses across the nation. Such action, led by small activities groups, is a perfect example of minority rule and should appall alumni of each institution of higher learning.

While these youthful mobs represent only a small portion of enrollment, and often include non-students, they disrupt campus life and halt the educational process of students who prefer to participate in meaningful learning activities rather than to demonstrate in purposeless defiance.

As alumni we should support a get-tough policy in which control can be maintained, student increase and institutional growth continued. If we fail to support such a policy, student takeover may become the "in thing to do" at all our schools.

If there are legitimate gripes, they should be aired by committees and discussion groups of students, faculty and administration representatives. This is the democratic, the sensible and non-violent approach to understanding. The ridiculous debacle at some universities in no way to reform any ills that may exist in a governing structure-but anarchy.

Severe penalties—including suspension, expulsion and jail sentences where appropriate—should be levied against students who disrupt the operation of a university, break into administrative offices, seize buildings or damage public property. Are we alumni ready to see the institutions we cherish destroyed by the actions of a few immature malcontents?

It is time for action—let's voice our support for continued progress in education and our opposition to the destructive tactics of youth with distorted views. Let us support a get-tough policy and keep the doors of our institutions open only to those who want to learn.

MOREHEAD STATE UNIVERSITY  
FOUNDED 1922

*Morehead State University*

## Billy Joe Hall Joins Bank At Mt. Sterling

Billy Joe Hall has been named Assistant to the President of the Mt. Sterling National Bank.

Hall, a native of Pikeville, served as Executive Assistant to the Commissioner of Highways in Frankfort, after having served on the faculty and staff at Morehead State University. Prior to going to Frankfort in August of 1963, he was Director of Alumni Relations at Morehead.

In making the announcement, Claude Kilpatrick, bank president said "we are particularly pleased to get a young man of Mr. Hall's experience and training to join our bank."

A 1954 graduate of Morehead High School, Hall received the AB degree from Morehead State University in 1957 and the MA degree in 1959. He served as a graduate assistant in public relations at Morehead in 1958-59 and then joined the staff on a full-time basis in September, 1959, heading the progressive alumni program at the institution.

The new banker is a member of the Church of God. He and his wife, Joyce, have three sons, David, 7; Richard Alan, 3; and Michael, six months.

Hall was selected Outstanding Alumnus of 1967 by the Morehead State University Alumni Association. He is the author of several books and articles.

## Airman Walter Carr Receives Citation

Airman First Class Walter D. Carr, son of Walter W. Carr of 326 Knapp Ave., Morehead has been recognized for helping his unit earn the U. S. Air Force Outstanding Unit Award.

Airman Carr, a personnel equipment specialist in the 437th Military Airlift Wing at Charleston AFB, S. C., will wear the distinctive service ribbon as a permanent decoration.

The unit was cited for achieving an exceptionally meritorious rating for distinguished service during a one-year period.

Factors which led to the unit being named for the award included development of a highly responsible airlift organization which maintained vital airlift routes essential to the United States overseas commitment to free nations in the world.

The airman, a 1965 graduate of Breckinridge High School, attended Morehead State University.

His wife is the former Deborah K. Neff.

## New Alumnus Completes Perfect Standing

Among the 709 graduates receiving degrees from Morehead State University this spring, was the second student in the University's history to complete all of his degree work at the institution with a perfect 4.00 scholastic standing.

He is Ronald Lynn Richardson, 24, who received a bachelor of science degree in biology and history after completing four years of study in three.

The son of Mr. and Mrs. William Richardson, Morehead, Ronald is one of three children in the family to be valedictorian of their graduating classes at Rowan County High School in Morehead.

The first was a brother, David who won the honor in 1963 and who today is a medical student at the University of Kentucky. Ronald was next, achieving the honor in 1965, while a sister, Barbara, is valedictorian of the 1968 class at Rowan County.

Because of his scholastic record, Ronald has received a full scholarship to the University of Kentucky Graduate School from the New York Life Insurance Company and valued at \$2,000 per year for four years.

The only other Morehead graduate to complete all of his or her degree work at the University with a perfect scholastic standing was Robert Douglas Fraley, who graduated in 1962 with a bachelor of science degree in business administration.

A graduate of University Breckinridge School, Fraley is currently a certified public accountant in Houston, Texas.

*Miss Sandra Michael Elam, daughter of Mr. and Mrs. Herb Elam, 211 Second Street, Morehead, received the degree of Bachelor of Medicine at commencement exercises Sunday, June 9. A graduate of University Breckinridge and Morehead State University before enrolling at Louisville. Miss Elam will intern at General Hospital in Louisville.*

## ALUMNI IN THE NEWS

### Alumnus Is Cited For Heroics

Captain Freddie G. Robinson, son of Mr. and Mrs. Robert Robinson of 259 Jefferson St., Charlestown, Ind., was a navigator on a C-124 Globemaster crew whose ingenuity and persistence probably saved the lives of 16 Japanese victims of a recent boat disaster in the Pacific.

Captain Robinson and his crew were 300 miles from the Philippines enroute to Wake Island when they were notified that a fishing vessel was afire.

Arriving over the area, they sighted an oil slick on the water and then dropping lower, spotted a raft afloat. Regaining altitude, the airmen sighted another vessel some 25 miles away but were unable to make radio contact. The ship headed north of the raft.

The Globemaster crew flew over the National Chinese vessel to the raft but the churning ship continued, heading even further north. In a desperate attempt to communicate with the Chinese seamen, Captain Robinson and his fellow crewmen came in over the craft at low level and fired a flare across the bow. Then, they scuttled between the vessel and raft eight times, dropping a flare each time they turned above the raft.

The Chinese ship stopped and the airmen came in again at even lower

level, to make three more runs between the two craft.

Three minutes after the survivors scrambled to safety aboard the vessel, Captain Robinson and his crew were headed to Anderson AFB, Guam, for an extra refueling stop.

Based at Charleston AFB, S. C., the captain flies aboard the giant troop and cargo carrier in the global Military Airlift Command transport system that includes the Southeast Asia Airlift.

The captain was commissioned in 1962 upon completion of Officer Training School.

A graduate of Hazel Green Academy, he received his A.B. degree in 1961 from Morehead State University.

Captain Robinson's wife, Phyllis, is the daughter of Mr. and Mrs. Pritchard Johnson of Salt Lick, Ky.

### Mills Receives Doctoral Fellowship

Joseph L. Mills, Morehead alumnus, is a recipient of a Miami University doctoral fellowship, in educational administration for the 1968-69 academic year.

The one-year fellowship includes a stipend of \$2,500 for trimesters plus remission of the general fees and tuition. No teaching responsibilities or other duties at the University are included in the fellowship.

### Alumnus Listed In "Who's Who In American Education"

Robert Curtis, Superintendent of Manchester Public Schools, Manchester, Ohio has been selected to appear in the 23rd edition of 'Who's Who in American Education.'

Curtis is a 1960 graduate of Morehead State University where he received his M.A. degree. He has served as superintendent of schools for the Manchester Local School District for the past five years.

### Dennis Wallingford Is Commissioned

Dennis Wallingford, 22, has received his commission as a second lieutenant in the U. S. Marine Corps and was administered his oath by another fellow Marine officer from Maysville — Captain Robert Whitlow, newly home from 13 months in Vietnam.

Lt. Wallingford was graduated in January from Morehead State University with his major in economics and while in college took Officer Candidate Training during the summer at Quantico, Va.

In fact, Lt. Wallingford is only the fourth Marine officer from Morehead University to be commissioned under this college program at Morehead. Captain Whitlow, also a Morehead alumnus, was the third and since both are friends it was the suggestion of the captain in the Cincinnati office for Dennis to be administered his oath by Captain Whitlow.

When the lieutenant completed his Officer Candidate Training last summer at Quantico, he graduated in the upper 15 per cent among his platoon's leaders. Also it was his platoon which received top honors.

### Mary Buckles Article Is Featured

Contributors in the March issue of the INSTRUCTOR Magazine included Mary Boleyn Buckles, Morehead alumnus. Mary received her B.A. degree in 1956. Her article is a featured teaching unit titled "The Impact of Ancient Rome on Our Country." She teaches in an ungraded school in Greensburg, Ohio.

### Eldridge In Theatrics

Gary G. Eldridge, a 1961 graduate, is now serving as Manager/Director for San Angelo Civic Theatre, San Angelo, Texas.

His latest play "Carnival" has received highest ratings from the Theatre Guild.

Gary is a graduate of Rowan County High School and Morehead State University.

## Alumnus Elected Mayor For Higginsport

Jimmy L. Ferguson, who received his B.A. Degree in 1960 from Morehead State has been elected Mayor of Higginsport, Ohio for the fourth straight term.

In addition to his civic responsibilities he serves as principal of the Higginsport School District, Brown County, Ohio and is a member of the Board of Trustees for Federal Programs in Brown and Adams Counties.

## Taylor Assigned To Development Program

Mr. James J. Taylor, son of Mr. and Mrs. Charles L. Taylor, Route 3, Pineville, Kentucky, was recently assigned to the Development Program in the Finance Division of Goodyear Atomic Corporation.

James was one of several recent college graduates to complete the Administrative Training Program sponsored by Goodyear.

He graduated from Morehead State University in August of 1967 with a Bachelor of Science Degree in Business Administration.

Goodyear Atomic Corporation is a wholly-owned subsidiary of The Goodyear Tire & Rubber Company, Akron, Ohio, and is the operating contractor for the U. S. Atomic Energy Commission of the government's

large gaseous diffusion plant in southern Ohio.

James and his wife, Laura, are now living at 2610 Scioto Trail, Portsmouth, Ohio.

## Hrichs Appointed Sales Representative

Paul D. Hrichs, Morehead alumnus, has been appointed to the sales representative staff of McKnight and McKnight and will cover the states of Michigan, Ohio, Indiana and Kentucky.

Hrichs holds the M.A. degree in Industrial Arts and has 10 years teaching experience in the Ohio schools. He will specialize in educational needs for the industrial arts instructor.

## Frey Is Employed By Jackson School System

William Allen Frey, a midyear graduate of Morehead State University has been employed by the Jackson City Board of Education as a teacher of high school commercial courses. He filled the vacancy caused by the resignation of Mrs. Loretta Garrison.

## Vest Commissioned Warrant Officer

Asa Mervell Vest, son of Mr. and Mrs. Drexel Vest of West Liberty, Ky., has received his commission and wings as a helicopter pilot and is now serving in Tay Ninh.

He is a graduate of Morgan County High School, West Liberty and a 1966 graduate of Morehead State University.

## Elam Receives Lexington Jaycee Award

Robert Elam, former Morehead student has received one of the Lexington Jaycee highest awards, being named "Outstanding Young Farmer for Fayette County."

This award is based on the honorees contribution to his community and the farming industry and is a national program by the United States Jaycees.

While at Morehead, Elam was an outstanding football player after starring for the Lexington Lafayette Generals in high school.

## Taylor Promoted By International Harvester

Grover D. Taylor, Morehead Alumnus, has been appointed Assistant Materials Controller for the Springfield Works Division, International Harvester Company.

Taylor joined International Harvester at Springfield as a production management trainee in June, 1963 and was promoted to management as a section supervisor in 1964 and to general foreman in 1965. He received another promotion as assistant supervisor of scheduling and distribution before his new appointment as materials controller. The appointment was announced by W. H. Smith, works manager for International Harvester.

## First Eagles Return To Their Home Nest

In the fall of 1929, nine boys from the hills of Eastern Kentucky reported for the first basketball practice ever held at Morehead Normal School, a struggling young institution of a few buildings on the hillside campus just east of the business section of town.

Thirty-nine years later, eight of the nine were reunited with their coach as they came together Saturday, February 10, to help organize Morehead State University's newly-established Alumni "M" Club in a modern, 10 story, air-conditioned and brand new men's residence hall.

Some had not been back to the campus in 25 years. Others had not seen each other since their college days. Although many heads were grey, some waistlines bulged and several carefully held to stairway railings, the spirit and enthusiasm of their playing days were there.

Leading the group was the coach, George D. Downing, currently a real estate broker in Lexington, and who made the principal address of the evening's program. Coach Downing, a graduate of University of Kentucky, came to Morehead in 1929 and coached "everything" for 12 years.

The only member of the team unable to attend was Dr. David Nickell of Harlingen, Texas.

The eight on hand were: George H. Queen, teacher of remedial reading at West Union, Ohio; Frank Laughlin, with the Kentucky Department of Revenue, Morehead; Edgar

McNabb, supervisor of Beechwood Schools, Fort Mitchell; Austin N. Riddle, Morehead restaurant operator.

Lawrence Fraley, superintendent with the Armco Steel Corp., Middletown, Ohio; William H. Counts, lawyer, Olive Hill; Henry L. Prichard, superintendent of schools, Beallsville, Ohio; Dr. A. A. Holbrook, veterinarian, College Park, Md., and Jack Lewis, retired Postal Service employee, Morehead.

Eighty-two athletic letter winners at the institution during its years as Morehead Normal School, Morehead State Teachers College, Morehead State College and Morehead State University "came home" for the meeting, presided over by Rondal Hart, director of Alumni Affairs at the University.

Each was presented with a lifetime pass to all Morehead athletic events and an engraved plaque symbolizing charter membership in the organization.

"This occasion is truly one of the most outstanding highlights of our years with the University," Dr. Adron Doran, Morehead's president said in welcoming the group to the campus.

"To have you come back for this occasion is a great honor to those of us who serve here today," he said.

"We are greatly thrilled by this fellowship with those of you who undergirded the institution when it needed a sure sound foundation and a philos-

ophy upon which to grow and develop.

"Many of you have marveled at the physical facilities and the growth in enrollment and academic programs which you have found on the campus today.

"I can assure you this growth reflects the dedication of those who have followed in your footsteps in committing themselves to preserving your faith in the future of Morehead State University and to building upon the foundations found here."

In responding to Dr. Doran's welcome, Coach Downing humorously told of some of the trials and tribulations of the school's early athletic program.

"We only had 13 men out for football at first," he said at one point, "and when they reported, only one had ever played football. Only two others had ever seen a game, but they all wanted to play and when they played they played to win.

"When we went out of town to play a game," he added, "we took everybody. There simply wasn't anyone to leave at home."

Following the dinner, the Morehead stars of yesterday and several of their cheerleaders used their new lifetime passes to watch the present-day Eagles defeat the Governors of Austin Peay 87-66 in an OVC basketball game at Laughlin Fieldhouse.

Join the MSU  
President's Club

Coach Downing delights former Eagle greats and guests as he turns the clock back a few years.

## Stephens And Fannin Get Ky.-W. Va. Gas Promotions

J. F. Skidmore, vice president of Kentucky-West Virginia Gas Co., has announced two promotions.

George L. Stephens was appointed supervisor of general accounting to succeed S. T. Griffiths who retired. He began his service with the company in Prestonsburg in 1949 and was transferred to Ashland in 1951. He was made chief clerk in 1960, and promoted to assistant supervisor of general accounting on June 1, 1964.

Stephens is a graduate of Prestonsburg High School and received a B.S. degree in business administration from Morehead State University in 1949. He served in the U. S. Air Force for three years and is a member of the First Methodist Church of Ashland. He resides at 3411 Morgan Ave., with his wife and two sons, George 4, and Lindsey, 9.

Jack R. Fannin was promoted to assistant supervisor of general accounting to succeed Stephens. He began his service with the company in Prestonsburg in 1951. He was moved to Ashland in 1953 and has served as chief clerk since 1964. A graduate of Prestonsburg High School, he has attended Morehead State University.

Fannin is a member of the First Church of God in Ashland, is a committeeman for Boy Scout Troop 126. He resides at 2433 Carroll St., with his wife, Ernestine and son, Glen, who is a senior at Paul G. Blazer High School.

## Cure's Article Published In National Magazine

Sidney Cure, Athletic Director and Head Football Coach at Gary, West Virginia, has a featured article in the October issue of "The Coaching Clinic."

Invitation to write for the magazine was brought about by his success in the coaching field where he has a four year coaching record of 31-9 and was the 1966 West Virginia Class AA Football Champions.

Cure is a 1960 graduate of Morehead State where he received his A.B. degree. He later earned the M.A. degree at West Virginia University.

## Alumnus Completes Specialized Instruction Unit

Army Private First Class Wendell J. Sherman, 24, son of Mr. and Mrs. Willie Sherman, Relief, Ky., completed eight weeks of advanced infantry training Feb. 2 at Ft. Dix, N. J.

He received specialized instruction in small unit tactics and in firing such weapons as the M-14 rifle, the M-60 machine gun and the 3.5 inch rocket launcher.

Sherman received his B. A. degree in 1966 from Morehead State University.

## Hardy Head Of Alpha Delta Kappa

Mrs. Kenzie A. Hardy was installed as president of Alpha Delta Kappa Sorority at the state convention in Indianapolis. She will serve the international honorary organization for women in education for the next biennium. Theme during her term of office will be "measure of Maturity."

Previously Mrs. Hardy had been state vice president and sergeant-at-arms, and was president and vice president of the local Theta Chapter.

She was graduated from Morehead State University and graduate work in guidance and counseling at Purdue University. She has taught in Tippecanoe County elementary schools and has been a teacher for the West Lafayette Community School Corp., for nine years.

## Morehead Alumnus Is Ohio "Coach Of The Year"

"Hecky" Thompson said he had a "pretty good bunch of boys" during the past basketball season.

His "bunch" the Western Indians, of Pike County, Ohio, were undefeated during the 25 game regular season schedule, the only team in Ohio to achieve this honor.

For his efforts "Hecky" was named UPI Class A "Coach of the Year."

Hecky, who holds both the B.A. and M.A. degrees from Morehead State University, was also an all around athlete. He captained his team to the NCAA Basketball Regional semi-finals.

Thompson is a native of Stockdale, Ohio and majored in Physical Education and biology.

In addition to his outstanding basketball ability, he is an excellent tennis and golf player.

He recently returned to the campus of his alma mater where he was honored as a nominee for the "Outstanding Alumnus Award."

## Youth Director

Lonnie Joe Davis, a teacher at Montgomery County High School, has been called as youth director of the First Baptist Church, Mt. Sterling, and assistant to the pastor. A native of Martin County, he received his B.A. degree in physical education and history from Morehead State University in 1966 and his master's degree in physical education from Indiana University in 1966.

MOREHEAD ALUMNUS

## Ousley Named Rowan's O.Y.M.

Paul Ousley, head football coach at Rowan County High School, Morehead, and former Eagle footballer, has been selected "Outstanding Young Man in Rowan County." Ousley is a 1958 graduate of Morehead State University and has coached and taught in the Bethel-Tate School District, Bethel, Ohio and Morehead.

The honor was bestowed upon Ousley for his work in developing youth programs in Rowan County and his work on the City Council.

## Teenager Is English Teacher

Education has been swift and relatively easy for a 19-year-old Canal Winchester English teacher, believed to be the youngest teacher in the state with a college degree and a state certificate.

Miss Judith Dotson raced through high school, completed a four-year college course in three years at More-

head State University and has been teaching eighth grade pupils at Canal Winchester since September.

The Ohio Department of Education does not keep record on the ages of teachers, but officials say if there are any others her age, they do not know about it.

"I'm a high school dropout," Miss Dotson said.

With her full senior year remaining, Judy needed only three-quarters of a credit to complete her requirement for graduation. She attended Reynoldsburg High School.

"The School officials wanted me to stay in school for the entire year but I thought it would be a waste of time," she said.

Her uncle was teaching at Morehead. He persuaded her to make an application to the school and it was accepted.

"Everyone was against it, but I'm glad I went on," she said.

She left high school just two weeks after she turned 16 and was teaching three years later, just two weeks after she became 19.

In college she majored in English, speech and drama and was graduated with the school's "high distinction award" with a 3.82 grade average. Four point is a straight A grade.

She said her dramatics experiences cured her shyness. "I found I felt more secure around older people," she said.

She chose teaching because "It's a tradition in the family." Her mother is a teacher and her father was once a teacher. "Besides, it's a good job for a woman and pays relatively well," she said.

Judy lives with her mother and father at 706 Basswood Road.

The auburn-haired teenager has definite ideas on teaching English to other teenagers.

"Prepositions just aren't exciting. I taught grammar for a semester but there is just so much of that you can teach," she said.

She thinks it is important for her students to learn how "to talk and write well."

Sandwiched between grading papers in her leisure time, Judy likes creative writing, reading, handwriting analysis and astrology.

"I've always been a bookworm," she said.

## Alumnus Is Surgical Society President Elect

Dr. Lewis Blaine, has been elected President Elect of the Kentucky Surgical Society for 1968-69.

Dr. Blaine is a 1940 graduate of Morehead State University and is now a General Surgeon and Oncologist in Louisville.

He has served as Editor of the Jefferson County Medical Association Bulletin, President of the Louisville Society of Medicine, President of the Louisville Surgical Society and is a member of the American Board of Surgery and Fellow American College of Surgeons.

He graduated with an area of concentration in science, and a major in chemistry and biology and a minor in math.

## Francis Has Impressive Record

Fred Francis, 1962 graduate of Morehead State University, is one of the most successful coaches the institution has produced in recent years.

Following graduation, he coached at St. Joe Prep where he constructed a 20-4-6 record, winning the Recreation Bowl in 1966. His team was ranked in the top 10 for two consecutive years and he was undefeated in 1966.

Fred served as assistant football coach at Murray State University where he received his M.A. degree and is now back field coach for the Eastern Kentucky University Colonels, Ohio Valley Conference Champions in 1967.

## Alumnus Involved In Experimental Industrial Arts Teaching Program

John Fannin's class of seventh graders at Walnut Hills High School is hard at work building 20 segments of houses. The materials — roofing, tile, siding—are life-sized. And there's enough sawdust to delight any boy.

They're participating in an experimental industrial arts program that Ohio State University is sponsoring at Walnut Hills and at Cutter, Dater, and Gamble Junior High Schools. It's also being tried in schools in Miami, Florida and Trenton, N. J.

The program, Fannin explains, is an attempt to up-date the industrial arts program. It's based on the theory that young students can learn more quickly than they've been taught in the past.

The seventh graders are studying a course called "The World of Construction," in which they learn how to build things from the ground up.

They start with the basic fundamentals of technology, learning about tools and how to use them. Then they study design, learning how to draw floor plans and elevations and how to plan a foundation for a building.

Then they study ground. How to prepare a site for building. They learn about grading and wrecking an older building to make room for a new one.

The students then begin building a section of a house. "These are vehicles," Fannin explains. "We had to have something that would keep them going."

The boys work in groups and construct a section of a house with prefabricated walls, a ceiling, a tile floor, two kinds of siding, a brick wall at the base, and a shingled roof. Each section also contains an electrical system, heating ducts and plumbing. The boys do it all themselves in less than 30 days.

They work from a laboratory manual, which gives day-by-day instructions and from a textbook that gives background information.

"If they were going to lay bricks today, for example, they would learn in their text how it's done, what kinds of tools are necessary, how bricklaying differs on different kinds of buildings," Fannin explains. "They'd follow through with what they learned by practicing it in the lab."

The program isn't intended to make skilled craftsmen of the boys, Fannin says, but it should give them a broad base of information that could be specialized later, whether a student decides to be a carpenter, painter, bricklayer, or engineer.

Later this year, the students will design their own houses and make styrofoam models. They'll also do the landscaping.

Then they'll divide into four teams and plan for a developing community whose situation changes every day. They might start out, for example, with a community of 1,000 people. Then a new factory might move into

the area and the students would have to plan for housing, food and entertainment for the increasing population.

Next year, as eighth graders, the students will study many aspects of manufacturing.

Fannin is a graduate of University Breckinridge School and Morehead State University.

## Worthington Receives Officer Training

U. S. Air Force Captain William L. Worthington, Jr., son of Mr. and Mrs. William L. Worthington, Sr. of Rt. 4, Maysville, Ky., is attending the Air University's Squadron Officer School at Maxwell AFB, Alabama.

Captain Worthington will receive 14 weeks of instruction in communicative skills, leadership, international relations, duties and responsibilities of the command-staff team, and aerospace doctrine.

The captain is accompanied by his wife, the former Yvonne Nicholls and their son, John. Mrs. Worthington is the daughter of Mrs. Pearl M. Nicholls of Bremen, Ky.

Captain Worthington, a 1958 graduate of Orangeburg High School, received his B.S. degree in 1963 from Morehead State University. He was commissioned in 1963 upon completion of Officer Training School at Lackland AFB, Texas. The captain participated in the Dominican Republic crisis and has served in Vietnam.

## LeRoy Cantrel Selected O.Y.E.

LeRoy Cantrel, business education instructor at Butler High School in Louisville, Kentucky, has been selected as the Outstanding Young Educator in Jefferson County by the Shively Jaycees.

A 1959 Graduate of Morehead State University LeRoy has served as Vice President of the Morehead Alumni Association, President of the Vocational Business Association and President of the Jefferson County Business Education Association.

He received his M.A. degree from the University of Kentucky and will return to the University of Kentucky as coordinator of Student Teaching in August, 1968.

## Morehead Natives Get Top Posts At University

Dr. John R. Duncan, for the past nine months dean of admissions at Morehead State University, has been named acting dean of the University's Graduate School, President Adron Doran has announced.

Dr. Duncan's appointment fills a vacancy created by the resignation of Dr. Jarvis Hill, who has accepted a position as head of the Department of Education of the newly-created Atlanta Baptist College, Atlanta, Ga., effective August 2.

Named acting director of admissions to replace Dr. Duncan is Bill B. Pierce, since 1966 assistant director of the Bureau of Business Affairs at the University.

Both will assume their new responsibilities at the close of the summer session.

A native of Morehead, Dr. Duncan received his AB degree in sociology and political science in 1960 and his master's degree in secondary education in 1961, both at Morehead. After doing graduate work at Miami University, Oxford, Ohio, and Purdue University, he received his doctor's degree in education from Indiana University in 1967.

Pierce, also a native of Morehead, has been with the University since 1964, when he earned his BS degree. He received his master's degree in business administration in 1966.

Pierce is married to the former Carole Ann Scott of Ashland, Morehead Alumnus and teacher in the Rowan County School System.

Duncan's wife, Greta, is also an alumnus of MSU and she will assume the responsibility of kindergarten teacher at University Breckinridge School this Fall.

SUMMER, 1968

## Spaulding Selected Outstanding Civic Leader

Russell Spaulding, a 1955 graduate of Morehead State University, is one of the outstanding young men in Vandalia, Ohio. He is currently serving as principal of Morton Junior High School after having completed additional education training at Wittenberg University, Wilmington College, Miami University and completed his M.A. degree at Ohio University.

In addition to his education responsibilities, his work in community and civic affairs has placed his name in nomination for Outstanding Young Men of America and Outstanding Civic Leaders of America.

He is a member of the Masonic Lodge, Vandalia Kiwanis Club, Vandalia Jaycees and is Immediate Past President of the Harrison Toastmasters. He was a finalist in state competition for the Jaycee Speech Contest in Ohio after winning the Cincinnati District Competition.

## Keadle Supervises Athletics

James B. Keadle, 1950 graduate of Morehead State University, has been appointed supervisor of athletics for the Warren City Schools, Warren, Ohio.

Keadle also serves as the Assistant Principal for Warren G. Harding High School, where he served as football coach from 1958-64.

Other coaching assignments were in Louisa, Kentucky and Jackson, Ohio.

Following graduation from Morehead he attended Kent State University and Westminster College where he received his M.S. degree.

Jim B. is married to the former Patricia Bellamy from Morehead, Ky.

**JOIN THE M.S.U.  
PRESIDENT'S CLUB**

## Lowe Named To New Position

Robert Lowe, 1959 graduate, has been named Chief Resident in Orthopedic Surgery, Vanderbilt University Hospital. Lowe who graduated with majors in chemistry and biology completed his advance work at Vanderbilt University where he served his surgical internship. He was General Surgical Assistant in Residence and was named Assistant Resident in Orth-

opedic Surgery. This was followed by his appointment as senior assistant resident and climaxed with his appointment January 1 as Chief Resident in Orthopedic Surgery with Vanderbilt University Hospital.

He is married to the former Sara K. Herr of Murrayville, Tennessee, who is a Vanderbilt graduate and nurse.

## *Faces in the Crowd*

Major problems in providing equal educational opportunity in Appalachia and the role of state education associations in helping to alleviate the economics and educational conditions of the region were discussed by thirty-five conferees from Kentucky, North Carolina,

Tennessee, Virginia, and West Virginia in a recent meeting sponsored by the National Education Association.

Among those in attendance was Mrs. Ruth Reeves, Morehead alumnus. A professional teacher in the Ashland Public Schools, Mrs. Reeves has

held almost every education association office at the local, district and state levels and is president-elect of the Kentucky Education Association.

She has served on the governor's committee to study finance for schools and was a committee member named to study

the Minimum Foundation Program.

Her professional work was further recognized when she was recently named "Woman of The Year" by the Ashland Business and Professional Woman's Club.

Now retired, Harlan Hatcher, served as the eighth president of The University of Michigan from 1951 to 1967. Under his leadership the University grew in enrollment but maintained three principles: Controlled growth in enrollment year by year, maintenance of high standards and continued improvement in quality of instruction.

Nationally and internationally recognized, Dr. Hatcher, has received many honors and awards. He is Commander in the Netherlands Order of Orange Nassau (1952), Companion of the Most Exalted Order of the White Elephant (Thailand-1965), and has received the Wolverine Frontiersman Award (1958), Star of Italian Solidarity, First Class (1962), and Second Order of Merit with the Middle Cordon of the Rising Sun from the Emperor of Japan (1962).

Author of several books, Dr. Hatcher headed a Ford Foundation mission to the Soviet Union to study higher education in that country. His studies also took him to South America for a foundation sponsored study mission.

Morehead State University followers remember him as an all-time great athlete. Steve Hamilton received All-American honors while attending Morehead. On the hardwood he led his team to the Ohio Valley Conference Championship, averaging 24.5 points a game while hitting on 40% of attempts from the floor.

Displaying his all round athletic ability Steve lettered in track where he set an OVC pole vault record and pitched the "Eagles" to the OVC league championship in baseball.

Following graduation Steve played professional basketball with the Minneapolis Lakers and finding his 6'-7" frame a little small, devoted his time to baseball. He now is star relief pitcher for the New York Yankees and owns one of the lowest earned run averages in the American League

His abilities reach another peak as he was selected player representative for his club and the league. This is one of the highest honors that can be bestowed on a professional baseball player.

Lloyd Cassity is an active business and civic leader. He is Vice-President of Johnson's Dairy Inc., in Ashland, Kentucky and a recognized leader in community development programs.

Selected as the Ashland area Boss of The Year by the Jaycees, he remains active in affairs of his alma mater, serving as a member of the board of regents.

Cassity served as President of the Morehead State University Alumni Association in 1961 and held office of President for the Joint Alumni Council of Kentucky during this term of office. He was recipient of the Outstanding Alumnus Award from his alma mater in 1966.

His administrative responsibilities at Johnson's Dairy have not suffered as a result of his community interest. Their tremendous growth in sales and general public acceptance is partially brought about by his public relations work. The picture depicts this image as he chats informally with John Haskell, WSAZ-TV Farm Director, during a live TV session of dairying and dairy products.

## *Faces in the Crowd*

A general news reporter and War correspondent, David E. Henderson, is now Washington News' correspondent for WAVE, Inc. broadcasting stations.

Assignments include covering the Indiana General Assembly Session and the Kentucky Legislative Session. In 1966 Henderson flew to Southeast Asia on two occasions to interview Kentucky and Indiana servicemen. During the six weeks he spent in South Vite Nam he completed 80 filmed interviews with soldiers and Marines. He also produced a total of five 30 minute documentaries in addition to daily reports from Viet Nam.

In 1967 Henderson opened a Washington news bureau for the WAVE, Incorporated stations which include: WAVE AM/TV, Louisville; WFIE TV, Evansville, Ind.; WFRV TV Green Bay, Wis.; and WMT AM/TV, Cedar Rapids, Iowa. His work in Washington is to report the work being done by local state delegations in Congress and to "localize" national news to fit the interests of the specific regions served by the stations.

Only four broadcasting companies in the U.S. provide such a service to their viewers.

In August Henderson will be chief correspondent representing the WAVE, Inc. stations at the National Conventions in Miami and Chicago.

## Faces in the Crowd

He was an aircraft pilot during World War II, flying the "Hump." Was awarded the Air Medal with Oak Leaf Cluster and the Distinguished Flying Cross. He attended Morehead State University and Speed Scientific School, University of Louisville.

Today James E. Noe is Director of Research and Education for the International Brotherhood of Electrical Workers (AFL-

CIO), the World's 5th largest labor union. In this position he is responsible for the leadership program and administers a \$120,000 IBEW Electrical Engineering Scholarship Program. He conducts technical institutes in co-operation with selected Universities.

Presently Noe is serving as a Labor member of the President's National Defense Executive Reserve in the Office of Emer-

gency Planning and is a member of the Labor Research Advisory Committee, U. S. Department of Labor.

He has served as special labor consultant to the Atomic Energy Commission and the office of Defense Mobilization. In 1964 he conducted a 30-day lecture tour of India and Japan, speaking on labor research, under the Department of State Cultural and Educational Ex-

change Program.

Active in civic and church affairs, he and his wife Edith are the parents of two sons and one daughter.

A point of interest in that both boys are pilots. Buddy, the oldest, was a navy pilot for eight years and now flies for the Civil Aeronautics Board and Timmy is waiting until his 18th birthday to earn his license.

# WHAT'S HAPPENING AT MOREHEAD STATE?

## Gov. Nunn Addresses Honors Day Program

Gov. Louie B. Nunn said that academic freedom and the right to search for truth on the college campus should be available only to those who honor the freedom of others.

Speaking at an annual Academic Honors Day convention at Morehead State University, the governor said that these freedoms must fall within the accepted and established guidelines of society, which "must be preserved if this state and this nation's way of life is to prevail."

"We do not advocate the unquestioned acceptance of the status quo," the governor told the Morehead faculty and students.

"The purpose of your education is not only to teach you to live within the order of society, but also how to improve on it."

Governor Nunn also charged the Morehead faculty with the responsibility of administering education by saying:

"One danger is inherent in our zeal to promote complete academic freedom and to provide an unhampered, challenging atmosphere which nurtures intellectual curiosity.

"This danger is that at the age when students enter our universities, intellectual curiosity most often runs far ahead of intellectual maturity.

"Students, parents must demand of university and college faculties," he said, "that unsubstantiated, controversial ideas and theories be presented to their children only when accompanied by the most discerning judgment and stewardship.

"If this is not done," he said, "I am afraid our young people will be far too vulnerable, during this impressionable age, to the dangerous theories which infest some of our universities."

Without any direct reference to any Kentucky college or university the governor went on:

"Even more dangerous than the idea at time is the method by which the purveyors of these ideas impose and try to enforce their arguments.

"The trend of the protest movement in the United States, I believe, has been established by an irresponsible element which has shown it is willing to burn down the house to roast the pig inside."

In paying tribute to the students being honored, the governor pointed out that "there is no generation gap" between his administration and them.

"Your contemporaries already are playing a major role in the new administration," he said. "In fact, I would venture to say that this is one

of the youngest administrations ever in Frankfort."

In citing the appointment of many young men and women to places of responsibility in state government, the governor also spotlighted the "intern" type of programs being followed today to involve talented young Kentuckians in careers in state government.

More than 375 Morehead students were recognized for outstanding academic achievement at the convocation. The most coveted award presented, the Open Forum Citizenship Award, went to Linda Haitz, Ripley, Ohio, and George Fraley, Middletown, Ohio. Both are seniors and this is the first time the honor has been shared.

Herbert Sparrow, Eminence, who was in Louisville at the time taking a physical examination for military service, was named recipient of the Chi Phi Delta "Man of the Year" award.

Art Dayton, Laurel Springs, N. J., and retiring president of the student body, was awarded the President's Cup in a surprise presentation by President Adron Doran.

In honoring Dayton, Dr. Doran said he had been selected because of his devotion to his responsibilities and for "having drunk from the often bitter cup of leadership."

A new award, instigated by Dr. Doran, the cup will be presented each year to an outstanding student leader.

## Instructor Authors Article On Keep Records

Dr. Ardyce Lightner, associate professor of Business Education, is the author of an article entitled, "Record Keeping—Fact or Fiction," in the January, 1968, issue of "The Balance Sheet," a magazine distributed nationally by the Southwestern Book Company of Cincinnati.

In her article, Dr. Lightner emphasizes that 20 per cent of the high schools with enrollments of 1,000 students or more already offer record keeping in order to help solve the problem of individual differences.

MOREHEAD ALUMNUS

## Powell Named Dean Of School Of Education

Dr. James H. Powell, associate professor and chairman of the Division of Instruction in the College of Education at the University of Kentucky, has been named dean of the School of Education at Morehead State University, President Adron Doran announced.

The new educational dean, who assumed his new responsibilities May 1, fills a vacancy created by the recent resignation of Dr. Kenneth Dawson, who left the University February 29 to become academic vice-president of a newly-established Baptist college in Atlanta, Ga.

A native of LaRue County, Dr. Powell received his A.B. degree in social science from Transylvania College. He received a master's degree in educational administration from the University of Kentucky, and in 1963, received his doctorate in the same area from the same institution.

His doctoral dissertation was on: "A Study of the Factors Involved in the Failure and Subsequent Success of a Voted Tax for School Buildings in Five Selected Counties in Kentucky."

For 11 years, Dr. Powell served in the Harlan County school system, including positions as teacher and assistant principal at Cumberland High School and principalships at Loyall and Benham.

In 1960, he was named director of the 12-grade Laboratory School at the University of Kentucky, a position he held until he was named chairman of the Division of Instruction and Di-

rector of Student Teaching at the University.

Dr. Powell also has served as president of the UK chapter of Phi Delta Kappa and as president and executive secretary of the area council of the Midwest Program on Airborne Television.

Baptists, Dr. and Mrs. Powell, who is employed in the University's business office, have two married children.

The new dean also is a Master Mason and served with the Army in the South Pacific during World War II.

"We are indeed fortunate in having a man of Dr. Powell's caliber and experience come to Morehead as dean of our School of Education," Dr. Doran said.

"His broad knowledge of programs of education at the university level will compliment the contributions being made today by our outstanding professional education faculty," he went on. "Although the school has received national recognition in recent years, our growth and development opportunities continue to be unlimited."

## Grote Named To Policy Vocational Education Post

Dr. C. Nelson Grote, dean of the School of Applied Sciences and Technology at Morehead State University, has been named to the governing cabinet of the American Vocational Association, a national group consisting of vocational education and practical arts personnel.

Dr. Grote was elected by members of the group, which encompasses more than 40,000 members, at a national meeting in Cleveland early in December.

An active member of the AVA for the past 16 years, Dr. Grote has served on two committees during the past year, one of which was responsible for designing a new membership brochure for the industrial arts division of the AVA.

Last year Dr. Grote was elected to the industrial arts policy and planning committee for a six-year term. He was one of three persons in the nation elected to this committee.

It was from these three planning committee members that Dr. Grote was elected to the cabinet post. He will serve for a two-year period.

## Naomi Claypool-Tom Young Art Building Is Opened

More than 100 works of 15 graduating art seniors at Morehead State University made up the first exhibit to be held in the University's new \$1,096,000 Art Building.

Dr. Adron Doran, president of the University, officially opened the exhibit and the building's three-level exhibition area May 13, at a ribbon-cutting ceremony.

The new building will be put into use with the opening of the summer semester, and will be dedicated formally in the fall.

The University's Board of Regents voted at its May 1 meeting to name the new building the Naomi Claypool-Tom Young Art Building in honor of two long-time faculty members.

Mrs. Claypool, now retired, was head of the Art Department at the University for 40 years, and Young, deceased, was an art teacher for 28 years.

The seniors whose works were displayed are:

James Economos, New Bedford, Mass.; Melanie Gabbard, Stanton; Lenora Gillum, Burke; Don Herbert, Detroit, Mich.; Peggy Howard, Florence; Jack Kendall, Bel Air, Md.; Rachael Kendrick, Marida; and Marlene McGregor, Manchester, Ohio.

Also, Alan Noble, Watts; Betty Picklesimer, Pippa; Bill Porter, Sandra Wolfe, both of Hamilton, Ohio; Jim Zimmerman, Owensboro; Betty Schindel, Mt. Orab, Ohio and Deana Standiford, Ewing.

Exhibited were works in oils, water colors, abstracts, realism, landscapes, still life and figures.

## Morehead Charters National Organization

A campus club, Sigma Xi, a national honorary society devoted to the recognition and encouragement of achievements in scientific research, has been organized at Morehead State University.

Dr. Jules DuBar, head of the department of geoscience at the University and a nationally recognized geophysicist, has been named its first president.

The vice-president is Dr. Lamar B. Payne, associate professor of chemistry, and Dr. Billy Nail, head of the department of mathematics, is the secretary-treasurer.

Other members of the new club include Dr. W. C. Simpson, dean of the School of Science and Mathematics; Dr. Russell Brengleman, associate professor of physics; Dr. David M. Brumagen, assistant professor of biology.

Dr. Margaret Heaslip, professor of biology; Dr. Ann Dobson, Assistant professor of biology; and Dr. Dwight Williams, associate professor of chemistry and science education.

Membership in the Sigma Xi is a scientific distinction of high honor. With it come the special opportunities of constantly advancing the course of science by continually exploring for new knowledge and applying it for the benefit of mankind, Dr. Simpson said in announcing the approval of the new Morehead club by the national Sigma Xi headquarters.

## Record Budget Approved

A \$11,487,249 budget for the 1968-69 fiscal year and the appointment of three new vice-presidents were approved by the board of regents at Morehead State University at their May 1 meeting.

Named vice-president for University affairs was Raymond Hornback, currently completing study for his doctor's degree at the University of Indiana. He is expected to return to the campus July 1.

Appointed vice-president for student affairs was Roger Wilson, dean

of students from 1953-66 and for the past two years director of Student Affairs.

Dr. Morris Norfleet, a native of Somerset and a University staff member since 1962, was named vice-president for research and development.

All are new positions.

The 1968-69 budget calls for expenditures totaling \$11,487,249. The proposed educational and general expenditures total \$6,994,554. Auxiliary enterprises total \$1,465,890 and the remaining \$3,026,805 will be expended for debt service and in restricted funds.

Dr. Adron Doran, president of the University, told the board the budget is based on the 1968 General Assembly appropriation of \$5,540,100 for the coming year, plus anticipated receipts from tuition, fees and room and board payments totaling \$5,947,149.

"This budget represents the educational philosophy of the institution and the development of its physical facilities as well," Dr. Doran told the board in presenting the budget.

The meeting was the first to be attended by non-voting representatives of the faculty and student body in accordance with a new law enacted by the 1968 General Assembly which calls for faculty and student representation on governing boards of all state-supported universities.

Dr. Frank Mangrum, head of the philosophy department since 1959, is the faculty representative, and Quentin Hatfield was elected student representative at a special election by the student body.

## Mrs. Mahan Gets National Honor

Mrs. Iris Davenport Mahan, visiting professor of Home Economics at Morehead State University, has been invited to Chicago to be honored by the National Council of Administrators of Home Economics for "her many contributions to Home Economics and her continued inspiration and encouragement to others."

Mrs. Mahan, who also directs Palmer House, the University's home management house, is one of 200 Home Economics administrators from 43 states and the District of Columbia invited to a Recognition Luncheon, sponsored by the NCAHE at the Pick-

Congress Hotel in Chicago, February 16.

One of the most widely-known women in the South, Mrs. Mahan, a native of Charlotte, N. C., for 16 years was editor of the Woman's Department of Farm and Ranch Magazine. She also has served as head of the Home Economics Department at Georgia State College, and extension specialist on the staff of the University of Kentucky and Louisiana State University.

In the 1950's she was honored, along with Dr. Milton Eisenhower and former Secretary of Agriculture Ezra Benson, for her contributions to agriculture, and at one time was voted one of the six most outstanding women born in the South. She also is listed in Who's Who of American Women.

## Louder Joins Music Faculty

Earle Louder, since 1956 head of the brass department of the United States Navy Band, Washington D. C., joined the music faculty at Morehead State University June 1, J. E. Duncan, dean of the School of Humanities at the University, has announced.

For the past two years, Louder has been a member of the guest faculty of the Cumberland Forest Music Camp. The camp, a two-week concentrated music study workshop, is conducted at Morehead each summer to help high school and university students wishing to develop their skills under the supervision of distinguished musicians.

Louder has appeared as guest soloist with many university and professional bands throughout the United States.

As head of the brass department with the Navy Band, he was responsible for the efficient performance of the brass instrumentalists and supervised the brass auditions for the band.

He also is on the National Board of the School Band and Orchestra of America and has been the Washington representative for this group.

At Morehead, he will be an assistant professor of music and will teach classes in the teaching of brass. He also will be available for private lessons on the low brass instruments, particularly the euphonium.

MOREHEAD ALUMNUS

## Electronic Data Processing Minor Is Offered

To help meet the growing need for qualified personnel in the \$6-billion-a-year electronic data processing world, Morehead State University will offer an Electronic Data Processing Minor in Business, beginning with the fall semester.

"This new program can be used as a separate minor business as well as one of the options in the Business Administration area of concentration," Dr. C. Nelson Grote, dean of the School of Applied Science and Technology, said in making the announcement.

"We firmly believe that the new course will be extremely popular with our students and that Morehead graduates will be in great demand by having taken it."

To earn the minor, 18 hours of special course work and three hours of electives will be required, Dr. Grote said. Six, three-hour courses, for a total of 18 hours will be required for the option in the Business Administration area of concentration, he added.

The courses to be offered in the new minor will deal with the fundamentals of business electronic data processing, understanding and use of the common business oriented language and conventions, systems designs and development, monitors, language assemblers, procedure-oriented compilers, report generators, utility programs and on-the-job experience in an actual data processing operation outside the classroom.

"Competition for qualified people in this field has driven salaries up so fast that programming has become one of the nation's highest-paying technological occupations," Dr. Grote said.

"A man or woman with two years' experience in programming can make \$8,000 to \$10,000 a year. With four years' experience even without a college degree, can pay off at \$15,000 a year, while advanced specialists can sign on for \$20,000 and more.

"Yet, many companies are unable to find experienced programmers at any price."

## Upward Bound Program Is Funded

Morehead State University has received a \$135,508 federal grant from the Office of Economic Opportunity to finance the continuation of an Upward Bound program for an 18-month period, ending June 30, 1969.

The grant, announced by both U. S. Senator John Sherman Cooper (R.Ky.) and Congressman Carl Perkins (D. 7th Dist., Ky.), is the third awarded the University for Upward Bound programs.

Upward Bound is a pre-college preparatory program designed to motivate young people from low-income backgrounds and inadequate secondary school preparation toward higher education.

Supported by the Office of Economic Opportunity in Washington, there are 252 institutions participating in the program with more than 23,000 young people involved.

The Morehead program is serving

130 high school students in eight Eastern Kentucky counties — Bath, Boyd, Elliott, Greenup, Johnson, Magoffin, Mason, and Morgan.

Selected more than two years ago while sophomores in their respective high schools, the students participating in the program have spent eight weeks on the Morehead campus for each of the past two summers, attending classes in English, speech, social studies, fine arts, applied sciences and technology, and physical education.

Field trips also are arranged to provide the students with a wide range of experiences for cultural and social enrichment, as well as academics.

Many of the students returning to the Morehead campus to participate in the Upward Bound program this summer will have graduated from high school in May and will be getting their last opportunity to strengthen their academic background before enrolling in college in September.

These students will be enrolled in an eight-week "bridge" program designed to span academically the gap between their high school graduation and their entrance in college.

The program is under the over-all direction of Dr. Morris Norfleet, director of research and development at University. Jack Webb is the academic director and Miss Carole Carte is the administrative director. Both Webb and Miss Carte are graduates of Morehead State University.

## MSU Professor Is Honored

Dr. Billy Nail, head of the department of mathematics at Morehead State University, has been named chairman of the Kentucky Section of the Mathematical Association of America.

Dr. Nail, who received doctorate at the University of Illinois, came to Morehead in June, 1967. Prior to going to Illinois, he taught at Wayland College in Texas.

Morehead, Ky. 40351

## Hallum Named Football Coach

John J. (Jake) Hallum, the Kentucky High School Athletic Association "Coach of the Year" at Paul Blazer High School last season, has been named head football coach at Morehead State University. Dr. Adron Doran, President of the University, has announced.

Hallum, was recommended to Dr. Doran by unanimous vote of the University's athletic committee, the president said.

Hallum joined the Morehead coaching staff in February as offensive line coach, succeeding Ron Durby who went to the University of Chattanooga as an assistant coach.

As head coach, he succeeds Guy Penny, who was at the Morehead football helm for nine seasons before resigning and receiving a 15-month sabbatical leave to permit him to study for his doctor's degree at the University of Southern Mississippi.

A native of Pickens, S. C., Hallum, 30, coached the Ashland Tomcats to the Kentucky Class AA high school championship last fall in his second season at Paul Blazer, defeating Elizabethtown 19-14.

Four of his Ashland players received all-state recognition and nine of his 18 seniors have since been given college football scholarships.

A dedicated student of the game, Hallum played on two state championship high school teams at Pickens before graduating in 1956.

He played his college football at Newberry College in South Carolina, where he graduated in 1960 with a

degree in a secondary education. At Newberry, he played defensive guard, linebacker and defensive end.

Upon graduation from college he returned to Pickens as an assistant coach to Fleming Thornton, and in two seasons helped coach the Pickens team to an 18-3 record.

When Thornton moved to Hopkinsville, Ky., as head coach, Hallum followed as an assistant in 1962. In four years there, he was instrumental in the Tigers' 1966 state championship and 40-6 overall record.

At the beginning of the 1966 season, Hallum moved to Ashland as head coach at Paul Blazer. After losing four of their first five games, the Tomcats rallied to win their last six for a 7-5 record.

Last season, they continued their winning way to capture the Kentucky Class AA high school championship.

In addition to being named the Kentucky high school "Coach of the Year," Hallum also was honored by the Ashland Junior Chamber of Commerce by being selected as Ashland's outstanding young man of the year for 1967.

"This is a tremendous challenge," Hallum said when notified of his appointment. "I fully realize the inexperience I have in college coaching, and know that the only way to overcome this handicap is through hard work and absolute dedication, not only on my part but on the part of our assistant coaches. I can guarantee only that hard work and dedication at this point."

Assistant coaches who will be retained are Mike Brown, offensive backfield coach, and Wayne Chapman, a native of Barbourville, W. Va. and a former all-conference player at Morehead. He joined the coaching staff in February along with Hallum after three years as a successful high school coach at the Auburndale, Fla., high school.

Hallum is married to the former Mabel Rogers Duvall of Greenwood, S. C., and they have two children, Todd, 4½, and Bart, one year.

"We recognize Coach Hallum's inexperience on the college coaching level," President Doran said in making the announcement.

"But we also recognize in him the characteristics essential to developing football leadership. He is a dedicated coach. He loves to win, a fact reflected in his eight years of outstanding high school records," he added.

"We have had a number of applicants for the job, but the athletic director, the faculty athletic committee and I feel that Coach Hallum's selection represents the best interest of the team and the University."

## 1968 Morehead Eagles' Football Outlook

With 21 of 36 lettermen returning from last year's fifth place OVC contender, Morehead's new head coach, John J. (Jake) Hallum and three of his assistants will make their debut in collegiate football next fall with a team which, although young and inexperienced at several key positions, will be an enthusiastic, dedicated group of football players.

Hampered by injuries to key personnel, the Eagles won four, lost five and tied one over-all last year after winning the OVC championship in 1966. They won two, lost four and tied one in conference play in 1967 and were outscored by their opponents 119 to 91 in league competition.

With All-OVC tackle Dave Haverdick on one side and 230-pound tackle Jim Fisher on the other, the defensive unit is expected to be strong. Question marks, however, hang over the front line of the offensive unit with only 230-pound Dave Moore at guard and 205-pound end Marvin Hicks returning. Leon Wesley, 180-pound senior, will be at safety on the defensive unit and is expected to see considerable offensive action.

Hard-running Lewis Rogan, 190-pound powerhouse, is expected to replace the fleet Tommy Gray at tailback. With experience and maturity, he could become one of Morehead's all-time great ball carriers. Junior quarterback Bill Marston will see a lot of action as the Eagles' field general with help from freshman George Malone, a 6-foot, 175-pounder from Fort Payne, Alabama.

The Eagles' very serious lack of depth must be offset by the largest group of incoming freshmen ever signed by the University in preparation for the coming season.

	*Ohio Valley Conference Games	

## Morehead Receives Special Education Grant

Morehead State University has been awarded federal contracts totaling \$31,195 to finance a special education program and to continue another into its third year, Dr. Adron Doran, president of the University, has announced.

The Special Education Department

of the University has been awarded an \$18,000 grant to finance the development of programs designed to train diagnostic personnel and teachers for work with children who have learning disorders.

The grant, which was awarded by the U. S. Department of Health, Education, and Welfare, will be used to employ a school psychologist in the Psychology and Special Education Department, Dr. Doran said.

It also will be used to provide funds for developing new graduate programs for students who plan to work with school children who have difficulty learning.

Under the direction of Dr. Bradley Clough of the Department of Psychology and Special Education, the University will be working with teachers in outlying school areas in putting into application the programs designed under the provisions of the grant.

The second grant, totaling \$13,195 and announced from the office of Congressman Carl Perkins (D., 7th Dist., Ky.) will be used to finance the continuation of a Headstart Regional Training Program, now in its third year in Eastern Kentucky.

Dr. Mary Northcutt, professor of education at the University and who has served as director of the program in the 18 Eastern Kentucky counties involved since its inception, will continue to direct it.

As such, she works closely with the full-year Headstart programs, summer Headstart programs and Child Care Development Centers in the area.

Headstart is a pre-school program designed for children from culturally different homes in low income areas.

The Kentucky program is unique, Dr. Morris Norfleet, director of research and development at Morehead, has emphasized, in that it is the only one in the country in which seven state-supported institutions are involved in the project.

"All others have only one or two people covering the entire state with no connection with the state university in many cases," he said.

Full-year Headstart programs are being operated by the University Breckinridge School on the Morehead campus, the Paintsville Independent Schools, and at schools in Martin and Pike counties.

Twenty-six others operate eight-week summer Headstart programs, namely: Rowan, Elliott, Carter, Bath, Greenup, Lewis, Fleming, Mason, Menifee, Robertson, Morgan, Martin,

Magoffin, Lawrence, Johnson, Floyd and Boyd Counties; Independent Schools in Greenup, Raceland, Russell, Van Lear, Fairview and Catlettsburg; and Maysville and Ashland city schools.

Four counties—Elliott, Floyd, Morgan and Magoffin—operate year-long Child Care Development Centers for four and five-year-old youngsters.

All experimental programs in child development are conducted at University Breckinridge School and at the Stark school in Rowan County.

## Howell Named To Board Of Regents

Gov. Louie B. Nunn has named one new member and re-appointed another to the Morehead State University Board of Regents, President Adron Doran has announced.

The new member is Jerry F. Howell, Jackson banker. He replaces D. H. Dorton, Paintsville banker, whose four-year term on the board has expired.

Re-appointed to the board was Dr. William Cartmell, Maysville physician and surgeon. Dr. Cartmell has been a member of the board since 1956 and currently is serving as its vice-chairman.

Other members are Lloyd Cassity, Ashland; Charles Gilley, Lexington; B. F. Reed, Drift; and Cloyd McDowell, Harlan. State Superintendent of Public Instruction Wendell Butler, Frankfort, is the chairman.

Howell, who attended college at Morehead, Western Kentucky and Georgetown before teaching for 11 years in Floyd County, served three terms in the state House of Representatives and one in the Kentucky Senate.

He also operated a hardware and furniture business at Price, Ky., for 19 years before becoming executive vice-president and cashier of the newly-organized Citizens Bank at Jackson, a position from which he resigned January 1 of this year.

Although semi-retired, Howell still is active in Kentucky financial circles and currently is serving as a director of both the Investors Heritage Life Insurance Company and Kentucky Investors, Inc., at Frankfort.

Mrs. Howell, a graduate of Western Kentucky University, was a student at Morehead in 1934-35 before going to Western. She returned in 1959-60 to complete her requirements for a certificate as a librarian.

## Marmie, Behling Named To Posts On Morehead's Football Staff

Morehead State University Athletic Director Bob Laughlin has announced the addition of two assistant coaches to the coaching staff.

Named defensive backfield coach was Larry Marmie, 26, for the past two years coach at Berea High School.

A native of Barnesville, Ohio, and a former All-Ohio Valley Conference quarterback at Eastern Kentucky University, Marmie will fill a vacancy resulting from the resignation of Coach Jack Harbaugh, who is returning to his alma mater, Bowling Green University in Ohio, as an assistant coach.

Named defensive line coach was John Behling, for the past year head coach at Fremont Ross Senior High School in Remont, Ohio.

He will replace coach Jerry Denstorf, who resigned at the end of last season to become head football coach at Bloomsburg, Pa., State College, Westerville, Ohio and where he earned a degree in education.

His coaching career includes two years as head coach at Massillon Senior High School in the rough northern Ohio competition, during which his teams had a 24-5-1 record.

Rounding out the Morehead coaching staff will be Head Coach Jake when Guy Penny resigned, offensive backfield coach Mike Brown, who will be starting his third year with the Eagles this fall and Wayne Chapman, offensive line coach and former All-Conference performer for the Eagles. Chapman returned to his alma mater after a highly stint at Auburndale High School, Auburndale, Fla.

## Chaney, Ward Articles Published

Two members of the physical education faculty at Morehead State University are the authors of articles in the May issue of the Kentucky Association for Health, Physical Education and Recreation Journal. They are:

Rex Chaney, director of program recreation at the University, and Dr. Nan K. Ward, director of women's physical education.

In this article, "Responsibility of The School in Education for Leisure,"

Chaney points out that schools not only should prepare individuals to earn a living, but also should prepare them for living. "And this includes living in leisure," he writes.

"The school must educate the whole person," he said, emphasizing:

"Regardless of how we define our aims, principles, beliefs, objectives and goals, all educative forces in the community have a role to play in achieving the end-product—a well-educated person.

"The end-product must be able to cope with his or her environment and achieve satisfaction from it," he wrote.

"The educative forces must stress the importance of the individual and his relationships with people and society. This includes being concerned with the preparation of the individual in his own 'worthy use of leisure time' or 'self-realization'."

Dr. Ward, in her article, "Physical Education on Community Colleges," reported on an extensive study of the University of Kentucky Community Colleges for the purpose of establishing guidelines for physical education programs.

"Good physical education, intramural and recreation programs are essential to the fulfillment of the major obligations of the community colleges," she says, "although such programs have not been developed."

Many of the community colleges' obligations have been met, she points out, but some phases have not been expanded, mainly because of the lack of finances and proper development.

In order that good physical education programs can be developed at each of Kentucky's community colleges, Dr. Ward recommends a five-point program:

1. Develop an appropriate physical education curriculum to meet the needs of the situation.
2. Provide proper equipment and facilities for the program.
3. Hire full-time physical education instructors.
4. Offer the program to students, and
5. Continually evaluate the program and make necessary revisions in order to meet changing needs.

Currently, there are nine junior colleges in Kentucky being operated as branches of the University of Kentucky.

These are located at Covington, Ashland, Fort Knox, Cumberland, Henderson, Elizabethtown, Somerset, Hopkinsville and Prestonsburg.

Three others—located at Hazard, Maysville and Louisville—are in preliminary development stages.

## Bentley Named Division Chairman

Dr. Earl J. Bentley, former track coach and assistant football coach at Morehead State University, has been named chairman of the University's Division of Health, Physical Education and Recreation. Dr. James H. Powell, dean of the School of Education, has announced.

Dr. Bentley received his doctor's degree in physical education recently at the University of Southern Mississippi, Hattiesburg, after a two-year leave of absence.

Dr. Bentley came to Morehead in 1959 from Wadley (Ala.) Junior College, and in addition to teaching physical education and coaching the track team, was the defensive line coach for the football team.

He received his B. S. degree from Troy (Ala.) State University in 1951 and his master's from the University of Tennessee in 1956.

## Payne Elected

Dr. Charles A. Payne, chairman of the Division of Physical Sciences at Morehead State University, has been elected to membership in the national honorary society of Sigma Xi.

Membership in the society is composed of men and women who are engaged in and committed to the encouragement of scientific research and who have attained a high degree of achievement through original research in the physical sciences, life and agricultural sciences, the earth sciences, mathematics or engineering.

Dr. Payne was elected to the Society by the Auburn (Alabama) University Chapter of Sigma Xi, where he received his doctorate in chemistry in 1960. His election was based upon his research work in organic chemistry while at Auburn.

Membership in the Sigma Xi is a scientific distinction of high honor. With it comes the special opportunities and responsibilities of constantly advancing the course of science by continually exploring for new knowledge and applying it to the benefit of mankind.

Dr. Payne also is a member of the American Chemical Society, the Kentucky Academy of Science and Phi Lambda Upsilon, an honorary chemistry society. He joined the faculty at Morehead in June of 1966.

**RECEIVERS**—In the picture above, Don Holloway, station manager of WMKY-FM, the Morehead State University broadcasting service, accepts the first of EJ AM-FM-Shortwave receivers from Dr. J. E. Duncan, Dean of the School of Humanities at the University. The receivers were obtained through a \$1,000 grant to the University from Madison Avenue paper industrialist Louis Schweitzer. Presented on behalf of Schweitzer by Bert Cowlan, vice president of Herman W. Land Associates, Incorporated, Communications Consultants, the receivers will be used as part of an adult education project. The project will utilize five program series from the Institute of Lifetime Learning for the cultural enrichment and continuing education of elderly and handicapped persons in the Morehead area.

## Faculty Members Nominated For Awards

Five Morehead State University faculty members were nominated for the fifth annual Distinguished Faculty Award.

Dr. Charles Pelphrey, professor of English.

Dr. Frank Mangrum, head of the Department of Philosophy and professor.

Dr. C. Nelson Grote, dean of the School of Applied Sciences and Technology and professor.

Dr. Palmer Hall, director of Graduate Study in Education and professor, and

Dr. Madison Pryor, chairman of the Division of Biology in the School of Sciences and Mathematics and professor.

The award, which was presented at the association's annual Awards Banquet, May 25, is based on a minimum of five years of service on the Morehead faculty, contributions to the field of education, professional and institutional growth, advanced research and cooperation with faculty and students.

Past recipients of the award have been: Dr. Wilhelm Exelbirt, 1964;

Dr. Margaret Heaslip, 1965; Dr. J. E. Duncan, 1966, and Dr. Mary Northcutt, 1967.

Dr. Pelphrey, a native of Carter County, joined the Morehead faculty in 1962 after four years as chairman of the English department at the Abadan Institute of Technology in Abadan, Iran.

He graduated from Morehead State University in 1949 with a bachelor of arts degree before receiving his masters in 1950 and a doctorate in English in 1958 at the University of Kentucky.

A native of Graves County in Western Kentucky, Dr. Mangrum received his A.B. degree from Washington University in St. Louis and his doctorate in philosophy from the University of Chicago.

He came to Morehead in 1959 and started the philosophy department, which he heads today at the University.

Dr. Grote came to Morehead in 1960 after receiving his doctor's degree in education at the University of Illinois. Previously, he had received a B.S. degree in education at Eastern

Illinois University and his master's at the University of Missouri.

Currently lieutenant governor of Zone 12, Optimist International, Dr. Grote also held supervisory positions with the Division of Industrial Arts in the Kentucky Department of Education, Frankfort, before coming to Morehead.

Dr. Hall has been at the University since 1957. A native of McDowell in Floyd County, he received his A.B. degree from Tusculum College at Greenville, Tenn., his M.A. from the University of Kentucky and his doctorate in education from Kentucky.

He also is a graduate of the University of Kentucky Law School and was admitted to the Kentucky Bar in 1939.

Prior to coming to Morehead, Dr. Hall was Dean of the College, West Virginia Institute of Technology, Montgomery, W. Va.

(Dr. Pryor was honored as this year's recipient and article appears in this issue of *Alumnus*.)

## Morehead University Faculty Member Earns Doctorate In Education From Ohio

Norman N. Roberts, a Morehead State University faculty member for the past 16 years, has earned his doctorate in education from Ohio State University.

Dr. Roberts, who is acting chairman of industrial education at Morehead, earned his BS degree from Morehead in 1950 and his MA degree from Stout University at Menomonie, Wisconsin.

His dissertation, "Industrial Arts Education in Kentucky," was presented at The Epsilon Ti Tau Breakfast at the national convention of the American Industrial Arts Association in Minneapolis on May 7.

Members of the organization feel that Robert's dissertation has significant implications for not only Kentucky but also each of the other states of the nation.

Robert's wife, Margie, a home economics teacher at Rowan County High School, also is a graduate of Morehead.

## New Art Building Among Nations Best

Morehead State University's new \$1,200,000 Art Building leaves little to be desired in providing the facilities necessary in discovering and developing the talents of creative students.

It is the only building of its kind on a Kentucky college or university campus devoted exclusively to the teaching of modern methods of art instruction and providing sound basic experiences for students naturally gifted in the visual arts.

It is being used for the first time during the University's summer term, which opened June 12.

There are three levels to the building.

A three-level gallery, to be used for student and faculty exhibits as well as for traveling art exhibitions, is entered from the front door.

More than 100 works of 15 art seniors were exhibited in the gallery last month. One of the most impressive rooms in the building, it contains more than 2,400 square feet of exhibition space.

Also on the main floor is a 20-by-30-foot, carpeted student lounge, to be used for the University's Art Club meetings, receptions and special events involving a limited number of people.

Also located near the main entrance is the office of Henry Glover, head of the department. Connected with it is a faculty conference room and his own personal studio.

The entire building is equipped with a sound system, originating from Glover's office and over which music can be piped to any or all of the classrooms or studios.

A 30-by-15-floor faculty lounge, complete with a kitchenette, also is located on the main floor. Like the

student lounge, it will be used primarily for receptions and special events connected with exhibits.

Each of the department's 10 teachers also have private studio-offices.

Other main floor facilities include a craft studio for classes in enameling, jewelry design and weaving, as well as classrooms for elementary and secondary art instruction.

Located on the lower level is a ceramic studio containing 1,200 square feet of working area and equipped with a large kiln.

Adjacent to it is a 40-by-50-foot sculpture studio with individual student cubicles. This opens onto an outside sculpture court landscaped with trees and shrubs. Another leads off the gallery on the main floor.

Also on the lower level are three welding booths, equipped with special exhaust fans and lighting. One booth is designed for electrical arc welding and two for acetylene oxygen welding.

Perhaps the most impressive room in the building also is located on the lower level. It is the 1,764-square-foot visual presentation room.

Containing 164 seats on seven terraced levels and equipped with projection equipment, it will be used for the teaching of art history, film presentations and other special events.

On the third floor are skylighted studios for students who will be working with oils, water colors or drawing.

In addition, there's a design studio, equipped with photography darkroom and cameras for use in connection with commercial art classes, and a graphic studio, designed for print making and equipped with a custom-made sink for working with acid and other materials used in etching.

All studios in the building are

equipped with a three-way lighting system, involving warm and cool fluorescent as well as incandescent lighting, which, when combined and regulated, produces artificial lighting virtually the same as natural light.

The building also is completely air-conditioned, equipped for controlled humidity, and contains an elevator for student use.

Custom-made student lockers are located on the two upper floors. These are 32-by-42-by-12 inches and designed to hold students' drawing boards and supplies.

"Inadequate locker space always has been a problem for our students," Glover says, "but not any more. These lockers have been carefully designed to hold everything the average art student will have to work with."

When formally dedicated this fall, the new building will be named the Naomi Claypool-Tom Young Art Building.

Mrs. Claypool, now retired, was head of the Art Department at Morehead for 40 years, and Young was an instructor for 28 years. He died of a heart attack several years ago. His son, Don Young, is one of the instructors who will be teaching in the new building.

## Jones To Work On His Doctorate Degree

Roger H. Jones, for the past 2½ years a member of the Art Department and director of professional relations at Morehead State University, began a leave of absence February 1 to work for the doctorate degree at Indiana University, Bloomington.

President of the Kentucky Education Association in 1964-65, Jones taught art, Spanish and journalism and sponsored the senior class at Breathitt County High, Jackson, from 1953-1965.

In 1965-1966, he served as president of the National Council Education Association Presidents, and last year was president of the Department of Classroom Teachers of the KEA.

At the time of his decision to enroll at Indiana, Jones was serving as the president of the Morehead State University Education Association. He has been succeeded in that post by Don Flatt, a member of the history faculty at Morehead.

He will continue to be a part of The Alumnus Magazine Staff, serving as Art Editor. Jones' home is in Lexington.

MOREHEAD ALUMNUS

## Enjoyable And Rewarding Experience

One of the most demanding, yet most popular, of the courses offered in the School of Applied Sciences and Technology at Morehead State University is Housing 305.

This is the first in a series of two courses offered in architectural design and drawing offered as electives in the School's industrial arts program.

A three-hour course, Housing 305 deals basically with the design, construction and the development of building plans for residential houses. The entire course deals with the residential phase of construction.

During the course, students are required to design and develop a complete set of architectural plans for a residence, including typical details and presentation drawings as well as a scale model of the proposed structure.

Teaching the course is Clyde Hackler, 34, who is in his sixth year at Morehead after coming to the University from near Baltimore where he was teaching at the Hartford County High School.

A graduate of Eastern Kentucky University, he received his Master's degree at the University of Illinois. He is a native of Corbin, Ky.

"Last semester, we had 25 different residential designs constructed in model form by the students taking the course," he said. "These ranged from the most simple and modest home to elaborate homes which would cost as much as \$100,000 to build.

During the current spring semester, Hackler is teaching the second course in the series which follows the same pattern with the exception that it deals with the design and construction of light commercial buildings, such as motels, churches, small apartment buildings, service stations and other types of small business houses.

Many of the plans produced by students who have taken the course in the past have been used to build homes in the Morehead area. Several members of the University faculty live in homes constructed from plans produced in the class.

A few students who have taken the residential course have gone on to use the understanding and practical knowledge they gained to develop plans for local builders as a profitable sideline, Hackler pointed out.

No commercial license is necessary, he said, for the development of residential plans.

Alan Mkitarian, a junior majoring in industrial technology from Haddonfield, N. J., and who spent more than 300 hours building the scale model of his home design, says of the course:

"I loved every minute of it. I wish I had the time to do more of it. I enjoyed the detail work involved in developing the plans and the model."

"It was a lot of work, but it was great because of the industrial concept which is applied at the college level. The class was conducted under conditions similar to those we would find in an architect's office. We were given assignments and final product delivery deadlines, and were expected to meet them—just as we would be required to do if it were the real thing."

## "Miss MSU" Is Crowned

Mary Ann Buddick, 20, a blue-eyed honey blonde from West Mifflin, Pa., is the first "Miss MSU" at Morehead State University. Miss Buddick, a senior and a music major, won the coveted title in competition with 11 other Morehead co-eds, each the winner of a special talent-beauty contest in her respective residence hall or sorority.

In addition to winning the right to represent the University in the Miss Kentucky Pageant in Louisville in July, Miss Buddick also received a \$300 scholarship and a \$300 wardrobe to go with her trophy.

A member of the Eaglettes with the Morehead State University marching band, Miss Buddick stands 5'4" with measurements of 37-22-36. She is president of her sorority, Sigma Alpha Iota, and was a member of the 1967 Homecoming Queen's court. Her parents are Mr. and Mrs. John Buddick of West Mifflin.

Maria Beale Fletcher Growdon, Miss America of 1962 from Asheville, N. C., served as mistress of ceremonies, in addition to presenting several vocal numbers.

The reigning Miss Kentucky, Jo Anne Clark, Jeffersonton and Western Kentucky State University, crowned the new Miss MSU to climax one of the most spectacular events ever staged on the Morehead campus. Miss Clark also sang and accompanied herself on the guitar.

The other contestants were:

Sue Pelfrey, Jackson; Linda Fries, Alexandria; Jane Lindsell, Bethpage, Long Island, N. Y.; Pauletta Click, Sandy Hook; Kathy Glab, Norwood, Ohio; Sheila Rose, Lexington; Pat Pinto, Louisville; Gayle Ann Lyon, Columbus, Ohio; Louie Parrott, Greenup; Kay Ludwick, Highland, Ohio; and Betty Scott Schindel, Mt. Orab, Ohio.

"Miss M.S.U."—1968

## New Alumni Receive Fellowships

Twenty 1968 graduates and students at Morehead State University have been granted assistantships or fellowships for continued study at other institutions ranging from Wisconsin to Florida and as far west at Albuquerque, N. M.

Fellowships went to seven: George Fraley, Middletown, Ohio, to the College of Business and Economics, University of Kentucky; Richard Books, Denville, N. J., industrial education, Stout State University, Menomonie, Wisc.; Larry Burgess, Wheelersburg, Ohio, English, at Ohio University, Athens.

Charles E. May, Prestonsburg, chemistry, Georgia Tech, Atlanta; Heinrich Zehetmaier, Hammersville, Ohio, Geosciences, University of South Carolina, Columbia; Philip Hock, Cincinnati, National Science Foundation fellowship in geoscience, University of New Mexico, Albuquerque, and Wayne Judy, chemistry, University of Louisville.

Seven received assistantships: Linda Armstrong, Peebles, Ohio, home economics, Ohio University; Judith Burnham, Winchester, English, University of Kentucky; Keith Campbell, Pomeroyton, mathematics, Florida State University, Tallahassee.

Robert L. Patterson, Ashland, mathematics, University of Tennessee; Ted Pass III, Jenkins, biology, Virginia Polytechnic Institute, Blacksburg; Gene Samsel, Morehead, biology, Texas A. & M. University; and Francis Shay, Morehead, biology, Virginia Tech.

Research assistantships went to: Lynn Colgan, Flemisburg, economics, Ohio State University, and William Lange, Detroit, industrial labor relations, Michigan State University.

Jerry Hall, Lexington, was selected for continued veterinary medicine study at Auburn University in Alabama; Clifford A. Greers received a tuition scholarship in divinity at the Duke Divinity School, Durham, N. C.; Ronald Richardson, received a scholarship to the University of Kentucky Medical School, and Robert Brown, Blackey, was named as a Morehead intern for the Frankfort Semester next fall.

## Graduation Is Family Affair

Monday, May 27, was a great day for Mrs. Elizabeth Weldon of Augusta in Bracken County.

That day, Mrs. Weldon, who operates her own beauty shop in Augusta, sat proudly by during Commencement exercises at Morehead State University and watched each of her three sons receive a degree from the University.

Not to the knowledge of University officials have three brothers ever graduated from the University on the same day in the past.

Graduating were James William, 26, Nicholas Thomas, 25, and Isaac Appleman, 24.

All are graduates of Augusta High School, where James and Nick played on the basketball team.

Their father, the late James W. Weldon, died in 1952 from complications resulting from an infection suffered while serving with the Army in the South Pacific during World War II. Prior to his death, he was a tobacco buyer and later a government tobacco grader at Augusta.

James, who has signed a teaching contract in the Cincinnati area, received a bachelor of science degree in biology and history.

After attending the University for two years, he served in the Air Force for four before returning to Morehead to get his degree. His wife, the former Mary Ann Waterfield of Georgetown, Ohio, is a sophomore at the University.

Nick received a bachelor of science degree in business administration.

Married to the former Charlotte Ann Thornsby of Augusta, he has accepted an industrial relations position with the Ford Motor Company and will move to Lorain, Ohio, immediately following graduation.

Before enrolling at Morehead, Nick served four years in the Marine Corps.

The youngest, Isaac, is not married. He received a bachelor of arts degree with a teaching certificate in social studies. He did his student teaching at Stanton in Powell County and plans to teach there next fall.

"This was one of the greatest days of my life," Mrs. Weldon said. "Although I think each of the boys was determined enough to get a college education to have done so on his own, there were times when I had to get behind them and insist that they keep at it."

Following her husband's death, Mrs. Weldon attended a beautician school in Cincinnati before returning to Augusta to open her own shop.

"With what financial aid we could get from the government through the war orphans' benefit program, what the boys could borrow and make themselves and with what help I could give them, we've been able to get the job done," she said.

"It's been a long, hard pull, but when I see each of them get their degrees, I'm sure the thrill of it all will erase the memory of the problems we had along the way. I just wish their father were here to share it with me."

## Family Invests 45 Years-Receives 15 Degrees

Among the 709 receiving degrees from Morehead State University this spring were a mother and daughter from an Eastern Kentucky mountain family which has invested 45 years in study at the University.

When President Adron Doran handed out the diplomas Monday, May 27, during the University's 45th Commencement exercises, Mrs. Grace C. Amburgey, Morehead, and her daughter, Barbara, 21, received the 14th and 15th degrees awarded members of their family.

Mrs. Amburgey received a master's degree in education with emphasis on library science, and will work in the University library this fall.

The daughter, Barbara, 21, received a bachelor's degree in education and plans to continue her education by working toward her master's degree at Morehead.

Another daughter, Betty Sue, 20, a sophomore in the School of Education.

Mrs. Amburgey, who taught school for 19 years before returning to the University 18 months ago to work on her master's degree, is a daughter of the late "Banjo Bill" Cornett of Hindman.

A Knott County mountain farmer and former member of the Kentucky Legislature, "Banjo Bill" Cornett was widely-known across Eastern Kentucky for (as his name implies) his ability to play the banjo and his

singing of mountain ballads. He died in 1960.

His widow, Mrs. Melissa Cornett, 72, still lives in the family home at Hindman.

To them were born 10 children, eight of whom hold a total of 12 degrees from Morehead State University. Barbara Amburgey will be the second grandchild to graduate from the University, and two others currently are students there.

In addition to Mrs. Amburgey, whose husband, Homer, is a disabled World War II veteran, the members of the immediate Cornett family who are alumni of the University are:

Coney Cornett, principal of a school in Greenville, Ohio, who holds both a bachelor and master's degree from the University. His daughter, Mrs. Carolyn Cornett Luft, graduated in 1965 and presently is employed at Wright-Patterson Air Base, Dayton, Ohio. His son, Billy, is a sophomore at the University today.

Coney's wife, the former Jewell Sutton of Knott County, also is a graduate of Morehead.

Mrs. Lola Jayne Jones, who holds a bachelor's degree, is a teacher at New Smyrna Beach, Fla.

Mrs. Lake Cooper, a member of the mathematics department at the University, holds both bachelor and master's degrees from Morehead. Her husband, Warren, one of the University's all-time great basketball players,

is basketball coach and athletic director at Rowan County High School in Morehead.

Another daughter, Mrs. Harry Smith, a housewife at Crown Point, Ind., holds a bachelor's degree as does Mrs. John Mayo, Morehead.

Brode Cornett is a teacher of mechanical drawing and a dealer in antiques at Arcanum, Ohio. He also holds a bachelor's degree, as does a third son, Bernie, who is employed at the Lexington Army Depot.

Brode's wife, the former Jeanette Smith of Knott County, attended Morehead but did not graduate. Bernie's wife, the former Joann Cragger of Johnson County, also attended Morehead.

The other two children in the family attended the University but did not graduate.

A son, Scott, who attended for two years, is associated with the federally-sponsored Headstart program, and lives in Hindman.

Mrs. Mildred Risner, the oldest of the daughters, attended for a few weeks before "getting homesick" and going home. At one time, she "kept house" in Morehead for four of her brothers and sisters who were enrolled at the University at the same time—Mrs. Amburgey, Mrs. Cooper, Mrs. Jones and Cornett.

"Mother deserves a lot of the credit for the educations we have been fortunate to receive," Mrs. Amburgey said. "She never let up in insisting that each of us get a college education, and she was always quick to encourage us when things seemed difficult."

Mrs. Amburgey, who periodically taught school and worked at a dormitory cleaning job to help finance her education, taught for 10 years in Knott, Floyd and Perry counties before her family moved to Greenville, Ohio. There Mr. Amburgey was employed with the American Aggregates Corp., the world's largest sand and gravel company.

She also taught for nine years while living in Greenville before moving to Morehead to work toward her master's degree.

"Although it was fun studying with the girls every night," she said with a sigh, "I'm tired."

"I have enjoyed every minute of it, but I must admit I'm glad all the studying and extra work is over."

# **FIGHTING FERRET**

## ***Fearless Hunter and Playful Pet, He's a Far-In-Friend Of Man***

By Matt D. Hayes

"Jed Moore had several," began one hunter of old, his eyes twinkling as he remembered the good old times when game laws were mere writing and nothing more. "Often used 'em to put meat on the table."

"Yeah," joined in another. "My daddy hunted with Jed some. They went out one Saturday morning at daybreak and was home before noon with two coffe sacks full of rabbits. It took Mom two days to can 'em."

A third, silent until now, offered his testimony. "My, but they had a mind of their own sometimes. I had to go to the house for a shovel and mattock to dig mine out when he came upon babies in the den. The old rabbits would get out quick, but the to plug up the hole different times babies couldn't. I guess a ferret would stay in the hole until he had eaten every last one if you didn't dig him out."

Forty years ago, all anyone had to do to be welcomed into the squat, spit and whittle group at the village store was to own a ferret. A ferret owner's conversation was to be listened to and enjoyed; he was a hunter, a lover of animals that hunted, and he always had some new anecdote about his ferret which would delight even the most discriminating of the crack-barrel crowd.

And although the ferret population is reported to be dwindling, things haven't changed altogether. Saturday gatherings around the village store or county courthouse are still much in vogue in parts of Kentucky, and all the newcomer has to do to be accepted is utter the magic word, "ferret."

The men of Eastern Kentucky grew up with a healthy respect for life. They come from a long line of farmers plagued by varmints which killed stock and poultry and destroyed crops. Those men had to hunt; it was an economic necessity.

Little wonder then that these hardy men took to the ferret, for ferrets are natural hunters. Ferrets are small and agile with a love of adventure and a desire to explore deep, dark passages in the earth.

I can vouch for the ferret's ability where hunting rats is concerned. I watched a ferret drive rats from their tunnels beneath a barn in Eastern Kentucky just a short time ago, and the results were just what the old-timers had said they would be.

Rats go crazy when they meet a ferret, even though the rats are almost always bigger and heavier.

I thought of this as we left the farmhouse and walked toward the barn we were to de-rat.

The barn was not an old one, but the rats had found it and set up housekeeping already. The ferret was placed on the ground, and without hesitation, she began her hunt. Close to the ground to begin with, she crouched lower, lengthening her body fantastically, and sniffed, weaving her head and forequarters from side to side like radar. She hit a scent and started scurrying along, her slender body outlining exactly the trail she followed. Her nose led her toward a tiny chink under a board, and before I could be sure there was a hole there, she was inside it.

There was complete silence for perhaps 15 seconds. Then we heard the faintest hint of noises underground, scratching, or thumping.

Suddenly a shower of pea-sized clods erupted at the base of the wall and a huge grey rat excavated himself out of mortal danger right into our midst. He sat up, hesitated, and and ran off to disappear into another hole.

Soon the ferret appeared, cool and calm, the emotional counterpart of her quarry. She was still on the scent of the rat, or perhaps another, for she started tracking again and oozed into another hole.

Again there was the dull sound of scuffling underground, and another rat ran for his life.

Evidently he saw us, for he headed back beneath a wooden platform which was resting almost on the ground. We could see his legs churning and detect winces of panicked

pain as his head rattled against the low floorboards in his flight.

The other rats must have got the message, for we didn't see another all afternoon. Our ferret wasn't finished, however. If all the rats had left, there was other game at hand.

A friendly old cow had found a cool place inside the barn where she would be at ease and chew her cud at leisure. Our ferret saw her and went into action. I have not yet decided whether a ferret is fearless or just plain stupid, but there are no other alternatives, and I am inclined to believe the former.

At any rate, the ferret came upon the cow after emerging from one of the tunnels under the barn. She was evidently frustrated by the lack of action she found, and she was hungry. At first she was dubious. She couldn't believe it. She looked at the cow, walked over to her, reared up on her hind legs and sniffed the cow's flank delicately. Then she opened her mouth and bit. The cow's flank was too big and flat for the ferret to do any good, but the cow realized her privacy was being violated. She arose quickly and left. The ferret just looked after her, mouth still open, weaving from side to side in disappointment.

So, ferrets really are ferocious little beasts. But they are not alone in this. Rats are just as deadly when cornered, as are many animals. What makes ferrets such good hunters where man is concerned? Their natural tameness.

Henry Hainline of Creston, Iowa, a breeder of ferrets for over 40 years says, "Ferrets are naturally tame and playful; hundreds are bought as pets each year.

This innate friendliness to man, and other characteristics, makes them well suited to numerous other tasks too. Hainline says that many of the hundreds he sells each year are bought by medical labs. Their tameness makes them easy to work with, and certain of their bio-chemical characteristics make them ideal for experimentation. The little animals did yeoman service as "guinea pigs" during the flu epidemics in past years.

Often, ferrets aid contractors in building construction. They are used to string electrical wires through conduits. All the exits are plugged except the one where he is desired to emerge. In a few seconds, the ferret appears, trailing his string. The Contractor then ties wires to the ferret's

string and pulls them through, certainly a great saving in time and money over the costly alternative of ripping out a well and laying new conduit.

But all these things, beneficial as they are, would bore the tamest ferret who ever lived. Their real love is the hunt. Chances are that many of the little hunters have been bored ever since the '20's when states started cracking down on unfair means of bagging game. Then legislatures outlawed the sport of hunting with ferrets, and penalties were levied against violators. Some states even banned

the ferret outright; Most made it very difficult and expensive to carry on such activities.

Pennsylvania, for example, charges a license fee of \$10 per animal. Ohio allows ferrets within the state without permit or license, but hunting rabbits is expressly forbidden-unless the hunter is a farmer who has an orchard in danger of attack from rabbits. Then the hunt is on, with the full blessing of the law.

Kentucky charges a \$2 licensing fee for ferrets. But, like Pennsylvania, it strictly prohibits their use in hunting game. No recent violations have

been reported. And probably none have taken place.

But it's hard to imagine a hunting man who could keep from putting a fine shotgun or a good hound to the test. Or maybe, as one wag suggested, all the Kentucky ferretmen moved to Ohio where they immediately went into the orchard business.

MATT D. HAYES, a native of Lawrence County, Kentucky, and a graduate of Morehead State University, is head of the English department at Hamilton Township School, Columbus, Ohio.

## Priorities, Understanding Key to Problems, Senator Hatfield Tells 1968 Graduates

Sen. Hatfield discusses American education with Quinten Hatfield, Morehead Student Representative on the University Board of Regents.

I come today not as a dreary pessimist nor as a "Pollyanna" optimist. But hopefully I can speak to you in certain terms of realism — realism of both the issues and the forces and the trends that we face today.

I am concerned, but I also believe that America has the dynamics, the genius, the capacity to meet our problems and to do it well and appropriately.

One thing that causes me great concern is that we are tending toward labels. We are tending to polarize people into antagonistic groups.

I am sure all of you were concerned by what we call the law and order problem. It seems that there is in this particular issue a polarization of people—those who would support and engage in what we call anarchy, and those who would respond by repression.

Anarchy and repression. Neither will solve our problem. Those who want to beef up the police force and bring in the troops and say "let us maintain law and order at all costs" may have a point as far as maintaining a stable society is concerned. But they stop too often at that point and fail to address themselves to the causes of disorder.

There is a necessity to consider both those problems, not in extremes but in what we would consider the great middle area. Polarizing the people today between those who are defenders and dissenters of a war issue again does not tell an accurate story. Hawks, doves, chickens, eagles, owls, what ever kind of bird that you want to use as an application for a label sometimes is not accurate at all but rather represents what we might call "the enemy of simplistic approach."

I would like to talk a little about the need for priorities and understanding. You have an opportunity to provide the kind of solutions which would eliminate the simplistic approach and will tend to demonstrate that answers are not found every time in the "either/or," in the black or white of the case. But rather per-

haps in gray complexity will be found the truth.

The priorities of which I speak are many fold and again it makes no difference whether you are a defender or a dissenter. There are certain priorities that all Americans must consider today, priorities which are not being considered properly.

Just where do our priorities lie?

Is it more important to kill a Viet Cong in South Vietnam or to save the embittered poor of our own country?

Is it more important to bomb south Vietnamese villages into rubble or to reconstruct our own cities of this nation?

Is it more important to involve ourselves in a revolutionary war in southeast Asia or try to prevent a revolutionary war at home?

We are expending today over thirty billion dollars in a war that has yet to be clearly defined in terms of objectives. Over 130 billion has been expended since 1946 when we first embarked upon this policy of trying to use an exclusive military instrumentality to solve basically a political, economical and social problem.

Do not forget the lessons of history because during that period of 1946-1954, we ultimately supported 80 percent of the cost of the French War. The French controlled Hanoi and Saigon, yet they lost in the debacle at Dien Bien Phu. They also lost 96,000 dead troops. We have lost over 25,000, and, yet, we realize that

we are pursuing further and further the kind of policy of escalation which has not brought us either victory or solution.

One month's cost of this war would provide enough library facilities for all Americans who today do not have libraries.

One month's cost of this war would eliminate all the teacher shortage in America, elementary, secondary, special, vocational, technical, higher education, post doctoral needs and other teaching professions.

One month's cost would not only eliminate all the teacher shortage, but all of the nursing shortage of those called to provide the nursing for the healing professions and their facilities.

It would provide for the elimination of the doctor shortage in this country today.

It makes no difference whether you defend or dissent the war policy, the difference is that these are some of the costs and these are some of the needs of America today.

Four month's cost of this war would have replaced one million dilapidated housing units for one million Americans living in substandard houses — poor people living in the ghettos.

Eight and one half month's costs of this war would have built all the school and hospital facilities we need in this nation today.

Fifteen and one half month's cost of this war would eliminate all the metropolitan transportation systems needs for the next 10 years, would remove all the urban renewal problems for the next ten years, and all of the air and water pollution problems for the next ten years in America.

Do you realize that 2/3 of the skilled engineers and scientists of America are diverted to the cause of war.

Some 170,000 teachers are needed, and yet, at the same time, this year 1/2 to 2/3 of all of our draftees will be Bachelor degree and Master degree holders.

Let me remind you that the government of Vietnam has still to draft their students, and one qualifies as a student in Vietnam if he has a single unit of course work.

We need to help people in other nations, but we must measure the cost in this country in terms of lives, in terms of material, in terms of diversion from other needs of this nation. These are some of the priorities that all Americans must consider.

We know that this coming year we

will experience a 70 percent reduction in our first year graduate programs in our institutions of higher learning, a 70 percent decrease which means a 63 percent drop in the field of physics and in the field of engineering alone. This is a nation dependent upon technological advancement and skilled personnel.

I am very concerned about the depreciation of human life. Every night into our homes via the television come the bloody pictures of war. Everyone knows that war is hell. Of course, any war is hell, but when we see today a nation which measures its progress and its advancement in terms such as the kill ratio and the body count, it's time for concern.

That's the terminology of the slaughter house out west. This depreciates human life, and there is a relationship between the instrumentality of violence abroad and the violence we see in our city streets today.

You say, "But, oh, what's the answer?" "Do you have a solution?"

Let me remind you that when those who went from the streets of this great nation to Philadelphia in 1787 to consider the inadequacy of the Articles of Confederation, they did not go with the drafted Constitution in hand. They did not have a blue print, a panacea, but they did recognize one thing, that the Articles of Confederation had been inadequate to meet their needs.

There is a *myth* today in America that somehow before one can dissent, one must have a panacea, a blue print, I do not have, but I do know this: our present policy is inadequate. It has not served the needs of America. I ask you to think about history and the economic and social implications of this policy. The need is going to be met when people like you think and act and speak and have the courage of your convictions.

I know it is unpopular, but you are going to face many situations in which it will be much easier to go along with, to conform to, or to support the status quo rather than to challenge constructively and intellectually.

Usually, this is so because of apathy and lethargic attitudes. I do not believe in challenging the status quo for the sake of action, but rather for the sake of change and improvement. That is the essence of progress and that is what has built America.

I am not speaking of institutions.

I am speaking of people. Here then is another priority.

Are we going to serve people or are we going to serve institutions? I am reminded of the time when I was at Berkeley hearing about the demonstration in which one student carried a placard and upon that placard he had written the words "Jesus, Yes—Christianity, No." Jesus, Yes—Christianity, No.

To the sensitive soul this might sound rather offensive, but on the other hand, there might be a rather profound lesson for each of us. In the personality and in the person of Jesus Christ was something very attractive, something very compelling, truth, humility, God incarnate.

Yet, as the student saw the institution of the church and often times what might be called the institutionalizing of Christ, he did not see something that measured up to the same attractive and compelling personality.

I use this not to indict the church, because the church is vital as an instrument and institution, but to suggest that the fault of worshipping an instrument rather than an objective or goal is grievous.

I submit that many times in our political policy we are engaged in supporting and perpetuating institutional life for the sake of the institution and we lose perspective of the individual.

God created each human being and He gave each human being an intellect, a soul, a body, feeling, emotion—all of the things that compose and comprise man. We find too, that we sometimes lose sight of man as a total being. Remember what Plato said. Plato said that the error of the physicians of Greece is that they were attempting to cure the body without the soul—without consideration for the soul.

I think this is oftentimes true with our quest for policies both national and international. Look at our great concern today about the competition of communism in the international realm.

I am concerned about communism. I might say that I have been involved in communist civil war. Some of us got involved after World War II in the Chinese Civil War in which we fought the Chinese Reds from Peking south. But let me say to you that those with whom we worked, oftentimes on the Chinese Nationalist side, were soldiers 15 and 16 years of age who knew little of what they were fighting for or what cause they

supported. Many times, again, they were serving an institution. One might wonder, then, why there has been a spread of communism in Asia.

Let me indicate to you why I feel there has been a spread of communism in Vietnam. Why should Ho Chi Minh be the great popular leader he was following World War II? We supported him, don't forget. We were his ally. He was our ally.

Some of us stood in the streets of Hanoi in September of 1945 as he raised that flag over City Hall. There was on the flag, the hammer and the sickle. It was the flag of Vietnamese Nationalism. I'll tell you why President Eisenhower said in his memoirs that if a free election had been held, Ho Chi Minh would have won 80 percent of the vote of South Vietnam as well as North Vietnam.

Because he espoused a communist doctrine? No. Because he had one simple phrase that was understood by the people. "The land shall be yours." To the South Vietnamese and to the North Vietnamese this meant for the first time in their life that they were going to have economic security, they were going to have food in their stomachs.

Now you can say he lied and he was dishonest. The point is he was addressing himself to the needs of the people at the time just as we were addressing ourselves to institutions of political establishments.

The greatest offensive that we could wage against communism today is not through bombs and bullets, but through food production to feed the hungry, miserable people of the world.

Four million people will be added to this globe by the end of the year. Three million people will die this year because of starvation.

Do you realize that 50 per cent of the world's population in the underdeveloped parts of the world will never reach the age of six? They will die because of starvation and malnutrition. History counsels us again that revolutions are not born out of a passion for blood letting.

Revolutions are born out of impatience with human misery. This is the real war. The real war is against that which is misery and starvation.

Those of you who are going into teaching, must be reminded we are losing the battle today in the battle for literacy. The world's illiterate will increase in gross numbers by some 200 million people.

We are losing the war against hun-

ger and at the same time we put our priorities on destruction. Let me assure you that I believe in strong defense—military institutions that will defend our system. We must have them. But we must have balance.

We're spending billions to try to beat the Russians to the moon and yet as we compete for the moon, most of the world's population is competing for bread.

We must remember, too, that the nation that unlocks the ocean will have greater influence and prestige than that nation which puts a man on the moon first. Because it is the ocean that covers 71 per cent of our world's areas. It is here that we will find the necessary protein to build the minds and bodies of people.

We live in a magnificent age of technology. We are engaged in a hot pursuit of materialism. And I recall that when man was first studying himself and asking questions, as in the case of the ancient Greeks, he asked "What is Man?"

He was considering his relationship to his Creator. He was considering the fact that his environment was his enemy. Yet today, we have conquered our environment to a great extent, but we have also determined more about what man is through what man has rather than what man is as a spirit. I know this is very old fashioned, but let me point out to you that it is not a question of theology to understand what man is.

It is a very practical question. It is very pragmatic. Judge Learned Hand, one of our great legal minds of our country, has said that man in America is attempting to place all of his hope for security and liberty on the Constitution, in the courts and in the statutes. This is a false basis for our security and our liberty because, he said, when liberty dies in the heart of men then no Constitution, no statute, no court can save it.

It is a question of the spirit. It is something that cannot be answered by legislation. It cannot be answered by money and possessions. It is something that can only be answered by each individual understanding who he is, why he is and what his relation is not only to his God but to his environment and his fellowman.

It was Albert Schweitzer who said, "I do not know what your destiny will be but one thing I do know: The only ones among you who will be really happy are those who will have sought and found how to serve." Again, this is an element of the

spirit. This is a character of man, a part of his character that cannot be provided by institutions.

I am deeply concerned that as we progress in America today, we tend to put our emphasis upon institutions and material wealth and power.

It was twelve only a group of twelve, who were committed to a person and to a great cause and a new way of life. They were called the apostles and they were an element that helped overturn the might of the Roman empire. They were a minority.

They were a small band of men and yet they had within them a power of love, not a power of an institution, not the power of materialism, but the power of love. We have been taught that the greatest power a man has to cast out fears and doubts is the power of love. St. John has told us this.

He said perfect love casteth out fear. That is why I am not fearful.

That is why I feel that we have a great destiny and a great country which can conquer these problems. But I do believe we must mobilize the real instrumentality of power which is the power of the spirit.

It is a cause for a spiritual renaissance. It is a need today for men to understand their relationship to their Maker. To understand why they are here and for what purpose they have been called to serve.

As we mobilize this great divine power as represented and incarnated in our Saviour, Jesus Christ, we will find man equipped not only intellectually but with the spirit to do that which is needed to build not only a powerful and influential life but in turn a powerful America, an understanding America with priorities that will meet men's needs not only here but throughout the world.

# MAY CANDIDATES FOR DEGREES

## MOREHEAD STATE UNIVERSITY Candidates For Master's Degrees May 27, 1968

NAME	DEGREE
EDWARD C. ANDRES St. Joseph, Mo.	A.M.
STEPHEN BENEDETTO Rochester, New York	A.M.
MYRNA BERNSTEIN Jackson, Kentucky	A.M.
JAMES M. BOWLING Rock Camp, Ohio	A.M.
TIM BRANHAM Melta Rural Station, Kentucky	A.M.
LARADEAN BROWN Morehead, Kentucky	A.M.
STANLEY CARTON Morehead, Kentucky	A.M.
GLORIA CHAPPELLE Jackson, Kentucky	A.M.

## Alumni Thoughts

### Time For Planning / Partnership

As is the case in most serious undertakings, planning ahead is a fundamental necessity. While it obviously doesn't guarantee success, planning does help tremendously in many ways. It is a must that programs and goals be organized—know what you are doing, where you are heading, and who is responsible for the ultimate success or failure.

The office of alumni affairs is planning ahead with over 7,000 alumni in mind. Our programs have been geared to aid the living/learning atmosphere on campus as well as generate interest with alumni, bridging the gap between college days and alumni years.

Your alma mater is growing and with this growth we naturally increase our alumni participation and potential. Let's form a partnership!

Newspapers these days seethe with stories of dissatisfaction among our youth. We read that they picket against the war, shout for equal rights, demand academic freedom and freedom of speech, or boo guest speakers whose views they dislike.

Much concern has been expressed among our alumni and educational leaders. They are interested, and rightly so, in the growth and development of Morehead State. It is easy to dismiss the organized protestor as not truly representative of today's youth. But should we dismiss the organized effort to infiltrate the

young students mind? Can we afford to wait until he grows out of the rebellious stage or easily influenced period of his life when he could be using his time more seriously to grow intellectually and professionally?

As alumni we can support University programs, continue our interest in new innovations, increase our "giving" to aid deserving students in the scholarship program and faculty awards for excellence in teaching and research. We can continually promote Morehead State by helping secure the better student for classroom experiences. Through this partnership we can further enhance the image of our alma mater.

Let's plan and work together in keeping Morehead State one of the top educational institutions in the nation. It is the intention of the Alumni Association to plan a course of action that will keep all alumni "in the know" concerning University and alumni activities. We now have the advantage of computer programming to assist us in this endeavor.

As we embark on another year I hope you will take full advantage of your alumni association. I hope as "active" alumni you will support alumni and University programs.

Have a happy and fun packed summer and mark October 18-19 on your calendar. This is the date you will return to your alma mater for the biggest homecoming in our history.

Rondal D. Hart
