

BY CAVAN & ANDREWS.

From the Philadelphia Commercial Herald.

Those who live at the present day are strange sights, and bear strange doctrines. Since the election of Gen. Harrison we have seen a party...

What are the Prospects?—Nothing more clear than the views and mischievous spirit of the Van Buren papers...

GEN. HARRISON IN FLEMINGSBURG.—Gen. Harrison arrived in this city last evening by the Powhatan Stage, and took lodgings at Mrs. Duval's at the Powhatan House.

Horrid Death.—We have seldom, if ever, had a more painful task to perform than that now before us. We regret to have to warn to the idle and intemperate.

A very simple but very efficacious remedy.—A gentleman in coming to this city from New York, some days ago, when he happened to get a spark from the locomotive engine into his eye...

The prospect of success brightens every day.—North Carolina, Alabama, Kentucky, Indiana, Maryland, Tennessee, and Louisiana, have shown their attachment to Van Buren...

This is a very simple way of removing whatever may have got into the eye, and it will be well for every body to remember it.

A third attempt, according to the statement of the private correspondence of the late Louis Philippe, has been made upon the life of Louis Philippe, the assertion of the public prints to the contrary notwithstanding.

The New Orleans Bee of the 23d inst., mentions the receipt of a letter from the interior of Mexico, in which it is said that a project is on foot to unite the Southern States of the Republic of Mexico with the Republic of Texas under an independent Government.

PENNSYLVANIA.—A traveler on the Pennsylvania State works takes the following notice of the several links which constitute the Main Line of communication between Philadelphia and Pittsburg, in such proper operation:—

Hannibal's passage over the Alps and Napoleon's march across the Alps, are not but steam trains, in comparison with this victory obtained by the peaceful state of Pennsylvania over the Alleghenies. The entire length of the route is three hundred and ninety-four and a half miles. You see Philadelphia and Pittsburg, the second cities of the Pennsylvania Canal, along the Susquehanna and Juniata, they cross the summit of the Allegheny by the Portage Rail-road, thirty-six and three fourth miles; and complete your course by the Western division of the Pennsylvania Canal, 104 miles in length. And this work, gigantic as it is, is but little more than half what the State has achieved, as such, in her purpose of internal improvement, and is less than a third of all that has been done in the State, by public authority and by stock companies. Will it be believed that the Allegheny has more than 1200 miles of Canals and Rail-roads, and that she is still projecting, and will no doubt, soon execute more? She is not satisfied with having expended from the State treasury twenty-five millions of dollars. What a noble example of energy in extending the trade and increasing the physical resources of a State. What a hundred part of the zeal had been shown by this, or any other State, in the development of her moral and intellectual resources."

Aid for Texas.—The Vicksburg Register states that Gen. Danlap of Tennessee is about to proceed to Texas with three thousand men. The whole corps is now at Memphis. Every man is completely armed, the corps having been originally raised for the Florida War. This force, in addition to that already in Texas, we have no doubt, will be able to carry every thing before it.—*Bull. Tex.*

The Canadians appear to be alive to the vast advantages of Internal Improvement. In addition to the Welland Canal, so honorable to the North American provinces and the mother country, there is in progress a survey of a route from Toronto on Lake Ontario directly across the country to Lake Huron, thus shortening the distance some hundreds of miles and throwing Lake Erie entirely out of the direct communication. Lake Superior and all Outisconsin, to say nothing of the Upper Mississippi valley, Missouri with its fur trade, are thus made tributary to the St. Lawrence. To counteract the effect of this improvement upon several of our Western States, it will be necessary to open by direct communications every facility between the Southern end of Lake Michigan and the Mississippi, Illinois and Washburn rivers on the one side and the Western end of Lake Erie on the other.—*Bull. Amer.*

A woman with two husbands.—An examination of considerable interest took place before Judge Randall a few days since. A man named Sullivan, if we remember aright, entered a complaint against another for having run away with his wife. He stated that the faithless woman was married to him in Ireland where they had one child. She subsequently came to this country and resided for a time at Boston, while residing there the family became acquainted with a stranger named Jenkins, that boarded in the house and contracted a debt to a considerable amount, for which the complainant sued him and had him thrown into prison. After his release he again visited the house, and succeeded in seducing Mrs. Sullivan, and finally decamped to New York and thence to this city, when Mr. S. had the man arrested and taken before Judge Randall. The woman denied having any knowledge of Sullivan, and said that so far from being his wife she never saw him before. Several witnesses testified, however, that they knew her in Ireland, where she passed as the wife of the complainant. This she contradicted in the most positive terms, and claimed Jenkins as her lawful and only husband.

The Judge however decided against her, and Jenkins was subsequently taken to his trial for the offence of running away with another man's wife at the next term of the Court.—*Bidwell's Rep.*

THE GREAT RACE.—By a passenger in the Car, who arrived yesterday at one o'clock, the result of the great race between Rodolph and Angora, at Louisville, is reported. Rodolph distanced Angora at the first heat. The heat was run in 8 minutes, 59 seconds—track heavy.

Perhaps no other race in this state has excited so much interest as this. Large sums were staked, which will naturally change hands; and some state pride was exhibited on both sides.—*Lex. Intell.*

A Madrid correspondent of the London Morning Chronicle gives a most delightful picture of Madrid and Spain throughout. He says "the appetite for blood for which the Spanish people are remarkable, especially when it can be gratified against an armed victim, has caused the most brutal and dangerous excesses to be committed.

There is no safety for any one walking the streets if he is out of sight of the guard-house. Men are despatched in open daylight in the public streets, upon the simple allegation of the murderer that the victim is a Carrier, and under this pretence many an assassin blow is given upon the countenance of private revenge. These National Guardsmen, on soldiers of the line, whether privates or officers, stand walking together or are liable to be arrested, and upon resistance, shot in the streets."

A curious and sensible friend of ours (says the Bangor Farmer) has made a calculation of the difference to the farmer between having a gate to his enclosures instead of bars; and our friend has found that if the bars are taken down but once a day, the difference in time for one year would be for the erection of three gates! In addition to this, a good gate is a pretty ornament to a farm.

Rail-road round the World.—The great international rail-road between England, France, and Brussels, has suggested the idea of a rail-road round the world, to be constructed at the expense of all nations! It could be completed in ten years, and then we could travel round the world in six weeks.—*N. Y. Sun.*

All the States choose by general ticket, except South Carolina, which chooses by the Legislature.

WHAT ARE HIS CLAIMS?—When the friends of the New York candidate are asked what are his claims to the support of the people, they will reply that he is the democratic candidate, and that he is a very smart man—but when the question is pushed in a more specific form,—what has he ever done for the good of his country?—they are dumb. His name is represented to have been when touched by the spear of Laizurel. Now this is a touch question, and hard to be answered, but the friends of Harrison should persist in asking it, for it is as good a way as any to exhibit the barrenness of the New York candidate's claims. What has Van Buren ever done? The friends of Harrison are afraid to answer this question on their candidate, because they are rich in the materials for an answer. But let it be persisted in for the Van Buren men, they are dumb.—*Culmet & War Club.*

Prospects of the Grain Crops in France, Germany, Holland and England.—The New York Mercantile Advertiser publishes a letter from Liverpool dated Aug. 9, which says—"I have travelled through France and Germany the middle of July, and Holland the last of that month, and England the beginning of August, and the grain crops throughout promise an abundant harvest; so much so, that at Rotterdam on the 28th of July the Corn market was extremely dull, owing to the prospects of the coming crops, and should the weather remain favorable a few days longer all would be gathered in safety."

AN HONEST GAMBELL.—A person in the habit of drinking very freely, being troubled with a sore leg, was advised by a physician to stand for a pint of brandy to wash it with. After obtaining the brandy, he came to the conclusion to throw up a copper to decide whether he should drink it or use it for his leg—it was head for the election, and tall for him—it turning out to be the latter, he gravely exclaimed, "I bar that too."

MARYLAND ELECTORAL COLLEGE.—According to the requirements of the constitution of Maryland, Monday last week was the day of meeting for the election of the State Senate at Annapolis. At the usual hour, the Whigs, 21 in number, were at their post—but a Van Buren man appeared, although the whole 19 were in town. The Whigs rose, and the Van Buren man, when they adjourned till 5. At 5 they again assembled, when the Van Buren member not appearing, they adjourned till 9 o'clock on Tuesday the 20th. At 9 o'clock on Tuesday the Whigs met in the Senate Chamber in the Senate Chamber, and remained in session

until 8 o'clock, P. M. without any proceedings, and then adjourned till Wednesday morning. The Van Buren members remained in town, but still refused to attend.

"Power," our "Resolution" appears to be the watchwords of the Van Buren party—Give us the reins of government and we are content—submit us to you for revolution how difficult a matter may be the consequence. The government—the laws—the constitution—are but play things in the hands of the Van Buren leaders, when brought into conflict with their lust for office and emolument.—*Engl.*

A man, in Kendall, England, has been arrested for marrying two wives in three days.

"WHAT'S IN A NAME?"—One of the bravest men in the United States, and who has had the most desperate personal encounters with the savages, is Gen. Dodge, Governor of Wisconsin.

PUN.—A late marriage between Dr. David Keck and Miss Mercy Dean, of New York, has caused a whimsical friend to remark, that he would wish Mr. Keck very merciful if he had not un-Daen his wife.

NO MISTAKE.—The Boston Herald says:—We learn that a dandy was taken up when the dog sat yesterday—the officer insisted that he was a puppy."

The steamer David Crockett, which has been running two years between Niles and St. Joseph, has been sunk by striking a rock.

A client once burst into a floor of tears, after he had stated the statement of his case by counsel, exclaiming, "My lord, my lord, I did not think I suffered half so much till I heard this day."

An Irishman, on being asked what he came to England for, said—Is it what I came here for, you mane? Arrah, by the powers! you may be sure I went for want for I had plenty of that at home.

IT'S AN ILL WIND THAT BLOWS NOBODY GOOD.—After the battle of Saratoga, Gen. Arnold met Sergeant Thorp, who had lost a leg in the action.

"Well, Sergeant," said the General, "you and I have been unfortunate."

"Not at all, sir," said the Sergeant, "my expenses are reduced."

"Indeed," said the General, "I found it hard work to get a living before, and now I shall have to get one stocking and shoe to buy."

Arnold laughed, and limped off, to his tent to finish his letter to Harry Clinton.

From the N. O. Bulletin.

NEW ORLEANS, Aug. 30.—On Sunday, a negro fellow, a slave belonging to Genis Arnold, Jr. of Jr. of a police officer, was about being apprehended by a Police officer of the Second Municipality, turned upon him and struck him a violent blow in the face, which stunned the officer, and before he recovered, the negro again struck him with a stone. The officer drew a sword and made a dash at the negro, who wrested from him and with which he stabbed him in the nose, and made his escape, pursued by many citizens, who had witnessed the affair. While running he was struck and severely wounded by an awning pole with an iron point, which was thrust into his side, and which he wrested from the man who held it, and with which he, in turn, and with his sword wounded five of his pursuers. He was finally taken and carried to the watch house to await his trial. It was with great difficulty that the police protected him from the summary punishments of the indignant crowd who had witnessed the deed. The negro, who was severely wounded, and will be tried in a few days.

On the same day, and nearly at the same time, a negro woman stabbed a white woman, who attempted to arrest her for stealing. She is also secure, and will be tried to-morrow.

APPRENTICE WANTED.

A youth of good disposition and industrious habits, desiring to learn the printing business, would be a good situation at this office, and would be taken on an apprentice on liberal terms.

PROFESSOR.

HAVING taught through their friends, as they believe, the most difficult Campaign in their editorial career, now confidently look to the friends around them for an increase of their subscription. They are aware that those counties around her that have pressed, can if they will, not only support our paper, but will sustain at least two. The terms of this paper are, for a year, subscription \$2.00 if paid in advance, and if not paid in advance twenty five cents will be added for every three months until the end of the year.
