

Cleaner and Less Numerous Race. By Mrs. SARAH PLATT DECKER, President National Federation of Women's Clubs.

THE thing we Americans must learn, if our country is to continue in its place at the head of nations, is to disregard such appeals as have been made by the president of these United States WHEN THEY ARE UNQUALIFIED.

When a nation such as England has to reduce its standard for entrance to the army because its men are inefficient, because of unwholesome prenatal and social conditions, it is time to take steps toward saying, by legislative enactment, if need be, WHO THE FUTURE FATHERS AND MOTHERS OF THE CHILDREN, WHO ARE TO KEEP THE NATION'S HEAD UP, SHALL BE.

Those who are intelligent and have listened to the president know their own mind and their duty to the country, WHICH IS MORE, but the great mass of the people who hear and heed the "multiply and replenish the earth" doctrine from the lips of the highest governmental authority of the land are the poor, the unprovided for, THE INEFFICIENT AND THIRTYLESS, who when they bring children into the world commit a sin against the children and put the country in jeopardy.

It Is Safer to Steal Now Than Ever Before

FAILURES of banks, with millions of cash and securities stolen, are such common occurrences that the daily chronicles no longer startle us. Are we the most dishonest people on the face of the earth? In our society HOPELESSLY CORRUPT! Steal a dollar and the world will kick you. Steal a million and the world will feel honored by being kicked by you. It is nearly always safe to be a BIG THIEF.

Felony is felony, whether committed by a bank president or a bank burglar. It is high time that we look upon these financial crimes as high treason against public property and PUBLIC MORALITY.

I have kept in close touch with public affairs in this city for twenty years, and I do not hesitate to say that in all that time it was NEVER SO SAFE AS TODAY to be a big thief.

THE MACHINERY OF THE LAW LIES STILL IN POLISHED INACTIVITY, WHILE THE OFFICERS OF THE LAW ARE RESTING AND TALKING.

The love of display, of luxury, of rivalry in family and social life is tempting many men to steal. The MOST FRUITFUL SOURCE of temptation and disaster is the attempt to lead \$50,000 existences on \$10,000 incomes.

An Awful Cough Cured. Nothing to Fear. Mothers need have no hesitancy in continuing to give Chamberlain's Cough Remedy to their little ones, as it contains absolutely nothing injurious.

Asylum Attendants Indicted on Murder Charge

Fred Pharris, Richard Champion and Daniel Adams, former attendants at the Eastern Kentucky Lunatic Asylum of Lexington, and J. M. Cloggett, who is still employed there, were indicted Tuesday morning charged with the murder of Fred Ketterer, of Ashland, a patient in the institution. Champion is the principal of a high school at Jonesville La., and Adams and Pharris are of Lexington. Pharris has been arrested and is now in jail. Ketterer died June 28 and as relatives of the man at Ashland found his body bore many bruises, they started an investigation. The State Asylum Commission has now under way an inquiry into the case.—Lou Post.

OUR RURAL NEWS NOTES

BY OUR REGULAR CORRESPONDENT. Correspondents are requested to place their signature to all letters sent in. These signatures are not for publication, however, but it is a rule which we must insist upon.

WILLARD

Mr. Warburn was here over Sunday. Miss Eva Boothe is suffering much pain from a dislocated ankle. Orman Hunter visited in West Liberty last week. Miss Celia Pennington visited home folks in Elliott Sunday.

Dr. Thompson, of Webville, was a professional caller here on Saturday and Sunday.

Miss Allie Hackworth has returned to Ashland after a delightful visit with homefolks and friends.

Dr. S. B. Watson will be here Monday from Illinois to attend at the bedside of his brother, T. M. Watson.

We regret to announce that our friend T. W. Watson was seriously ill with appendicitis, at the home of Mrs. Jane Kitchen.

Pro. J. O. Daniels, of Soldier, passed through here Saturday afternoon on his way to Webville to be the guest of his many friends.

Misses Pearl and Geneva Fleming were little guests of their grandparents, Mr. and Mrs. Jas. Fleming, of Cottage Home, last week.

Misses Nell Johnson, Ola Duncan and Mable Peay, Messrs. Fields, Hodge and Wilcox left on Monday for Grayson to attend the Institute.

Jeff Hunter and daughter, Bulah, of Terre Haute Indiana, who have been guests of his brother, Dr. Hunter, at Martinsburg, are now visiting relatives here and at Butler.

S. T. Pennington, who has a position in Washington, D. C., with a handsome salary, has taken up the study of law. Sam is rapidly going to the top of the ladder.

Mrs. G. W. Prayter, who has been the guest of her daughter, Mrs. J. E. Gieger, of Princess, for the past two months, is now at home with her daughter, Mrs. D. F. Webb.

Madames W. M. Parlow and H. H. St. Clare went to Louisville Sunday where they will represent Rice Chapel of the Eastern Star organization of this place.

W. F. Fuiz is attending the Institute.

Woodie Danner visited homefolks Saturday and Sunday.

M. S. Qualls has purchased a large line of winter goods.

The rainy weather has damaged crops considerably.

We are sorry to say Mrs. Liza Jordan is no longer with us.

Frank Cooney was a business visitor at J. M. Fultz's Sunday.

R. B. Cooney and wife attended services at Cross Chapel Sunday.

Mrs. Leta Fultz is very ill at this writing, caused by a fall. We are glad to see the weather moderate and get a little warmer.

There is No Free Open Market in America. By United States Senator R. M. LA FOLLETTE of Wisconsin.

THERE is no FREE OPEN MARKET in the United States for a pound of beef or mutton. Don't you know that half a dozen men among the packers fix the price of beef as it leaves the farms? They CONTROL THE PRICE of every pound that leaves the butcher's counter.

There is no market for a bushel of grain because the same constituents which make up the beef trust dominate. And these same men who fix the price of meat have much to do in fixing the price of the fruit that comes to the table even from California.

THERE ARE EIGHT MEN WHO CONTROL NINE BILLIONS OF THE THIRTEEN BILLIONS OF RAILROAD CAPITAL IN THE UNITED STATES. THESE EIGHT MEN CONTROL 90 PER CENT OF THE VITAL MILEAGE OF THE RAILROADS.

There is no longer any competition between the railroads. Ponder upon this and what it means to the country, so dependent upon the great common carriers. I do not say that the government should deal unjustly with the railroads or transportation companies.

I am opposed to government control of railroads. The idea is not a good one, for I am sure the legislation adopted at the recent session of congress, together with what may be passed during the next few years, will be sufficient to control the most obstreperous railroad corporation.

The government should have control of the RATES, and they should be sufficiently large to permit the corporations to earn a reasonable dividend. In Wisconsin the state railroad commission assessed the railroads after going over every mile of line.

EVERY STATE SHOULD HAVE A RAILROAD COMMISSION, WHICH SHOULD BE ACTIVE IN ITS DUTIES.

I think a railroad corporation should earn about 6 per cent dividend upon a reasonable capitalization.

EVERY STATE SHOULD HAVE A RAILROAD COMMISSION, WHICH SHOULD BE ACTIVE IN ITS DUTIES.

I think a railroad corporation should earn about 6 per cent dividend upon a reasonable capitalization.

Pupils Need More Exercise

TWO classes of children in our public schools demand SPECIAL ATTENTION today—first, the children of the business and professional classes; second, the brighter and more ambitious children of every class.

A SOUND AND VIGOROUS BODY AND TOUGH NERVOUS SYSTEM ARE ABSOLUTELY ESSENTIAL TO THEIR SUCCESS.

Muscular exercise and fresh air are necessary to the child to promote growth and development of all the vital organs, THE BRAIN INCLUDED.

The average child needs far more outdoor exercise today than a century ago. He actually has far less than used to be furnished by the farm.

constructing and accepted a position in the A. J. Stamper mercantile firm.

Get your property insured against fire at Brown & Casady's. They represent some of the old line companies "no better" they represent the Hoffman Agency, Mt. Sterling, Ky.

Dr. Logan has had the dwelling on his West Main property, purchased by D. A. Branson did the work.

Albert Counts has given up instructing and accepted a position in the A. J. Stamper mercantile firm.

Why not have your fine horses, mules and cattle insured? You can get it done at Brown & Casady's office. They do a general line of insurance under the Hoffman Insurance Agency, Mt. Sterling, Ky.

We have recently completed an order for a quantity of large circulars for W. H. Scott & Co., telling what they have and how they sell things.

Rev. E. L. Howerton has assumed the pastorate of the Baptist Church. He is able and has good audiences and 117 attended Sunday School there Sunday.

The Popular Restaurant, on Cross street, that, for the past several months, has been running under the proprietorship of Mr. Quiney Adams, has been purchased by Hiram Davis.

Judge Bennett voted for the Junior Order legislation in Congress.

Judge Bennett introduced into Congress a bill for a fish hatchery and if he is able to push it through the coming session it will be located in Tygart's Creek near our town.

Our brick yards are dependent on good times. Our citizens are dependent on the brickyards. The Republican party with its wisdom, affords the former and it is the duty of our voters to vote for the candidate of that party against the candidate of a party that would bring stagnation of business, and idleness to our people. Vote for Judge J. B. Bennett.

The only local issue that concerns our voters is which party has done most for our town. The Republican party or the Democratic party. Any child could answer this: every expression of his fat face and well-clothed body is a sermon in behalf of the Republican party. During the last Democratic administration, how different! Children were half clothed and half fed. It is no disgrace to say that our town was dead, factories closed, nothing doing, no money in circulation, no employment, and starvation, failures and strikes everywhere and many families in want. How is it now? No one will deny that the splendid condition, or rather transformation, was brought about by Republican policy. Judge Joseph B. Bennett is the nominee for that party and it is our duty to support him.

The time to insure your horse is before it burns; afterward, it is too late. See Brown & Cassidy.

Family Skeleton.

Many a person's family skeleton is a state of weak digestive organs inherited from careless ancestors. The skeleton can be laid to rest by Dr. Caldwell's (dixative) Syrup Pepsin. Better do so at once, otherwise it will dog you daily, and keep you in constant misery, and in danger from worse complications. Syrup Pepsin is a specific for indigestion, constipation, headache and biliousness. Try it. Sold by N. M. Hutches, Druggist, Olive Hill, Ky., at 50c and \$1.00. Money back if it fails.

After a brief visit with home-folks here C. F. Harrison returned Wednesday for Sciotoville, O., where he has been employed for quite a while.

YOUNG—MORELAND.

Married, at the residence of Harry Scott, John Young, a son of the late deceased H. B. Young, to Miss Ada Sumate, of Fleming county, Sunday, Rev. E. L. Howerton officiating. Numerous presents were tendered the couple.

Made a Hit.

When Dr. W. B. Caldwell, the sage of Monticello, first suggested his great remedy for indigestion, constipation and biliousness, now known as Dr. Caldwell's (dixative) Syrup Pepsin, its success was so great that it made an instant hit. Since then it has been used all over the world and has never failed to duplicate its first success. Try it. Sold by N. M. Hutches, Druggist, Olive Hill, Ky., at 50c and \$1.00. Money back if it fails.

Life is embittered. Life is too often embittered by the grievous pains and suffering caused by dyspepsia, in one or other of its many forms. No other disease covers such a wide range of symptoms, or causes such varied suffering, to its victims. Stomach ache, headache, dizziness, nausea, biliousness, constipation, fever, etc., all are due to this one dreadful disease. No wonder that thousands are so indignant over the care of their pains by Dr. Caldwell's (dixative) Syrup Pepsin. It is a most marvelous, potent, and unbreathed cure. Try it. Sold by N. M. Hutches, Druggist, Olive Hill, Ky., at 50c and \$1.00. Money back if it fails.

CITY REAL ESTATE COMPANY, OLIVE HILL, KY.

NO. 1.—Located on Buffalo Fork of Tygart Creek, containing 27 acres, 20 acres in cultivation, 7 acres in woodland, balance in pasture. Can make a warranty deed. Good country dwelling, a good barn, finest orchard in Carter county. Part down, and easy terms on balance.

\$550

NO. 2.—135 acre tract, 40 acres in woodland, 40 in cultivation, 85 in pasture. Warranty deed. Good orchard, and 6 living springs, 1 well. A good 2-room dwelling, good barn, 5-ft. vein of No. 2 clay underneath, good soft located on the head of Smoky, near Lewis county line. Terms half down, balance in 1 year.

Price: \$1,000

NO. 3.—Situated on Flat Fork of Tygart, 3 miles of Olive Hill, and 1 mile of Limestone. A 65-acre tract, 40 in woodland, 15 in cultivation 10 in pasture, barn, house and outbuildings are worth \$600; all good land, well watered. 1 mile to church- and schoolhouse, 1 mile to bank, 1 mile to 2 stores. Clay land. Well in yard.

Price: \$950

NO. 4.—Town property valued at \$700. 5-room cottage very neatly built, all rooms finished with first-class lumber, a newly built cellar worth \$75. 200 yards of depot.

Price: \$750

NO. 5.—C. B. Waring Property, 1 acre ground, Frame, Plastered 5-room, color, barn, coal house, summer kitchen, 7 apple trees, good garden, house 5 years old, best situated in Old Olive Hill. A good well, all out 1 1/2 miles sufficient for town dwelling, a very artistic building.

\$1,100

NO. 7.—J. S. Mavity Property, 10 acres in Black Oak Bottom, 3 miles east of Vanceburg. A one story brick frame house of 5 rooms and porch, neat fence, hen house and woodshed, all covered log stable, good orchard of bearing trees, mostly Rome Beauty, one young orchard of 40 trees, just beginning to bear, and two other young orchards containing all varieties, peaches, apples, pears, grapes, raspberries, gooseberries, etc. Land all fenced, soil sandy loam, no rocks, no timber, uneven but all tillable. List \$2,000 for cash, for which price it will be sold. Also has a good cistern at the house, 3 spring and creek of never-failing water. 8 acres adjoining can be bought. Land mostly in grass.

Price: \$600

NO. 8.—Cooper Property, Town property on Woodside avenue; 11-room building; all plastered rooms; just finished all new of first class material; 2 story; bay window front; J. A. lot; fine spring, water handy and never-failing, finest location of any residence in town, 300 yards depot, 100 yards to Public School, all on a good foundation. House alone cost \$1,800. Is offered part down, balance on easy terms.

Price \$1,750

NO. 9.—35 acre Country farm on Tygart creek, 11 miles North Enterprise, 2 miles West Limestone, Ky., it has 7 ft. vein clay opened up, is well watered, 200,000 ft. timber in trees, 20 acres cultivation, 12 in grass, good country house and outbuildings, 1 mile of school, 200 yards to postoffice, lays well, fertile soil, see similar title.

Price: \$1,050

NO. 10.—David Tipton Farm, 20 acres, 12 acres in bottom, all in cultivation but 14 acres, fertile soil all tillable, good cottage home, good orchard and barn, good well water, good outbuildings, 1 mile of Enterprise, 2 miles of Limestone, Creek runs through farm and well watered and fenced, 5 acres in grass, 64 ft. vein asphalt and oil, vein black shale, just chert. It will sell or trade for town property.

Price: \$550.

NO. 11.—A. J. Coates Property, 31 acres, 1 mile from Kottus, on Tygart creek, 100 yards of RR, 200 yards of state road, good fence, well watered, good spring of never-failing water, all tillable and lay-smooth. Good vein of bricklay. All in grass.

Price: \$600.

Cobalt An Evil Spirit Harnessed To Work for Mankind

Is the evil spirit of the old Saxon miners destined soon to revolutionize the automobile industry?

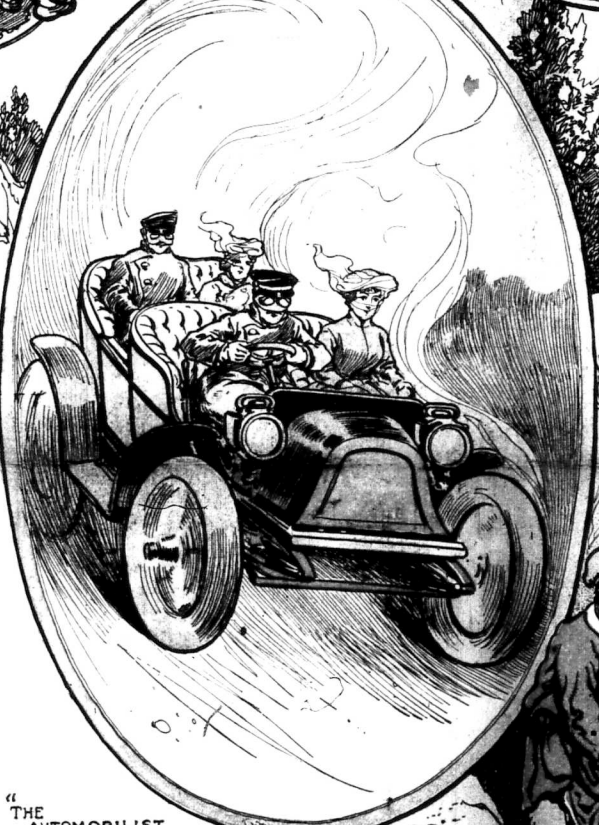

Back in the middle ages, when the famous mines of Schneeberg were opened, the Saxon miners were not long in discovering that the silver was nearly always associated with a strange mineral and that it frequently replaced the precious one altogether. Specimens of this mineral were turned over to the wise men of the kingdom. One and all pronounced it useless. Thereafter, as they mined, and their eyes fell on the common companion of the silver they were instinctively after "the miners," in contempt, dubbed it kobold. That is to say, gnome, or evil spirit; for, like an evil spirit, they said, it was present only to give them trouble.

Kobold, we of to-day still call this metal, which is one of the elements, though the spelling is now cobalt. It was not until the middle of the sixteenth century, many generations after the namers of the metal had been gathered to their fathers, that even slight use for it was discovered. Up to to-day its uses have been limited when compared with other elements; it is still the gnome of old in large measure. But, will this hold good of it in the near future?

"For a number of years I have been working on my electric storage battery, as you probably know," said Thomas A. Edison, in substance, recently. "It has been my aim to build a battery that will take an automobile a hundred miles without having to be recharged. The problem was baffling until I introduced cobalt into the battery cells. Now I believe that I have the battery all right, and the only problem remaining to be solved in order to make the battery practicable is for me to find a way to get cobalt in sufficient quantity and cheaply."

"How does Mr. Edison employ cobalt in his battery?" He smilingly keeps the secret to himself. But, he says, if only he can solve the one problem now confronting him—that of cheap supply—the use of his battery will cut down the present weight of the automobile by half. This of itself will greatly reduce the price of the machine, thus tending to make it a necessity instead of the luxury that it now is. It will also increase the speed possibilities. Last, but not least, the automobilist will no longer be dependent on gasoline, the favorite motive power of to-day, and the objectionable for obvious reasons. Against electricity none of these objections can be raised; it is a noiseless, odorless "fuel."

Thus, Mr. Edison's battery, if the hopes of its inventor in finding cobalt are realized, will bring about a revolution in the electrical world as great as that which took place in the world of water when Robert Fulton demonstrated that a boat could steam her way from port to port even better than she could make the same trip by sail. Cobalt, Edison is now traveling about the country, endeavoring to locate cobalt sources of sufficient quantity and purity to cheapen it to the point where his battery will be practicable. Cobalt now sells for two dollars a quarter pound. A few days ago it was worth twenty-five cents more. A quarter of a pound of cobalt is about as much bulk as the same amount of iron. Mr. Edison's bat-

"THE AUTOMOBILIST WILL NO LONGER BE DEPENDENT ON GASOLINE"

tery calls for a great deal of cobalt, and cobalt at two dollars a pound, Mr. Edison feels, would be looked upon as a luxury by most of those very fortunate persons whose pocketbooks enable them to view even the imported gasoline touring car as a positive necessity to their well-being.

Mr. Edison has inspected cobalt deposits in North Carolina. He has been to Canada. He will go to Missouri. He has other places on his visiting list. Will his patient quest be rewarded by success? That is a question that automobile manufacturers are anxiously asking themselves. No one who knows Mr. Edison doubts that he has got pretty nearly what he says he has in his storage battery. Mr. Edison has never been of that type of man who announces that he has something which time sooner or later proves that he has not.

To invent and perfect an electrical storage battery for widespread commercial use has been the dream, the ambition, of Mr. Edison for years. Nay, it has been his hobby, to the practical exclusion of all other scientific investigation. He has worked day and night over the problem; he has frequently thought he stood on the threshold of success, only to be disappointed the next day, or week.

In all these years that he has been struggling with the problem interviewers have had a hard time to get him to talk on any subject other than his storage battery. His fellow scientists have twisted him good-naturedly on his leg-

ging in of the battery at every possible turn of conversation. It is scarcely to be doubted that he has given more time and thought to the battery than he did to any one of his many inventions that are now benefiting mankind immeasurably. Mr. Edison himself declares that until he has perfected a storage battery along the lines that he has laid down for himself he will not feel that he has done his full share of the world's work.

When one realizes how earnestly, and with what singleness of purpose, one might say, Mr. Edison has pursued the problem of the storage battery, does not the Wizard's more or less prolonged trips here and there over the face of the country in anxious search for the much desired "evil spirit" of the old Saxon miners savor of the intensely dramatic! miners' beds savor of the intensely dramatic?

Cobalt, this gnome, this evil spirit that holds such rosy promise for the future, has been practically unknown to the average person. Let us see what it is and what it does.

It is the principal ingredient of a coloring matter known as smalt, which is employed by lacemakers to correct the yellow color of newly washed linen, and by paper manufacturers as a blue pigment for staining writing papers and coloring wall paper. Smalt is a substance that will give a lasting blue to paper, and, until an artificial ultramarine was introduced, it was used exclusively for this purpose. Smalt is obtained by fusing roasted cobalt ore with pearl-

"THE OLD SAXON MINERS IN CONTEMPT, DUBBED IT 'KOBOLD, EVIL SPIRIT'"

and quartz sand. The molten mass is poured into water and finely powdered. This powder it is that is used after the fashion of indigo and to stain the dainty blue note-paper that is a favorite nowadays for carrying tender messages around the world.

Cobalt, when compounded with oxygen, also gives a blue color, and oxide of cobalt is used exclusively to color glass, porcelain and pottery. The coloring properties of cobalt blue, essentially the oxide of cobalt, is so great that the addition of one-thousandth part of cobalt blue to white glass is sufficient to make the glass a deep blue.

Cobalt blue, as a pigment, is used by painters and water color workers; they could not get along without it without Old Saxon blue, the famous porcelain blue. King's blue, the Thénard's blue, variegated blue, cerise blue, deep blue, employed in glass coloring, all owe to cobalt their blue. And then there is cobalt blue, the most beautiful blue that is used for the groundwork of the old-fashioned blue and gold sign boards; the presence of oxide of cobalt as a base makes it blue.

So remarkably does cobalt possess the power of "making things blue," to use a common expression, that even the faintest trace of it will render iron slag distinctly blue. It could almost be said, in all truth, that cobalt, in compound, tints the world.

Had it not been for cobalt the writers of the old fashioned adventure novels would have been deprived of one of their stock and always thrilling incidents—the invisible letter, written between the lines of the visible letter, and always reaching the heroine in the nick of time and keeping her from dying of anguish or hope long deferred.

A chloride of cobalt, when dissolved in a great deal of water, gives invisible or

sympathetic ink. A faint pink in color when in dilute solution, the color is not discoverable when used on paper. Only when the piece of paper is heated before a fire, thus causing the chloride to lose the water, does the writing stand out blue, thus enabling it to be read with ease. The writing can be made invisible again by putting the paper in a damp place or by holding it over a steaming kettle, a la the heroines of long ago.

According to "Watt's Dictionary of Chemistry," these are the properties of cobalt: "Steel gray, lustrous, crystalline plates; nearly white when polished; hard; somewhat malleable; very ductile at red heat and upwards; slightly magnetic, even at full red heat. The compact metal does not oxidize in air at ordinary temperatures."

Chemically, cobalt is classed with iron, nickel and manganese in the iron group. In many respects it closely resembles both iron and nickel, the latter more than iron. It is found associated with silver, nickel, iron, manganese and bismuth. It is difficult to separate cobalt from its associates, especially nickel. It is seldom

mined for itself alone, it is more profitable to secure it as a by-product. But the day may not be far distant when cobalt will be mined for itself alone. In its greatest quantity cobalt is now produced as an accessory of nickel.

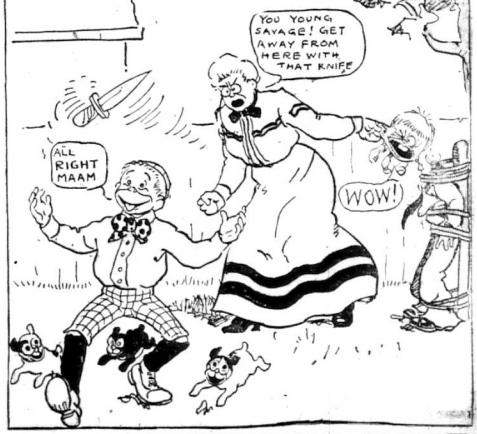

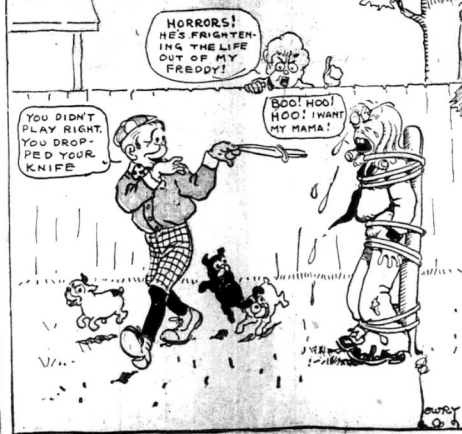

There is evidence to show that the use of cobalt in coloring glass is one of the rediscovered secrets of the ancients. Modern Europe did not know of this property of cobalt oxide until 1590; before that time the "white" glass supposed to be worthless, in compound, as it is now of itself—except in Mr. Edison's battery, of course. Blue pottery and glass recovered from ancient ruins have been found to have cobalt as a base for their color.

Not until almost two hundred years after the first commercial use of this gnome metal was discovered by Scheurer did Brandt recognize it as one of the elements. Now, nearly two and three-quarter centuries after Brandt, it would seem that the element itself is to be proved commercially useful and cause a startling revolution in transportation, if only it can be produced in sufficient quantity and purity to make it cheap. Unless it can be found in a comparatively pure state the long and tedious process will render its use in Mr. Edison's factory impracticable.

The principal localities of cobalt production to-day are Schneeberg, Saxony, where the metal got its bad name; Madam, Norway; Tunberg, Sweden; Mosen, Rhenish Prussia; Bolivia; Chile; a little spot in Missouri; the Transvaal, where a pure variety of what is known as speiss cobalt, free of nickel, has recently been found; and Canada, where it is mined as an accessory of silver. The Canada mines are the latest to be opened. The presence of the element in the Dominion was not suspected until a big cut for a new railroad through virgin forest revealed it in company with its customary bed-fellow, silver. The latter metal at once brought about an influx of miners, who were not long in making the discovery that the by-product of cobalt would be a very valuable asset to the mines. Hence, to-day quite an appreciable percentage of the world's supply of cobalt is being obtained from Canada. Round about the combined cobalt and silver mines, which are more like diggings than mines, a town of several thousand inhabitants has sprung into existence, and it is now possible for the traveler to go from New York to Chicago without a change of Pullman into the very heart of this region, which only a few months ago was a veritable wilderness. Many Americans are living in the town, and not a few of the mines are controlled by Yankee capitalists; it is American money that is largely responsible for the rapid development of the Canada of to-day.

The discovery and development of several more cobalt beds as extensive as the Canadian bed would probably bring down the price of the mineral to the figure desired by Mr. Edison. And with this Wizard of the Chemistry on the head of the metal, who knows where it will be mined next, to the end that you may behold another wonderful revolution in transportation and other speculations of chemistry?

BIG BEAUTY DOLL SLEEPING FREE

THIS DOLL IS NEARLY TWO-THIRDS OF A YARD TALL, the largest and most beautiful Great Big Doll that we ever gave away. She has a magnificent head, with real curls, and lovely big eyes that go to sleep. She wears an immense lace picture hat, trimmed with pretty ribbons. The dainty blouse front and the handsome long jacket, set with ribbon and white embroidery, the beautifully embroidered, bell-shaped skirt, delicate lace trimmed underwear, white stockings and white kid shoes, all in the latest style, make the costume perfectly splendid. THIS IS AN ACTUAL PHOTOGRAPH OF THE DOLL. Send to your name and address for only 25 pieces of our New Art Jewelry Novelties to sell at 10 cents a piece. These are genuine gold plate. Our goods are worn by the best people. Mail these and return our \$2.00 received from the sale and we will send you at once this great, big, beautiful, dressed, jointed and sleeping Doll.

WITH HER WE WILL ALSO GIVE YOU THE COMPLETE COMBINATION SEWING OUTFIT, JUST AS SHOWN IN THE PICTURE, BY MANY TIMES LARGER.

THIS HANDSOME SEWING CASE contains buttons, hooks and eyes, embroidery silk and eight spools of sewing silk, including white, black, pink, red, green and blue. This is something which every little girl longs to own. Remember we give this with the doll, and you get both premiums together without delay. Write today.

Woman's Effort to Please Man

By Professor W. I. THOMAS, University of Chicago

HERE has been developed a peculiar code of morals to cover the peculiar case of woman. This may be called a MORALITY OF THE PERSON and of the bodily habits, as contrasted with the commercial and public morality of man.

Purity, constancy, reserve and devotion are the qualities in woman which please and flatter the jealous man, and woman has responded to these demands both really and seemingly. Without any CONSCIOUSNESS of what she was doing (for all moral traditions fall in the general psychological region of habit), she acts in the manner which makes her most pleasing TO MEN. And—always with the rather definite realization before her of what a dreadful thing it is to be an old maid—she has naively insisted that her sisters shall play well within the game and has become herself the most STRICT CENSOR of that morality which has become traditionally associated with woman.

FEARING THE OBLOQUY, WHICH THE WORLD ATTACHES TO A BAD WOMAN, SHE THROWS THE FIRST STONE AT ANY WOMAN WHO BIDS FOR THE FAVOR OF MEN BY OVERSTEPPING THE MODESTY OF NATURE.

ORINO Laxative Fruit Syrup

Pleasant to take and does not gripe or nauseate

Cures Chronic Constipation, Stomach and Liver Trouble

Stimulation Without Irritation.

ORINO Laxative Fruit Syrup is a new laxative syrup combined with the delicious flavor of fruits, and is very pleasant to take. It will not gripe or sicken. It is much more pleasant and effective than Pills, Tablets and Saline Waters, as it does not derange the Stomach, or irritate the Kidneys, Liver or Bowels.

Constipation.

ORINO Laxative Fruit Syrup will positively cure chronic constipation as it restores the natural action of the intestinal tract. Ordinary cathartics may give temporary relief but the stomach is upset and the bowels are irritated without any permanent benefit having been derived.

The condition of the patient remains unchanged. The Stomach, Liver and Bowels have not been stimulated and in a few days a stronger purgative may have to be taken. This is why Pills and Aperient Waters never give permanent relief. Their violent action results in an unnatural movement of the bowels and it is necessary to keep taking them indefinitely.

Why ORINO is different.

ORINO Laxative Fruit Syrup is the only preparation that really acts upon all of the digestive organs. Other preparations act upon the lower bowel only and do not touch the Liver. It can very readily be seen that a preparation that does not act upon all of the digestive organs

can not cure Chronic Constipation, Torpid Liver, Indigestion, Sour Stomach, etc.

For Bilioussness and Sick Headache.

Take ORINO Laxative Fruit Syrup. It sweetens the stomach, aids digestion and acts as a gentle stimulant on the liver and bowels without irritating these organs.

Clears the Complexion.

ORINO Laxative Fruit Syrup stimulates the liver and thoroughly cleanses the system and clears the complexion of pimples and blotches. It is the best laxative for women and children as it is mild and pleasant, and does not gripe or sicken. Refuse substitutes.

OUR GUARANTEE

Take ORINO Laxative Fruit Syrup and if you are not satisfied your money will be refunded.

Prepared only by FOLEY & CO., Chicago, Ill.

:: AT REASONABLE PRICES ::

We have added this new line to our already large and growing business, believing that it will be profitable to us and a convenience to many of our customers.

Our present line—FURNITURE, etc.,—completed the household outfit with the exception of Stoves, Tinware and Graniteware; hence, the necessity of putting in such, of which we now have a full and complete stock. We are in this business to stay and are going to establish a BIG trade. We know it will take lowest possible prices to do so and have made our prices on our goods at as low mark at which it is possible to sell goods of the quality that we are carrying in stock.

Come and see for yourself and be fully convinced and informed of the above facts.

A HOME IN TEXAS.

Dr. C. F. Simmons, owner of this 60,000-acre tract, having business calling him to St. Louis, has divided this land into 4,200 farms, ranging at 5-10, -20, -40, 80, -160, -320 and 640 acres each, and a 4,200 lot town site; 25 and 50x140; they sell for \$120, payable \$10 per month, no interest on notes; no tax on land till paid. There is an equal chance for the big farms with all. Plan of distribution is approved by the government.

This extraordinary proposition are offering you for \$120.00, payable \$10.00 a month.

A brief history and plan of distribution: Dr. Chas. F. Simmons, of Oakville, Texas, the manufacturer of the famous Simmons Liver Regulator six years ago bought for his only son 60,000 acres of land in Southwest Texas for a stock ranch on which he has since placed \$40,000.00 of improvements. Something over a year ago his son was accidentally killed and since his death the father has practically given away the finest body of river bottom land in Southwest Texas.

WHO IS DR. C. F. SIMMONS?

Here is what every county official has to say about Dr. C. F. Simmons and the land he is offering for sale.

"To whom it may concern:— We, the undersigned, have the pleasure of a personal acquaintance with Dr. C. F. Simmons for the past six years a resident and citizen of this county, and know him to be a gentleman and a man of standing and character and reliability and we consider him responsible and trustworthy in his business dealings. He is the owner of a fine tract of land in this county containing between 55,000 and 60,000 acres. This tract of land fronts on both sides of the Nueces river and contains as fertile a body of land as can be found anywhere in this part of the state. In all our business dealings with Dr. Simmons we have found him to be frank, truthful and trustworthy and it is a pleasure to us to recommend him to the favorable consideration of all persons having business transactions with him. Very Respectfully, W. A. Hill, Co. Judge, Live Oak Co., Texas. G. C. Robinson, Co. & Dist. Clerk. W. L. Lewis, Sheriff & Tax Collector. J. H. McMurry, Co. Assessor. C. H. Regan, Co. Physician. Ira Hinton, Co. Trustee. W. W. Cause, Atty. at Law.

PRESIDENT ROOSEVELT SAID:

"TEXAS IS THE GARDEN SPOT OF THE WORLD."

SUNNY TEXAS AND SOME OF ITS ADVANTAGES.

No other state in the entire Union shows such a variety of soil and produce as does Texas. There is nothing grown on a farm anywhere in the U. S. which is not successfully grown there. It is first in the raising of cattle, horses, mules, production of peaches and cotton in the United States; second in production of hogs. It has more timber than Michigan. It has more prairie than Kansas. It has more Oak than West Virginia. It has more Iron than Alabama. It raises more corn than Illinois. It raises more wheat than Dakota. It raises more fruit than California. It raises more tobacco than Virginia. It raises more melons than Georgia. It produces more oil than Pennsylvania. It raises more grapes than all the balance of the United States together. It has an annual distribution of \$5 for each school child, which speaks for itself, in the matter of fine education of its children. There are no hurricanes or tornadoes or earthquakes or cyclones, its whole flowers bloom 10 months in the year. Where the farmer does not have to work hard six months in the year to raise food to keep his stock from dying during the winter as they do in the north and northwest and where there are no artificial means to have plenty and go in the best society. Where the natives work less and have more to show for what they do than many other country on earth.
