

The Presidency—Letter from Gen'l Taylor

The circumstances under which the following letter was received by the editor, are regarded as a warlike and important one. We felt it our duty, when the first demonstrations were made in favor of Gen'l Taylor for the Presidency, to dwell upon the subject as a candidate for the office, and we desired that some of the suggestions contained in our article should meet the eye of General Taylor, and therefore enclosed it to his address, with a few words expressing our position as a Journalist. In reply to that communication, we have received the admirable and significant letter, which we take pleasure in laying before our readers.

HEAD QUARTERS AYR OF OCCUPATIONS, Camp near Monterey, May 18, 1847.

Sir: I have the honor to acknowledge the receipt of your letter with the enclosure of your editorial extracted from the "Signal," of the 13th of April.

At this time, my public duties command me to say, that it is impossible to answer your letter in the terms demanded by its courtesy, and the importance of the sentiments to which it alludes, neither, indeed, have I the time, should I feel myself at liberty, to enter into the few and most important points which you suggest by article in question. My own personal views were usefulness till the end of the war, when my withdrawal as a military chief, service rendered to my country, common enemy, shall no longer be compromised by their expression or discussion in any manner.

For many sources I have been addressed on the subject of the Presidency, and I do violence neither to myself nor to my position as an officer of the army, by acknowledging to you, as I have done to all who have inquired of me, the true and candid opinion, that my services are ever at the will and call of the country, and that I am not prepared to say that I shall refuse to accept of the nomination to the Presidential office, but that I can and shall yield to the call that does not come from the spontaneous action and free will of the nation at large.

For the high honor of the country, of such an office, I take the occasion to say that I have not the slightest aspiration; as after the termination of the war, I have always, I trust, in the society of my family and particular friends, and in the occupations most congenial to my wishes. In no case can I permit myself to be the candidate of any party, or yield myself to party schemes.

With these remarks, I trust you will pardon me for thus briefly replying to you, which I do with a high opinion and respect of the sentiments and views embraced in your editorial.

As many wishes for your prosperity in life, and great usefulness in the country, which your talents and exertions are embarked, I beg to acknowledge myself.

Most truly and respectfully

Your obedient servant,

Z. TAYLOR.

Major General U. S. Army.

JAS. W. TAYLOR, Esq., Cincinnati, O.

The article, to which reference has been made, was published in the Signal of April 13th, and is as follows:

Gen. Taylor and the Presidency.

We perceive, in various quarters, the nomination of Gen. Zachary Taylor for the Presidency. So far as such a demonstration of public feeling, and the expression of opinion, or trick of political faction, it would be unworthy of notice, but we think it evident that this movement of the public mind has not the higher character of a spontaneous conviction that Gen. Taylor has distinguished an energy and wisdom of conduct, and a modesty of demeanor, which are as requisite as the deliberations of a cabinet as the plan of a campaign.

To suppose that the people are blinded in their political preferences by the bare fact of military achievement, is the grossest error of the popular impulse and the stern honesty of Andrew Jackson, which aroused the sympathy and trust of the nation, and we predict that, whatever skill or success he may attend to in the conquest of Mexico, he will never excite the admiration or confidence which follows the hero of Buena Vista. We are not surprised, therefore, that the friends who are calling for the sword of General Taylor, are the same who would call for the sword of the Gordian knot of political intrigues. But it is a far different question, whether his name and fame shall be made an instrument of mere partisan warfare. In this respect, there is a distinction, which we are confident Gen. Taylor will be among the first to perceive and act upon, and which we hope will be higher than any other man of his generation. He is not to be constrained to make in reference to existing and future agitation of this subject.

What an enviable rank in the eyes of the nation, and the respectability of the world, would it be to see Gen. Taylor now visible! Should he return from the field of the Rio Grande and the heights of the Sierra Madre, with what honors and respect would he be greeted by men of all parties! In this respect, the nomination of Gen. Taylor is an object too high and permanent to be baffled by Presidential votes. All that we desire is the incumbent of the highest office of the nation, to be a man of high and permanent rank with Washington, as an unobscured but eloquent preacher of the highest political morals. How much more enviable such a position than that of a mere soldier, or a man of the mantle of his military honors, over the excesses and dissipation of the party politics.

It is no friend to the country, who would thus seek to restrict the applause of the whole country to the interested clamor of a party. Still, as a citizen of a free Republic, Gen. Taylor is not to be regarded as a mere man, but as a man who can readily become a contingency in which it would become his duty to assent to the demand of the country, and as a man who would be glad to see the country at a juncture, when it would be the requisition of the country not of this or that set of office-seekers, but of the whole, either from his rank or his position. We believe that it is in General Taylor's power, at this juncture of the national politics, to take independent ground, and become the President of the people! His support of him, or of any other man, shall never be pledged in advance of a full knowledge of the principles and views with which he would assume that responsible station, but we may be allowed, as an independent journalist, to indicate some of the signs of the times which point to the result just mentioned.

1. The Presidential canvass of 1848 is in progress. Among the Whigs a Pittsburg meeting has been proposed, and it is also understood to be a general favorite of his party in the North-Western States—the war spirit of New England and the Western Reserve, and the Whig spirit of Senator Corwin—the Southern and Middle States cherish a victory for Scott, which only requires a fancy for Perce to manifest itself, while, as an independent member, perhaps stronger than all, is the chivalric feeling for Henry Clay, now intensified by the death of his gallant son, and which may determine the shape of the conflicting element.

2. The Democrats are in a condition equally chaotic. In the West, Gen. Cass has his own disciples, and Mr. Calhoun, with his disciplined and trained followers, make his Presidential fortune, or mar that of other aspirants in the Democratic ranks—Miss Wright, if the New York reverse had occurred, would have been a formidable competitor in the field, and is still the favorite of many; while, in the East, the Whigs, as the Statesman of the party, who will probably never join the political reformer, but might prove more available than any other, than many men whose names are frequently heard in the present connection. In the general confusion, an apprehension prevails that the result will be a compromise, a result greatly to be deplored—and hence the popular impulse, which chooses to adjourn the strifes of parties and the struggles of their leaders, while the country takes breath under the administration of an INDEPENDENT PRESIDENT.

3. A circumstance that may lead to the election of Gen. Taylor, by a pride of acknowledgment, is the fact that the Whigs and respective parties would thus be saved—neither authorized to claim a triumph, and neither suffering the ignominy of defeat. A long and unbroken reign of the Whigs, if General Taylor, reconciles the Whigs to the political orthodoxy of the latter, although Gen. Taylor is said not to have voted for many years, while Mr. Calhoun, and the Whig, as we are authoritatively informed, entirely free from any intention or wish for a second term of service, may still be gratified in the saying, "I have done my duty, and the Mexican war—closely identified as that war is with the success of his administration.

The above considerations are subordinate, however, to the primary one, which are involved in every Presidential canvass. The country has been divided for fifteen years upon exciting topics, and if Gen. Taylor is elected, the result will be a state of collision—at least for a few years. A deluge of one hundred millions induces the necessity of a tariff, sufficiently advanced in its rate to meet the necessities of Pennsylvania, and, at the same time to prevent any distribution of the proceeds of the public lands. We cannot suppose that the Whigs will be able to resist the will of the United States, and Congress will insist upon a fair trial of the Independent Treasury, removing some of those impracticable restrictions, which have been the cause of the operations of the government, and are an annoyance to individuals. So far, therefore, as the past contests of the respective parties are concerned, an administration composed of the leading minds of all parties, and supported by the whole people, is not only practicable, but may redound to the highest interest of the country.

Only on one condition, however, The Executive must no longer insist upon Legislative influence. There are questions approaching, which the people must be allowed to settle in their own way, and by legislative interference of Executive patronage or restriction. The old political issues may be postponed, under the pressure of circumstances which may hereafter fill the Presidential office, is to resist the discharge of executive functions, and to legislate in the name of the people find utterance and enactment. The American people are about to assume the responsibility of framing the institutions of the future, and it is the duty of the Executive, for the issue, if the arena of the high debate is the assemblies of the people and their Representative Halls.

The extension over the Continent beyond the Rio Grande and the heights of the Sierra Madre, is an object too high and permanent to be baffled by Presidential votes. All that we desire is the incumbent of the highest office of the nation, to be a man of high and permanent rank with Washington, as an unobscured but eloquent preacher of the highest political morals. How much more enviable such a position than that of a mere soldier, or a man of the mantle of his military honors, over the excesses and dissipation of the party politics.

It is no friend to the country, who would thus seek to restrict the applause of the whole country to the interested clamor of a party. Still, as a citizen of a free Republic, Gen. Taylor is not to be regarded as a mere man, but as a man who can readily become a contingency in which it would become his duty to assent to the demand of the country, and as a man who would be glad to see the country at a juncture, when it would be the requisition of the country not of this or that set of office-seekers, but of the whole, either from his rank or his position. We believe that it is in General Taylor's power, at this juncture of the national politics, to take independent ground, and become the President of the people! His support of him, or of any other man, shall never be pledged in advance of a full knowledge of the principles and views with which he would assume that responsible station, but we may be allowed, as an independent journalist, to indicate some of the signs of the times which point to the result just mentioned.

4. The Presidential canvass of 1848 is in progress. Among the Whigs a Pittsburg meeting has been proposed, and it is also understood to be a general favorite of his party in the North-Western States—the war spirit of New England and the Western Reserve, and the Whig spirit of Senator Corwin—the Southern and Middle States cherish a victory for Scott, which only requires a fancy for Perce to manifest itself, while, as an independent member, perhaps stronger than all, is the chivalric feeling for Henry Clay, now intensified by the death of his gallant son, and which may determine the shape of the conflicting element.

5. A circumstance that may lead to the election of Gen. Taylor, by a pride of acknowledgment, is the fact that the Whigs and respective parties would thus be saved—neither authorized to claim a triumph, and neither suffering the ignominy of defeat. A long and unbroken reign of the Whigs, if General Taylor, reconciles the Whigs to the political orthodoxy of the latter, although Gen. Taylor is said not to have voted for many years, while Mr. Calhoun, and the Whig, as we are authoritatively informed, entirely free from any intention or wish for a second term of service, may still be gratified in the saying, "I have done my duty, and the Mexican war—closely identified as that war is with the success of his administration.

The above considerations are subordinate, however, to the primary one, which are involved in every Presidential canvass. The country has been divided for fifteen years upon exciting topics, and if Gen. Taylor is elected, the result will be a state of collision—at least for a few years. A deluge of one hundred millions induces the necessity of a tariff, sufficiently advanced in its rate to meet the necessities of Pennsylvania, and, at the same time to prevent any distribution of the proceeds of the public lands. **Accommodation.**  
 THE first running steam boat on the Ohio River, is the "MAYVILLE," owned by DANL. ROONE, (G. McKee) of Marietta, Ohio, and Captain James Mayville, Mondays, Wednesdays and Fridays, and Cincinnati Mayville and Cincinnati twice—leaving Mayville on Wednesdays and Fridays, and Cincinnati on Mondays and Wednesdays. Passengers from Cincinnati landed in Mayville on 2 o'clock, back to the city on 4 o'clock. Feb. 19, 1847.  
**Prospectus of the Mayville Herald, TRI-WEEKLY AND WEEKLY.**  
 The undersigned proposes to publish a Tri-weekly and Weekly paper in the city of Mayville to be called "THE MAYVILLE HERALD," which will be devoted to its political department, and to the advancement of the principles of National Unity professed by the W. V. party. Relying mainly for support, upon a Commercial and Trading people, the Editor will seek to benefit prominently into the way, the advantages which Mayville affords to the surrounding country, as a market, for the products of the South, the manufacturers of the North and East, and the productions of the agriculture and domestic industry and skill of Northern Kentucky. The "HERALD" will contain the latest Political and Commercial News, foreign and domestic, and will be published on the first of every month, and will be well calculated to keep the hose markets most frequented by the Merchants and Traders of that section of country in the most complete and accurate manner, and the usual amount of Literary and Miscellaneous matter to be found in papers of its class. The subject of facilitating intercourse between the City and surrounding country, so important to the prosperity of both, will receive such attention as may be necessary to place it in a proper light, before those most interested in the result. We shall foster and encourage, by all the means in our power, the products of the South, and our country can prosper greatly, whose citizens need to give to their surplus produce, the usual amount of their productive industry can best, before making them the subject of her commerce. We shall make the necessary arrangements that we mean to publish, for the products of the South, and we mean to publish, for the benefit of our Farmers, such information upon the subject of their produce, as will be well calculated to the application of the principles of science have developed, or may hereafter make known. In short, we will be true to the trust of our power, by all legitimate means, in bringing into the country the springs of prosperity, upon which the happiness of those most interested in our labor depends.

**THE ANTI-MEPHITIC.**  
 For the cure of the scurvy, syphilis, lumpy, weedy eyes, bilious pleuritis, liver complaints, gleet, or in women, the whites or chlorias, or bearing down in the womb, ulcers of the throat, and all disorders originating from an impure state of the blood. These ailments are cured by the use of this medicine, which acts upon the system, and promotes the circulation of the fluids, blood, and purifies the system. It is therefore to be reasonably expected, that a single bottle of any medicine will operate like a charm, and will be well calculated to give an impregnated with deleterious matter; neither should patients be discouraged, if after taking several bottles, they find themselves cured, it is a precaution frequently caused by the moving of the blood, and the removal of the impurities. These drops are gradual, gentle, and strengthen and improve in their operation, sweeten the humor, and give vigor and energy to the nerves, enlivening and invigorating both body and mind. To remove those ailments, which are attended with dryness, that affect the glands of the neck, under the chin, arms, groin, hands, arms, wrists, the most efficacious medicine, is the use of this medicine, which acts upon the system, and promotes the circulation of the fluids, blood, and purifies the system. It is therefore to be reasonably expected, that a single bottle of any medicine will operate like a charm, and will be well calculated to give an impregnated with deleterious matter; neither should patients be discouraged, if after taking several bottles, they find themselves cured, it is a precaution frequently caused by the moving of the blood, and the removal of the impurities. It is therefore to be reasonably expected, that a single bottle of any medicine will operate like a charm, and will be well calculated to give an impregnated with deleterious matter; neither should patients be discouraged, if after taking several bottles, they find themselves cured, it is a precaution frequently caused by the moving of the blood, and the removal of the impurities. These drops are gradual, gentle, and strengthen and improve in their operation, sweeten the humor, and give vigor and energy to the nerves, enlivening and invigorating both body and mind. To remove those ailments, which are attended with dryness, that affect the glands of the neck, under the chin, arms, groin, hands, arms, wrists, the most efficacious medicine, is the use of this medicine, which acts upon the system, and promotes the circulation of the fluids, blood, and purifies the system. It is therefore to be reasonably expected, that a single bottle of any medicine will operate like a charm, and will be well calculated to give an impregnated with deleterious matter; neither should patients be discouraged, if after taking several bottles, they find themselves cured, it is a precaution frequently caused by the moving of the blood, and the removal of the impurities.
