The Convention Question.

The returns from the different of this important question, come in slowly Enough, however, is known to produce the belief that the majority is perfectly overwhelming.
In 23 counties (including the city of Lo

isville.) from which we have returns, the majority in favor of a Convention—which is the number of votes over one half of all the legal votes of said counties—is upwards

The Green river counties, have alway been esteemed strongest for a convention and if this should prove true, the probabil ty is, that the excess of the vote for rention over the number of one-half of th legal voters of the State, will not fall far short of 20,000. We have seen no estimate fixing the majority at less than 10,000 votes We will publish the vote of the differen counties, when all are received.

We have no doubt an effort will be made

by the opponents of the measure, to intro duce new issues into the next summer cam paign, calculated to alarm the fears of cer-tain classes of our citizens, and prevent the consummation of the proposed reform. But it will avail them r avail them nothing. On the oth-will be seen that time serving ns, who have remained studiously silent will come out with all the zeal of new converts in its favor.
