## THE QUARTER PLAN

Morehead, together with a number of other colleges in Kentucky, is adopting the quarter plan of organization beginning with the summer school of 1942. This change in organization will make no fundamental difference in the educational plans of any individual.

Under the semester plan, which has been followed in the past, the regular school year of 36 weeks was divided into two semesters of approximately 18 weeks each. Under the quarter system this period of 36 weeks will be divided into three quarters of approximately 12 weeks each. The fourth quarter will be the summer term, also approximately 12 weeks in length. For the convenience of those students who are teaching in schools that begin in July the summer quarter will be divided into two terms of approximately six weeks each.

Under the semester system a minimum of 128 semester hours of college work is required for graduation. Normally this calls for a student load of 16 semester hours carried for eight semesters (four school years). With the quarter plan a minimum of 192 quarter hours is required for graduation which calls normally for a student load of 16 quarter hours carried for 12 quarters (four school years).

Certain advantages are to be gained from use of the quarter plan—

1. Students enroll for shorter terms thereby breaking the payment of fees into smaller amounts.
2. Individual students can frequently enroll for a term of 12 weeks who would be unable to be in school for 18 weeks. This is particularly true at the present time.
3. The units of study are more concentrated and it is presumed that more effective work will result.
4. Vacation periods can be arranged so that they do not break into the work of a quarter. Vacations are taken between terms.
5. The work of the regular school year and the summer session are better coordinated.

## CURRICULA

The curricular offerings at Morehead are varied. Students may pursue courses leading to the:

1. Provisional Elementary Certificate
2. Standard Elementary Certificate and the degree
3. Provisional High School Certificate and the degree
4. Provisional Certificate in Administration and Supervision and the degree
5. Bachelor's degree without a certificate
6. Degree of Master of Arts in Education

The college awards two undergraduate degrees, the Bachelor of Arts and the Bachelor of Science. Each degree may be taken with or without a certificate. The student should notice that the requirements for the degrees differ according to the type of degree and the type of certificate. The chief distinction between the Bachelor of Arts degree and the Bachelor of Science degree is the 90 quarter hour requirement in science for the Bachelor of Science degree. There are also differences between the Bachelor of Arts degree with the Elementary Certificate and the same degree with the High School Certificate. There are accordingly eight distinct courses of study leading to the degree. A student should choose early in his college career which course he prefers to take.

### GENERAL REQUIREMENTS FOR THE BACHELOR'S DEGREE

The candidate for the degree must meet the following general requirements:

1. A minimum of 192 quarter hours of prescribed and elective college credit.
2. A standing of 1 on all work offered for a degree.
3. At least three-fourths of the credit in residence in some standard college and at least one year in residence and one quarter immediately preceding graduation in this institution.
4. Not less than 65 quarter hours of the work offered for the degree must be selected from courses numbered 300 or above.

## MAJORS AND MINORS

Not later than the beginning of the sophomore year, the applicants for degrees must file with the Registrar their selections of majors and minors. (This does not include those who are applying for the Bachelor of Arts degree with the Standard Elementary certificate.) The heads of the departments in the major and minor fields must approve the course to be taken before the blank is filed. Two majors of 36 quarter hours each, or one major of 36 quarter hours and two minors of 24 quarter hours each, may be selected.\*

A student may choose his major\*\* or minor\*\* from any one of the subjects listed below:

Agriculture  
Art  
Biology  
Chemistry  
Commerce  
English  
French  
Geography  
History

History and Government  
Home Economics  
Industrial Arts  
Mathematics  
Music  
Physical Science  
Physics  
Sociology and Economics

## AREAS OF CONCENTRATION

To meet the needs of high school teachers who will teach entirely in a general subject area, Areas of Concentration may be selected in lieu of majors and minors. A person who concentrates in an area is not required to offer minors in any other field, but any single subject in which he has as much as 18 quarter hours outside of his area of concentration may be added to the face of his certificate.

Provision for Areas of Concentration was made by the state authorities with three ideas in mind: first, more and more secondary teachers are teaching in one department or field of work; second, greater opportunity is afforded for integrated preparation; and third, with the greater emphasis on graduate

\*\* Please note that Education cannot be counted as a major or minor field.

preparation for secondary teachers, extensive knowledge in some general field becomes exceedingly important as an adequate background.

Areas of Concentration may be taken in the areas of:

Social Science  
Science  
Home Economics

English  
Commerce  
Agriculture

This certificate may be reissued every three years upon three years' experience as attendance officer, or 24 quarter hours of standard college training.

## **GRADUATE STUDY**

The graduate program is under the general direction of the Committee on Graduate Instruction. This committee is appointed by the president of the college, on the advice of the dean, and is composed of one faculty member from each department offering approved courses for graduate credit.

The Director of Graduate Instruction is the dean of the college, who also serves as chairman of the Committee on Graduate Instruction.

The Committee on Graduate Instruction prescribes the qualifications of all teachers who offer graduate work and approves all courses which may be taken for graduate credit.

The graduate degree granted by the Morehead State Teachers College is the professional degree, Master of Arts in Education.

### **REQUIREMENTS FOR MASTER'S DEGREE**

#### **I. Admission to Graduate Work**

1. Graduates of accredited four-year colleges are admitted to graduate work on application to the Director of Graduate Instruction. This application must be accompanied by a transcript of undergraduate credit.
2. Graduates of non-accredited colleges must meet the conditions for graduation in Morehead State Teachers College before their applications for graduate work will be approved.
3. The prerequisites for admission to graduate study in education is the completion of the requirements of a four-year curriculum for the education of elementary and/or secondary teachers as prescribed by the Council on Public Higher Education.
4. If the student's undergraduate preparation is inadequate, this deficiency must be made up by taking designated courses which will not be counted for graduate credit.
5. The student's graduate program must be pursued under the direction of a committee of three members. This committee is composed of one member appointed by the head of the department of education, one member appointed by the

head of the department in which the student is minoring, and the Director of Graduate Instruction, who acts as secretary of the committee.

6. The applicant must arrange a program of graduate work under the direction of his graduate committee, and he shall not be admitted to complete graduate standing until this program has been approved by his committee.

## **II. Admission to Candidacy**

1. To be admitted to candidacy for the graduate degree, the student must have the equivalent of an undergraduate minor in education, including credit in student teaching; must secure the approval of his complete graduate program, including his thesis problem, from his Graduate Committee; and have the final approval of the Committee on Graduate Instruction.
2. The student may apply for admission to candidacy not earlier than the twelfth week of residence before the degree is granted.
3. Admission to graduate courses does not necessarily mean admission to candidacy for the Master's degree.

## **III. General Requirements for the Master's Degree**

1. A master's degree may be earned in either of two ways—
  - a. If the student elects to write a thesis, the degree may be secured by completing a minimum of 36 weeks of residence and a minimum of 45 quarter hours of work, 36 of which must be in regular courses.
  - b. If the student so desires he may elect to do additional course work in lieu of writing a thesis. In this event the minimum requirements for the degree are 54 quarter hours of credit and 48 weeks of residence.

Students who expect to continue their training beyond the master's degree are strongly advised to write a thesis.

2. The student is required to have an average standing of 2.0 on all work offered for the degree, and no credit is allowed for a mark below C.
3. A graduate major requires a minimum of 18 quarter hours of course work in addition to a thesis in the field.
4. Graduate students may take upper division courses, but at least 50 per cent of all course work must be in courses open to graduate students only.

5. The following will not be accepted for graduate credit:  
(1) work done by the candidate as an undergraduate; (2) work done in undergraduate courses as a special student; (3) credit earned in courses in the lower division; (4) correspondence or extension credit.
6. In evaluating residence for part-time students, 6 to 9 quarter hours of class work entitles the student to six weeks of residence.
7. Students holding what would ordinarily be considered as full-time positions are not permitted to receive graduate credit for more than 9 quarter hours of work during any quarter.
8. Not more than 9 quarter hours credit earned in on-campus week-end classes or night classes, is accepted in satisfaction of the course requirements for the degree.
9. No graduate student is permitted to earn more than 16 quarter hours of credit in any quarter or more than 9 hours in any summer term.
10. Transferred credits may not be used to reduce either the residence requirements or the minimum number of quarter hours required. This regulation does not prevent the Committee on Graduate Instruction from recommending that a regularly enrolled graduate student complete not to exceed 9 quarter hours of work in another institution.
11. In all cases the requirements for the degree must be completed within five years from the date of beginning graduate work.

#### **IV. Thesis Requirements**

1. If a thesis is written not more than 9 quarter hours credit is granted for its completion, half of which is for a seminar in educational research and thesis writing for which the student enrolls each term that he is in residence and half to be credit for the accepted thesis.
2. The candidate must include the thesis in his schedule and must pay the regular fee for each hour of credit received.
3. The thesis problem must be approved before the student is admitted to candidacy for the Master's degree.
4. The finished thesis must be presented to the student's Graduate Committee at least 30 days before the date of his examination.
5. If the thesis is accepted, two typewritten copies bound in prescribed form must be filed with the Director of Graduate Instruction not later than 15 days before the date of the final examination.

## V. Examination

The candidate must present himself, at a date and time to be announced, for oral and/or written examinations on his graduate work, including the thesis. This examination is conducted by the student's Graduate Committee and the Committee on Graduate Instruction. Other members of the faculty may be invited by the Committee on Graduate Instruction to participate in the examination.

### SPECIAL COURSE FOR TEACHERS

At the request of the Superintendent of Public Instruction Morehead, as well as the other state institutions, is offering a special course during the summer quarter on **The Public Schools and the War**. It is the plan of our educational leadership to make the schools of Kentucky positive forces in advancing the war effort in the local communities.

No doubt all teachers are anxious to do everything that they can, but many are uncertain about what may be done. It is hoped that all students in the summer school who will be teaching next year will take this special course. In this way they will be able to serve as leaders in their own school systems.

This course will be taken in addition to the regular student load for the summer term.
