"Responsibility is a unique concept. It can only reside and inhere in a single individual. You may share it with other, but your portion is not diminished. You may delegate it, but it is still with you. You may disclaim it, but you cannot divest yourself of it."

It is traditionally done anyway

This is our philanthropy

Our plan is a short presentation

Suspended Business: Goal Setting

President Gay

At the retreat, we set many internal goals and have achieved many of them  
What goals do we want to set on campus?

What are the biggest issues facing our constituency

Not charging to park in the overflow lot, but also keep the commuter bus from operating  
Long response for maintenance for online problems  
Not enough handicapped accessible areas besides the doors  
Inconsistency of commuter bus timing  
Nation-wide initiative to reduce energy consumption by 2% per year  
Another food option besides 2 GrillWorks  
Get more non-traditional and commuter students more involved  
Lighting around the library, steps between East Mignon and Mignon Hall, and  
some parking lots  
Turning lane in the Overflow Parking Lot  
Using more than 2 meals in the Dining Areas

What would you change at Morehead?

Alcohol policy  
Datatel  
Every dorm room should have a thermostat  
Stronger commitment to a more ecological efficient green campus  
Turning off the lights at the Jayne Stadium when not being used  
Food selection should be expanded to healthier food options  
Citizens should be more civically engaged  
Non-traditional house  
More school spirit within the community  
More activities on campus (broadcast on the side of buildings)  
Get rid of the suitcase college stereotype  
Problem with the network crashing and more availability to wi-fi  
Tailgating at the football games

See Greek letters removed in ADUC

## **FREQUENTLY ASKED QUESTIONS RELATED TO IMPLEMENTATION OF DATATEL AND THE RI<sup>2</sup>SE PROJECT**

**Last Update: 11/07/2007**

### **1. Why was Datatel in particular chosen for MSU instead of any other competing options? Who did the choosing? When was the decision made?**

A formal request for proposals from software vendors was conducted in September, 2004 and there were five vendors who submitted proposals. An initial review of the proposals identified that only two of them fully met the criteria required in the proposal request. This Request for Proposal process is based on the state procurement policies which state agencies (including public universities) are required by law to follow. A comprehensive evaluation of each of the two qualified proposals was conducted during the months of October and November 2004. The two qualified vendors were invited to demonstrate their applications to the campus in presentations that ran throughout a full two-day period (each vendor) in ADUC. All faculty, staff and administrators were invited and encouraged to attend any or all of the sessions that applied to their areas of work (i.e. student system demo, financial systems demo, etc.). We had strong attendance at most all sessions and feedback/evaluation forms were collected from everyone who attended.

The feedback/evaluation forms from each of the vendors participating in the on-campus demos (Datatel and SAP) were summarized and provided to the software selection committee which was comprised of a broad-based group of campus representatives that included faculty, academic department chairs, deans, administrative directors and staff from the key service areas such as Accounting and Budgetary Control, Human Resources/Payroll, Financial Aid, Admissions, Registrar, Graduate Admissions, Physical Plant, Housing, etc...)

After review of the campus feedback and detailed discussion of the strengths and weaknesses of each application, the group unanimously selected Datatel's Colleague as the application that best fit MSU's defined needs for a new system. NOTE: No one on campus with the exception of the VP for Planning, Budgets and Technology knew the price quote for either of the systems being considered until after the selection committee had made their recommendation for Datatel. We believed it critical that our selection of a preferred application not be impacted by an affordability issues.

In the end, Datatel's Colleague application was chosen as the preferred solution for MSU based on a systematic, campus-wide assessment of vendor responses. A report on the overall project (RISE) was presented to the MSU Board of Regents on Dec 16, 2004 and a contract for the purchase of Colleagues was signed later that month.

### **2. Is MSU the guinea pig for this system? If not, what other universities/colleges nationwide have used it?**

Datatel's Colleague has been a software solution on the market for over 39 years. Over 27 of those years they have been focused only on the higher education market and today Datatel is the only software solution that on the market that focuses exclusively on higher education as a company. They have a client retention rate of 98% and are currently being used at 740 colleges and universities supporting over 4 million student registrations.

### **3. Did the system go through a bid process? How much did this system cost MSU and how much did the old AIMS system cost?**

The total software application cost including cost for professional consulting services during implementation was just over \$3 million. The bid process was described in the response to the first question. Over one-half of the application cost was covered through a competitive federal Title III Strengthening Institution grant awarded through the Department of Education for over \$1.7 million.

I don't have the cost of the old AIMS system but it would not be comparable given the difference in time and technology between the two systems. The AIMS system was purchased in 1982 but the company went bankrupt in 1983 and MSU formed a company with several other AIMS schools to purchase the full rights to the software from the bank so that we could continue to run the software and protect the investment we had made at that time. Over the next 20+ years, MSU customized and expanded the AIMS system to meet unique 20+ needs and preferences for processing at MSU.

#### **4. Why was the change made from AIMS to Datatel?**

Because the AIMS system had been in place for more than 20 years, the foundational structure on which it operated had become outdated and limited the technical staff's ability to continue to maintain it in a functionally competitive way as we looked toward the future and the capabilities that were being developed by other market applications. The significant level of customization of the AIMS system made the University vulnerable given the growth and complexity of the system and also considering the number of key staff who were knowledgeable in the maintenance and use of AIMS who would soon be eligible for retirement. Key issues where AIMS lacked sufficient long-term stability are listed in the RiSE project charter document available on the Administrative Computer Applications/RiSE web site. It was determined that the best long-term strategy for the institution would be to retire AIMS an invest in a business partner that could provide MSU with an application that is built for higher education using state-of-the-art technology tools and also could insure resources would be available for future development of the application.

#### **5. What is appealing about the new system? What are the benefits it has to offer compared to the old AIMS system?**

There are many pros and cons when comparing what we see currently with Colleague verses what we had developed over 20+ years in AIMS. What is important to understand is that the switch to Colleague puts in place a foundation and a business partner committed to long-term development of the application as well as the benefit of a strong national user group of other higher education clients using the same software application. Colleague is currently just "out of the box" and there are additional add-ons and configuration changes that will take place over the next few years that will continue to improve how it serves our specific needs and preferences. We had these same issues which are common to any major change experience when we first implemented AIMS. The greatest benefit is the value of stability in using a product common with other institutions and that has a corporate commitment for future support and development.

#### **6. As of now, what are the negative (technical difficulties) of the new system? How long approximately until the problems are fixed?**

There are really no specific technical difficulties other than the normal issues associated with learning to use and administer a system of this size and complexity. Both the technical support staff and the faculty/staff users will need time to master the application and learn to do in Colleague what they had previously done through AIMS. Time and hard work will resolve all of the issues identified to date.

#### **7. Why hasn't everything been switched over to Datatel instead of using AIMS for some services and Datatel for the others?**

The system and database is too large and complex to migrate at one time. The migration process was developed in consultation with Datatel experts and communicated through both the project Charter document (available on the web site) and through other campus opportunities for communication. Also, because the system is a relational database (meaning one piece relies on the existence of another) it had to be built in an order that would facilitate on-going process throughout the implementation period. We started with financial systems which had to be in place to bring up Human Resources/Payroll since you have to be able to have a general ledger financial system in place to hire and pay employees. The Human Resources system had to be in place so that faculty were in the system to build a schedule of courses. Student records were then migrated to Datatel so that students could register and be billed for courses -- again requiring the financial system already be in place. That is an over-simplified explanation of a very complex relational system structure but hopefully paints the picture of why a planned migration over a period of time was necessary. As of fall 2007,

the major functional modules are now in place in Colleague. What is left to be migrated is mostly historical data such as prior year (non-enrolled) student transcript records, prior year official enrollment files, etc that support various reporting needs and student services such as degree audit.

**8. When will the statement of intent be available on-line?**

Statement of intent has now been added and is available for students to use starting with the spring 2008 semester. The paper process was only a temporary solution for fall 2007 during the conversion process. Students that do not process a statement of intent on-line by the deadline date will continue to have their schedules dropped so that seats can be made available to other students needing to register.

**9. Looking up courses is not user-friendly – what if you don't know the course number?**

You are only required to enter the course number if you are going through "express registration". If you work through the "search for sections" option you can pull classes using multiple criteria including course name. See the online instructions for "how to register" for more tips using the registration system.

**10. When looking up courses you are prompted to enter the course "level" which is confusing.**

The "search for sections" utility offers multiple fields to assist with identifying a specific course including identifying a course "level". However, this is an optional field to assist with narrowing your course selections. It is not a required field and can be skipped. See the online instructions for "how to register" for more tips using the registration system.

**11. How can students know when a course is going to be offered?**

The terms when a course will be offered are included in the course description of the Undergraduate Catalog. A roman numbers I, II or III following the credit hour indicates the term in which the course is offered each year. I = Fall, II = Spring and III = Summer.

**12. When will Datatel provide students with an academic checksheet that includes all their previous classes?**

Spring 2008 – Academic checksheets (or degree audit) requires transcripts to be live which won't happen until final grades are posted for fall semester in early December. Advisors will be trained on using the new degree audit in February and March so it can be used for assisting students with advanced registration in the spring of 2008. The academic checksheet process for the fall 2007 semester had to be handled using the printed checksheet from AIMS for prior work and combined manually with current semester courses. However, this was a one-semester inconvenience that was necessary during the transition period.

**13. Can I apply for a parking permit online?**

The ability for students to apply and pay for a parking permit was a customization unique in AIMS that is not currently a service provided in Datatel. Until such time as this can be added into Datatel using tools that facilitate customization or unless we find a third-party solution that will integrate with Datatel, students will need to visit the Public Safety office once a year to purchase their parking permit.

**14. Will MSU ever see an online voting process that was structure as effectively as the one we had in AIMS?**

Like with parking permits, online voting was a unique customization developed in AIMS. As resources permit, we will either need to find an online voting solution that can be purchased and integrated with Datatel or use customization tools to develop this feature as we did in AIMS. Until that time, a manual voting process will be necessary.

**15. Will online housing applications be available in Datatel?**

Online housing was another unique customization developed in AIMS. As resources permit, we will either need to find an online housing application system that can be purchased and integrated with Datatel or use customization tools to develop this feature as we did in AIMS. Until that time, a manual housing application process will be necessary.

**16. Undergraduate students could apply for graduate school admissions with ease in AIMS. Is that available in Datatel?**

The ability for graduate applications to be processed online will be available in Nov – Dec 2007 when the Active Admissions module goes live.

**17. Is it true that all students who live on campus pay for cable tv? With AIMS only the students that would be using it had to pay. Why has that changed?**

This is a change in process unrelated to Datatel. Prior to the 2007-2008 academic year, students living in residence halls received BASIC cable free and had the option to purchase EXPANDED cable each semester. Over 80 percent of the rooms participated in the optional EXPANDED cable service. After discussion of this with the Residence Hall Association in spring 2007, they unanimously voted to support a change that would increase housing rates by \$10 per semester to cover the subscription cost that would enable the EXPANDED cable to be provided to all rooms and avoid the optional sign up process. This change actually creates a savings for students living in two-person or private rooms compared to what they would have paid when the service was optional.

**18. Currently, student billing consists of simply a total. There is a need for itemized financial billing information. The bill does not differentiate which part is housing, tuition, fees, etc. Will this be available?**

The online bill only shows a summary balance. However, printed bills which are mailed to the student's permanent address if they owe an outstanding balance and that printed statement show itemized detail. Staff are looking at how the itemized detail might be added to the online billing inquiry in the future. Student's can visit or email Accounting and Budgetary Control and ask for a detail printed statement anytime.

**19. In AIMS, a student could not change their personal information such as local address, permanent address, ad other contact information. Would this be available in Datatel?**

The restriction to prevent students from changing personal information such as name, local and permanent address is in place due to policy and not technical ability of either AIMS or Datatel. To protect the integrity of official contact data, the Registrar's Office restricts this change by policy.

**20. Is there a way for students to check their cumulative CPA on Datatel?**

Both the students cumulative GPA and major GPA will be available on the academic checksheet which will be available in spring 2007.

**21. Why have the fees for dropping/adding a class shot up to \$50 as opposed to the \$10 it was last year?**

It is expected and helpful for students to have the flexibility to adjust schedules early in the semester and students can do that at no cost through the last date posted for adding a class – typically two weeks into the semester. After that time, the \$50 drop fee applies. The drop fee was increased from \$10 to \$50 to modify a student behavior which was creating significant inefficiency for the University. If a student remains in a class beyond the last day to add, that seat goes unused and other students needing the course must wait for another semester to enroll. A large number of courses which are full at the start of the semester finish with more than one-half of the capacity going unused. Reducing drops will enable the University to fulfill demand for the courses with fewer sections which will save resources that can be reallocated for other academic priorities.

Congress Minutes  
11-7-07

Meeting started: 5:05

Roll Call: Absent Excused: Rep. Meadows, Rice, and West  
Press in Attendance: Carl Gibson, MSRP and the Trailblazer

Purpose

Suspended Business: President Andrews and VP Patrick, VP for Plan., Budget, and Tech.

President Andrews

Thanks for inviting us  
Our goal is to better enable student success  
Datatel is an Enterprise System  
Keeps a record of payroll and registering  
We have to switch in steps  
Look forward to it

VP Patrick

Thanks for the opportunity  
Forwarding the questions were very helpful

History

AIMS system was at its ropes  
Implemented in 1982  
Average life expectancy is 5-7 years  
AIMS company went bankrupt right after we bought the program  
We bought the right to maintain the software  
The hardware that wrote the system also went bankrupt  
In the 90's we converted to Unix  
The was before we had personal computers and the Internet  
The suggested number of computers is 40  
This was a major blessing and curse  
We are the only one who uses the system  
We were also envied by our peers  
We glove fitted everything, but technology has greatly affected our  
system  
We were at risk of falling behind  
We cannot integrate with other systems, due to no outside help  
Lately, we have had key people who retired and cannot recruit the  
new employees  
Most vendors do not know what AIMS is  
We will miss our unique features, but we have to step back to  
move toward the future

## Funding

We received a Title III Grant

Received  $\frac{3}{4}$  of the funding by the Federal Government

UK has spent over \$50,000,000 whereas we have only spent \$3,000,000

## Selecting Datatel

Had to compile a list of all applications we wanted

Received five vendor requests

Broad based selection committee choose 2 vendors  
SAP and Datatel

Both vendors gave a two-day comprehensive demonstration

There was a unanimous selection of Datatel by the committee,  
which price was not part of the criteria

## Datatel

Celebrating their 39<sup>th</sup> Anniversary and 27<sup>th</sup> in Higher Education

Only ERP focused 100% on higher education

740 colleges support this vendor with 4 million students register  
yearly

We are the first public institution to use Datatel in the  
Commonwealth.

They have a 98% retention rate

## Wrote our charter document

It is available on the web

Defined the vision, scope, direction, and goals of this project

Outlined the phases, structure, and guidelines to steer this project

Assigned ownership and responsibility

It is going to take a long time to implement

Records have to be managed

Working on Communication Management, Report writing,  
analytics, and third party applications

Some of the applications won't be available until 2009

It is not going to be perfect

We are not going to have glove fit applications

There will be a lot of short run challenges

Phased implementation

Third party solutions

It creates an additional workload to implement

The workers have done a tremendous job

It is going to take time to be proficient and maximize the ability to  
configure our needs

Letter of intent and online holds will be available next semester

## Successes

We are on time and under budget

We are reaching our project goals

Building relationships

Building a "new generation" of technical users

It is tough for advisors to do it the first time

It might be a glitch

It is more than likely a training issue and takes time

We are also going to add a picture

Rep. Kennedy

Will the unofficial transcript be available?

VP Patrick

Will look into this issue?

Guest Connor

Will it be integrated with Blackboard?

VP Patrick

We are trying to automate the gradebook process and invitation  
Blackboard and Datatel are partners

Rep. Hardy

When will it be open?

VP Patrick

Between 7:30 and 8:00

Rep. Fitch

Why was Datatel launched before it was completely converted?

VP Patrick

It is a phased approach  
We don't have enough resources to implement both systems at the same  
time

Rep. Kennedy

Any plans to integrate TK20 and Datatel

VP Patrick

We use a smaller portion of TK20 and it would be a minimum use

Rep. Harlow

Will this program provide information to students?

VP Patrick

It will be a filtered system approach (pick and choose what you want to see)

President Gay

Will students be able to see their billing

VP Patrick

It is only available in a hard copy  
We are trying to see how the best way to implement it online

President Gay

Will you be able to see historical documents from AIMS?

VP Patrick

We will convert all academic profiles, but not the financial profiles  
We can have our workers access the historical financial records from AIMS

Rep. Weber

It takes courage to take the initiative. Thanks for coming

Rep. Menville called question, with no objection

Motion made by Rep. Menville, seconded by VP Hockenberry

Discussion

Guest Allen

The show is this Monday at Button Auditorium  
Called "Don't Forget to Laugh"

All of the proceeds go to research for Alzheimer's  
Bringing comedians  
So far have raised \$300 and still need \$200

Rep. Bishop

You know this is a reimbursement process?

Guest Allen

We will pay for the PA equipment after the show

Advisor Koett

You may not need to rent the equipment for Button

Advisor Weathers

That is an expense you don't have to have

Rep. Arnett

Where is the money coming from?

Rep. Menville

It is from the General fund

Rep. Pennington called question, with no objection

Bill 23 passed

Discussion:

Non-Traditional Forum

Rep. Harlow

It was an informal meeting

Mainly individual concerns

Three main areas of focus

1. Lounge
2. Commuter bus inconsistency
  - a. Bus is only intended for commuters
3. Lack of communication
  - a. Repeat class forms

Rep. Arnett

We can direct the lounge concern toward the Student Lounge  
Committee

Rep. Menville

Talked to the Eagle Project Secretary

She was open with sharing a lounge

Non-Traditional Students are singled out

It would be good to include a microwave, locker system,  
and a fridge

Separating the lounge is a bad idea (waste of time)

Rep. Harlow

It would be better to place few lockers in the class buildings

President Gay delegated to the Student Life committee to work on the locker  
situation

Spring Break, Spring Back

President Gay

There are two, maybe three ideas

1. Hazelgreen Academy
  - Creating a system to bus students out to Wolfe County
  - Dorms won't be open until April
  - Will work on the auditorium
  - Purchasing a new curtain
2. Chicago
  - 15 person cap
  - Working in a soup kitchen and something similar to the Big Brother, Big Sister system
3. Working with Habitat for Humanity to build a house

What are your feelings?

Rep. Menville

Last year, we had a group sent to Louisville and that was in Kentucky

President Gay

Cost of Hazelgreen will be about \$25 and Chicago will approximately be \$160

Rep. Ward

Last year, the Hazelgreen trip was cancelled

President Gay

We are also focusing on the Regional Stewardship campaign  
Last year Louisville and Gulfport were full, but Hazelgreen was cancelled

Rep. Bishop

Will the students stay in their dorm rooms?

Advisor Weathers

Year around housing and apartments yes

We will need to check on the other dorms

Rep. Pennington

Students desire to get away from Morehead

If we have to have a trip in this area, then there needs to be a group outing one night

Rep. Holden

Since Chicago is only a 15 person trip, will there be any other locations?

President Gay

It was originally intended to have 40 spots, but another group made 25 reservations

Rep. Ellis

The Hazelgreen trip could be an asset

Some people don't want to travel

Rep. Bishop

What is the capacity for the Hazelgreen trip?

President Gay

The only problem would be transportation

**Any other ideas/suggestions, please let me know**

## Student Life/Dining Questions

Rep. Ward

Suggestion for meat idea at HomeZone?  
Steak

Are you interested in Stir-fry addition?  
A majority of Representatives were in favor

Are you interested in a Mini Java City in ADUC?  
A majority of Representatives were in favor, but more people were  
in favor of the stir-fry option

**Any ideas/suggestions, please let me know**

Rep. Holden

A lot of people told me that they want the salad bar back

Rep. Ward

Surveys last year said the students wanted a more of a Grab and  
Go Option

Sales in salads have tripled

If they went back to the salad bar, have to sell it per ounce

Rep. Pennington

There is a problem with not being able to get quarters for laundry

**President Gay delegated to Student Life**

**Attitude**

The longer I live, the more I realize the impact of attitude on life. Attitude, to me, is more important than facts. It is more important than the past, than education, than money, than circumstances, than failures, than successes, than what other people think or say to do. It is more important than appearances, giftedness or skill. It will make or break a company... a church... a home. The remarkable thing is, we have a choice everyday regarding the attitude we will embrace for that day. We cannot change our past... we cannot change the fact that people will act in a certain way. We cannot change the inevitable. The only thing we can do is play on the one string we have, and that is our attitudes... I am convinced that life is 10% what happens to me and 90% how I react to it. And so it is with you... we are in charge of our attitudes.

What kind of food will be there?

VP Jones

We are getting pizza

Rep. Menville moved to approve, seconded by Rep. Hamilton

Bill 30 approved

Bill 31: SGA stance on 2008 legislation by the Kentucky General Assembly

Made by Rep. Arnett, seconded by VP Stevens

Discussion

Rep. Kettenring

Why are we opposed to HB 11 (Tuition Freezes)?

Rep. Arnett

It is a tough situation

If the tuition gets a freeze then we will have to cut some budgets

Rep. Holden

Wouldn't the cut be for this year only?

Rep. Arnett

It would have a drastic effect on projects that took a long time to develop

Rep. May

I am opposed to taking a stance on HB 114 (carry a weapon in a vehicle)

Rep. Arnett

This is one of the most controversial issues

I feel it would reduce public safety

There may be a similar incident to Virginia Tech  
There is no reason to have guns

VP Stevens

HB 11 retards growth of the university  
There could be a time where we cut majors

Rep. Rosser

If HB 114 goes into effect, then our safety will decrease  
Criminals have weapons

Guest Burgin

I don't see why anyone opposes HB 114

Rep. Hamilton

HB 111 (using agency bonds)  
There are some students on campus who would want to see the  
tuition not go into organization's funds  
We are here to serve the student

Rep. May moved to strike HB 114 from Bill 31, seconded by Rep.  
Yarawsky

Rep. Spalding

HB 114, if not approved, could have a negative effect on  
the university  
Some people may feel that they lose their freedom of  
speech  
Hinders overall mission

Rep. Harlow

Car is locked up doesn't mean anyone can get the gun  
Sometimes a person's passion may run high

Rep. May

This bill is of extraordinary significance  
We need to pass this bill unanimously  
There is no need to include HB 114 in our bill

Rep. Rosser

Criminals have weapons, so why can't we?

Rep. Spalding

People can rob the vehicle and kill a person with someone  
else's gun

VP Stevens called question, seconded by Rep. Hamilton

Motion failed 16-18

Rep. Ward moved to add HCR 7 (task force to study opportunities for  
students with disabilities), seconded by VP Harmon

Rep. Dourson moved to pass the formal amendment, seconded by

VP Hughes

It has been a long time since programs have been evaluated

Our goal is to get 21<sup>st</sup> Century Curriculum

We need to make sure we are a cutting edge university

There is no universal way to evaluate our curriculum

We spent the first semester to plan this audit

We are asking teams in each department about the quality of programs

We need to figure out the needs and opportunities so we can reach them

It is very tough to fix the entire education system

We are not starting to fire people or save money

We have a responsibility to a quality education

We are going to do an audit in every program

There are no predetermined outcomes

We will send a formal recommendation in October

General Education Redesign

We will not be implementing this until fall of 2011

We have to work with the students to be sure they get a quality education

Working to get the opportunity that a student can graduate with 120 hours with the intention a person can graduate within 4 years

Want to work with SGA

The plan is to have a process to work with students

Rep. Allen

Would our education be less competitive after the General Education Reform?

VP Hughes

It is more competitive because we will have to create interdisciplinary courses

February 18, 2008

Dear Legislator:

As a student at Morehead State University, I wish to share my concerns regarding the future of public higher education in the Commonwealth. The state budget presented by the Governor proposes an unacceptable \$7.2 million dollar cut in operating funds to my university. This budget threatens to return all progress in higher education back to the funding level of 1998.

Given the problematic budget from our Governor, it is essential that you as our representative step up to rectify this situation. We need you to maintain a strong base appropriation for Morehead State University.

Please limit future delays in agency bond projects for universities by **supporting HB 111 & HB 177**. Furthermore, I request your support for MSU's agency bond projects currently included in the budget;

- \$39 million for a student recreation center
- \$11 million in housing improvements

The proposed 15% cut in KEES awards equates to about 1,000 MSU students not receiving this support over the next two years. Please **support HB 12**.

Decreases in state appropriations and cuts to KEES awards will only create greater barriers for Kentuckians to enter college and receive a quality education-- marginalizing many individuals, and putting the future of the Commonwealth at risk.

I thank you for your service to Kentucky and continual support for higher education.

Sincerely,

Concerned Voter & Supporter of Morehead State University

President Andrews

Governor Beshear submitted a budget that contains a significant reduction

1. Structure imbalance  
9.2 billion in costs with 8.75 billion in revenues
2. Shortfall of Medicaid and correction revenue

He had to present a balanced budget

12% decrease in base fund appropriations  
3% budget cut this year

That is approximately \$7.2 million dollars at Morehead

General Assembly appropriates money

House of Representatives crafted a bill based new revenue

\$0.30 cigarette tax  
Refinance debt

Not hiring 3,500 new employees from the ones who are  
retiring this year

This budget will add \$400 million to both years

They are hopefully going to restore funding at the current level

Vetoed projects have been brought back this year

KEES funding are hopefully back

This will go to the Senate and they will revise it

It will then go to a joint conference committee

We have worked hard

Each University Vice President is looking to see where we can cut 15%

Plan for a worst case scenario

We will cut costs, increase tuition

We will try to be responsible to the students, but there have been 9 budget  
cuts in the past 20 years

We are the best affordable institution in Kentucky, but we can't stay there

Our philosophy

We will continue to be great

We have to be very strategic in cuts

Per Credit hour model

Generates more revenue

No more free classes (between 12-18 credit hours)

All students pay something for every credit hour

Addresses affordability for part time students

This is a more flexible model

Currently

Students do not pay for 12-18 credit hours

We want to make a rate for credits over 12 hours (25%)

If we didn't increase the rate, we would have to increase tuition by  
9.5%

People who take 15 and 19 credits will have to pay the same

Next steps

Campus budget hearings

Tuition fee approved by the Board of Regents, then CPE

Rep. Arnett

What is the marginal cost to produce 13-21 hours?

VP Patrick

We will still have to pay for faculty

President Andrews

Our staff productivity is going down

VP Stevens

Will students who are on a merit scholarship have their scholarship capped?

VP Patrick

Need based scholarships won't change

We have to decide what should be considered as full tuition

Rep. Hille

You could say tuition counts as the first 120 credit hours

Rep. Ash

Wouldn't people switch to part-time if we implement this model?

VP Patrick

There are other reasons to be full time

Rep. Westendorf

How will this affect the retention rate?

VP Patrick

We need to watch students who are taking 15 credit hours

Rep. Kettenring

This model will make students less willing to challenge themselves

Originally students can take tough class and drop them

With this model, their GPA could drop, making them ineligible for  
scholarships

VP Patrick

We need to be as efficient as possible

Our main goal is to cover the costs

Rep. Hamilton

What about people switching majors

*HELP STOP*

**TUITION INCREASE!**

VP Patrick

That is the ultimate question  
Who will pay for free classes?

VP Stevens

Many student appreciate the free credits  
What will happen if we drop this model? Will students leave?

VP Patrick

Our research says students won't

Rep. Spalding

What about the recreation center fee?  
Many students use the facility who are paying for it

VP Patrick

We have to have guaranteed money to build it

Rep. Menville

How will a student graduate in 4 years?

VP Patrick

Per Credit Hour Model will treat everyone equally

Rep. Bishop

Will this affect the housing rate?

VP Patrick

We have already developed the 10 year housing plan  
It has the rates for the next 10 years

Rep. Fitch

What will happen to the 1 credit hour classes?

VP Patrick

We will have to look at them

Rep. Arnett

We have a major issue: remediation  
Will we bump these requirements?  
They are required to take the classes which means extra costs  
Changing classes is part of the education process  
We should have an opportunity to vote  
We will discourage people to take in the full college experience

President Andrews

We have got to pay the bills

Rep. Spalding

It is as cost effective to graduate in 10 years compared to 4 years?

VP Patrick

It is the same

VP Stevens

A student referendum is vital

President Andrews

We are trying to figure out a way to be more affordable  
We are trying to take care of students

2. Write an Email, Letter and/or Place a Phone Call!

### What you need to know...

#### THIS IS the Situation RIGHT NOW:

- The current state budget proposal presented by the Governor proposes an unacceptable **\$7.2 million dollar cut in operating funds.**
- This budget threatens to **return all progress** in higher education **back to the funding level of 1998.**
- Higher education funding is **being treated as part of the problem;** rather than part of the solution.
- Voters are **not willing to tolerate these dramatic cuts!**

#### YOU SHOULD TELL THEM:

\*\* Legislators need to maintain a strong base appropriation for Morehead State University; we could be facing a possible \$1400 increase in tuition the fall of 2008.

\*\* Ask your Legislators to: please limit future delays in agency bond projects for universities by **supporting HB 111 & HB 177.**

\*\*Legislators need to support MSU's agency bond projects currently included in the budget;

- \$39 million for a student recreation center
- \$11 million in housing improvements

\*\*The proposed 15% cut in KEES awards is also unacceptable. This equates to about 500 MSU students not receiving these awards over the next two years.  
Legislators should **support HB 12.**

\*\*Decreases in state appropriations and cuts to KEES awards will only create greater barriers for Kentuckians to enter college and receive a quality education-- marginalizing many individuals, and putting the future of the Commonwealth at risk.

\*\*\* Voters are **not willing to tolerate these dramatic cuts!**
