Jaycees To Solicit Signatures Sunday For Library Petition

Members of the Morehead Junior Chamber of Commerce Sunday will fan out to all sections of Morehead seeking signatures for a petition to establish a public library district here.

Following a short meeting at 1:30 p. m. at the Rowan County Jaycees, teams of Jaycees will canvass throughout an effort to gain as many signatures as possible toward the total of 1,100 needed to legitimize the district. Competition of the petition would permit setting up an organization with authority to levy a tax for the library's benefit.

Canvassing for the library will be taken up at the monthly dinner meeting of the Jaycees, to be held at 7 p. m. today at the Kentucky Gateway Hotel.

The civic organization also will make plans for its Rowan County High School football program project, in which members are distributing programs at the high school and are selling foam rubber cushions at all athletic events, including those involving the Morehead, Breckinridge and Morehead State College. Proceeds will be used to fund the city's youth football program in the community.

Child Escapes Serious Injury In Car Mishap

Five-year-old Ella Mae Oliver received only bruises here shortly before noon Monday when the car she was riding in was struck and then fell underneath it.

Police Chief Curtis Coyle said the child and her mother were crossing Main Street near the Peoples Bank when Ella Mae jerked loose and fell into the side of an auto driven by Virginia H. Hughes of Huntington, W. Va., Coyle said and she fell underneath. The vehicle ran over both feet.

However, the police chief said examination at St. Claire Medical Center showed no broken bones, just bruises and abrasions.

Ella Mae is the daughter of Mr. and Mrs. Isaac Oliver.

Mrs. Mary E. McRoberts Passed Away

Death came last Wednesday to Mrs. Elizabeth McRoberts, 72, wife of Oza McRoberts.

Mrs. McRoberts died at her home near Cranston.

A native of Elliott County, she was born Oct. 29, 1891. She was married to Mr. McRoberts in 1917. Two sons survived her. They are Everett Lee McRoberts, Sardinia, O.; and Noah Patrick McRoberts, Batavia, O.

Nine brothers and sisters also survive. They are: Abram McRoberts and Mrs. Jesse Hall, both of Morehead; Aftand Tackett, Fairfax, O.; Mr. Desha McRoberts, and Mrs. Mary Ann Vena McRoberts and Mrs. Vona Stigall, all of Cranston; Mrs. Lela Mae McRoberts, Weston, Ky.; and Mr. Marilyn Preston, Gothen, O.

The Eagles are the only un-defeated college team in Kentucky with a 5-0 record and an overall unbeaten streak of six games which goes back to the last game of the 1963 season when Kentucky fell 6-0 to Morehead.

State Campaign Head Speaks Here Friday

State Rep. Joe E. Johnson of Lexington, chairman of the Kentucky campaign for the Goldwater-Miller ticket, will address a major Republican rally here Friday evening.

Scheduled to begin at 6 p. m., the affair will be held in the Rowan County High School cafeteria, where a free dinner will be served prior to the speaking program.

Entertainment has also been included as a part of the program, a Republican spokesman said.

Johnson, one of the younger members of the Legislature, has had a rapid ascendancy in GOP affairs. He was first elected to the lower house in 1963 and was voted one of the most outstanding legislators by his colleagues after the 1964 session.

A spokesman for the Rowan County Campaign Committee, headed by Denver Kinuder and Mrs. Sam Patton, said that Republicans, but all persons interested in the Goldwater-Farrabee ticket, are invited to the affair.

'GREAT COMEBACK' Last Quarter Rally Nips A-P 11

"Our youngsters were slugging for three quarters but had the courage and heart to overcome what appeared to be unmountable odds in the last quarter," a happy Guy Penny exclaimed Monday morning.

Penny's Morehead Eagles upset Austin Peay 20-14 in the final game of the season on Saturday in the Cranston Baptist Church. Rev. F. T. Littleton and Rev. Floyd Hall officiated.

Burnal was in Richmond Cemetery under the direction of Lane Funeral Home.

New Christy Minstrels Set Concert In MSC Fieldhouse

The New Christy Minstrels, widely acclaimed folk-singing group will present a concert Tuesday at 8 p. m. in the Morehead State College Fieldhouse.

The event is being sponsored by the social clubs of Morehead State College and tickets are on sale at the College Business Office. Tickets are also available from members of the Campus Club, Aquila Club, Lakotas, Cappa Triads and Collegiate Knights. Price of admission is \$2 for students advance tickets and \$3 for general admission.

The Minstrels had a network television show on location at the New York World's Fair this summer. Moscow has permitted the State Radio to play the folk-singing group's albums.

Ranging in age from 21 to 19, the group consists of two girls and seven boys. Each plays an instrument and sings and does a solo specialty performance.

The Minstrels play a bouncy and happy type of rhythm under the direction of 30-year-old Randy Sparks, vocalist, instrumentalist, arranger, and founder of the group.

Members of the group have come from various different areas and previous occupations. Barry Kane emigrated from Russia and Larry Ramos was born in Hawaii. Art Podell attended a Jewish theological school.

Multi-lingual versions of the Minstrels' songs have been received in more than 120 foreign countries. They have also appeared at various colleges and universities throughout the country.

JOHNSON PRAISES CONGRESS

President Johnson saluted the 86th-87th Congress by saying that he knows of no Congress that has done more for the nation. He also said that he would like to see a picnic, submerging partisan differences in the cause of building America and keeping the peace.

Additional Assistance Asked In Student Aid Campaign

Sponsored by members of the Methodist Youth Fellowship, a drive for clothing, shoes or money for students in the Rowan County Schools, was reported this week to be well underway.

Persons who wish to make contributions to the drive—which is aimed at an estimated 800 children who need the basic necessities in order to attend school regularly—may leave items at these locations:

- the lobby to the educational building of the Morehead Methodist Church, Church and Stone;
- Freonore Store.

A pickup service will be provided by the MYF for persons who have contributions to make if they will call 784-4645 or 784-4727.

Water Rationing Point Set At Three-Foot Level

Five-Foot Level Would Bring Cut Off

Water rationing would begin in Morehead when the level of Morehead State College's storage tanks falls to three feet and the city's supply would be completely cut off if the level should continue to drop and reach the one foot mark.

This is the gist of a policy statement on relations between the City and College, so far as water supply is concerned, issued within recent days by Dr. Adron Doran, president of the school.

Doran's statement, authorized unanimously by the MSC Board of Regents, and set forth in a letter to Morehead Mayor Eldon T. Evans, came against this background:

The City purchases filtered, treated water from Morehead State College and the college nearly a year ago notified the city that if it is to continue to sell water to the city the college treatment plant must be expanded. It has been noted that the plant is operating at capacity and if both college and city demand continue over the present plant will be unable to process sufficient water to supply the needs of both.

MSC told city officials that an increase in the 2 1/2 per 1,000 gallons rate now paid by the city would be necessary as the city's part of the expense in underwriting the plant expansion.

However, the city declined to accept the increased rate and, instead, to construct its own water facility.

In the interim, the college is to continue to supply water to the city, and attorneys for both parties were instructed in July to attempt to negotiate a agreement on water supply which both the city and college could operate until the city's new plant is complete, probably in 18 months to two years.

The college president said the three-foot and one-foot levels for rationing and cutting off water to the city were recommended to him and the Board of Regents by W. H. Rice, college engineer.

The level of the storage tanks, when it reaches six and one-half feet and that the level is being checked three times a day by the Utility Board.

There appears to be no imminent danger of the level dropping to the three-foot mark under normal usage, Johnson indicated, since he pointed out he could not recall an instance where any of the storage reservoirs had ever run dry.

Doran's plan obviously was not intended to apprise the city of the fact that water at this point is in short supply; rather, it is regarded as a means of making the college's position in the matter as explicit as possible in the event a shortage should develop.

The complete text of the letter:

Death Takes Mrs. Blanch Warren, 79

Funeral services for Blanch Warren, 79, who died Oct. 19, were held Oct. 19 at Lane Funeral Home.

Rev. James Fields officiated at the rites.

Burial was in Lee Cemetery.

Mrs. Warren was a native of Rowan County. She was born March 28, 1885.

She was married to John Deane Warren, who preceded her death. On Feb. 2, 1959, she was married to Nora Warren, who survived.

Other survivors include a daughter, Mrs. Mada McGill, Louisville, a brother, William Prather of California, and a sister, Mrs. Marnie Day, New Castle, in the Perry, D. Britton, Mich.

Last Rites Held For Cora Plank

Mrs. Cora Plank, wife of Rowan County jailer Elmer Plank, died last Tuesday at St. Claire Medical Center following an illness of about a year. She was 59.

A native of Lewis County, she was born Sept. 14, 1905. She was married to Mr. Plank Oct. 19, 1924 and six children survive this union. They are: Mrs. Dixie Boythe, William Guy Plank, Warren Plank, Homer Plank and Ray Plank, all of Morehead and J. D. Plank, Kirklind, Ind.

Her brothers and three sisters also survive. They are: Dick Eham and Mrs. Myrtle Liles, Mrs. Marnie Day, Beckham Eham and Mrs. Lucy Clark, both of Morehead, and Mrs. Mada McGill, Louisville, Mich.

Mrs. Plank was a member of the Adams-Davis Church of God.

Funeral services were held Friday in the Adams-Davis Church. Rev. Stanley Caudill and Rev. Dewey Bon officiated.

Heart Attack Claims Dr. C. R. Rader

Dr. Clifford Rader, a member of the faculty at Morehead State College since 1947, died last Wednesday in St. Claire Medical Center after suffering a heart attack in the college.

He was 58.

Dr. Rader, head of the Division of Social Sciences, was stricken suddenly. He had no previous history of heart trouble.

He was reported to be a native of Jackson County, he was a veteran of World War II. His education was received at Eastern State College and the University of Kentucky.

On June 1, 1953, he was married to Adele Ritter, who survives.

Other survivors include four brothers and sisters: Ed Rader, Manchester; Lucian Rader, Walter Rader, both of Hamilton, O.; and Mrs. Dess Holt, Portsmouth, O.

Funeral services were held Friday at Lane Funeral Home. Dr. Adron Doran, president of Morehead State College, officiated.

Burial was in Richmond Cemetery at Richmond, Ky.

Youngsters To 'Trick Or Treat' For UNICEF

Morehead youngsters will be "trick or treating" a day early next week—and for a cause which has been hailed around the world.

The local children will be seeking funds which will go to fight poverty, disease, hunger, ignorance and despair—forces which confront hundreds of millions of the world's children.

Beginning at 6 p. m. next

FOR FALL AND WINTER New Recreation Program Coming

A fall and winter recreation program is expected to be unveiled in the near future by the Morehead-Rowan County Recreation Commission, it was announced today.

A United Fund agency, the Commission has named Peter Verhoven, a graduate student at Morehead State College, to direct the program. Verhoven was in charge of summer recreational activities for the group.

Tentative plans, which are dependent on the amount of facility utilization allowed at Rowan County High School, are for a variety of sports, along with adult education classes, Verhoven said.

The said and winter program will afford some form of recreation for every person in Rowan County, the program's director pointed out.

At the same time, Verhoven pointed out, the program, which involved a total of 2,053 persons in various arts, crafts, sports events and other forms of relaxation.

Summer playground events drew a projected 1,000 persons while girls basketball events attracted 104. A five-week series of adult education classes, attended by 60 men and women, while 20 craft lessons in jewelry, pottery and painting attracted 70 boys while a theater and drama workshop for children was attended by 25.

Nine persons availed themselves of bait and fly casting lessons of adult approximately 25 took part in folk and square dancing. Some 125 adults and children attended a picnic sponsored by the commission, while another 130 were on hand for a water carnival.

A track and field meet drew 130 entries, while some 350 children took advantage of a free movie offered by the group.

Verhoven pointed out that the total of 2,053 persons served represents about 50 percent of the population of Morehead.

Admission to the program is a goal of doubling the summer attendance in the fall and winter months.

The commission is made up of Adrian Rader, Rev. Charles Brooks, Robert Allen, Mrs. Joe Brooks, Mrs. Mae Caudill.

Water Plant Plans Nearly Done; Sub-Surface Work Started

Plans and specifications for Morehead's new water treatment and distribution facility are nearly completed, a spokesman for the Utility Plant Board said this week.

Clint Johnson, Utility Board superintendent, reported that the engineering firm of Howard K. Bell and Associates are nearing the end of this phase of the project.

In addition, Johnson said, sub-surface work has gotten underway at the site of the treatment plant near Farmers. Core drilling to determine the depth necessary for foundation work is being carried out.

What's Ails Dr. Rader

"What's ails Dr. Rader is a heart attack," says a spokesman for the college. "He was stricken suddenly. He had no previous history of heart trouble. He was reported to be a native of Jackson County, he was a veteran of World War II. His education was received at Eastern State College and the University of Kentucky. On June 1, 1953, he was married to Adele Ritter, who survives. Funeral services were held Friday at Lane Funeral Home. Dr. Adron Doran, president of Morehead State College, officiated. Burial was in Richmond Cemetery at Richmond, Ky."

Arm Injury Suffered By MSC Trackster

Fred Burns, a member of the Morehead State College track team, suffered a fractured arm in a fall during a practice run in the stadium Saturday in the automobile accident near Clearfield.

Burns, 22, competed in the javelin throw and the high jump for Coach Earl Bentley's track team.

He was treated at St. Claire Medical Center and released from the hospital Tuesday. The accident occurred at 2:30 Saturday.

State Police said Burns, whose home is in Boston, Mass., was a passenger in a car driven by Marcus Allen Matheny, 20, of Logan.

Burns said the car, reportedly traveling too fast for road conditions, went out of control and left a highway. Struck in the left side Saturday afternoon about six miles west of Morehead, the car was struck in the left side by a tree.

His injuries were so severe that he was unable to get out of the car. He was taken to St. Claire Medical Center and released from the hospital Tuesday. The accident occurred at 2:30 Saturday.

Water Rationing Point Set At Three-Foot Level

Five-Foot Level Would Bring Cut Off

Water rationing would begin in Morehead when the level of Morehead State College's storage tanks falls to three feet and the city's supply would be completely cut off if the level should continue to drop and reach the one foot mark.

This is the gist of a policy statement on relations between the City and College, so far as water supply is concerned, issued within recent days by Dr. Adron Doran, president of the school.

Doran's statement, authorized unanimously by the MSC Board of Regents, and set forth in a letter to Morehead Mayor Eldon T. Evans, came against this background:

The City purchases filtered, treated water from Morehead State College and the college nearly a year ago notified the city that if it is to continue to sell water to the city the college treatment plant must be expanded. It has been noted that the plant is operating at capacity and if both college and city demand continue over the present plant will be unable to process sufficient water to supply the needs of both.

MSC told city officials that an increase in the 2 1/2 per 1,000 gallons rate now paid by the city would be necessary as the city's part of the expense in underwriting the plant expansion.

However, the city declined to accept the increased rate and, instead, to construct its own water facility.

In the interim, the college is to continue to supply water to the city, and attorneys for both parties were instructed in July to attempt to negotiate a agreement on water supply which both the city and college could operate until the city's new plant is complete, probably in 18 months to two years.

The college president said the three-foot and one-foot levels for rationing and cutting off water to the city were recommended to him and the Board of Regents by W. H. Rice, college engineer.

The level of the storage tanks, when it reaches six and one-half feet and that the level is being checked three times a day by the Utility Board.

There appears to be no imminent danger of the level dropping to the three-foot mark under normal usage, Johnson indicated, since he pointed out he could not recall an instance where any of the storage reservoirs had ever run dry.

Doran's plan obviously was not intended to apprise the city of the fact that water at this point is in short supply; rather, it is regarded as a means of making the college's position in the matter as explicit as possible in the event a shortage should develop.

The college president said the three-foot and one-foot levels for rationing and cutting off water to the city were recommended to him and the Board of Regents by W. H. Rice, college engineer.

The level of the storage tanks, when it reaches six and one-half feet and that the level is being checked three times a day by the Utility Board.

There appears to be no imminent danger of the level dropping to the three-foot mark under normal usage, Johnson indicated, since he pointed out he could not recall an instance where any of the storage reservoirs had ever run dry.

Doran's plan obviously was not intended to apprise the city of the fact that water at this point is in short supply; rather, it is regarded as a means of making the college's position in the matter as explicit as possible in the event a shortage should develop.

The complete text of the letter:

Water Rationing Point Set At Three-Foot Level

Water rationing would begin in Morehead when the level of Morehead State College's storage tanks falls to three feet and the city's supply would be completely cut off if the level should continue to drop and reach the one foot mark.

This is the gist of a policy statement on relations between the City and College, so far as water supply is concerned, issued within recent days by Dr. Adron Doran, president of the school.

Doran's statement, authorized unanimously by the MSC Board of Regents, and set forth in a letter to Morehead Mayor Eldon T. Evans, came against this background:

The City purchases filtered, treated water from Morehead State College and the college nearly a year ago notified the city that if it is to continue to sell water to the city the college treatment plant must be expanded. It has been noted that the plant is operating at capacity and if both college and city demand continue over the present plant will be unable to process sufficient water to supply the needs of both.

MSC told city officials that an increase in the 2 1/2 per 1,000 gallons rate now paid by the city would be necessary as the city's part of the expense in underwriting the plant expansion.

However, the city declined to accept the increased rate and, instead, to construct its own water facility.

In the interim, the college is to continue to supply water to the city, and attorneys for both parties were instructed in July to attempt to negotiate a agreement on water supply which both the city and college could operate until the city's new plant is complete, probably in 18 months to two years.

CONCEPT IS NOT NEW

Rehabilitation Makes Mental Patients Productive Members Of Communities

Employed today as a janitor on a small college campus is a 57-year-old man discharged after 18 years at Kentucky State Hospital, Danville. Last year, he, 121 similar patients were retrained and returned to wage-earning job or housekeeping duties in their homes and communities.

good work habits. These and group recreation activities enabled the patient to regain his ability to set alone with others. Last week six weeks of training in sanitation and janitorial work.

ONE OF THE LEAGUE'S TOP TIGHT ENDS HE WAS CAUGHT BY OPPONENTS TO LEAD EAGLES TO VICTORY. HE'S A 6 YEAR VET FROM SOUTH DAKOTA STATE.

Vocational rehabilitation of the mental patients to productive places in the community is a joint effort of the State Department of Mental Health and the State Education Department's Bureau of Rehabilitation Services.

Before the patient's rehabilitation staff accepted this patient for intensive training and placement, vocational evaluation determined his aptitudes for work in the community.

One of the mental patients who was retrained and returned to the community, and were given follow-up training to aid in the transition period. Some of these rehabilitants were women who returning to their homes and were trained in housekeeping and nutrition by a home economist.

"Rehab" is not new at the six institutions where a purpose is restoration of patients and residents to the highest possible level of social and occupational adjustment. Yet in the past the Mental Health Department has lacked funds to equip and staff a full-scale occupational training and placement program.

last year, 2,970 mental patients were screened and accepted for vocational rehabilitation. Of these, 1,121 were trained, returned to the community, and were given follow-up training to aid in the transition period.

Added to total benefits must be cleared to prepare a mentally retarded person for employment in the community, Reichman said. The area itself is new. Ten years ago, in 1951, only 263 mental patients in the entire state were rehabilitated. In 1962, rehabilitants numbered only 4,400, a tiny fraction of the nation's 5,000,000. Yet mental health authorities estimate that the vast majority of these people have the potential to be trained for employment, either in private industry or in sheltered workshops. Only 200,000 are so severely retarded that they cannot work.

The Bureau of Rehabilitation Services, on the other hand, is widely dedicated to providing medical care, artificial appliances, academic and vocational education, placement services, and follow-up as an investment in the potential of the mentally and physically handicapped. Last year, the Bureau provided services to 2,500 handicapped Kentuckians, including State mental patients. A total of 3,375 Kentuckians were transported from the area of welfare and dependency to productive citizens, using funds from State funds and \$1,475,123 in Federal money.

in addition to industrial training in various parts of the institution - laundry, kitchen, grounds upkeep, including rooming in the Frankfurt hospital - school has operated an industrial workshop for several years. Here residents are trained in arts and crafts skills, simple manufacturing, arts, tasks, and social routines of sanitation and staffing categories.

Burley Sales Open Nov. 23, A Week Later Than Usual

The burley tobacco market faced with a slow-curing crop which may be ready for sale about the end of the month, but last year's emergency closing out the first sales period to 42 hours.

reduction and by drought over much of the burley-growing area.

W. I. Staton, executive secretary of the Burley Tobacco Growers Co-Operative Association, which handles the support program and that, however, in the estimate is "just speculation" at this point.

Staton noted that his organization has expanded rehydrating facilities and anticipates no trouble in handling the pre-Christmas sales. He also pointed out that sales of pool tobacco on hand have been active, and that tobacco from only two crops, 1962 and 1963, is on hand.

The association's stocks are now around 195,000,000 pounds. The committee also estimated that sales would go at the rate of about eight million pounds per hour - slower than last year's pace - and that about 75 percent of the entire crop would be sold before Christmas.

PERFECT RECORD Representative William H. Natcher (D., Ky.) has made all 976 roll-calls on legislation since he was sworn in January 3, 1959. Ralph R. Roberts, Clerk of the House, certified this statement. Natcher said that when Roberts told him he had a perfect three year record he decided to build up that record.

CONSERVATION DISTRICT REPORT

Farm Ponds In County Increase To A Total Of Nearly 600

By Donald B. N. Ison
The following report was submitted by Leland S. Hall, Chairman of the Board of Supervisors of the Rowan County Soil Conservation District. We wish to thank Mr. Hall and all of those who have helped to make this report possible.

The following report of the past year activities is submitted to the co-operators of the Rowan County Soil Conservation District. You have had the usual wet and dry periods that are typical of this area. Some of you have had sufficient water to take care of your livestock when the water holes in the branches and creeks dried up. You built 40 more ponds this year. That brings the total number of ponds in the district to around 600. Beef cattle sales in the county amount to more than \$1,000,000 annually. You couldn't have kept so many livestock, if you hadn't stored the rain water when it fell and had it ready when other sources failed. May the time soon come when each pasture field has its own water supply.

One of the important problems facing our country today is the control of rain water. Our cities, our farms, and our factories must all have adequate water. In the Eastern part of the United States, we depend on rains to replenish the used water. With more wells being drilled, the water level in the soil goes down. The heavy downpours come faster then the ground will absorb it and runs off into the streams

to be carried away. We need more large reservoirs to catch and store this excess water where it falls, and feed it back into the streams slowly. Farm ponds help considerably to control water. Forest banks also help prevent floods. Within the last year, 3 1/2 inches of rain fell in less than a 48 hour period. Nearly all this rain soaked into the accumulated woodland's duff and into the soil. The creeks didn't get enough to start running and the erosion was so slight that what rainfall made it's way into the holes of the creek wasn't muddy.

Sod waterways are another way to control excess rain fall. Water running over soil protected by grass and grass roots doesn't wash. Running water always seeks the lowest level and if this area is not protected, a ditch will be cut. This causes loss in cropland and doesn't produce a crop. You are realizing this now and more requests for aid in establishing protection are received each year. Elmer Kistick, tenant on the H. M. Meadows farm, Clyde Litton and Ova Arnett were among those receiving assistance in establishing this practice this past year. Thirty-five acres of ditches were reclaimed this way, during the period.

Sometimes the control program differs and has to be approached in another way. Some of your land is wet and needs drainage. Water running down a slope and spreading over crop or pasture land can prevent the efficient use of the lower field. Diversion channels can be constructed so that the runoff can be led away from the pro-

ductive land. Two thousand seventy-five feet of these ditches were built. Contour cultivation, where the row crops are planted on the level around sloping land help too. You asked for and received assistance in laying out guide lines on 1,849 acres this year. You built 600 feet of terraces and installed 1,045 feet of tie drains. You constructed 2,350 feet of open drainage ditch, and 7,700 feet of surface field drainways. You made a start to control water on your farms.

Sixty seven thousand six hundred thirty acres, operated by 850 co-operators have had some conservation work planned by the district personnel. Three hundred seventy-five farmers requested and received technical assistance during the past year. You set aside 91 acres of land that was unsuitable for cropping or grazing. One man who had a large tract of woodland was fenced to exclude livestock. You grew 300 acres of corn by planting in the tractor wheel tracks, and controlled the weeds with sprays. This cuts production cost without sacrificing yield. You worked over and re-seeded 1,343 acres of meadow and pasture land. You seeded 1,878 acres of row crop or idle land to hay or pasture. There were 39 new co-operators who signed agreements with the district with a total of 2,374 acres. Thirty basic conservation plans were developed by Soil Conservation Service Personnel, bringing a total of 42 basic plans with 42,042 acres for Rowan County. Twenty basic plans were reviewed to technical changes

and desire of the co-operators. Our goal is to develop a basic conservation plan for each individual farm so that we can use our land efficiently, conserve our soil, water, and other resources to make Rowan County a more desirable and prosperous place to live in.

Your district co-operators with the Extension Service, the Division of Forestry, and other agencies in Morehead, Kentucky would have helped you solve some of your problems. The variety tests in tobacco would have shown the different characteristics of each kind and how it would react to your growing conditions. One never gets too old, or learns so much that he can afford to pass up opportunities to profit by example. It has been said, there is always a better way of doing things. If we were in the Valley of Virginia, "burning destroyings" or taking away everything of value. U. S. Mail, Gen. Wesley Merritt reported, "The Valley from Staunton to Winchester was completely deserted. It had been strongly tempted to start fires in St. Albans, but were not successful."

Thirteen of the Confederates were arrested by Canadian officers and \$50,000 which they had was impounded. A Canadian court freed them and ordered the money returned to them. It and money carried by those Confederates who had not been arrested, amounting to the total taken from the St. Albans banks, eventually was turned over to the Confederate States government at Richmond, Va. In a second testing of the status of the raiders, some of those who had been arrested again and the United States sought extradition them. A court of Montreal held that the things done at St. Albans were acts of war, and again released the soldiers.

It. Young and two others had arrived at St. Albans nine days before the day of action and stayed at a hotel. They left their place and making detailed plans. Others came in from time to time, some arriving on a train from Montreal at noon on October 19, the day the town was captured. At 3 o'clock, when the town had been struck, all carried out their assignments in a tactical way. One man who had been taken prisoner was still when trying to escape; he died two days later. The other soldiers were wounded. Within minutes after the clock struck, the Rebels were in control of the town and had begun collecting the money.

We wish to thank the Soil Conservation Service, The Rowan County Fiscal Court, the Department of Conservation, Morehead State College, Don Nelson and the other SCS personnel who have assisted in making this report possible.

Leland S. Hall, Chairman Rowan County Soil Conservation District Supervisors.

'Photo-Scenic' Weekend Slated At State Park

Mountain scenery and the "color" of autumn are waiting camera fans taking advantage of the Photo-Scenic Weekend Friday through Sunday at Pine Mountain State Park near Pineville.

State Parks Commissioner Robert D. Bell said that two members of the Louisville Courier Journal's nationally-known photography department will be there to instruct in use of all kinds of cameras. They are Billy Davis, the newspaper's director of photography, and Bill Strode, 1963 Photographer of the Year for the Eastern States.

Participants in this next special fall package program at a state park are invited to bring their best slides or prints--both black-and-white and color. The weekend starts with outfit supper Friday, Bell said, then continues with a sound of lectures, demonstrations, contests, and field trips. The \$25 per person price includes two nights of lodging, six meals, and all special events. A unique "vacation for horses" is being offered through October at Pennycuik Forest State Park, near Dawson Springs, and also at Pine Mountain. Private stalls will be provided for motorists who bring their own horses, or either park for trail riding. Last of the special fall packages, the Gemma will be presented November 20-22, at Jenny Wiley State Park, near Prestonsburg.

Home Rule Seen In Charter

Latest developments in revising Kentucky's 1891 Constitution include the probability of home rule for local government and indications that the revision committee is seeking opinions from qualified advisors. The city and county subcommittee in its session on Friday, Oct. 16, had a sympathetic hearing to pleas for more home rule.

The Assembly's coordinating committee has approved in principle the future appointment of 100-member advisory committee.

The legislative chairman of the Kentucky Municipal League, Malcolm Rhoads, Fort Thomas, told the city and county subcommittee that small towns and large cities have different problems. The voters should be allowed options in the structure of local offices, he said. Cities need to be protected from the financial burden imposed by some State laws, he added.

Some of the changes in local government being discussed include: Merger of the prosecuting functions of the county and the Commonwealth's attorney into one office; consolidation of the jailer's and the sheriff's office; reorganization of sheriff's duties, including assignment of his tax and election duties to other offices and removal of the one-term limit; abolishing the fee system provision for appointment of tax commissioners instead of election, and removing judicial duties from fiscal courts so that they may concentrate on the administration of county business. Appointments to the proposed advisory committee would be made after the Assembly's work is further advanced. Chairman of the five standing committees, however, have been authorized to call in such advisors and consultants as are felt necessary. The coordinating committee has assigned 1206 sections of the present Constitution to study committees. The committee on health, welfare, education and corrections will meet in Frankfort Nov. 18.

UNIVERSAL One reason money is so popular is that it can be made in almost any where and out of almost anything.

100 YEARS AGO THIS WEEK

The Civil War In Kentucky

By Joe Jordan (Kentucky Civil War Commission)

One, hundred years ago this week, a Confederate States soldier, Bennett J. Young, 21, of Nicholasville, Ky., led twenty-two other soldiers, nearly all of them Kentuckians, in an invasion of Vermont that was launched from Canada. They sailed the largest Vermont town near the Canadian border, seized for their operations three boats, escaped across the line into Vermont, and a wild ride on captured horses.

The raid had been authorized by the Confederate State War Department in retaliation for the Union Army's laying waste the Roanoke Valley of Virginia, "burning destroyings" or taking away everything of value. U. S. Mail, Gen. Wesley Merritt reported, "The Valley from Staunton to Winchester was completely deserted. It had been strongly tempted to start fires in St. Albans, but were not successful."

Thirteen of the Confederates were arrested by Canadian officers and \$50,000 which they had was impounded. A Canadian court freed them and ordered the money returned to them. It and money carried by those Confederates who had not been arrested, amounting to the total taken from the St. Albans banks, eventually was turned over to the Confederate States government at Richmond, Va. In a second testing of the status of the raiders, some of those who had been arrested again and the United States sought extradition them. A court of Montreal held that the things done at St. Albans were acts of war, and again released the soldiers.

It. Young and two others had arrived at St. Albans nine days before the day of action and stayed at a hotel. They left their place and making detailed plans. Others came in from time to time, some arriving on a train from Montreal at noon on October 19, the day the town was captured. At 3 o'clock, when the town had been struck, all carried out their assignments in a tactical way. One man who had been taken prisoner was still when trying to escape; he died two days later. The other soldiers were wounded. Within minutes after the clock struck, the Rebels were in control of the town and had begun collecting the money.

We wish to thank the Soil Conservation Service, The Rowan County Fiscal Court, the Department of Conservation, Morehead State College, Don Nelson and the other SCS personnel who have assisted in making this report possible.

Sales Tax Is Money Source In 38 States

The rise in state and local taxes has left just twelve states without a state sales tax, according to Changing Times, the Klinger magazine. Noting that Pennsylvania, with the highest sales tax, is up from 4 percent to 5 percent in article in the current issue sees continued increase ahead in both state and local taxes. It's findings are based on an exclusive survey of all major state taxes showing how the tax burden varies from state to state.

The only states without a state sales tax now are Alaska, Delaware, Idaho, Massachusetts, Minnesota, Nebraska, New York, Oregon and Virginia. A sample increase noted in the report was Alabama's sales tax, up from 6 percent to 4 percent.

Highest tax on each package of cigarets sold in Mississippi, now 8 cents per pack. Other increases: Alaska and Florida from 6 cents to 8 cents, New Jersey City taxes cigarets at 4 cents a pack. State levies on each gallon of gasoline are

from 5 cents to a Hawaii to 11 cents ranging from 8 1/2 cents to 11 cents. Individual income tax is now imposed by more than 30 states, including West Virginia, where residents did not pay income tax five years ago when the magazine conducted a similar survey. Among states with increased rates are Idaho, Indiana, Minnesota and New Mexico. City income taxes are noted in Kentucky, Michigan, Ohio and Pennsylvania.

ON NAVAL GUNFIRE The nation's top Marine said that there is a "deficiency" of naval gunfire to support operations in the beach landings and "remedial action is essential." General Wallace M. Greene, Jr., Marine Corps commandant discussed what he called a "gun deficit" before Marine and the Navy amphibious forces have been concerned for some time that their capability has been reduced by the switch from conventional guns to missiles.

LIGHT WATCHMAN makes late arrivals safe arrivals With dusk-to-dawn outdoor lighting, you'll never again have to stumble in the dark. And you'll never have to touch it; darkness turns it on; light turns it off! And it operates for just pennies a day. AT HOME, "Light Watchman" protects against prowlers and lengthens the "day" for outdoor recreation. ON THE FARM, it speeds late evening and early morning chores. AND FOR BUSINESSES, it attracts customers, helps prevent accidents and thefts. "Light Watchman" can be another important step toward the joy of total electric living.

Rambin' Thru Williba

Gary Abnet Caught Federal Grasshopper

By Glenn Hollon

Gary Abner was visiting in Harrison County today and along came a little Federal Government truck. Out of the truck jumped a big green Federal Grasshopper. It was a healthy little insect. Gary captured the Federal Grasshopper and he put it into a jar with some green vegetation. The Federal grasshopper thrived very well until the end of the month; but when its check didn't come, it starved to death.

It was a fine nice to Mrs. Bernard Lynch to give to us a good old mommy cat for to fetch all our rats and mice. This cat really did well in getting rid of these varmints. But that is the best family we have ever contacted with. Already the 15 kittens in every doorway and under every foot of board along within the barn or outside the barn. We thought cats only found kittens about once a year. This cat has already found two gangs of kittens and prospects for a lucky find again in almost certain. We contacted Mrs. Lynch upon how to stop this overpopulation of cats and she didn't know at the time but she told us later that woman in London, England was giving her cats some of them new family pills and the London cat has not found another single kitten. We must see the Family Plan Doctor at the County Seat and get some family pills at once. We ain't got no powdered milk and it is putting a strain on our old cow to provide for so many cats. The mice and rats are all gone and the cats must have something to eat.

Them congressmen seem how much the strain of debating would be upon a president or a nominee for president and they passed a law that won't let Democratic or Republican candidates for president debate each other. Congressmen especially the Democratic kind, knows what is best to keep their president in the top shape and they know debating can produce a terrible strain upon a president or a nominee for president. Debating with the president could let information leak out to the people that they shouldn't leak out to the people. They're confidential things what happen in Washington and all the president ain't supposed to know about it.

HALLOWEEN

Fall Brings Beauty, But Danger Lurks

By Adrian M. Razaq

County Agent

Those folks who have been out in the country in the past week or so I am sure can appreciate the fall beauty of the trees both in town and out in the rural sections. I agree with the many who have said that they believe this has been one of the prettiest they have seen. Let's keep in mind, however, that as these leaves fall they present a hazard to our woodland due to the fact that they will be dry and likely to start forest fires if care is not taken by pickers, hunters and others who are out in the woods.

If you need to be in the woods, especially if you build a fire, be sure that it is out before you leave and take care with that cigarette when you throw it away. I was talking to one of our fire wardens the other day and he said one of the hardest jobs he knew of was fighting a brush fire on a hillside on a warm fall day. I am sure that many of you will agree with him and not only is it hard work, such a fire represents a serious economic loss to our county and country.

Now is a good time to get a good crop of corn. Some folks have a chance of seeing some Bluegrass on my lawn to help things up stand. A quarter bushel per 1,000 square feet of good quality Bluegrass should be enough. If you have any fertilizer, put on about 25 pounds to 1,000 of a 10-10-10 or it's equivalent.

Morehead OES Chapter Installed New Officers

New officers were installed last Tuesday by the Morehead chapter of the Order of Eastern Stars.

Mr. Dortha Gales was inducted as worthy matron, while Wanda G. Wells is the new worthy patron.

Others who assumed office at the same time were: Mrs. Lois Spurlock, associate matron; Elwood Bumgardner, associate patron; Lottie Powell, secretary; Mrs. Etie Lee Corrette, treasurer; Mrs. Thelma Burdman, associate conductor; Mrs. Esther Ellington, chaplain.

Maie Blair, marshal; Sharon Spueck, organist; Mrs. Joyce Lyons, Adah; Mrs. Lyda Carter, Ruth; Mrs. Dora Williams, Lath; Patricia Linn, Martha; William Hubbard, Elcie; Ed Leach, Wanda; and Mrs. Edith Marsh, sentinel.

Outgoing worthy matron was Mrs. Lois W. Carter, while the outgoing worthy patron was Elva Barker.

Mrs. Cales was installed by her sister, Mrs. Dora Williams, a past matron who now resides at deputy grand matron of District 4.

Installing officer was Mrs. Dorothy Holbrook, a past grand matron. She was assisted by Oscar Peñney, deputy grand matron of District 4.

Mrs. Pauline Blair was installed marshal and Mrs. May Williams installing chaplain. Organist was Mrs. Vivian Young. Honorary installing officers were: Mrs. Mary Carey, Russell, associate matron; Bob Carter, Russell, associate patron; Mrs. Ada Fagale, West Liberty, conductor; Mrs. Louise Wright, Johnston, Armo, president; Mrs. Suth Linton, secretary; Mrs. Estelle Blakely, Russell, treasurer; Mrs. Alma Stevens, Grayson, Adah; Mrs. Margie Vanisher, South Shore, Ruth; Mrs. Bernice Brown, Greenvale, Esther; Mrs. Lucille Bogg, Olive; Mrs. Martha A. Egan, Stafford, Catersburg; Bill Black, Catersburg, Russell; Wanda; and Elva Baker, sentinel.

Mrs. Maxine Casity was chairman of the serving committee.

Expansion Set At Ashland's Arco Plant

The Arco Steel Corporation plant at Ashland will share in the company's \$600 million expansion program, Logan T. Johnson, Arco president, has announced.

Other plants sharing in the expansion funds are at Middletown, Ohio, Houston, Texas, and Butler, Pa.

In a 10-year period Arco has put \$158 million into expansion of facilities at its Ashland plant. As a result of increased facilities, 800 employees have been added this year.

The largest single expansion in the history of the company includes this work at Ashland: Adding a new tandem cold reduction mill, a new zinc coating line and remodeling of a hot strip mill.

FARM BUREAU in Action

News Donnell
Kentucky Farm Bureau Fed.

During the last two weeks Farm Bureau commodity advisory committees have been meeting at the State Farm Bureau office. This may not sound like an important news item, but it points up Farm Bureau's procedure for coordinating the problems of individual commodity groups with agriculture, and for coming up with solutions to these problems that are in the best interest of all farmers.

That's the whole idea of a general farm organization. Farmers come in 45 years ago when they organized Farm Bureau that organizations along commodity lines could not accomplish the overall job of building a strong voice for agriculture. In other words, they recognized that unity in a minority group was essential for success. They knew that agriculture could not talk with 300 different voices and be effective.

At the same time, Farm Bureau leaders know that the problem of individual farmers is mostly concerned with the production and marketing of the commodities they produce. It is to properly serve its members.

This is where Farm Bureau's commodity advisory committees come in. These committees are made up of the leaders of the various commodity interests. They are men who have a first-hand knowledge of individual commodity problems and are able to advise Farm Bureau on the most workable and most acceptable solutions to these problems.

These committees meet several times each year to bring the leadership and the staff on Farm Bureau up to date on commodity problems. They also meet prior to the meeting of the State Farm Bureau Resolutions Committee, and make recommendations on policy matters of vital concern to producers of the various commodities. They also meet to discuss the county voting delegates at the state convention. Statements on local and state problems then become the policies of Farm Bureau at the state and county levels, and statements on national problems go on to the national level as recommendations for national policies.

Survivors May Get Benefits

SSManager Says
If a worker in your family dies, some members of the family should inquire at the social security office to see if survivors benefits are payable. Thomas Thompson, Social Security district manager in Ashland, said this week.

Death in a family, especially where there are young children, can mean the shattering of dreams and hopes for the child's future. Social Security benefits can mean the difference between the shattered dreams and the security of a continuing income and a happy home life, the district manager declares.

According to Thompson, 9 out of every 10 young children and their mothers can count on survivors' benefits to keep the family together. Survivor benefits may be payable to young children when the mother, who has been working, dies, even though the father is the family's primary source of support.

Nearly 4 1/2 million survivors of deceased workers are receiving monthly benefits. The average benefit paid to a widowed mother with two children is about \$100 per month.

Henry N. Sutherland, Social Security representative for this area, will be in Morehead each Tuesday at 10:00 a. m. in the Public Assistance office.

LETTERS TO THE EDITOR

Taxation By Petition Opposed By Reader
Editor, The News
I have observed for several years the policy of your newspaper to be impartial in relating views of your readers, although sometimes they differ from your own. I appreciate this very much. I believe this policy contributes to the popularity of your paper has attained.

Last week I had a letter printed in your paper prating the growth of interest by the parents in the Parent-Teacher Association at the Clearfield school. In this letter I related the topic that was most interesting to the group.

Some of my friends understood this letter to be a flintation of the letter by Mrs. G. A. Sheets questioning the desirability of imposing a tax by petition on the people's possessions of 7 1/2 a hundred for use to purchase a mobile and library.

I wish this letter to clarify my position on the subject.

For several reasons I am not in favor of taxation by petition; I will state a few of my objections.

(1) I believe it to be a method to circumvent the will of the voters by denying them the use of their ballot in exercising their voting law. On any proposal that voters may decide they should have the right to a secret ballot.

(2) I believe there is a constitutional limit to the rate we may be taxed. Although this

Berry Again Heads Burley Cooperative

Officers of the Burley Tobacco Growers Cooperative Association were re-elected at the association's annual organization meeting in Lexington.

Re-elected for 1964-65 were John M. Berry, New Castle, president; David J. Williams, Lexington, vice president; W. L. Stator, Lexington, executive secretary-treasurer; and G. J. King, Nicholasville, assistant secretary-treasurer.

Seven directors of the Association, elected in their respective districts at meetings in September, were 2 in favor for new two-year terms on the 25-member board. They include William B. Blackford, Lexington, first district; Sam Clay Jr., Paris, second district; E. Logan Brown, Shelbyville, third district; E. Boyd Dover, fourth district; W. G. Wigginton, Georgetown, fifth district; E. C. Schazman, Russellville, O., sixth district; and Edward S. Furnish, Vevey, Ind., seventh district.

Three directors-at-large for the states of Kentucky, Ohio and Indiana were named by the board for one-year terms. They are David J. Williams, for Kentucky; Raymond I. Satterfield, West Union, O., for Ohio; and George Elliott, Rising Sun, Ind., for Indiana.

Two directors, Brown and Tom Darnell Fleming County, were named to serve as members of the association's sales committee, and Blackford was named alternate member.

Twenty-two directors representing districts of the association and the three director-at-large comprise the 25 member board. One-third of the 22 district directors are elected annually. All of the association's directors are growers of burley tobacco.

The Burley Association administers the pipe support program for burley in Kentucky, Ohio, Indiana, West Virginia and Missouri.

At the meeting, held in Lexington, Stator reported the sale of an additional 1,324 hoghead of burley, including 1,299 from 1963 holdings and 1,299 from 1963 burley taken under the price support program. Each hoghead weighs approximately 90 pounds. These sales were in addition to the approximately 28,000,000 pounds sold in September.

Morehead, Ky.

THE PUBLISHER'S PEN

Morehead Had Its 2nd Biggest Crowd On Last Saturday

Recently we quoted some of our senior citizens to the effect that the coming winter will be long, cold and rugged. Among the "signs" is a bumper crop of apples. We did a little checking and it appears that the biggest apple crop, prior to this year, was in 1937. And, brother that was the worst winter in our adult lifetime. The temperature below 20 degrees several days in a row and snow covered the land for weeks.

ANOTHER BAROMETER IN OLDEN DAYS

Those who sit on the courthouse benches say the fall foliage is most beautiful in their memory and that sometimes extends back the turn of the century. They are in agreement this is a definite and unalterable harbinger of a cold winter. The trees are so beautiful this fall that even our own people, who are used to such splendor, are taking colored pictures. The police say that tourists are pleasantly amazed and many driving to this part of Kentucky to record this on their cameras. One of the most beautiful scenes of all is the west side of a road on the north side of U. S. 80 between Salt Lick and Owington. If you're driving around to get a little of this crisp fall atmosphere we suggest you travel the some 15 miles from Morehead to see what many consider to be the most beautiful panorama of nature has ever provided in these parts.

ALL RECORDS WERE BROKEN

It is generally agreed... or at least so recorded in our Centennial Edition of nine years ago... that the biggest crowd ever to assemble at Morehead was to hear and see President Harry S. Truman in 1948.

The second largest came last Saturday for Homecoming at Morehead State College. Metropolitan sportswriters were on hand with their 8,000 estimate at Breathitt Sports Center. It was also, to our thinking, the most thrilling football game ever played at Morehead. The Eagles, down for 47 minutes, came back in a period of less than seven minutes for two touchdowns and two perfect extra point placement kicks to defeat the Red China 21-13.

One of the yell heads at the clock ticked away the final seconds of the game. "We're Florida bound." Evidently the avid Eagle supporters are referring to the Tangerine Bowl at Orlando. The only way Morehead can receive its first post season invitation would be to finish the season unbeaten - perhaps the remaining four games in convincing fashion.

Robert Kennedy is a slight favorite to defeat Sen. George Wallace, the OVC leader. Perhaps the toughest game is Saturday at Morehead to Murrefreesboro to meet always powerful Tennessee. Morehead has been unable to conquer the Bluebirds in 13 years, and will likely be the underdog on Sunday's betting line.

The winner will be the only unbeaten club in the conference. We thought that Saturday's fierce struggle with Austin Peay would decide the OVC title. But, it's a case for the Eagles of being fired from the frying pan to the fire. Saturday's game may be the championship.

Unfortunately for Morehead, the entire conference is tightening its belt. Eastern and Eastern, off to a bad start, are vastly improved according to every scouting report. It is entirely possible that a 5-2 record could nail down the OVC title. On the bright side - the spirit of the Eagles couldn't be broken. There are no serious injuries, and the players are con-

ident, after Saturday, that they can go all the way and give MSC its first undefeated football team in the 36 years the Eagles have fielded a team. Morehead had five victories in a row... longest streak since 1939.

THIS WAS CERTAIN TO COME

The MSC Board of Regents has issued, in writing, its position on supplying the City with water in the future. In substance, the ultimatum is that the big (cut-off) wheel will turn if the level in the storage reservoir drops to one foot.

Since November we have reached and re-written that this is truly serious business, and this policy statement from the college emphasized the increasing gravity of the situation. We, like other thinking Moreheadians, remain hopeful that it can still be worked out, and the rapid progress of the college, the town, and suburbs continue in orderly fashion.

ONE WAS GREEN, THE OTHER BROWN

Those who attended the MSC-Austin Peay and the Kentucky-LSU games Saturday (afternoon and night) were amazed how green the grass was at Breathitt Stadium and a solid brown at Stoll Field in Lexington.

Both are mixtures of Bermuda and Blue Grass. Lexington friends say a freeze killed the grass there. Actually, MSC officials confide, the new turf at Morehead was kept green by an artificial coloring process. It was dyed to give it that mid-summer look for the gratification of the ole grads.

(Kentucky plans to dye its grass for Wildcat homecoming three weeks hence. While in this vein, we should record, if you didn't already know, that Morehead has the only unbeaten college football team in Kentucky.

WE KNEW SOMETHING ABOUT THIS

Returning last week from the World Series, this country publisher had an inside inkling that Yogi Berra would be let out as Yankee manager, but missed a chance to scoop the smart boys by failing to come out in print with such a prediction.

Yogi could not discipline the club, and many of his star performers, like Mickey Mantle, were unhappy and not playing up to par.

The office girl chortles - if you had so much knowledge why didn't you go all the way and forecast that Khrushchev would be fired by the Russians and Red China would test a nuclear bomb. We were privileged, along with some other grass roots editors and publishers, to attend a dinner in the White House in 1961 as the guest of John F. Kennedy.

During that round table exchange, JFK said he did not trust Russia, but added: "Mr. Khrushchev, and I, are in agreement on one thing - that Red China will overrun the world if given the opportunity... our hope is that they will never find the secret, and produce nuclear weapons."

Everyday in the future history of the world is fraught with danger and possible extinction of mankind and society as we know it.

TO THE POINT - Most New York taxi cabs refuse to travel through Harlem... Republicans have about conceded the Big New York state electoral vote, but point out they can win without it.

Robert Kennedy is a slight favorite to defeat Sen. George Wallace... about 92 percent of the retail food business is done by chain stores. Their margin of profit is about two percent before taxes and a little more than one percent after tax bills have been paid.

They depend on heavy volume and this is probably the most competitive of all businesses... we were surprised that the biggest State this year was from Jefferson. This is the certain indication of the growing prestige of MSC... most folks who attend the World's Fair are disappointed, and complain of the extremely, and perhaps unfair, high prices. A family four or five, must be frugal to hold expenses to \$100 a day... you can drive from Morehead to either the Louisville or Cincinnati airports in two-and-a-half hours. The State Highway Department expects to soon let a contract for I-64 from Mt. Sterling to east of Owingtonville... the United Fund Drive is getting underway this week. Twice as much money will be needed to meet the goal. About \$3,500 is being earmarked for indigent care at St. Claire Medical Center... farmers are requesting information on cucumbers following an offer by a Louisville packer (Parnout Foods) to buy the

Farm Records Needed For 1964 Census

All farmers in Rowan county will need this year's business records to help answer questions on a form scheduled for mailing in early November to start the nationwide Census of Agriculture. County Agent Adrian Ranzor said today.

The Census of Agriculture is taken every five years by the Bureau of the Census, an agency of the U.S. Department of Commerce, in years ending in "2" and "7". It provides information of vital importance to the nation's agricultural resources and production. Such information is needed in making decisions affecting many segments of the U.S. economy. Data gathered include the number and size of farms, number of persons living on farms, acreage and harvest of crops, a livestock and poultry inventory, and information on farm equipment and facilities, and on income and some production expenditures.

The job of taking the farm census will be in three stages, the county agent said. The first stage - organization of a team of local citizens in each county to take the census - is already underway. Crew leaders to supervise the census in each county are being selected and trained. They will have the responsibility of recruiting and training enough enumerators to count the farms (and ranches) in their counties. Each enumerator will visit about 150 farms during three weeks of temporary employment.

Shortly after Nov. 1, the Census Bureau will open stage two by mailing out census forms to all rural property holders in the county. The county agent continued. Farm operators will then have a period of time to consult their records (for best estimates for the year) and answer the questions on the forms.

In the final stage, enumerators will visit each farm in the county to collect the questionnaires, the county agent added. At the time of this visit, the enumerators will help farmers complete answers to any questions the farmers may not have been able to answer. Enumerator visits, which will take about three weeks to complete, will start according to the following schedule: Nov. 10 - Maryland, West Virginia, Virginia, Kentucky, Ohio, Indiana, Illinois, Iowa, Missouri and Kansas. The center crop and place a grading station at Morehead provided Rowan farmers plant 50 acres or more... we maintain and reiterate that our farmers could show a considerable return on the breeding of thoroughbred race horses. Herndon Evans, editor of the Lexington Herald, can supply full information. It is conclusive that breeding costs are much cheaper in fringe areas than in the Bluegrass counties of Fayette, Clark, Bourbon, Woodford etc... many members of the Kentucky General Assembly believe that a lottery on the Kentucky Derby would solve the Commonwealth's revenue problem. We think it would die in infancy if as little as 15, or 20, percent is returned to the public as in New Hampshire. It's an open secret that the State of Kentucky is so burdened with debt service and demands for more services that it is a day-by-day financial existence, sort of Bob Peter to pay Paul favorite for the Kentucky Derby since Citation. He was bred in Kentucky.

New Museum Planned At Perryville

The State will build a museum at Perryville Battlefield State Park with a cyclorama, a huge visual display of the Civil War battle that occurred on the site. State Parks Commissioner Robert Bell said the construction will be completed by next spring.

The building will be a two-story split-level structure with 2,800 square feet of floor space. The museum will be on the upper level and an apartment for a caretaker will be on the lower level. It will be the seventh museum in Kentucky's parks and shrine system.

ANNUAL REPORT CONCLUDES

Rowan Health Department Lacks Personnel, Money To Do The Job

A comprehensive report covering the activities of the Rowan County Health Department during the first six months of 1964 was...

Two main phases of the department's responsibilities, the responsibility for the care of the health program required of a health department and the responsibility for the financial support to provide a minimum of essential public health services...

There have been activities of the department in its assigned areas...

LABORATORY SERVICES: Sixteen laboratory specimens collected and examined...

states and public buildings. One hundred seventy-seven samples of raw milk, 24 samples of concentrated milk, 50 samples of water collected...

MATERNAL AND CHILD HEALTH: More than 20 home visits made by public health nurse in connection with services to expectant mothers...

SCHOOL HEALTH: Public health nurse made 117 school visits and participated in 37 teacher-nurse conferences...

CRIPPLED CHILDREN: One hundred field visits made to crippled children...

DENTAL HEALTH: Educational talks have been given to school children; dental care pamphlet distributed and a dental clinic has been conducted for indigent children...

COMMUNICABLE DISEASE CONTROL: Thirty-three immunization clinics were held with the following immunizations given: Smallpox, DTP, 974; Typhoid, 90; Oral Polio, 229...

TUBERCULOSIS CONTROL: The health Department gave 167 x-rays, while the mobile x-ray unit gave an additional 206. Only one new case of this disease has been reported in Rowan County during 1964...

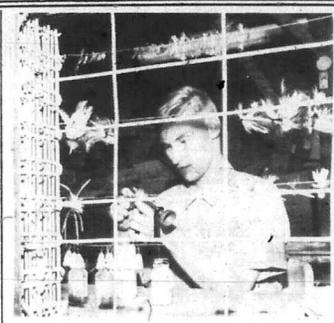

VENEREAL DISEASE CONTROL: Only three cases of venereal disease have been reported here in the past six months...

CHRONIC DISEASE: The public health nurse made 12 home visits. In addition there were 99 office or clinic visits relating to chronic diseases—for the most part, heart disease...

MENTAL HEALTH: Public health nurse made 28 home visits to the 11 mentally retarded children on the department's register...

The staff of the Rowan County Health Department during the period covered by the report included Mrs. Mary C. Klinec, public health nurse; Estill E. Green, sanitation and Mrs. Jeanette McPeck, clerk and registrar of vital statistics...

Members of the Rowan County Board of Health, which is the supervisory body for the Health Department, are: Dr. Ernest Blair, chairman; Dr. Samuel E. Reynolds, Dr. C. Louise Caudill, County Judge W. C. Flannery, Bridges Johnson and Dr. C. C. Mayhall.

Vocational Training

FRANKFORT STATE HOSPITAL and SCHOOL'S industrial workshop plays a major role in the vocational rehabilitation of residents there and the sale of some 1,000 hand-tied fishing lures last year helped make the program self-supporting...

State Hospital Patients Busy Filling Arts, Crafts Orders

Fingers are flying these days at Frankfort State Hospital and School's art and craft workshop where a pile of orders from Kentucky and a dozen other states signal the approach of the Christmas season...

Claig Sprout ... And His Friend, TIMOTHY TUGMUTTON ... Sez

DEAR MISTER EDITOR:

Ever met in a while they give some feller on television that's trying to put a carload of education on wheels about brains. Last night, for instance, they had this professor talking on the subject of "small relations" (Oleina!) I don't listen to such jumb, but my old lady was working the console and what my old lady tunes in, let no man turn her around. At my house it just ain't good family relations...

Yours truly, Claig Sprout

Federal Lakes Creating Sportsman's Paradise

HARNESSING RIVERS throughout Kentucky to prevent costly floods and at the same time provide big reservoirs for recreation uses is part of the long-range program of the U. S. Army Corps of Engineers. During this fiscal year Congress appropriated \$54.5 million for reservoirs, locks and dams and other flood control projects. Funds have been appropriated for construction of the Cave Run Reservoir, Laurel Reservoir and Carr

Fork Reservoir with work expected to start in 1965. Kentucky Lake in Western Kentucky and the new Barkley Lake nearby are both Tennessee Valley Authority projects. Projects are under study on the Big Sandy River, Green and Barren Rivers, Humphreys Creek in Western Kentucky, Kentucky River and tributaries, Salt River, Upper Cumberland River and in Southeastern Jefferson County.

Farm Facts

Mountain Farmers Still In Business

Don't write-off the Kentucky mountain farmer too soon as a victim of the agricultural development of the state. There are already signs that many of them can use local resources to compete advantageously in certain specialized enterprises with access to more favorable farm areas. This was well illustrated a few days ago when farm specialists from the Extension Service told a regional conference of bankers, meeting at Morehead, (Beecham County), that was happening in the hills of Eastern Kentucky.

Take poultry, for example. Who would have thought that the largest agricultural development in the state during 1964 would have been in lecher and brook counties? In one small section of those counties a real poultry complex is developing, about 60,000 hens in flocks ranging from 8,500 to 10,000. They are producing high quality eggs at a profit and in combination with corn belt farmers. How can they do it? First, they have an abundance of labor - mostly family help - and a ready market that has long been sup-

plied by shipped-in eggs, and second, by buying feed in carload lots it can be delivered at only slightly higher prices than it would cost in the corn belt. Most important of all, these producers spent much an hour studying their problems before they went into business and have developed a record keeping and accounting system that works in the m of trouble before it happens.

The bankers were told also of the progress made in the use of plastic greenhouses for the production of hothouse tomatoes, lettuce and other vegetables. Here, many mountain farmers have advantages over their urban competitors. There is an abundance of cheap fuel. Many mountain farmers have natural gas available on their own land, and there is plenty of coal and wood. Labor is also abundant and these two items, fuel and labor, account for the major part of the hothouse costs. Local producers are already supplying a large part of the demand for hothouse tomatoes in some mountain towns and are now looking to distant markets. One

county, Wolfe, is working on a program to get six acres under plastic which will permit truck shipments to northern markets. In these two enterprises, eggs and hothouse vegetables, mountain assets more than offset mountain liabilities.

Mountain farmers are also making progress in producing feeder pigs and calves. Although they will never become large producers, they can contribute to the economy of the area. No one expects the deep mountains to get into extensive dairy production, but it is encouraging to see a cheese plant operating at London where it will provide a milk market for farms in the foothills of the Cumberland. Where farm income is low, as it is in Eastern Kentucky, it is not necessary to have big operations to add materially to the comforts and standards of the family.

Youngsters--

(Continued from page 10)

as children from the United States continue the 14-year-old tradition of "share rather than scare" during the Halloween season.

Under the direction of United Church Women, led by Mrs. A. B. Bower, children from all Morehead churches have been invited to take part in the single-evening effort.

Cattle Testing Program Grow Butler Reports

The state's program of testing marbled dairy cattle for brucellosis is growing, according to Agriculture Commissioner Wendell P. Butler.

He said tags signifying "tested animal" were applied to the backs of 19,801 animals in September compared with 16,280 during August.

Blood sample reports were received on 57 percent of the animals backtagged during August.

"The success of our backtagging program is due to the fine cooperation by stockyards and packinghouses," Dr. R. J. Henshaw, acting state veterinarian said.

Backtagging helps eliminate much on-the-farm testing and saves money, Henshaw said. "There are no fines for use and use and should demand that their cattle be backtagged at market," he added.

Henshaw explained that through health information obtained from marbled cattle, brucellosis testing credit can be made to the herd and the county from which the backtagged animals come.

HOME-COMING WIN

RCHS Slips Past Boyd County

For the second straight year, Rowan County High School has downed Boyd County by a 7-0 score.

Coach Paul Outley's Vikings Friday edged by the lions on the strength of an extra point, to the delight of a homecoming crowd estimated at more than 1,000.

Actually, it was a come-from-behind win for the Rowan Countyians, who went to the dressing room at halftime trailing 6-0.

Boyd County drove to its only score early in the second period and failed on the conversion try.

Rowan County, on the second play of the second half unloaded a 60-yard pass play, with Bobby Brown carrying Gary Capner's pass the final 25 yards to touchdown territory.

Freshman Fullback Ronnie Skaggs bulled his way over for the extra point and that ended the scoring.

Rowan County penetrated to the Boyd County 20-yard line twice in the second half, after having failed to cross mid-field in the first two periods.

The Vikings halted Boyd County on their own 20 yard line in the fourth quarter, nullifying Boyd's only serious threat after halftime.

Outley's eleven will take on Fleming County tomorrow and head this week that two freshmen will start in the backfield. They are fullback Skaggs and halfback Wade Hatton.

in the first two periods.

The Vikings halted Boyd County on their own 20 yard line in the fourth quarter, nullifying Boyd's only serious threat after halftime.

Outley's eleven will take on Fleming County tomorrow and head this week that two freshmen will start in the backfield. They are fullback Skaggs and halfback Wade Hatton.

The RCHS eleven will close their season here a week from Friday by taking on Louisville. Their campaign's record has far is 6-2, the best mark completed at this stage of any of the three seasons since football was revived at the county school.

Whether you smoke cigarettes or not, if you live long enough you will die of something or other.

Illness Knocks Dudley Off Pro Golf Tour

Mike Dudley, former professional at Sunnybrook Golf Club here, reportedly has been ordered off the national pro tour because of an acute stomach ulcer.

Dudley, a graduate of Morehead State College, became ill on the eve of the Sunset-Camilla tourney in Sacramento, Calif., recently and was hospitalized for observation.

Why Pay Twice?

You already pay taxes to support a generous federal-state medical program for those over 65 who need it. Why pay again for a plan that isn't needed?

Proper Burley Preparation Is Essential

Farmers may have spent much labor on their burley crop this year.

But if they don't prepare it properly for market, says Ira Mastie, University of Kentucky Agriculture Extension Service specialist, they'll lose some fruit of their hard labor.

Here are recommended practices to ready cured tobacco for the market.

Take hanging tobacco down at the proper time. Fat (uncured, still sappy) stems should not be present in any portion of the plant. If they are, use heavy fires to dry them out in the barn.

Strip tobacco when it is ready. If left in the barn after it is ready for stripping, it will darken and cause the farmer to be penalized with a lower support price.

Stripping rooms should be efficient. They should be comfortable, properly heated, well-lighted, and have wall presses.

There are five basic grades on a stalk, i.e., from top to bottom: 1, 2, 3, 4, and 5. Sort the leaves into these basic grades for higher support prices and better auction floor grading. Mixed grades probably will bring less money.

Press tobacco lightly. If the tobacco is pressed too hard, the buyer may leave in on the pile and not buy; he doesn't have time to examine caked tobacco carefully.

Surprised? Chances are you never heard of the Kerr-Mills Law, passed by Congress in 1960. We call it...Health Opportunity Program for the Elderly.

This program enables individual states, with federal assistance, to guarantee to every elderly person who needs it the health care he or she requires. Thousands of people every day are being helped by its broad benefits.

Yet, the supporters of the proposed Medicare Tax would have you believe that its passage is urgent...that persons over 65 are deprived of needed medical care because they can't pay for it.

So why pay twice? Find out about the health program you really need supporting. For information on health care for the elderly in your area, ask your doctor or contact your state or local medical society.
