

THE MAYSVILLE MONITOR.

March 11, 1841.

ADVANCE PRICE—25 PER ANNUM

MAYSVILLE LITERARY—Question for debate on Saturday Evening next—'Would a Bank of the United States be constitutional?'

APPROPRIATE. NERADIE. William P. Conwell, W. T. Reed, P. C. Chambers, D. T. Hart.

(Ladies and strangers are invited to attend.)

GEN. HARRISON'S INVOCALU—We are indebted to the politeness of the Editor of the Eagle, who received a copy on Monday night, to lay before our readers at this early period, a copy of the new president's inaugural Address.

We hope our readers will wade through it, notwithstanding its almost interminable length, for scarcely have we ever seen a more novel and extraordinary document.

Instead of a succinct, brief and candid exposition of the leading principles which are to control his administration of the government, all is vague, uncertain and ambiguous—unintelligible generalities, and elaborate disquisition upon settled doctrines, with a brief synopsis of ancient history, compose chiefly the whole and burden of the Address.

Gen Harrison's friends must certainly be disappointed, if not greatly mortified, at the character of his Address. They expected something more than mere wind and froth.

F. T. CHAMBERS, Rep. of this country, is a candidate for a seat in the Legislature of Kentucky.

PETER V. DANIEL has been nominated, and confirmed by the Senate, as a Judge of the Supreme Court, vice Judge Burroughs, deceased.

THE HON. GEORGE C. BRIDGES, of the Senate of the U. S. was elected to the Legislature of Massachusetts, to fill the vacancy occasioned by the resignation of the Hon. Daniel Webster.

THE DEPARTING OF RETIREMENT—A few months ago, Spanish Ogles and every scamp demagogue of the Whig party were declaiming most vociferously against Mr. Van Buren and his party, for extravagance in furnishing the White House.

DEATH OF JUDGE P. V. BARNER. The following melancholy intelligence has been received from the Supreme Court of the United States, who retired to his chamber in his usual health, on Wednesday night, was found dead in his bed on the morning of Thursday.

AMERICAN WATER-ROTATED HEADS. The following patent rotation, reported by Mr. Williams from the committee on Naval Affairs, was read, and passed to a final reading, in the Senate of the United States.

Rooted by the Senate and House of Representatives of the United States of America in Congress assembled. That the Senate of the United States do hereby, to time, if he shall think it safe, and for the public interest, enter into contracts for the supply of American water-rotated heads for the use of the navy, without any contracting for officers and men, and advances towards the same, prior to the actual delivery of the article, upon such terms as they may deem good and sufficient for a faithful performance of the contracts.

A Down East editor expresses a wish, that if his friends have feeling for him, they will carry that feeling into their pockets.

character, which raised his native State to an eminent distinction among her sisters of the Union.

These considerations, which must sharpen and deepen the first pang felt in the death of his family, will, in time, be their great consolation.

COST OF BANKING—We copy the following from the New York Evening Post. It is a summary of a report from the Secretary of the Treasury, Mr. Woodbury, on the subject of losses sustained by the Government and people of the United States, by Banks—

That Bank notes are a great convenience, is an argument urged by the friends of the banks, that a paper currency costs more than it is worth, is an argument urged by their adversaries.

We have before us a report from the Secretary of the Treasury, sent to the Senate of the United States on the 12th of February, in answer to some inquiries of that body.

THE TRUE DOCTRINE. The Board of Commissioners in their report on the subject of the proposed Distribution Bill—the parent of the present assignment project—and the millions forecasted are lost for good.

THE LOSS OF THE BANK OF THE UNITED STATES. The loss of the bank of the United States, which was destroyed by fire on the 10th of February, 1837, is estimated at \$15,492,000.

Table with 2 columns: Description of loss, Amount. Includes items like 'Loss of specie payments by the Federal Government', 'Loss of specie payments by the State of New York', etc.

This is an enormous aggregate, but this, as the report observes, is not all—The losses by fictitious banks and their operations of mere swindling, are very considerable, and are increasing.

GERMAN BANK OF WOOSTER. This institution is in all probability on its last legs.

THE AMOUNT PAID BY THE COUNTRY to the banks during the last year, after the effect of their agency and their notes after deducting 22 per cent. interest for the use of bank capital and the reasonable expense of managing the banks, is computed at \$84,000,000.

It appears that the Continental Power, and the French preparations, if the way to secure peace is to prepare for war, the nations of Europe would seem to be strongly in favor of peace.

policy to fight for the purpose of preserving peace. The object of the whole matter is the question of peace or war in Europe.

THE TRUE DOCTRINE. The Board of Commissioners in their report on the subject of the proposed Distribution Bill—the parent of the present assignment project—and the millions forecasted are lost for good.
