My objections were principally to the first res-olution, and more particularly the the command of Gen. Taylor, from its po Matamoras, was improvident a tutional.

By an act of the Texas Con ed on the 19th of December, 1836, she de Rio del Norte was ner boundary, and laid off one of her counties between the

She made continued claims to it, and or several occasions invaded that territory with her armies, and had on one occasion taken Laredo, and her last expedition, in tha quarter, was defeated, at Mier, in 1842.

With those facts, and this claim on the part of Texas, she was, on the 1st day of March, 1845, by a joint resolution of both Houses of Congress, admitted into the American Union as one of the States of this Confederacy. She sought admission nto the Union to procure that protection and defence against Mexico which ation demanded; and we adopted her into the Union, with her war with Mexico, and disgraced and forfeit the public confidence. this claim of boundary.

Prior to that time Mexico had never

outed her boundary. The contest was for ultimate dominion, and Mexico sought to re subjugate Texas, and to bring her again un der Mexical rule. The question of boun dary had never been mooted between Mexico and Texas, to my recollection.

Mr. Clay, in his Raleigh letter, affirms

that by our purchase, from France, we had territory to the Rio del Norte nd that annexation would be a declarati of war against Mexico.

This territory was principally settled by American citizens, but was ceded, by the United States, to Spain, in exchange to Florida, and incorporated into the Mexican government under her constitution. But, finding no stability in the Mexican government-revolution succeeding revolution-and military rule having obtained-Texas sought a separate, independent Republicar form of government, under which her citi zens, and their property, could be protected.
This produced the war between Texas and
Mexico, which the United States has adopt-

this war, admits that, "The act (fring the boundary of Texas) was nothing more than the expression of her wishes or processions of government. Its only practical effect was, that emanating from its Congress or Lec-

give up the territory claimed by Texas."

In addition to all this, Texas in Convey on assembled, on the 7th day of July, 1845, assed a resolution calling on the President occupy and establish posts on her frontier, and to introduce his forces to defend the ter

ritory and people of Texas.

The United States in good faith was bound to protect and defend the territory claimed by Texas, and when thus ealled on by Texas was bound to take the posses-sion of and defend the territory, claimed by her, and it did not become the United States or her representatives, to enter into or dis-pute with Texas as to her boundary, and become the ally of Mexico against Texas,

on this boundary question.

I object to this resolution for another re son. It seems to me to have for its object, the destruction of two candidates for the Presidency at a single fire. Both President Polk and General Taylor are implicated by this resolution. If it be true that they have been guilty of a vibation of the constitution to the state of the resolution of the constitution of the state of the resolution of the state of the retary of War, dated Corpus Christi, Texasa, October 4th, 1815, says, that his "entire force will soon be concentrated, and it may well he a question whether he views of government will be best carried out by our remaining at this point. It is with great deference that I make any suggestions on topics which may become matter of delicate negotiation: but if our Government, in settling the question of boundary, makes the line of the Rio Grando an ultimatum. I cannot donot that the settlement will be greatly facilitated and hastened by our taking possession at ouce of one or two suitable points on or quite near that river. Our strength and state of preparation should be displayed in a manner not to be missiaken. However salutary may be the effect produced upon the border people by our presence here, we are too far from the frontier to impress the government of Mexico with our residness to vindicate, by force of arms, if necessary, our title to the country as far as the Rio Grande. The "army of occupation" will, in confliction for "army of occupation" will, in confliction for a concentrated at this point, view. Mr. Hord's Communication.

We have not space this morning, to devote to answering as we could desire, all the arguments by which this gendleman attempts to savatian his objections to the first resolution of the Lexington Mass Meeting, introduced by Mr. Clay.

Mr. Hord recites the fact, that Texas published to the world that she caimed the published to the world that she caimed the proposed of the common of the respect to the first morning to the respect to the continuation of the respect and affect in connection with Mr. Polk's management of the war and its diplomacy, proves, unfortunately for Mr. Polk and those who sustain him in the war, that his sacred regard find my acceptance of their offer during the first the research of the respect and form the respect to the confidence, I feel that they are the respective to the confidence, I feel that they are the respective to the confidence of the respect to the confidence.
