REPLY TO P. O. BOX 548

March 25, 1965

Mr. Clint Johnson, Superintendent  
Morehead Utility Plant Board  
Morehead, Kentucky

Dear Clint:

In my discussion yesterday with you and Mayor Evans I pointed out certain factors that in my opinion favored the City of Morehead providing their own water supply and treatment facilities rather than to continue the purchase of water from Morehead State College.

You are aware that we made a study of the College water facilities and sources of supply but at the direction of the state officials the needs were projected for only 15 years in the future. We subsequently prepared plans for the expansion of the College water treatment plant to a capacity of 1400 gpm which was estimated to serve the college and the City for the next 15 years. The water supply in Triplets Creek and the raw water storage reservoir was estimated to be adequate to supply only the present 500 gpm treatment plant during an extremely dry summer season. Although we reported on the need for an additional raw water supply, the planning of the dam and reservoir was not authorized. It therefore appears that had the College continued with the construction of the planned plant additions a shortage in actual raw water supply could have developed in an unusually dry year.

Subsequent to the College study a water supply study for the City was made. By this time the plans for Cave Run Dam on Licking River had progressed far enough to provide reasonable assurance of an adequate water supply from the Licking River. The City authorized planning for treatment facilities and a transmission line and treated water reservoir. The treatment plant will have a capacity of 1.5 million gallons per day which is estimated to serve the City alone for at least the next 25 years at the present growth rate. The transmission main is sized to deliver 4.5 mgd in the future without a booster pump or 6.0 mgd with a booster pump. The treatment plant is designed so that it can be readily expanded as needed in the future. You will note that the planned plant for the City was sized on the basis that the College would continue to provide its own water supply. The City plan could serve the College needs when and if those needs exceed the present College supply capacity. In such case it is possible that the City plant might have to be expanded ahead of the estimated 25 years, but this is dependent upon the rate of growth of the College and the City.

Comparison of the two plans shows that the College plan is based on treatment plant expansion to serve the combined needs for the next 15 years but no provisions were made for an increased source of supply which is needed during that period. A study of impoundment possibilities indicated that it was not financially feasible to provide impoundments of water to supply the needs for more than the next 15 years. In other words, if the College plan was expanded and a new dam and reservoir were provided, they would serve the needs of the college and the City for about 15 years after which time it would be necessary to resort to the river supply.

The City plan provides for the immediate needs, with facilities that will allow almost unlimited future expansion at minimum cost.

One factor which I think is extremely important is the matter of industrial development as it is affected by the availability of an adequate water supply. This is an important factor in attracting industry and as long as the supply is barely adequate for existing needs the likelihood of interesting new industries is remote. With an ample water supply and reserve treatment capacity which the City can furnish, the industrial possibilities are brightened considerably.

I have attempted to make this analysis as objective as possible since we have served as consultants to both the State and the City.

Yours very truly,

HOWARD K. BELL, CONSULTING ENGINEERS, INC.

## Engineering Opinion

THE LETTER - This is the complete letter which city officials released this week, giving the opinion of a Morehead engineering firm regarding water studies made by

the company for both Morehead State College and the City of Morehead. It was written by J. Willey Finney Jr., of Howard K. Bell, Inc.

## KENTUCKY'S 174TH BIRTHDAY

# Frankfort Scene of Statewide 1965 Homecoming This Weekend

The citizens of Rowan County have been invited to Kentucky's statewide homecoming at Frankfort, Friday, Saturday and Sunday by special invitation of Gov. Breathitt and County Judge W. C. Flannery.

"We want everyone to come," Flannery said this week. "This is the statewide homecoming for 1965 Homecoming Year and there will be plenty of fun for everyone, including a parade and beauty contest, dancing and more."

In addition, we are celebrating Kentucky's 174th birthday during our homecoming, and this is cause for everyone to come and join in the festivities.

Flannery and Breathitt also issued a joint invitation to Rowan County Judge W. C. Flannery to represent the county as an honored guest.

Judge Flannery has been asked to name a queen to represent the county. Her name, along with those across the state, will be placed in a container from which Gov. Breathitt will draw the name of Kentucky's 1965 Home-

coming Queen.

Breathitt said he is looking forward to visiting with the county judges and their families, the county queen and all the young people during the three-day homecoming.

The City of Frankfort, the Frankfort-Franklin County Chamber of Commerce and State government are hosting the statewide homecoming. Invitations to the Chamber of Commerce of the 120 county judges went out May 13. A follow-up letter from the Frankfort Young-

men's Club went out May 15.

A formal invitation from Gov. Breathitt was mailed May 18, inviting the county judges and their families to a reception at the Governor's Mansion, at 4:30 p.m., Saturday.

Gov. Breathitt and Mayor Flynn said that this intensive effort to bring everyone together for one weekend is a rare opportunity for the county judges and their families and the county queen.

Flannery said a complete schedule of special activities has been planned for the weekend and the queen. The Younger's Women's

Club of Frankfort is handling arrangements for the queen candidates from the moment of their arrival. The candidates will be guests at a Saturday morning breakfast and hear a welcome message from Miss Gattie Lou Miller, commissioner of public information. With their county judges, the queens will lead a parade from downtown Frankfort to the Capitol grounds later that morning where Gov. Breathitt will crown the Kentucky Homecoming Queen.

The county judges will be received and recognized at the Capitol grounds ceremonies attended by city, state and county dignitaries. Later, with their families and the county queens, they will be guests at a reception given by the governor in the Governor's Mansion.

In addition to special activities centering around the county judges and county queens, a varied program of events is scheduled for other homecoming visitors throughout the day in Frankfort and in the surrounding area in commemoration of Kentucky's 174th birthday.

During the entire day Saturday,

four tractor-drawn "fun mobiles" will circle downtown Frankfort and the Capitol with free rides for all. In the evening the world's premiere of the movie, "Wonders of Kentucky," will be held at the Capitol Theatre. Following the first homecoming, free to the public, movie will be shown continuously, free to the public.

Gov. Breathitt and Mayor Flynn said all county judges are urged to confirm their attendance at the statewide homecoming by writing or calling the Frankfort-Franklin County Chamber of Commerce or the Department of Public Information, Capitol Annex, Frankfort. They said confirmation of attendance of judges, their families and county queens is needed in order to complete accommodation arrangements.

MILITARY PAY-HIKES President Johnson has asked Congress to boost the pay of all uniformed members of the armed forces. 88% million a year starting January 1, 1966.

## MSC To Host 200 FHA Chapters

Over 850 members of the Future Homemakers of America chapters from throughout Kentucky will attend the annual state convention to be held on the campus of Morehead State College next Tuesday through Thursday.

Representatives from more than 200 high school chapters from all corners of Kentucky will attend the annual event whose theme is "Future Homemakers--Make Citizenship A Reality." Featured speakers will include Mrs. Lois Oliver Sigler, former national adviser of the Future Homemakers of America; Dr. Harry M. Sparks, state superintendent of public instruction; and David C. Ross, minister of the Mayo Memorial Methodist Church, Paintsville.

Names of the general sessions will be held in Burton Auditorium. The girls will reside in Mignon Hall, Westmignon Hall, Regent Hall and Wilson Hall.

The opening session will be held at 7:30 p.m. Tuesday, with Rev. Ross speaking on "Citizenship Challenges A Youth." Ray Klusick, assistant to the president for public affairs at Morehead State College, will deliver the welcoming address.

The Wednesday session, beginning at 9 a.m., will feature an address by Mrs. Sigler entitled "Home--The Hub of Good Citizenship."

Dr. Sparks will speak on the theme of "Citizenship in the Community" at the Wednesday afternoon session which will be followed by a test and open house at the Morehead State College Home Economics Building.

The annual banquet is scheduled for 6:45 p.m. Wednesday. Vasil Ventoza, lyric soprano, Morehead, will present a program of music.

Wednesday's general session, beginning at 8:45 p.m., will feature the conferring of state degrees and a performance by the state FFA chorus.

At 8:30 a.m. Thursday a symposium on "Creating a Good Image of American Citizenship Around" will follow the business session. Symposium participants include: Mrs. Willie C. Ray, Shelbyville; Mrs. Loyla Hagins, Louisville; and Mrs. Patricia B.

Vaughan, Shelbyville. The final session will be held at 11:00 a.m. at which time the 1965-66 officers will be installed. Charlotte Dye, Pulaski County High School, is the current state FHA president.

Mary Belle Vaughan, State Department of Education, Frankfort, is the state adviser. Monroe Wicker, director of school services at Morehead State College, is coordinator of the convention.

## Name Winners In St. Claire Prize Drawing

Names of winners in the St. Claire Medical Center Auxiliary's prize drawing were announced this week.

Dr. Olga Mourino won a chair donated by Goodpasture Furniture Co., Mt. Vernon. Mabel Reynolds was prize-winner by Pierce's 5 & 10 and Mrs. Ruby Klusick won a lawn chair given by Western Auto of Olive Hill.

Mrs. Mike Keller, chairman of the auxiliary's ways and means committee, said more than \$125 was realized from the sale of tickets.

The money was used for various auxiliary activities at the Medical Center.

## Financing Political Campaigns

A bill now pending in Congress would bar candidates in federal elections from receiving contributions from outside the state in which they were campaigning.

It's by no means a new idea. The same sponsor has proposed it without success before, and chances are slim for better luck this time.

The practicalities of politics being what they are, very few members of Congress are going to vote to cut off their own potential sources of revenue. Because campaign expenses are high, the candidate with resources of his own or enough

supporters in his home state to foot the staggering bill is a relative rarity.

So the majority must get the money from somewhere, and frequently a major source is the Senate or House Campaign Committee, or the national headquarters organization of his party. Obviously, such funds come from all over the country.

While we agree with the sponsor of the legislation when he says existing practices come fairly close to putting public office up for the highest bidder, we wonder about the proposed solution. It seems that complete home-state financing might lend itself to more corruption by direct and outright "buying" of the candidate in question.

There must be a better solution to an admittedly complex problem.

## Confidence Medicine

Human greed manifests itself in myriad ways.

Few of them are pretty.

Newspapers constantly turn up a new wrinkle or scheme some fertile mind has devised for separating fellow humans from their hard-earned cash.

All too often the gullible victims are the ones who can least afford the loss.

But of all the "confidence" cult and get-rich-quick schemers among the most despicable are the practitioners of medical quackery who prey on the suffering and fears of the seriously ill.

Instances of that are too familiar even in a time when medical research has come up with answers to problems that only a few years ago seemed insoluble.

What brings the subject to mind is the story of a court case involving a self-styled and self-taught cancer "expert" who had been giving treatments to young leukemia victims.

In convicting him, the court imposed the maximum penalty permitted by law and openly voiced regret that it couldn't be harsher.

One hopes the story received enough circulation to warn other potential victims who might be taken in.

## A New Concept

Often the public loses interest in a piece of legislation once it has passed Congress and leaves the front pages. Too frequently, after all the publicity surrounding its debate and passage and the bill is signed by the President, it becomes "just another law."

In many cases this public amnesia is justified, for one could devote his lifetime—and get ulcers in the process—trying to keep up with the proliferation of laws passed on Capitol Hill. Still, it is a duty of citizenship to have an interest in our laws.

A recently-passed law that merits the attention of every citizen is the Appalachian Act of 1965. This measure, now going into effect in the eleven states of Appalachia, represents a new concept of federal spending that could well reverse, to some extent, the trend toward the welfare state.

The federal money to be spent in Appalachia is controlled by a commission dominated by the states. This body, the Appalachian Regional Commission, directs the program according to the vote of the eleven state members and one federal member.

Although the federal member is co-chairman and has the right of veto, the states can easily counteract this veto by withdrawing their votes when necessary.

If citizen interest in this process is high enough, perhaps more laws will be passed which give states a considerable say about how federal money is to be spent.

## NEWS REPORT FROM WASHINGTON

By Rembert Benjamin, M.D.

Washington, D. C.—Senator Strom Thurmond (R.-S.C.) has released copies of a newsletter reportedly published by a patriotic organization in 1956 which purports to outline a Communist blueprint for a voting rights bill similar to the American Civil Liberties Union's Philadelphia—stated that the Communist Party had launched a long-range project of "stamping out" Congress into passing such voting legislation in 1965.

Copies distributed by Thurmond carry the date of December, 1956. The report predicted the bill would eliminate all educational requirements for voting, including literacy tests, and would open federal registers to all areas of the South.

It went on to forecast that the communists would attempt to form a third party in Dixie immediately after the enactment of the bill.

The article said that "Communist-dominated labor unions are to emerge as a part of this phase of the operation, as the ultimate goal is to merge the elements of the 'civil rights' front with that of the labor movement of the American South."

By uniting these two forces, the newsletter contended, the "Communist strategy is to believe that the third party which will be born in the South can be national U. S. Labor Party." The South Carolina lawmaker recently mentioned this newsletter.

letter in remarks placed in the Congressional Record. The Senator said he had been trying to obtain a copy since then. Thurmond called the author "quite a prophet."

"I understand, however, that he makes no claim to be a prophet, only that he reported in 1956 the facts as given to him by a Communist Party member about the Communist Party plans for 1965," the legislator said.

The article gave this information on what it called the "Lincoln Project."

"The Communist Party's Central Committee will begin to dispatch agents to 11 Southern states next month (January, 1957) to work with local party leaders in surveying 20 counties, one of which might be ideally suited as a target for disorder early in 1965."

"This survey will continue through 1957, the Central Committee will make the choice of 20 counties...with the final selection to be made on the conditions prevailing in 1965."

"The legislation which the party will seek from Congress in 1965 has already been prepared by its legal staff," the newsletter said, including the literacy tests and the establishment of federal control in areas charged with voting discrimination.

The article contended that the party had no interest in desegregation, but only wanted to "use the safe and sure bloc of nearly 10 million persons."

## NEWS NOTES

### STOR AWAY FOUND

Los Angeles—Homeless for his home in London, Brian Robison, 20, had a friend find him in a crate measuring 30 by 26 by 38 inches and hid it as a computer. After a 21-hour flight from Sidney, Robison decided he'd had enough and broke through the crate with a hammer so he'd be discovered.

### LOST BOY SAFE

Ahol, Mass.—Three-year-old Steven Ignaszewski was found in a small hole beneath a rock about a mile from his home by four searchers who had looked for him for five days and nights. He was treated for exposure and insect bites and returned home with grateful parents.

### LABORER GETS FORTUNE

Cleveland, Ohio—John Godfrey, a \$140-a-week dock worker has inherited nearly one million dollars from an aunt. The 53-year-old father of three boys said he hoped the money "wouldn't change their way of life."

### PITY THE JUDGE

Honolulu, Hawaii—A new divorce law was signed into law two days earlier than planned. Civil Judge Samuel King granted 13 divorces before he knew the new law was signed. Six of the divorced couples are still judicially married.

### RETIREE FROM RETIREMENT

Walham, Mass.—When Austin D. Blakely, 67, retired from the U.S. Navy, he was being retired, he ran for mayor, Rhodes, 80, is pondering whether to run for a fifth consecutive, five-year term. He's concerned because he would have to pay for a special election.

### 32 DAYS ON A RAFT

Manila—Frank H. Cushing, 63, a former aviation stuntman found after floating 32 days on a 20-foot raft made of old drums. They had been searching for him for five days and nights. He was treated for exposure and insect bites and returned home with grateful parents.

### LEARN ABOUT POLICE

Indianapolis—Pound guilty of slandering police by calling them "crooks" James Cooper, 24, was sentenced to spend 30 days in the diesel fuel of municipal buses. After the final session, Cooper gave the judge a five-page theme on the integrity of the police and the integrity of the courts.

### PERFUME IN FUEL

Long Beach, Calif.—To answer numerous complaints, a bus company has hired perfume in the diesel fuel of municipal buses. After the final session, Cooper gave the judge a five-page theme on the integrity of the police and the integrity of the courts.

## DOCTOR TALK

By Rembert Benjamin, M.D.

Congenital heart disease occurs in less than 1 per cent of live births, with a small percentage of this group being due to the mother having had German measles in the first three months of pregnancy. The remaining cases of congenital heart disease are now felt to be possibly due to other virus infections.

Of the children born with a congenital heart defect today the outlook is now good, thanks to all the recent advances in our knowledge of congenital defects and in the development of surgical techniques for correcting the abnormalities.

Children with congenital heart defects show various symptoms that become obvious at variable times after birth—such as respiratory distress evidenced by shortness of breath, also, many will show marked physical retardation, other children will be crying and being sick and in some the entire body will have a bluish discoloration.

Most children with a cardiac defect will have a heart murmur at birth, but some will have several years before the abnormality is observed. Most authorities recommend that the child with a suspected congenital defect be four to five years old before steps are taken to see whether or not the particular abnormality is amenable to surgery.

At the time of this examination a thorough history and physical examination is done, including X-ray and fluoroscopic studies of the heart, also an electrocardiogram and various blood studies are necessary. Most important of all is the making of correct diagnosis is the angiogram and cardiac catheterization.

Angiography is a test in which a dye solution is injected into a vein of the patient's arm and then serial X-rays of the heart at short intervals are taken. The final and most important step in diagnosing a congenital heart defect is cardiac catheterization. From this study and observation, it is possible to accurately state what kind of heart defect is present and whether surgery is indicated.

Shoes are colorful and come in a variety of styles this season. A woven kitten shoe resembles a kitten's paw but has a more elegant appearance.

Most of us think that summer is the most season. This is not true, however, for moths can breed at temperatures as low as fifty-five degrees. For this reason, it is important to keep moth crystals in closets, in ward and garment bags the year around.

Household items such as mattresses, wall-to-wall carpeting and upholstery should be sprayed several times with a reliable insect spray.

Moths and silverfish, etc. on and paper-hanging insect, are not killed by moth crystals. They are killed by direct contact with sprays and in gas as crystals evaporate in the air.

Although they are around bathroom tile and cement. Ordinary bathroom cleansers have no effect on them, so a spray should be used here, too.

The proper amount of nugsgets or crystals is about one pound for every one hundred cubic feet of space. The gases do not remain in the air, but are placed in the top of the garment bag and folded in with the clothes.

Most of us think that summer is the most season. This is not true, however, for moths can breed at temperatures as low as fifty-five degrees. For this reason, it is important to keep moth crystals in closets, in ward and garment bags the year around.

Household items such as mattresses, wall-to-wall carpeting and upholstery should be sprayed several times with a reliable insect spray.

Moths and silverfish, etc. on and paper-hanging insect, are not killed by moth crystals. They are killed by direct contact with sprays and in gas as crystals evaporate in the air.

Although they are around bathroom tile and cement. Ordinary bathroom cleansers have no effect on them, so a spray should be used here, too.

The proper amount of nugsgets or crystals is about one pound for every one hundred cubic feet of space. The gases do not remain in the air, but are placed in the top of the garment bag and folded in with the clothes.

## Rowan Money Supply Hits New High In Past Year

The amount of money in circulation in Rowan County, a prime factor in determining economic activity, is at a high level, according to a new Government report.

At the close of the last fiscal year, it shows, the supply of money in local banks, which comprises the bulk of the currency in circulation, was equivalent to \$713 for every man, woman and child in the community.

There was an additional amount of money, small by comparison, in the form of cash in people's pockets and in cash registers and safes of business firms.

The \$713 per capita bank deposit in Rowan County compares with an average of \$617 per capita in their counties two years earlier.

The figures on the money supply and the way it is distributed have just been released by the Federal Reserve System in its first such report in two years. It lists the funds on hand in commercial and savings banks in every part of the United States.

An adequate supply of money on deposit is important for a community's economic health, it is pointed out, in which keeps the wheels of industry greased.

The greasing takes place when banks put the money back into the stream of commerce through loans and investments, thus providing business concerns, farmers and others with necessary financial services.

And, because the regulations require a commercial bank to keep only a small portion of its deposit in its reserve account, it is able to loan funds equal to about five times its reserves.

The total on deposit in Rowan

County banks at the end of the fiscal year, according to the Federal Reserve report, was \$9,269,000, as against the amount on hand two years before, \$8,022,000.

Included in this total were time deposits (savings accounts) of \$3,676,000 and \$4,584,000 in demand deposits (checking accounts) of individuals, partnerships and corporations as well as certain governmental and interbank deposits.

Note worthy in the trend toward more money in circulation is the extent to which bills of larger size—those of \$20 denomination and up—have come into more general use. They have gained in number much more rapidly than have the smaller bills.

## Softball League Opens Season This Afternoon

Play will open today (Thursday) in the Jaycee Softball League.

The season's initial contest is scheduled for 5:30 p.m., with the second game of a double-header to start immediately after the first.

Teams in the league include Morehead Men, Clearfield Pipers, Breckinridge K-Y Club, Morehead Jaycees, Christy Creek, College College, Rowan County, Point Express and the Hilltoppers.

Games are to be played on Thursday and Monday, with two games each evening. Occasional Sunday doubleheaders are also on the card.

## Morehead Man Shot Low Score

Two more qualifying shoots for Kentucky's long rifle team have been set for June 19-20 and July 10-11 near Boston, Ky. C. Doc Haddaway, Louisville, has reported.

Haddaway is coordinator of the team which will represent the state in the third annual Kentucky-Pennsylvania shoot-out this fall.

Top scores of the first qualifying match held May 22-23, were:

James M. Van Diver, Elizabethtown; Ray M. Wexler, Louisville; Ronnie Fuller, Louisville; Bob Smith, Valley Station; Al Leaf, Louisville; Norman Katz, Louisville; Cook Camfield, Lexington; Ralph Marcum, Sand Gap; Bob Fison, Morehead; and M. L. Sumner, West Point.

A total of 17 men entered the first qualifying match, Haddaway said. Each shooter is allowed to compete in two matches.

His highest score in either match determines his to enter the final match. The matches are to be held at the site of the matches is the country, including a number of meetings around Charleston as well as in Ohio, Kentucky and other nearby states.

"I saw Christ open the back door of the church and walk in," he said of the vision which he first saw at a church in Quick, W. Va. "I grabbed the sides of the pulpit, grew numb. I couldn't even move. That's what I saw. A bright light coming from His face. I couldn't see His face because of the light but I could see His robes and His hands, and the blood dripping out of the wounds on His hands."

"I told the congregation what I was seeing and some of them wept," he said.

Since that vision, Campbell says, the vision was repeated regularly.

"I'm usually Jesus-ite, but I can never get a look at His face. The light's too bright," Campbell said. "This vision is helping himself to services primarily on weekends and close to his home because of his school work."

He says he was called to the ministry while sitting on the steps of a church near Huntington about 18 months ago.

Shortly afterward he had converted more than 200 of his classmates at Dupont High School, along with two teachers.

Joining Campbell in the revival at Garvin Ridge will be Rev. Allen N. Killen, who will lead the services and will preach on Sunday evening.

The Garvin Ridge church, one of the Olive Hill area's largest, is located on U.S. 60, about three miles west.

## He Sees Christ Widely-Publicized Youth To Preach In This Area

Spencer Campbell Jr., the 17-year-old evangelist who says he has seen visions of Christ during his revival services, will conduct another series of meetings in Carter County, beginning today.

Campbell, who is 18, caused a sensation in the section around Charleston, W. Va., with the effectiveness of his preaching and his reports of visions, will preach at the Garvin Ridge Pilgrim Church on Sunday evening.

A junior at Dupont High School near Charleston, the youth conducted a revival at Globe (Carter County) last year which has been described as "highly successful."

The recipient of international publicity as a result of many conversations since he began evangelistic work about 18 months ago, Campbell has conducted revivals in many parts of the country, including a number of meetings around Charleston as well as in Ohio, Kentucky and other nearby states.

"I saw Christ open the back door of the church and walk in," he said of the vision which he first saw at a church in Quick, W. Va. "I grabbed the sides of the pulpit, grew numb. I couldn't even move. That's what I saw. A bright light coming from His face. I couldn't see His face because of the light but I could see His robes and His hands, and the blood dripping out of the wounds on His hands."

"I told the congregation what I was seeing and some of them wept," he said.

Since that vision, Campbell says, the vision was repeated regularly.

"I'm usually Jesus-ite, but I can never get a look at His face. The light's too bright," Campbell said. "This vision is helping himself to services primarily on weekends and close to his home because of his school work."

He says he was called to the ministry while sitting on the steps of a church near Huntington about 18 months ago.

Shortly afterward he had converted more than 200 of his classmates at Dupont High School, along with two teachers.

Joining Campbell in the revival at Garvin Ridge will be Rev. Allen N. Killen, who will lead the services and will preach on Sunday evening.

The Garvin Ridge church, one of the Olive Hill area's largest, is located on U.S. 60, about three miles west.

With the Kentucky road death toll for 1965 climbing steadily closer to the all-time record rate of 1964, State Safety Commissioner Glenn Lovern has taken additional steps to increase traffic accident prevention activities in the Kentucky Department of Public Safety.

"Ours is a continuing and never-ending battle against traffic accidents," Lovern said. "But we feel that the alarming rate of increase within the past 30 months calls for special action."

Special safety steps have already been taken through the increased use of radar and road blocks by the Kentucky State Police and through the development of the comprehensive four-phase State Action Program for Highway Safety. The Commissioner added.

We feel that the improved point system adopted last year by Governor Edward Breathitt will have a beneficial effect on the highway situation.

He listed the five areas of direct assistance from the Insurance Institute to be made available:

The preparation and printing of a special reference manual for Kentucky traffic judges, to be financed by the institute.

The conducting of a series of regional traffic court conferences.

The retaining of all enforcement officers of the Kentucky State Police, with instruction by the North Western University Traffic Institute.

The development of needed public education efforts toward improving the quality of driving in the Commonwealth.

Continuing technical staff assistance for the implementation of other portions of Kentucky's Safety Action Program.

The determination of traffic safety needs upon which the Institute's decisions were based, Lovern said, "was made at a series of meetings of Institute officials and representatives of the Governor's Co-ordinating Committee for Traffic Safety during which the state Action Program for Highway Safety was also developed."

## State Traffic Toll Up More New Safety Measures Planned

With the Kentucky road death toll for 1965 climbing steadily closer to the all-time record rate of 1964, State Safety Commissioner Glenn Lovern has taken additional steps to increase traffic accident prevention activities in the Kentucky Department of Public Safety.

"Ours is a continuing and never-ending battle against traffic accidents," Lovern said. "But we feel that the alarming rate of increase within the past 30 months calls for special action."

Special safety steps have already been taken through the increased use of radar and road blocks by the Kentucky State Police and through the development of the comprehensive four-phase State Action Program for Highway Safety. The Commissioner added.

We feel that the improved point system adopted last year by Governor Edward Breathitt will have a beneficial effect on the highway situation.

He listed the five areas of direct assistance from the Insurance Institute to be made available:

The preparation and printing of a special reference manual for Kentucky traffic judges, to be financed by the institute.

The conducting of a series of regional traffic court conferences.

The retaining of all enforcement officers of the Kentucky State Police, with instruction by the North Western University Traffic Institute.

The development of needed public education efforts toward improving the quality of driving in the Commonwealth.

Continuing technical staff assistance for the implementation of other portions of Kentucky's Safety Action Program.

The determination of traffic safety needs upon which the Institute's decisions were based, Lovern said, "was made at a series of meetings of Institute officials and representatives of the Governor's Co-ordinating Committee for Traffic Safety during which the state Action Program for Highway Safety was also developed."

ITEM: For a typical family of four, the U.S. Department of Agriculture estimates that 40 cents of the food dollar is spent for meat, poultry, fish, and eggs. Almost 24 cents goes for vegetables and fruits; 17 cents for milk, cheese, cream, and other dairy products; 11 cents for baked goods, flour, and cereals; 3 cents for butter, margarine, and salad dressings; 2 cents for sugar, margarine, and jelly; and 3 cents for coffee, soft drinks, seasonings and other miscellaneous items.

ITEM: To brighten aluminum outdoor furniture, sand the surface to remove the dull film which may have formed as a result of exposure to all kinds of weather. Then, apply a clear, exterior, non-yellowing acrylic or butyrate lacquer.

## Foster Story Sets June 19 Opening

The Stephen Foster Story opens its seventh season at the amphitheatre at My Old Kentucky Home State Park in Bardonia, Ky. June 19. The outdoor musical, based on the life of the famed American composer, will play every night at 8:30 (except Mondays) through Sept. 5, plus a 3:30 Sunday matinee in the air-conditioned auditorium of the Bardonia High School.

At both Sunday performances and the Monday matinee, children under twelve will be admitted free if accompanied by a parent.

William Byrd, general manager of the Stephen Foster Story, said that in honor of Kentucky's Homecoming Celebration this year's cast will be made up of actors who have appeared in past performances. Although he also said that a number of changes have been made in the play this year, none of the familiar Foster music has been altered, however.

Forty-eight Kentucky children with multiple handicaps, youngsters who are physically handicapped and mentally retarded, will attend a one-week camp session at Camp Kynock, Carrollton, beginning Saturday, June 5.

The announcement was made by Miss Betty Burke, director of the Easter Seal camp operated by the Kentucky Society for Crippled Children.

The program will provide opportunity for the youngsters to enjoy a social and educational experience in an outdoor setting.

## Haldeman Committee Sets 'Smoke' Meet

The Haldeman Committee will hold its third meeting at 7 p.m. Thursday at the Haldeman school. Under discussion will be the community's air-pollution problem, stemming from smoke generated by a plant owned by the Kingsford Company.

Rowan Circuit Court last week fined the charcoal processing plant \$500, but granted the company's request for an additional three months to attempt to rectify the problem.

The Haldeman Committee was formed in March as a community watchdog to monitor the plant's emissions.

The group's president, Andrew O'Neil, said representatives of the Kingsford Company have been invited to the meeting. Also in attendance will be Thomas R. Burt, attorney representing the Haldeman group.

**Shelia Murphy In State Girls Tennis Meet**

Shelia Murphy, Breckinridge Training School's top honors tennis star, will take part in the state tennis meet in Louisville Friday and Saturday.

Miss Murphy won the right to compete in the state finals by taking the regional title at Ashland Saturday downing Connie Hale of Howell in a hard-fought match, 3-6, 8-4 and 7-5.

The 17-year-old school girl, ranked 7th in the state last year, fought back from 5-3 and matched point to take the regional championship.

## As old-fashioned as the Model-T

Antiques are fine but when it comes to providing adequate electrical power to your house, nothing is more important than an adequate entrance panel or "fuse box."

Look at it this way: your use of electricity has increased several times in the past several years, yet the increased electrical power must use the same limited entrance into your home. Results? Appliances fail to get all the power they need; motors burn out quicker; lights or TV dim when any motor starts.

The solution is simple. Install a new entrance panel—large enough to serve today's and tomorrow's needs. It can be installed quickly and economically.

## ADEQUATE WIRING

UP TO **\$50 BONUS**

RECC members can earn up to \$50.00 special incentive when replacing a 60 amp or smaller entrance panel. Phone or write us for complete information. No obligation, of course.

Distinctive Grads

**MOREHEAD HONOREES** — Eleven graduating seniors at Morehead State College graduated with black distinction at commencement exercises this week. Seated on the front row: Peggy Sue Bradford, Westbury; Judy Parker Ramsey, Farmers; Willis Grant Sams, Tellerboro; Judith Martin Riddle, Morehead; Patricia Jane DeMaes, Stamping Ground.

Standing are: Larry Cooper, Carville, Westbury; Dr. Eunice Ison Hill, Dorion; Betty Louie Tackett, Olive Hill; Bettie Mae Lee, Flemington; and Charles E. Webster, Hillsboro.

To graduate with black distinction, a student must have a point standing of 3.6 or better on the 4.0 system.

**Outlying** — (Continued from Page 1)

had been proposed here. To furnish approximately 3,000 gallons of treated water an hour, the unit was offered by Mike Keller, Rowan County's V-8 Defense director, who said he had located the portable plant and could make arrangements through Adjutant General A.V. Lloyd, for the city to obtain it.

Lack of a qualified operator for the plant was one drawback cited in the refusal by authorities to approve use of the unit here.

The situation eased somewhat over the weekend, but as of Tuesday afternoon the city's storage tank was again practically empty; the college reservoir contained nine feet.

Anticipating that a serious situation was in the making, Mayor Elton T. Evans last Tuesday issued a proclamation asking for conservation of water by homeowners and businesses.

Some commercial users, however, were exempted for a time, and car washes were voluntarily suspended by service stations and individuals alike.

To graduate with high distinction, a student must have a point standing of 3.6 on the 4.0 system.

Graduating with distinction were eight Kentuckians and three Ohio natives. They are: William Bundy Bedford, Jr., Cynthia; Sherri Lynn Brainer, Louisville; Alma Phyllis Brown, Flemington; Georgeanna Mae Cramer, Richmond, O.; Willie Davis, Westbury; Gail Burke; Janice Walker Humble, Winchester; Joseph B. Knaus, Williamsburg, O.; Betty Jo Phelps, Corbin; Herbert D. Rice, Louisa and Nancy Walker Sowards, Sciotoville, O.

To graduate with distinction, a student must have a point standing between 3.4 and 3.59 on the 4.0 system.

Following the commencement exercises, the graduates were the guests of the Morehead State College alumni association at a luncheon in the Doran Student House.

## Athlete's Foot Can Be Serious Skin Disorder

"Names can be misleading. For instance, athlete's foot. This infection of the skin of the foot is not confined to athletes," says Dr. Kenneth S. Welsh, Rowan County health officer.

"Although high school students have this fungus problem in large numbers, it can occur in all age groups."

Athlete's foot is a skin disease caused by a fungus, similar to mold which grows on food. It grows in warm, moist, poorly ventilated places. The spaces between the toes are ideal for fungus growth, especially where feet stay damp from perspiration.

Symptoms are increased soreness between toes, scaling, itching (in most cases), and blisters on the feet. When the disease continues and becomes worse there can be tearing, and raw places, swelling, and redness. Some severe cases look and feel like dry poisoning.

As a rule, the disease is more uncomfortable and annoying than dangerous, says Dr. Welsh. But when it causes blisters in the skin through which other infections can enter the bloodstream, then it is a serious matter.

The disease can usually be cleared up in a short time if the right treatment is begun early and followed faithfully—it can be made worse by the wrong care.

"If you have any signs of this disease, have your physician examine your feet and prescribe the proper treatment for you," he recommended.

Continual and proper foot care is necessary to remain free from this disease, especially if you have ever had it previously.

1. Wear clean, dry socks or stockings, and change them at least once a day.

2. Wash and dry well between the toes. Rub off any dead skin with your towel.

3. Use only clean, freshly laundered towels.

4. Use shower "claps" at all times in public showers and dressing rooms.

5. If your feet are inclined to stay damp with perspiration, dust them well with talcum powder or a recommended medicated foot powder. Give your shoes a chance to dry thoroughly by alternating them each day.

"These precautions may take a little extra time, but if you follow good foot-care habits, you will look and feel better. So make a habit of following these simple recommendations," Dr. Welsh advised.
