WARREN, PA., WEDDAY, OCTOBER 21, 1896.

nored an ultimatum will follow.

Indian Head Rock Visible.

PORTSMOUTH, O., Oct. 21.—Indian Head rock, in the Ohio river opposite this city, is high and dry for the first time for years. It is only in extreme low water when the top of the rock is uncovered. It gets its name from the figure of an Indian head cut in its flat top. Who cut it is not known, as it has always been there since this part of the country became settled.

In the Ambassadors' Hands.
