

Why Bluegrass Grows In Central Kentucky

Bluegrass and other grasses and legumes thrive so well in Central Kentucky that three-fourths of the plowable land is kept in grass for pasture and hay.

lent of calcium and phosphorus, the soils of the Bluegrass area grow good legumes that supply nitrogen that is so necessary for vigorous grasses.

Kentucky Farm News

Ways of cooking inexpensive cuts of meat by electricity were demonstrated to Boyd county homemakers recently by a utility nutrition expert.

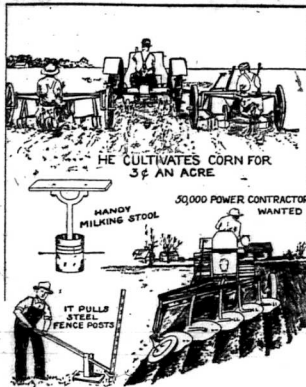

IN THE GARDEN

SUMMER LETTUCE

Soon the spring crop of lettuce will be over, for it may not be long before the temperature will rise so high that the spring-started lettuce will bolt to seed.

As in the case of ordinary lettuce, the soil should be well enriched with manure, preferably chicken manure. This kind of fertilizing induces leaf growth which is what is obviously desired.

FARMING IT... BY WILLARD BOLTE

By pulling two extra two-row cultivators with a special hitch, as shown at the top, this Iowa farmer cultivates corn at a cost of 3¢ per acre for fuel.

With powerful tractors, large tillage and harvesting machinery, and dirt-moving equipment, the right kind of power and machinery, the power contractor can prepare a seed bed as cheaply as the farmer can do the work himself.

Bluestone

The Flannery family reunion was held at Sandy Hook Sunday with more than 100 in attendance.

John Henry Ward, of Muncie, Indiana, is visiting relatives at Bluestone. Miss Katherine Cassidy, Farmers, visited Miss Mary Moore on Wednesday.

a guest of Mrs. John H. Scagg this week.

COW TESTS SHOW GOOD PRODUCTION

Of the 7,734 cows on test in 14 Kentucky dairy herd improvement associations last year, 2,656 cows produced more than 300 pounds of butterfat each.

Highest average was made in the Bluegrass association, 7,987 pounds of milk and 375 pounds of butterfat. The lowest producing association had an average of 5,929 pounds of milk and 286 pounds of fat.

LEG PAINS - LOSS OF ENERGY - TIRED LISTLESS - LAZY - FEELING - BURNING PASSAGE - DIZZINESS - SWOLLEN ANKLES NERVOUSNESS

Many times kidneys become sluggish and need aid to filter and pass off acids and poisonous wastes. KIDANS is a long-patented formula indicated as a stimulant diuretic for the kidneys and bladder.

Send No Money Results or Money Back

Write today for two boxes KIDANS. Send no money with order. On arrival deposit only \$1.00, plus postage with postman. Take one box according to easy, simple directions. Then if you don't agree results are really wonderful, return the second, unused KIDANS and we will refund your full \$1.00.

CUCUMBER BEETLE

Word keeps reaching us that the cucumber beetle is taking its usual toll; in fact, if anything this insect seems to be more numerous than in other years.

Another insect about which many letters are being written is the red, yellow, white and black broad-shouldered bug that is being found on cabbage and its kin.

age and is therefore immune to poisoning. Its control would be the same as for lice, namely, spraying or dusting with a tobacco preparation.

while this insect is small it is soft-bodied and subject to control by the same method as suggested for lice. At this time, it is well to inquire into whether the number of tomato plants now set will be adequate for the season.

JUAREZ

By HARRY LEE

The story of "Juarez," which is really three stories in one, has been made into a motion picture by Warner Bros., starring Paul Mann and Betty Davis. This picture will be shown at the Trail Theatre in the near future.

Mexico — vast — silent — mysterious —

Against a background of mountains and clouds, a Zapotec village nestled in the shadows of a valley. A solitary bell was pealing from an adobe chapel, within which, by the flickering light of altar candles, a Mexican padre was christening an Indian baby.

Though the year was 1806, visitors may still read on the yellowing pages of the register of the Church of St. Thomas of Indian, the name of the child—Benito Pablo Juarez.

Left in poverty early by the death of his father, Benito received from a charitable priest a good general education, and the means of studying law. He speedily rose to distinction in the stormy political life of his time—always a champion of the poor. In 1861 he triumphantly returned from exile, and was elected President of Mexico.

Among his first official acts was the temporary suspension of payments on foreign debts. This led to the landing of English, Spanish and French troops. The first two powers were soon induced to withdraw their forces—but Napoleon III of France declared war.

Even while preparing to meet force with force Juarez was pushing vigorously his plans for the rehabilitation of Mexico. He struck at the root of the major evil, the concentration of her lands in the hands of a small but powerful group of men. Juarez saw to it that a law was passed empowering him to take the lands from the rich and distribute them among the poor. The infuriated landowners, scent one of their number, Senor Montares, to Paris to lay their grievances before the Emperor, Napoleon III.

In the great council chamber of the Tuileries, in the presence of the Empress Eugenie and his ministers of state, Louis Napoleon addressed the suave envoy from Mexico, "It's absurd, Senor Montares, to consider the fraction of lands until Marechal Buzaine, head of my army of occupation, has put an end to the resistance of this upstart Indian—Juarez!"

A secretary entered with a dispatch from the ambassador at Washington. As Louis read it a startled odor escaped him. The Empress peered over his shoulder, eager to see as well as to hear.

"The Confederate Army of Gen-

eral Lee was decisively beaten at Gettysburg on July third, and is now in full retreat. It is the unanimous opinion of military experts here that this defeat terminates all prospects of final victory for the Southern States.

"What," asked Eugenie eagerly, "does that mean to us?" "Mean?" roared Louis, "It means that the civil war may end—moment—and we understand the conquest of Mexico on the theory that the South would be victorious—and that a divided America would be unable to enforce the Monroe Doctrine! I've been wrongly advised! My Ministers..."

Napoleon worked himself into a royal rage, stalking back and forth like a caged lion—blaming—blaming everybody except himself—"Well, what do you advise—shall we evict Mexico, admit the defeat of French Imperialism by Benito Juarez—a revolution at home? Or shall we wait for the Yankees to destroy us at the Rio Grande?"

"Calm yourself, Louis!" Eugenie corraided as though she's been his doctor, "and listen to me! Take a lesson from your uncle! How did the first Napoleon hold Holland? By giving Holland a monarch! How did he hold Sweden? By giving Sweden a monarch! Why shouldn't you hold Mexico the same way—by giving her a monarch of her own?"

"Marvelous!" cried the Emperor, quite overcome with the wise suggestion of his spouse. "You shall be the honor, my love, of naming the future Emperor of Mexico!"

Eugenie, overjoyed, began her task with the gusto of a barmaid's daughter. "Let me see," she mused, her jeweled fan-stick tapping her painted lips. "Why there's Prince Albrecht of Anhalt-Zerbst—but he's a protestant, of course, and won't do! Oh, I know! There's the Musgrave Earl of Lippe-Dolmold—too old! The Duke of Modena—too fat!"

"Puppets, my dear, mere puppets!" "We must have a great name!" "You are right, Louis! Absolutely right! We need for Mexico a prince of a great name! The name of an ancient ruling house! Let me think. Ah! I have it! Maximilian, Archduke of Austria! Maximilian von Habsburg!"

"Magnificent!" cried Louis and

turned to Senor Montares. "We suppose," said Senor Montares to acquaint the young couple with the great good fortune that awaits them! "And be on your way at once!" At the moment in Miramar—the beautiful chateau he had built for her by the shores of the Adriatic—Maximilian and Carlota lived supremely, the only monarchs upon their happiness being that their union had been blessed by no other than Mexico, but with a name to them—Juarez, the Indian, not even that.

(To be continued)

Blame Old Beds For Spread Of Blue Mold

The use of old tobacco plant bed sites is blamed by experts at the Kentucky Agricultural Experiment Station for the spread of blue mold. Early outbreaks of the disease in both Tennessee and Kentucky were always in plant beds that were used last year, according to Dr. W. D. Valleau, plant pathologist at the Experiment Station.

The future of the blue mold disease is in the hands of tobacco growers, says Dr. Valleau. If even a few growers in each county persist in using old plant bed sites year after year, he believes trouble from blue mold may be expected.

The blue mold fungus produces bed-like bodies in the leaves killed by the disease, and these seeds or spores start the disease the next year if the same bed site is used again. Burning or steaming cannot be relied upon to destroy the blue mold spore in an old bed site.

If every tobacco grower in Tennessee and Kentucky would use a new bed site each year he would not only protect his own tobacco from an early attack of the mold, but would protect the beds of his neighbors, declares Dr. Valleau.

Kentucky Girls In Honor Fraternity

Home economics students that were pledged during 1938-39 to Phi Upsilon Omicron, national professional home economics fraternity at the University of Kentucky College of Agriculture include several from Kentucky and other states.

The entire membership in the home economics field, leadership and character are among requirements for membership. These young women are expected to be among those who will in the future build a finer family life in America.

A national survey was made to find the divorce rate among Phi Upsilon Omicron members who had been graduated ten years. Among the entire membership in colleges throughout the land, at that time only one divorce, had taken place. This is particularly striking when it is considered that on an average one marriage in six now ends in divorce in this country.

STRESSES GOOD GARDENS

A slogan, "Every farm a good garden" is being used by County Agent Robert F. Spence in Rockcastle county, Ky. In 12 communities, garden demonstrations are being made as a program to encourage the production of a larger part of the home food supply. The growing of a large number of different vegetables is receiving special attention.

4-H CLUB MEMBERS TO HAVE LAMB SHOW

Four-H club lambs from a dozen or more central counties will be shown and sold at the Producers' Stock Yards in Lexington June 3. Cash prizes totaling about \$250 will be distributed among the winners, and the lambs will be sold following the show. Rings will include single lambs, pens of 15 lambs, and record books. Eight hundred to 1,000 lambs are expected to be shown, according to entries at the College of Agriculture.

AMONG THE COUNTY AGENTS

Perry county farmers have used 95,000 pounds of grass seed in their "better soils campaign."

With model houses and a sanitation program, E. G. Howe, Fleming county, kept losses on 350 baby chicks to three.

Graves county sportsmen distributed 15 pair of quail to 4-H club members, also brought in 60 additional pairs.

Information on pruning trees has been disseminated in county-wide campaigns in Jessamine, Bourbon and other counties.

Walter Moss, Green county farmer, is building a model poultry house according to plans furnished by the College of Agriculture.

Twenty Boyd county farmers are growing trial plots of Warba and Chippewa certified seed potatoes.

Wildlife Exhibition Being Prepared To Show Throughout Ky.

The Wildlife Exhibition of the Division of Game and Fish is being made ready for showing throughout the state during the summer and fall months, Major Brown, director, said today.

The exhibition, under the direction of Billy Lee, conservation officer for the division, received commendation wherever shown last year and proved of great value as an educator of the people to the needs of wildlife conservation.

The exhibition is available for county fairs, 4-H Club gatherings and other such meetings. But in order to prevent any conflicts in engagements Major Brown stated that any person or club desiring the exhibition must write in to division headquarters at Frankfort and requests for dates should be sent immediately.

The exhibition consists of mounted ducks; geese; squirrels; foxes; quail; hawk; owl; coon; opossum; mink; weasel; and others.

PRE-DECORATION DAY SERVICES HELD AT STARK

Approximately 50 persons attended the pre-decoration day services at Stark, Ky., Sunday.

Among those present for the singing gathering were W. E. Leedy, Akron, Ohio; Miss Lynn Thompson, Maysville, Ky.; Mr.

and Mrs. Glen Harper, Mr. and Mrs. W. K. Leedy, Mr. and Mrs. Andy Porter and family, Mrs. E. S. Leedy, all of Stark; Helen Leedy, student at Morehead College; and Mr. and Mrs. T. M. R. Hall, of Morehead.

To You As a Consumer

When Walter Chrysler bought his first car about 34 years ago for \$5,000, there were approximately 60,000 people employed in building, selling and servicing automobiles. Today there are 12 or more times that number employed in building, selling and servicing automobiles.

Advertisin greated the increased demand. Demand was responsible for increased employment. Advertising created jobs for American workmen, and raised the standard of living in the nation.

These same results apply to radio, refrigeration, air conditioning and to thousands of smaller items which today are in common use in America.

What is true of manufacturing is equally true of distribution. In advertising the merchant finds an inexpensive method of increasing his sales and so lowering his percentage of sales overhead and increasing his ability to buy in larger quantities at lower prices. That means lower prices for the consumer.

The consumer who patronizes the advertising merchant profits because of advertising.
