Teach Agriculture and Domestic Science in Rural Schools.

WHOLE COUNTY GOES

More Children Enrolled As Farm Children Censuses Show

The Herald publishes this morning that the State Superintendent of Rural Schools, in his annual report to the Board of Education of the State of Indiana, has made a careful study of the census of the schools in the state, the number of children enrolled in them, and the number of schools opened for the purpose of teaching agriculture and domestic science.

The report shows that the number of children enrolled in the schools of the state is increasing steadily, and that the number of schools opened for the purpose of teaching agriculture and domestic science is also increasing.

In all, there were 84,512 children in the schools, and it was estimated that the number of schools in the state was about 9,500.

The schools were well attended, and the children were well taught.

COATER, State Superintendent of Rural Schools,
