Memories, riding behind "Mom" on old "Charley" to Grandma Yazzels, and playing with the white cat and black one, the white one we called "Milkie," the black one "Blackie." "From my dog and constant playmate until I was fourteen. Putting my hand before a 22 pistol and letting Lloyd Evans shoot him in. Sleeping on a chestnut burr in my bare feet. "Grandma" pulling my first teeth with a string. My first train ride on the C. F. & S. R. from Flemingsburg to Johnson Junction. Riding on the mail "hack" from Plummers Landing to Flemingsburg with Lonnie Lawrence, fare \$.20. Earning my first dollar on Mr. Charley's farm at Lewisburg. Those three and one half inch hard collars I used to wear with a little "Jazz" bow tie. Boy, "was I hot" was I! Lester Hogge is having her house remodeled to suit herself, and the dars Lester to say anything about it. ("Larkin" if that was me I'd set my foot down.) E. B. Daugherty and his wife Hazel passed through Hot Springs on their way to Phoenix last Monday, she was madder than a hornet, she wanted me to turn around and see if she did not leave the hot water heater on. I said Clayton, you call that "kid" "Gus" and we'll never speak again. He said he wanted a girl in the first place, but he was tickled that it was a boy. "Ear" he wanted a boy all the time and any time you'd bring him, bring him up. I can't wait to see you all busy-eyed in the mornings, with top truck marks on your feet, and all kind of baby food books around the "Blue Moon." X'mas Workers Must Have Security Numbers

Workers who obtain seasonal employment in department stores or in other service related to the Christmas holidays should have social security numbers before or at the time of starting such work.

This statement is made by Mr. J. A. Chaney, manager of the Social Security Board field office in Ashland, Ky. "With the approach of payment of monthly benefits it is increasingly important that every worker who gets a seasonal or part time job should have a social security number," Mr. Chaney said.

"Many who seek employment will find it to their advantage to obtain social security numbers before applying for jobs, as many employers now refuse to put a new hire on the job until he or she has a social security number."

CORRECTION

In a story published last week under the caption "80,000 Indebtedness of Rowan to be Refinanced" it was erroneously stated that Judge I. E. Peltrey and the Fiscal Court called upon Mr. Lynn of Frankfort official in charge of the county debt commission and he recommended that the re-financing steps be taken by the Fiscal Court.

Judge Peltrey did not make this trip being unable to do so. The Independent is glad to correct this error.

A round table discussion was held on the results of last year's hybrid corn growing. The discussion went on for about ten minutes, different members had different ideas about the corn, partly because this crops season was unusually wet. Some boys received better results from open pollinated corn than they did from hybrid.

Elliott Man Held For Alleged Rape Of Two Children

Transferred to Rowan Jail By Judge; Mob Rule Was Feared

Darb Turner, 49, of Elliott county is in the Rowan county jail accused of raping his two teen age daughters, according to Alby Hardin, Rowan jailer in whose custody he was placed Friday night for safe keeping.

The alleged offense was committed Friday night and Turner brought here upon recommendation of Harold Adams, Elliott county judge who feared that he might possibly become the victim of mob rule.

Turner's daughters, Myrtle, 14, and Cleffie, 16, preferred charges, reports state. Held on two separate counts with bond fixed at a total of \$4,000, Turner will remain in jail until the March term of the Elliott Circuit Court.

18,000 Bob Quails Released By State For Hunting Season

Game and Fish Commission Asks Hunters For "Fair Play"

The sport of kings—hunting—when thousands of men, women and children enter the fields of Kentucky to enjoy quail and rabbit hunting, such as the Commonwealth has not experienced in many a year. Even the war that was caused by the drought of August, September and October can not change the fact that game seems abundant.

With the release of more than 18,000 Bob Quail in pairs in the fields of Kentucky during late March and early April of last spring by the Division of Game and Fish aided by the game clubs over the state, a restocking program, such as this state has not experienced in many years was conducted and its completion now shows ample birds for the minnow and that means more game in the bag and more sport for those persons who enjoy bird hunting.

Nothing was done in the way of replenishing our rabbits, but they seem to haveably taken care of themselves if reports of their increase over past years can be taken as a basis for comparison.

"If the sportsmen are to continue good hunting in Kentucky Major James Brown, director of the Division of Game and Fish states, "They must abide by the code of sportsmen, observe the fish and game laws as to open seasons, bag limits, seeing to it that they have their hunting licenses, and treating the landowners with due respect."

The daily bag limit on quail is 12 with not more than two days bag limit in possession at any time.

The daily bag limit on rabbits is 8 with not more than two days bag limit in possession at any time. It is strictly against the law to sell quail at any time and any one caught either buying or selling this game bird is liable to an arrest.

Rabbits may be bought and sold but as the law reads that no person may have in his possession more than two days bag limit—16 rabbits—this means that all grocerymen or others who might deal in rabbits will have to hold their supply down to a total of 16 at all times.

Grant Telescope Can Pick Up Candle Beam 40,000 Miles Away Scientists Say

"How far that little candle throws his beams!" Yes, were it not for the impurities of our atmosphere it could be seen forty thousand miles by means of the giant 200-inch mirror being installed on Mount Palomar in Southern California. And glass makes that mirror practicable. Thus glass in a telescope brings the distant world closer. In a microscope it makes the minute world larger. In a camera it makes a fleeting world permanent. In spectacles it makes the world clearer.
