This Story Dedicated To Both The Students And Faculty Who Go Frognog

Jimmy City, one of the mem-
bers of the Journalism class that
contributes to the Trail Blazer,
writes on "Frognog":
Now that the season is nearly
right, it's time to be lighting
up their passion lanterns and
their minds in Paintsville this
season in search of the built,
fug.

To me, as it is with many others,
frognog, as it is locally called, is
one of the most exciting of any
sport. And in pursuit of it, the
one who must either wade the
creeks all night or have a boat.
Frognog, my personal choice
while others choose, will choose
the boat.

By using a strong light, gasoline
lanterns and miners carbide
lamps being the most common
means used, you seek the victim,
because the frog seems to sit in
frozen and glare into a strong
light as it will only a three or
more prolonged look with barbed
pits.

The problem of Fish and Game
Conservation has been brought
to our attention and partly worked
out. Never a word however has
been said about the frog. Any ex-
perienced frog hunter will tell
you the frog population has de-
creased in our local streams the
last few years. Frog take sev-
eral years to reach maturity and
the "always green" season has led
to a practically extinction of the
frogs. Several years back a
night's hunt would net the hunter
two or three hundred frogs. Now
a bunch of thirty or forty is con-
sidered a large catch. This loss
of the genus has also led to a
decrease in the frog population.

Let's help the frog out and have
fringing houses of some kind, the
product of which will go to help
recreate our streams with the
frogs we do with the fish hatcheries.
