"ONE OF KENTUCKY'S GREATER WEEKLIES"

VOLUME VIII

MOREHEAD, KENTUCKY, THURSDAY MORNING, JULY 10, 1941

NUMBER TWENTY-EIGHT

The next man that bleats at me like a Billy Goat, I am going to take him like Jim Rose took Ed Maggard. I have had more insults thrown at me since that Billy Goat fight than General Morcom ever thought of having. The fact is the goat and I were both scared to death and he was framed-up from start to finish. I don't have anything against my goat, Nanny goat or Billy Goat but it made me so mad when they brought that thing out on the field I just made up my mind to kill it. First he, I thought it was Jack Cecil when I first saw it, and when I made my first thrust that "I'll kill you, Jack Cecil and I said: "The goat was mad and he called him that." Bruce Patrick was also angry for he said the next man that calls my goat Jack Cecil, I will take him like my brother took Cooper that time. It getting to the point that when I deliver a MAYTAG the kids come out and holler, "Mama, here is Billy Goat with your war yarker." My wife has not spoke to me in a civil manner since that fatal day. She claims it will be something that we will never live down. My being framed there had no effect on my audience. That was not my fault, and I can prove that Dr. Nickell the one who is running for Representative from Rowan County and just for that I am not going to vote for him in the primary. Besides I am going to use my vote for the man I like best. I think he is a going to get too many votes I will vote for either that I will support or Ookie (I will support from his chair-bottling business). Ivan Hogg has just about the stinkiest wife I know of and I can prove it by the Willie Miller case. She also has the ugliest husband and the only one I know of that does not like his wife. Thanks to The Merchants Association of Morehead for looking forward to some way to raise money to help put the ROWAN COUNTY SCHOOL AND AGRICULTURAL FAIR over. The effort that we put forth does not make much to you, but think what a grand time those four thousand kids will have. If you have to walk through mud, rain or an ox or m, be sure and hear and see Theo Brock at the College Auditorium Friday, July 11th, at seven-thirty p. m. As I understand it, the mayor of Narvik, Norway, when the Germans took it over some time ago, I am going to take it like I know that a man that is interesting. A man that has gone through some trials and tribulations and has lived it all up here. Joe, of the famous "JOE'S PLACE" states that he will make his home here in Morehead, and that he likes us mountain people better than the Blue Grass people. Welcome Joe, we try to be good neighbors. We do not drink Fayette County but it needs culling out. Some of the undesirable include King Swope. The only thing he ever ran for and caused was a bus. Paul Little or Dan Caudill's week end boarder. He is a skinny as a match before a married Dan's daughter and dinner table. Now he is almost as big as L. C. Young, our big gunner from Fayette. Give us a here Joe and we, I am sure all appreciate that free playground we furnish to our children. A. C. "Parney" Martindale is cutting the tails off his hoglets now and saving all the bottle caps. He says Judge White has all the money or how many hoglets it takes to make \$150.00.

**E. R. "Dock" Egan Announces For Magistrate**  
E. R. "Dock" Egan makes formal announcement this week of his intention to become a candidate for the office of Magistrate in the 4th District, composed of Brunsby No. 20, Cranston No. 12, Pine Grove, No. 5 and Pleasant No. 13. Egan, subject to the action of the Republican party at the primary election, to be held Saturday, August 2, 1941. "Dock" was born and reared in

## Norwegian Mayor To Speak Friday At MSTC Auditorium

Theodor Brock To Lecture On Subject, "Battle of Narvik" At 7:30 P. M., July 11

The thirty-three year-old Mayor of Narvik, Norway, and son of the War Minister in the former Norwegian Government, who recently escaped this country through Sweden, Russia, Siberia and Japan, will speak at the Morehead College Auditorium Friday, July 11th at seven-thirty p. m. Mayor Brock was twice sentenced to death by the Germans. The first time was on April 13th, the day of the great sea battle of Narvik, because he had removed the personnel of the telephone and telegraph lines thereby rendering them useless to the Germans. The City Council petitioned the German authorities and they were set free on parole. When the war was over, Brock was again arrested and would have been shot, had he not made a daring escape. This young man was an eye-witness to the "Battle of Narvik" and he will tell of the future of Norway. He says that Germany will find the Norwegians tough, and that it now takes 400,000 Nazi soldiers to keep the necessary iron grip on Norway. The public is invited to hear Mayor Brock speak on the subject "The Battle of Narvik."

## Ten Men To Leave July 17 To Fill July Draft Quota

Ten men will be inducted on July 17 to enter the armed forces of the United States at the Industrial Center at Fort Thomas, Kentucky. This group fills the quota for Draft Call No. 14 of the local Draft Board. The men are: Willie Gordon Sexton, Crane; Alton Sonag; Payne, Morehead; John Will Lykins, Hamm; Arnold Fyffe, College Student; William Earl Bannister, College Student; P. Crawford, College Student; Lloyd Lee Hiltbrand, Triplett; James W. Calvert, Morehead; and Ivan Eugene Bell, College Student. Call Number 15 of the Local Draft Board will be issued on the time between August 1 and August 14, and will be for sixteen men. The volunteer list was exhausted with Call No. 13.

## Sorghum Co-Op Can Be Organized In Rowan County

Possibilities of organizing a sorghum cooperative marketing service for Rowan County are being explored, according to Carl Wade, Vocational Agriculture Instructor of Morehead High School and member of the advisory board for the Farm Security Administration. Many farmers in this county have heretofore been handicapped for marketing purposes and have disposed of them through the sorghum cooperatives in adjoining counties. The cooperative system, the best method for small producers, offers the grower the protection of a uniform price over the entire state as well as guaranteeing the public of receiving a sorghum of uniform quality. Wade is cooperative, a large acreage is necessary. In the event that an organization is formed here, there will be a Government grader assigned to this district for the purpose of grading the finished product. Mr. Wade urges that any grower in Rowan County who are interested in cooperatively marketing their sorghum, see Mr. Bill Layton at McKinney's Store, dealing with him the number of acres planted in sorghum and the amount intended for sale.

## Merchants Awards Made On Friday Of Last Week

The Morehead Merchants Association held its weekly gathering to award its Commerce prizes on Friday of last week in order to become part of the Fourth of July Celebration here. Prizes were awarded in different proportions last week, with

## Rummage Sale To Be Held By Church Of God On July 12

The Missionary Society of the Church of God will sponsor a rummage sale on July 12. This sale promises to be one of the biggest sales ever given in Morehead of various donated articles. The Society has for several weeks been embroidering pillow cases (and are they pretty), which they will sell plenty cheap, also they have been making aprons of all kinds and fashions. Other home made articles are shoe holders, pot holders, pin cushions, etc. In addition to this they have ordered from a Company many articles of clothing which have been slightly used and which will be sold on that day. The place of the sale will be announced next week in the local papers, and it is hoped that every parent who would be interested in buying school clothes for the boys and girls as well as clothes for the grown up will visit this sale. The sale will begin at seven o'clock morning Saturday morning, July 12, and last the entire day or as long as the stock lasts. Tell a friend about this and come and bring a friend. Do yourself a service, get a good friend the privilege by telling him about it.

## Baptist Church To Hold Annual Lawn Party Tonight At 7

Refreshments, Games, Good Fellowship On Flood-Lighted Lawn The annual Family Party of the Morehead Baptist Church will be held tonight (Thursday) at seven o'clock, on the church lawn. As usual, the invitation is not issued direct by letter, but by general announcement from the Sunday services and through the paper. It is extended to all who attend any of the services or who belong to any of the organizations of the church, and to their families. Even those who attend only occasionally any of the meetings of the regular services or the organizations are invited. Refreshments will be served as the people gather, and games for both young and old will be played on the flood-lighted lawn of the church. The history of this occasion is that it is the high social event of the church, and those who attend this time may expect a good time and good fellowship. The Pastor, B. H. Kazee, will head the reception list, and the church members will be invited to head to make everyone feel welcome. There will be no charge. The committee in charge of the occasion are: Morehead Baptist Church, Mrs. H. C. Hagan, O. F. Patrick, Mrs. H. L. Braden and Roberta Bishop.

## Morehead High To Have Free Lunch Program This Year

Issues Appeal For Donated Fruit Jars For Canning Peaches The Morehead Public School will inaugurate a free lunch program at the beginning of the 1941-42 school year, under the direction of Mrs. Whittaker, supervisor of canning projects and Miss Mary Alice Gabel, Vocational Agriculture Instructor at Morehead High. It was announced this week. The school has not operated a cafeteria or lunch room before, but each year for the past three years the Morehead Woman's Club has sponsored the free milk program for underprivileged children. The milk project, the school feels, has been of great value in promoting health and in teaching the value of milk as a health food. This year, the children who are certified for free lunch will also receive a free plate lunch, while others

## 11 Rowan Students On Honor Roll At MC 2nd Semester

Out of the one hundred-six students enrolled at Morehead State Teachers College for the second semester, eleven maintained a B average or better. The students are: Leo Bell, Bradley, Elvira Caudill, Opal Layton, Wilma Engler, Katherine Palmer, Frances Porter, H. J. Porter, H. Porter, Katherine Turner and Paul Wheeler, were the Rowan County students who made the honor roll. The Social Committee entertained all honor students with a party Monday, June 17, at the home of Mrs. H. C. Hagan, Frances Peratt and Paul Wheeler of Morehead, and Ligea Boggs of Greenup. But all that we ask is that receiving the other guests with President and Mrs. Vaughan.

## Air Corps Examining Board Here For 4 Days, July 9-12

Col. Robert L. Rockwell Heads Group Of Officers As Board President The young men residing in this part of the county who wish to apply for appointment as Army Aviation Cadets, according to Captain E. R. Hart. "For any young man who is interested in flying, or in aviation as a career this is literally the opportunity of a lifetime," said Captain E. R. Hart. "It is a perfect opportunity for the present emergency have resulted in a tremendous increase in the number of men to whom training can be made available, and have also brought about many improvements in the quality of the training." "Recent liberalization of educational requirements has placed this opportunity within easy reach of almost any High School graduate who is ambitious to make a future for himself in aviation," he continued. "But all that we ask is that the applicant in perfect condition of college training is still necessary to exempt the applicant from the educational examinations, the examination is eligible and are well within the scope of ordinary good High School courses in the subject covered. It is expected that a sufficient number of applications are received from physically qualified men in Morehead. But all that we ask is that the applicant be normal physically—normal eye sight, normal hearing, normal heart—that sort of thing. A great many well qualified men who are intensely anxious to become pilots have been discouraged in the past because of the general impression that it takes a species of superman to pass the Air Corps physical examination. This is definitely not the case." Applicants who are accepted as Aviation Cadets by the Army are now in effect receiving a \$25,000.00 scholarship in the finest aeronaut

## Col. Robert L. Rockwell Heads Group Of Officers As Board President

The United States Army Air Corps Aviation Cadet Examining Board for the State of Kentucky will visit Morehead for four days beginning Wednesday July 9th, it was learned Monday. Captain Daniel S. Earhart, Air Corps member of the Board is in Morehead making arrangements for the work of the Board, which will meet in the Administration Building of Morehead State Teachers College. President of the Board is Colonel Robert L. Rockwell, Air Corps, a distinguished veteran of the Lafayette Escadrille in World War I. Member One, who also served in the United States Army Air Corps after this country entered the war in 1917, and became one of the "aces" of the American army. This is the first visit of the board to this section of Kentucky, and is made for the convenience

## Interest In FSA Here Is High; County, Merchants Assist

That local interest in the establishment of an office of the Farm Security Administration in Morehead is paramount, was proved this week when it was revealed that the County is furnishing free of charge, office quarters for the FSA personnel, and that the Morehead Merchants Association is completely redecorating the office quarters with new paper, new paint work, new shades and complete interior decoration. The offices are located on the first floor, corner room, of the Courthouse here, and will open next Monday, July 14th.

## 15 Additional Men Registered With Local Draft Board

Fifteen additional cards of registrants in the second Selective Service Registration were received by the Local Draft Board here since the first registration in July, 1941. The cards are those of late registrations and registrants who elected to be transferred to this board from some other board. Their names follow: Ezra Hanson Reynolds, Millard Quisenberry, Robert Egan, Felix Wellman, Herndon Hall, George Washington Hamm, Emerson Easton, Curtis Pultz, Elmo DeHart, Alshab Boyd, Leland Grever, School land Black, Fandy Hunter, Johnson Camden Young, Ardith Ray Jones and Thomas Smith.

## 3 Rowan Farmers To Serve As FSA Advisory Group

Three Rowan County citizens have been named on committees to advise and assist in the operation of the rehabilitation program of the United States Department of Agriculture. William K. Rouse, Rowan County Supervisor for Farm Security Administration, announced the appointments made by Earl Maynew, FSA State Director at Lexington, Kentucky. The members appointed by Mr. Maynew are: George Ellington, W. P. Wells, W. H. Hick. Mr. Rouse said that Mr. Ellington, Mr. Wells and Mr. Chick will serve on both the automatics for the Farm Debt Adjustment and tenure improvement work and the subcommittee for the rural rehabilitation program. Mr. C. H. Goff, Mr. Carl Wade and Mr. H. C. Hagan are members of the FSA State Director at Lexington, Kentucky. Several hundred Rowan County homemakers have been notified by letter of this demonstration which is open to the public for one interested in canning of fruits and vegetables is urged to attend.

## 44 Rowan Candidates Draw For Positions On Primary Ballots

Harold Blair Will Open Dental Office Here, July 14th Six Candidates Have No Opposition Candidates, who filed for offices in Rowan County, met at the Courthouse on Tuesday afternoon and drew for positions on the ballots for the primary election, to be held Saturday, August 2, 1941. The drawing was held in the County Court Room under the supervision of County Court Clerk, C. V. Alfrey. Following is a complete line-up of the names as they will appear on the primary ballots, listed according to their respective positions:

## Harold Blair Will Open Dental Office Here, July 14th

Dr. Harold Blair, dentist, will formally open offices here Monday, July 14, with quarters in the Consolidated Hardware Building, near the intersection of Main Street and Wilson Avenue. The office quarters, located on the second floor of the building, have been completely remodeled and redecorated throughout. Dr. Blair will have the most modern equipment known to the dental profession, and will be able to render complete service in all branches of dentistry.

## 15 Additional Men Registered With Local Draft Board

Result of Late Registrations And Transfers From Other Boards Fifteen additional cards of registrants in the second Selective Service Registration were received by the Local Draft Board here since the first registration in July, 1941. The cards are those of late registrations and registrants who elected to be transferred to this board from some other board. Their names follow: Ezra Hanson Reynolds, Millard Quisenberry, Robert Egan, Felix Wellman, Herndon Hall, George Washington Hamm, Emerson Easton, Curtis Pultz, Elmo DeHart, Alshab Boyd, Leland Grever, School land Black, Fandy Hunter, Johnson Camden Young, Ardith Ray Jones and Thomas Smith.

**DEFENSE BOND Quiz**

Q. What is the price of a Defense Savings Bond?

A. For the smallest Bond, you pay \$18.75. The Bond will increase in value in ten years to \$25.00. For \$75.00, you get a Bond which will increase to \$100.00; other Bonds are in proportion.

Q. What will the Government do with the money I pay for my Bond?

A. Your money will be put to work at once in the National Defense Program to protect the freedom and safety of the United States, and all of its people everywhere.

NOTE.—To purchase Defense Bonds and Stamps, go to the nearest post office or bank, or write for information to the Treasurer of the United States, Washington, D. C.

**Editorial On The George R. Clark Memorial Drive**

Louisville Courier - Journal  
 Lauds Efforts Of Prof. Hamblen Tapp

(An editorial from the Louisville Courier-Journal Monday, June 23, 1941)

Pride of statehood, as our Sesquicentennial Year approaches, is being expressed in many ways. One of the most significant is the proposed Clark Memorial Drive. This drive, named in honor of George R. Clark, the great explorer, is a fitting tribute to his memory. The drive will be a link between the past and the future, and will serve as a reminder of the great achievements of our nation's history.

This is recognized in Ohio and Indiana, which have erected magnificent memorials to the intrepid warrior with a statesman's vision. But they honor the great Clark in a different way. They have named a drive in his honor, a drive that will be a link between the past and the future, and will serve as a reminder of the great achievements of our nation's history.

Indiana's "Centennial History" begins with the capture of Vincennes, the great city of French settlement. But for such a reason in the first place, the right time, says the Hoosier historian, "there is little doubt that the vast territory now comprising the five great States of Ohio, Indiana, Michigan, Wisconsin, and Wisconsin, would have not been led by the Treaty of Paris after the Revolutionary War."

Who then is little doubt that the vast territory now comprising the five great States of Ohio, Indiana, Michigan, Wisconsin, and Wisconsin, would have not been led by the Treaty of Paris after the Revolutionary War.

Who then is little doubt that the vast territory now comprising the five great States of Ohio, Indiana, Michigan, Wisconsin, and Wisconsin, would have not been led by the Treaty of Paris after the Revolutionary War.

**Farm Meeting Will Be Held At UK For County Delegations**

A meeting is being held at the University of Kentucky on Monday, July 7, which will be attended by Rowan County farmers. The delegation will be headed by C. B. Turner, Chairman of the Rowan County Agricultural Conservation Association. The meeting is being held to discuss the Agricultural Conservation Act of 1940, and the importance of the act to the farmer.

It is clear to anyone that Hitler has taken a gigantic gamble. Russia is a military power, Hitler would no longer have to fear attack from the East. He could then concentrate all of his weapons for the final assault on the British Isles.

## Army Wants More Voluntary 3-Year Enlistments In July

Openings For 535 Men In This Corps Area; 710 In Other Sections

Authorization for enlistment of additional men in the United States Army Air Corps ground units was announced today by Fifth Corps Area Headquarters, Fort Hayes, Columbus, Ohio.

Some 1050 single, male, white citizens, eighteen to thirty-five, will be enlisted for three years and assigned to Ellington Field, Texas, for training.

Vacancies for the Air Corps under this requisition may be filled by enlistment of qualified trainees at induction stations, reception centers and Air Corps replacement centers, by approved transfers of qualified regular Army enlisted men; by enlistment of qualified members of the National Guard in Federal service whose applications for discharge for the purpose of enlisting in the regular Army are approved by their organization commanders.

All men enlisted under this requisition except overseas replacements will be sent to reception centers for processing.

This Corps Area also is assigned 535 openings for three-year enlistments in units as follows:

## UK Making Plans To Celebrate 50th Year Of Football, Oct. 11th

A ceremony celebrating the fiftieth year of football at the University of Kentucky will be held Saturday afternoon, October eleven, on Stoll Field, the University's gridiron, between halves of the Kentucky Vanderbilt football game.

Plans for the occasion have not been completed yet, but Bernard Shively, University athletic director and line coach will have his guests that day Jackie Thompson, Franklin, Indiana, the Wilkes' first football coach.

## Canning Inventory Should Begin Now Says UK Economist

Check All Materials Necessary For Home Canning In Ample Time

"With all America defeminded, home canning is taking on new importance this year," says a statement from the Kentucky College of Agriculture and Home Economics. It has been pointed out by Dr. Louise Stanley, chief of the home economics bureau of the United States Department of Agriculture that "millions of quarts of good food stored away in home pantries are important to both the family and national preparedness."

Attention should be given to getting canning equipment in A-1 condition, and keeping it that way.

Infantry, Camp Wheeler, Georgia, Field Artillery, Fort Bragg, North Carolina; Coast Artillery, Fort Meade, Virginia, Cavalry, Ft. Riley, Kansas; Engineers Corps, Fort Belvoir, Virginia; Quartermaster Corps, Camp Lee, Virginia; Signal Corps, Fort Meadmouth, New Jersey; Ordnance Department, Aberdeen Proving Ground, Maryland; Medical Department, Camp Lee, Virginia; and Armored Force Units, Fort Knox, Kentucky.

There are 340 vacancies in various arms and services in Havana, 110 in Puerto Rico and 250 in Panama.

In view of the current expansion of the United States Army, opportunities were never so good for young men to enlist and earn rapid promotion to specialist and non-commissioned grades. It was pointed out.

The following suggestions are given:

"First, if canning non-acid vegetables, you'll need a steam-pressure canner in tip-top condition. Only in such a canner is it possible to get temperatures above boiling. Higher than boiling temperatures are necessary to kill the organisms that cause spoilage in practically all vegetables except tomatoes.

"Steam-pressure canners need to be re-checked each year to see that the pressure gauges register correctly. This gauge can be taken off and sent to the factory where it was made for the manufacturer to check, if necessary.

"The best way to can acid foods (fruits and tomatoes) is to use a water-bath canner for processing. See that all parts of this are assembled. All that is needed is a wash boiler, a bucket, or a similar vessel that has a tight-fitting lid and a rack for the bottom. This canner needs to be high enough to permit covering the cans or jars with one to two inches of water.

"As for containers, take stock of the supply of glass jars or tins. Buy new rubber rings for glass jars. Good rings will stretch to twice their length. Discard any jars that show cracks, chips, or dents. Throw away porcelain-lined metal lids if the lining is the least bit loose. Tighten loose wire clamps on lighting-type jars by bending the wire down at the middle on top, and inward at the sides. If using tin cans, be sure to have the right kind of tin for the kind of food to be canned. You'll need C-named lined cans for corn, beans, kidney beans and succotash. C-named cans have a dull finish and are light gold color. You will need the deeper gold, brighter B-named for beets, all kinds of berries, cherries, cranberries, plums, pumpkins, and squash.

Plain tin is satisfactory for all other fruits and vegetables."

## UK To Offer Twelve Short Courses At 1st Summer Session

Two-And-One-Half Week Terms To Cover Agriculture And Education

Twelve two-and-one-half weeks short courses, five in agriculture and seven in education, will be offered during the current term of the 1941 Summer Session at the University of Kentucky beginning July 3 and extending through July 19, the closing date of the first five weeks session.

Registration for these courses will be held July 3, the opening date for the series.

Included in the agricultural courses will be one in farm engineering, offered three credits and dealing with engineering principles and practices in soil management. It will be held daily for the first three morning hours. Another course in farm engineering dealing with special problems in that subject, also offering three credits, will meet daily at the same time.

The courses in animal industry one taking up the problems of farm dairying, one advanced poultry production and the third dairy cattle breeding, all offering three credits, will meet daily from July 3 at the first, second and third hours of the morning.

A three credit course in the administration of vocational education, will meet by appointment in the Agriculture building. Another, dealing with the elementary school and offering three credits will meet the second and third hours daily in the College of Education; and a third, "Methods of Teaching Vocational Agriculture," will meet daily by appointment, and will offer three credits.

## Burrow Cites 1912 Law On Employing Females In State

Limits Workers To Ten-Hour Day, 60 Hour Week In Most Industries

Citing a law which has been a part of the Kentucky Statutes since 1912, Commissioner William C. Burrow of the Department of Industrial Relations today warned that the employment of women for more than ten hours in any one day or sixty hours in any one week may result in the arrest of the employer.

Burrow pointed out that in specific occupations women are not allowed to work more than this prescribed period, and he said it would be the policy of the Department in the future "to enforce this law to its very letter."

"Although this regulation has been in the books for almost forty years, there has been a general laxity in the past about its enforcement," the Commissioner pointed out. "However, it has now been placed in the hands of this Department, and we are charged with the duty of enforcing its provisions. We intend to do that, and we intend to do that now."

The law states that no female of any age shall be permitted to work in any "laundry, bakery, factory, workshop, store or mercantile manufacturing or mechanical establishment, or hotel, restaurant, telephone exchange or telegraph office, more than sixty hours during any one week," and it also says that no female under twenty-one shall be employed in any occupation except domestic service, or nursing for more than this time. It also limits the daily work to ten hours.

"Burrow pointed out that in specific occupations women are not allowed to work more than this prescribed period, and he said it would be the policy of the Department in the future "to enforce this law to its very letter."

## Milk Producers In Central Ky. Form A Dairy Cooperative

Association To Aid In Marketing Problems; Promote Producer-Consumer Relations

For several weeks milk producers in the Blue Grass region have been working toward the formation of a cooperative marketing organization. It is the only use of its kind in the State and its membership is composed only of producers, some of which sell their milk to pasteurizing plants and others sell direct to the consumer.

Central Kentucky milk producers have long felt a need for an organization to represent them and to aid them in solving their problems in merchandising their milk, promotion of better relations between producer and consumer, purchasing of supplies and increasing the consumption of milk.

The Marketing Division of the Kentucky Department of Agriculture at Frankfort assisted the farmers to organize. In order to do those things which could be accomplished through cooperation of all agencies of the milk industry, considerable time was spent in sponsoring June Dairy Month, and the results obtained were conclusive for

## THE MOREHEAD INDEPENDENT

all concerned that there were great benefits to be derived from a cooperative.

The formation of a cooperative in Central Kentucky is especially important because Central Kentucky farmers have not been as favorable toward cooperative marketing as those in Western Kentucky.

Members of the organization will be drawn from the "Lexington Milk Shed" of Woodford, Scott, Franklin, Fayette, Bourbon, Clark, Mercer, and Jessamine Counties.

Mr. Earl Robbins, teacher of Vocational Agriculture of the Lafayette High School, was very prominent in the organization of this cooperative.

"Although this regulation has been in the books for almost forty years, there has been a general laxity in the past about its enforcement," the Commissioner pointed out. "However, it has now been placed in the hands of this Department, and we are charged with the duty of enforcing its provisions. We intend to do that, and we intend to do that now."

The law states that no female of any age shall be permitted to work in any "laundry, bakery, factory, workshop, store or mercantile manufacturing or mechanical establishment, or hotel, restaurant, telephone exchange or telegraph office, more than sixty hours during any one week," and it also says that no female under twenty-one shall be employed in any occupation except domestic service, or nursing for more than this time. It also limits the daily work to ten hours.

"Burrow pointed out that in specific occupations women are not allowed to work more than this prescribed period, and he said it would be the policy of the Department in the future "to enforce this law to its very letter."

"Although this regulation has been in the books for almost forty years, there has been a general laxity in the past about its enforcement," the Commissioner pointed out. "However, it has now been placed in the hands of this Department, and we are charged with the duty of enforcing its provisions. We intend to do that, and we intend to do that now."

## Milk Producers In Central Ky. Form A Dairy Cooperative

Association To Aid In Marketing Problems; Promote Producer-Consumer Relations

For several weeks milk producers in the Blue Grass region have been working toward the formation of a cooperative marketing organization. It is the only use of its kind in the State and its membership is composed only of producers, some of which sell their milk to pasteurizing plants and others sell direct to the consumer.

Central Kentucky milk producers have long felt a need for an organization to represent them and to aid them in solving their problems in merchandising their milk, promotion of better relations between producer and consumer, purchasing of supplies and increasing the consumption of milk.

The Marketing Division of the Kentucky Department of Agriculture at Frankfort assisted the farmers to organize. In order to do those things which could be accomplished through cooperation of all agencies of the milk industry, considerable time was spent in sponsoring June Dairy Month, and the results obtained were conclusive for

**MODEL LAUNDRY & DRY CLEANERS**

## HAVE YOUR RUGS CLEANED THE NEW WAY

Rugs get dirty, no matter how regularly you use the vacuum cleaner. You just can't get rid of all that surface soil, you just can't pull out that embedded grit that has been trampled deep into the pile. That sharp grit is wearing away the rug; only shampooing will get them really clean. We clean both front and back by the Hill System, with Hill Rug Fluid. It removes that dingy look and brings back the natural lustre and color of your rug. This fluid moth-proofs your rug for nine to twelve months.

Try our rug cleaning and be convinced!

**Army Air Corps--**

(Continued from Page 1.)  
 tical school in the world, Captain Earhart pointed out. "The training which the Cadet receives costs the Government \$15,000.00. In addition, during the period of approximately three and one half years which is the normal length of service as a Cadet and as an officer in the Army Air Corps following his graduation, he receives over \$10,000.00 in pay and allowances. Also, under recent acts of Congress, he is entitled to receive a bonus, or severance pay, of such time as he leaves active duty as an Army flier of \$500.00 for each year of such active duty following his graduation as a Cadet."

"Following induction in the status of an Aviation Cadet," continued Captain Earhart, "the aspirant flier is sent to a primary training school for a period usually of ten weeks. There he receives instruction in such ground school subjects

as principles of navigation, motors, and theory of flight, as well as learning to fly in small primary training planes. Upon successful completion of this course, he then enters the West Point of the Air-Banking Field, Texas, for the so-called Basic course—also normally of ten weeks duration. Here his ground school work continues, and also receives instruction in matters of general military importance, and does a lot of flying, using the much faster and more powerful BT (basic trainer) planes. This follows ten more weeks at an advanced Course flying base—possibly Kelly or Brooks Field in Texas. Upon completion of this course the Cadet receives his commission in the Army Air Corps as a 2nd Lieutenant and is immediately assigned to a tactical air unit—a "group"—the Air Corps equivalent of a regiment.

"As a Second Lieutenant, he receives pay and allowances at the rate of from \$205.00 to \$248.00 per month. During this period also, he has an opportunity to enter the Regular Army as an officer on the active list, in the event he decides he wants to make a career of military aviation. Otherwise, usually after three years of active service, he reverts to a civilian status, though retaining his commission in the Army Air Corps Reserve. He now has the best technical training obtainable anywhere in the world, to enter the great aviation industry—the fastest growing industry in the world today. As an example it need only be pointed out that practically all air and commercial pilot training in the world is done by the American airline pilots and that America's airlines are the world's best in that field."

"By applying for an appointment as an Army Aviation Cadet, a young man is not only rendering his country the highest type of service possible in this emergency," concluded Captain Earhart, "but he is also providing himself with one of the best opportunities for his future livelihood which can possibly be had. The fact that even as a Cadet he receives \$105.00 per month plus quarters, clothing, free insurance, etc., is perhaps the best demonstration of the economic advantages of this field of activity."

Full information about all phases of Aviation Cadet appointments, training and qualifications may be obtained from the hour. All interested persons are cordially invited to call on the Board which is in Morehead.

### Newly Set Shrubs Need Extra Care During First Year

Blooms Should Not Be Expected Until Plant Is Two To Three Years Old

A shrub, like a baby, requires extra care during its first year, according to N. R. Elliott, landscape specialist for the University of Kentucky College of Agriculture and Home Economics. After that year, the shrub can tend for itself somewhat, but for the care of last fall or this spring) he makes the following suggestions:

All newly set shrubs should have the soil cultivated at least two to three inches deep in a circle around each plant. This circle should be about two feet in diameter, keeping all of the grass and weeds out of this circle. The grass and weeds use moisture and the plant food that is urgently needed by the newly-set shrubs.

Do not feed or fertilize newly-set plants. To do so often over-stimulates these plants so that the top is not able to absorb and use all of the plant food brought up by the roots. Newly set shrubs should not be fed until they have

had one entire year of growth in their new location.

The shrubs undoubtedly were pruned when they were set; however, often these plants will develop three or four new shoots that grow rapidly, giving the plant an awkward appearance. By heading back these new shoots now it is possible to encourage development of side branches which means a denser, better shaped plant. This will apply especially to Spirea, Forsythia, Mock Orange and Weigela. By carefully pruning these plants in this way they can be developed in a short time into very attractive specimens.

Do not expect newly-set shrubs to produce much bloom their second year; in fact, it is better to let the plants grow and develop well for two to three years and then let them produce bloom.

Newly-set shrubs should be watered enough during the first summer. Specially July, August and early September, to keep them growing in good condition.

The low-lying keys from Key West northeast to the mainland on Florida constitute the sole habitat and breeding ground for the handsome great white horn.

Many publications of wildlife can be obtained from the Superintendent of Documents, Washington, D. C. for five cents a copy.

### Ivan Jett Now On Agricultural Staff Of Ky. Chain Stores

Former Marketing Director Of Ky. Accepts Post With Chain Stores Council

Ivan Jett, director of marketing for the state of Kentucky for the past year, became agricultural counsel of the Kentucky Chain Stores Council July 1. It was announced today by Joe T. Lovett, executive director of the Mid-South Chain Stores Council. The organization, with headquarters at Murray, was established to coordinate the contribution of chain stores to the agricultural, civic and industrial advancement of Kentucky, Alabama, Mississippi and Tennessee.

Mr. Jett was born in Jackson, Kentucky, in 1911, moving to Madison County while a youngster. He attended Eastern State Teachers College and the University of Kentucky, from which he graduated with the degree of B. S. in Agricultural in 1931.

For nine years he was instructor in Vocational Agriculture at Stamping Ground High School, Scott County, prior to becoming director of marketing. The Future

Farmers of America chapter, of which he was advisor, won the National F. F. A. contest of 1937 and again in 1938, the only chapter in history to win this honor twice. Mr. Jett is widely known throughout Kentucky, particularly by the farmers and agricultural leaders with whom he has worked in establishing more orderly and effective marketing channels for farm products. He owns and operates a farm in Scott County.

### Clearfield News

E. E. Elam spent the Fourth of July with Mrs. Elam and the children in Clearfield. Mr. Elam has been employed at the DuPont Charlestown Powder Plant.

Polly Hamm and family have moved to Indiana.

Mr. and Mrs. George Jesse, of Cincinnati, Ohio, spent the night with E. E. Elam and family Thursday and were the dinner guests of Mr. and Mrs. Albert Patton on July 4. Mrs. Jesse is Mrs. E. E. Elam's niece.

Juanita Elam is spending a few days in Harlan this week with her son, Junior Huff.

Mrs. Taylor Hamilton, who has been ill for some time, is better at this writing.

### Public Invited To Hear Speakers At College Auditorium

Morehead State Teachers College extends an invitation to the public to hear outstanding speakers of the day, who will lecture in the College Auditorium at the convocation hours.

The following speakers are scheduled to make appearances on the following dates:

Theodor Brock, former Mayor of Narvik, Norway, will speak on the subject, "The Battle of Narvik," Friday, July 11 at seven-thirty p. m.

Dean L. A. Peckstein of the University of Cincinnati will speak on the subject, "Education Looks at Defense," Tuesday, July 12 at seven-thirty p. m.

Ralph C. Jenkins, President of Danbury State Teachers College, Danbury, Connecticut, will speak on the subject, "The Man Who Complimented Mann," on Wednesday evening, July 23rd, at seven-thirty p. m.

### Careless Waste Of Eggs Needed For Food Unnecessary

Methods For Preserving Life Of Eggs In Hot Weather Outlined

Losing two billion eggs annually through preventable spoilage is as serious as the sinking of a food ship, points out a statement from the Kentucky College of Agriculture and Home Economics. This figure is an estimate given with reference to the loss of the nation as a whole—virtually all resulting from careless handling.

must be increased by at least five percent as a national defense aid, every care should be taken to keep eggs fresh. One egg-packing plant recently reported to the United States Department of Agriculture that in a two-month period, its candlers had thrown away a thousand dollars worth of eggs.

Careful studies have shown that eggs are "good" when laid, but the germ in fertile eggs may start developing at any temperature above sixty-eight degrees. Infertile

eggs, for which cooling also is important, may be produced by getting rid of the roosters as soon as eggs for hatching are no longer needed.

As an egg when laid is at the body temperature of the hen—at least one hundred-four degrees—it should in warm weather be cooled almost at once. The recommended temperature for cooling both fertile and infertile eggs is between forty and fifty-five degrees.

# WELCOME TO

Bee's Old Reliable Shows  
Proctor Lot - - - Morehead, Ky.  
**Week Of July 21st**  
Sponsored by the Morehead Merchants Assn.

Letter From the Manager of Bee's Old Reliable Shows:

**THE MOREHEAD MERCHANTS CLUB MOREHEAD, KENTUCKY GENTLEMEN:**

We are happy to play your city the week of July 21st. Mr. Bee always had a soft spot in his heart for Morehead and in memory of Mr. Bee, we are going to put on one of the best shows we have ever had. There will not be less than thirty concessions and we plan to have the largest midway that has ever been presented in Morehead.

We want to express to you our thanks for your cooperation in helping us to make this a show that the people of Morehead and Rowan County will appreciate.

Yours very truly,  
**V. McLEMORE, Manager**  
Bee's Old Reliable Shows

**THIS WEEK IN DEFENSE**

President Roosevelt told his press conference he still hopes the United States can stay out of the world conflict. His statement was made in answer to a reporter's question if changing international situations caused the President to alter his belief, stated in 1939, that the United States could and would stay out of the war.

Navy Secretary Knox told his press conference reports that Navy vessels were engaged in convoy duty were "absolutely untrue," and that reports that the Navy had lost lives, material and equipment or had been involved in any encounter with belligerent craft were "most decidedly" not true.

OPM Director Knudsen issued a statement urging greater defense efforts and said "nothing could be further from the truth" than that Russia's entry into the war had averted danger to this country. Mr. Knudsen said "we are in somewhat better shape than we were last Summer but we need the spark of enthusiasm—yes, of patriotism—to carry the program forward faster."

Acting Secretary of State Welles announced Russian requests for buy strategic materials had been received and brought to the attention of the proper Government officials. Mr. Welles also said the United States had under consideration a plan to relax export restrictions on Russian commerce to permit the flow of war materials to that country. He also announced United States and North African French officials have arranged a plan calling for continuous movement of two ships carrying tin, sugar and other goods to Africa, and two carrying strategic materials to the United States.

President Roosevelt suspended duties on British Burma vessels reaching the United States to aid

the flow of supplies to China over the Burma Road. Treasury Secretary Morgenthau extended China's \$50,000,000 credit here for another year. Assistant Commerce Secretary Hinkley asked commercial airlines for twelve transport planes to meet "emergency" defense requirements of the demeritocracy.

In his bi-annual report to the Secretary of War, Army Chief of Staff Marshall urged that Congress pass legislation permitting use of armed forces outside the Western Hemisphere and permitting holding selectees National Guardsmen and Reserve Officers in the service for more than one year. General Marshall said that conditions have changed to such an extent that a "grave national emergency" exists of a more severe character than the public realizes.

The War Department announced it will promote its officers on the basis of merit instead of seniority and permit re-enlistment for Regular Army men only if they are public workers in order to weed out those not able to take advantage of further training.

The War Department awarded contracts totaling more than \$478,000,000 for planes, engines and parts. The OPM announced its aircraft specialist, Merrill Weigs will go to England to confer on production methods. General Arnold, Chief of the Army Air Forces, lowered requirements for pilots of heavy bombers so that fliers with 750 hours military air experience could man the ships to be built at the rate of five hundred a month. The Air forces also announced experimentation with glider training for its personnel.

More than 750,000 men who have reached twenty-one since Selective Service registration last October, registered for service this week throughout the nation. President Roosevelt ordered 800,000 men inducted into the Army as selectees now in service finish their year of training.

Pending final action by Congress on legislation deferring men who were twenty-eight on July 1 or

before, Selective Service Director Herber ordered temporary deferment of this age group. He also advised local boards to defer registrants with one or more dependents to whose support they make "any substantial contribution." The only exception to this, he said, would be men who married in the hope of evading service.

The War Department announced program of stage shows at Army camps throughout the country and said civilian contributions to soldiers' welfare will be coordinated by the Citizens Committee for the Army and Navy, Incorporated. Outstanding theatre men have made arrangements for the five road shows to visit camps, using equipment built on trucks, the Department said.

Congress passed legislation designed to prevent prosecution with a "reasonable" distance of military and naval reservation for construction of schools, water works, sewers, hospitals and other necessary public works in locally over-crowded by defense workers. Works Administrator Curmody established eleven regional offices to handle the program and select projects suggested by the communities and for which the OPM announced defense housing projects will be given priority to assure availability of necessary building materials. Defense Housing Coordinator Palmer issued a pamphlet explaining how defense housing needs are met.

OPM recommended building eight new aluminum plants, in Arkansas, the Booneville-Grand Coulee area, Upper New York State, Alabama, California and North Carolina to produce 600,000,000 additional pounds annually.

Price Administrator Henderson announced a series of conferences beginning the week of July 7 with representatives of makers of automobiles, refrigerators, washing machines, oil burners and steel necessary of essential raw materials to take care of public services essential to civilian welfare—such as transportation companies, telephone companies, farm equipment manufacturers, fire and police services, hospitals and schools—will be made as soon as amount of source materials needed are ascertained.

The United States Employment Service reported serious shortages of workers in thirteen shipbuilding, sixteen aircraft and twenty-six machine shop occupations such as ship fitter, template maker, boatbuilder, engineer, aircraft riveter, tool and die maker, and lathe operator.

The National Youth Administration announced allocation of \$4,040,000 to finance July operations of a new program to train 368,000 out-of-school youths for defense jobs in the next year. The program is operated in cooperation with United States Service and the United States office of Education and local public educational officials.

**THE GARDEN**  
(By JOHN S. GARDNER)

**TIMELY TOPICS**

Beets: Up to July 15, it is quite feasible to sow beets for storing, those grown in the early spring having become too tough to be toothsome. In good conditions, Detroit Dark Red is the sort to use, but anticipating dry weather, it is safer to use the early variety, Crosby's Egyptian. If a plank was laid atop the row, deep soil moisture will rise in sufficient amount for the seed to start.

Carrots: Unless consistent watering can be done, the likelihood is small that carrot seed can be made to sprout, sown so late, at least a satisfactory stand. A note for next year is to have all carrot seed sown by the end of May, and to use Chantenay, a variety that

The office of Education reported that 1,500,000 persons were trained for defense work by existing educational facilities in the past year.

The Assistant Coordinator of Commercial and Cultural Relations between the American Republics, speaking in Pennsylvania, said that in April Latin America sold \$101,000,000 worth of goods to the United States—a rate of trade sufficient to absorb the wartime loss to the other Americas of the continental European markets.

Agriculture Secretary Wickard, Associate Price Administrator Elliott and Paul McNutt, Coordinator of Health Activities, outlined a plan for community action to save for immediate or future use quantities of food ordinarily wasted.

The officials urged community leaders to check local fruit and vegetable surpluses, plan for distribution through school lunch and play programs to meet nutritional needs of small-income families, and make arrangements for preserving products not used in fresh form.

stays tender and sweet almost no matter how large it grows.

Endive: Somewhat out of the ordinary, endive could well be included in all gardens. Sown in July, a piquant salad may be had from September to frost. The seed should be sown thinly, and thinning should be done to eight inches. Two varieties are Broad-leaved Batawin and Green Curled, Chinese Cabbage: By mid-July, late cabbage chances can be evaluated, and if prospects appear slim, Chinese cabbage may be started. The seed should be sown three or four in a place, twelve inches apart, and the strongest plant left. It is ready in October, and last until "black" frost. It may be stored by resetting in boxes of earth in the cellar and watering just enough to keep in turgid. Pe Tsai is the most easily found variety.

Cultivation: Anticipating dry times that usually come, cultivation from now on should be thorough, but shallow, and the soil surface should be maintained level. There should be no hills and no ridges, and these expose too much surface to evaporation. Besides, in making ridges, soil is "borrowed" from the middles, to drop the moisture level sometimes below the root level of the vegetable roots.

**NOTICE OF ADMINISTRATOR**

Notice is hereby given to all persons owing the estate of Oscar L. Bohman, deceased, to pay the undersigned Administrator at once, and all persons having claims against said estate will present them to me for payment, duly verified as required by law.

This June 13th, 1941.

M. C. CROSLY  
Adm. for the Estate of Oscar L. Bohman, deceased.  
Morehead, Ky. —3t.

**FARM NEWS**

Such big crops of peaches, plums and apples are in prospect in Estill County that County Agent C. C. Shade is recommending thinning in order to improve the quality of fruit. Most orchard owners have sprayed.

I. J. Duff of Perry County is growing the fourth consecutive tobacco crop, following crimson clover. His crimson clover was considered one of the best green manure crops in the county this season.

Mrs. H. M. Wilson of Hancock county had a profit of \$217 in seven and a half months, when she sold her poultry flock this spring. She had an average of ninety-two hens a month. County Agent Baker Atterbury says green range increased her returns.

Allen county farmers estimated their Balbo rye pasture worth \$12.00 to \$25.00 per acre. Large amounts of rye seed were saved in the county, and big acreages will be sowed to vetch and rye for cover crops and pasture.

Thirty-two acres of coriander seed are being grown in Marion County. Distillery representatives visiting the fields reported them highly satisfactory.

The second annual campaign to rid Robertson county of old roosters sent seven hundred to market. Buyers continued to pay a premium of two cents a pound after the campaign, and it is thought a majority of the old roosters eventually were sold.

**Social Security Cards Not Proof Of Age, Warns Bohon**

Possession of a social security account card is not proof that a person is legal age to work in any State, it was said today by Elbert M. Bohon, manager of the Ashland

Kentucky, field office of the Social Security Board. Pointing out the danger of accepting these cards as such proof, he said:

"Recently our office has issued many thousands of social security account numbers to young folks who are planning to obtain their first jobs. The social security account card does not show the age of the carrier, nor is it in any sense proof that the person to whom it is issued is of legal working age in this state.

"Employers should be careful to see that the young men and women they hire are of legal working age for the type of job for which they are engaged. The fact that an applicant has a social security card is never to be taken as proof of age as these cards are issued to persons of all ages, if they are working in commerce or industry or except to obtain such employment.

"The application for an account number shows the age of the worker but this is confidential information and cannot be given to anyone."

Man about to become an owner of the electric company

WAIT a minute—this man is taking a medical examination, isn't he? That's right—and what's more he is passing it.

But what in the world does that have to do with owning an electric company?

It's this way: The man is applying for life insurance. And when he becomes a policy owner he will automatically become a part owner of some electric company. The same thing would be true if he were depositing money in a bank. For everyone who has a bank account or a life insurance policy is part owner of some electric company. How is that?

Because the money you put in the bank, or buy a life insurance policy with, is invested in various businesses, including electric companies.

This makes you one of the millions of people who have a personal stake in the electric companies—an extra "plus" benefit to you from a business operation which has not only steadily improved your electric service, but has also succeeded in reducing your electric rate about 50% in the past 10 to 15 years. And it is the aim of the people who have accomplished these things—the employees of your electric company—to keep on helping you own and share more of the benefits of electricity at less and less cost.

IT COSTS LESS TO LIVE BETTER ELECTRICALLY

### Low Tobacco Prices Force Ky. Farmers To Truck Farming

### State Commissioner Of Agriculture Urges More Consumption Of Ky. Products

Kentucky's new vegetable industry will be on trial this year. The low prices of tobacco, and other crops, have forced Kentucky farmers to obtain new forms of income, and Kentucky has a suitable soil and climate for the production of excellent fruits and vegetables.

Calloway County has produced early tomatoes and will market twenty-five car loads through the Calloway County Vegetable Growers Cooperative Association. Rowan County Vegetable Growers Cooperative Association are marketing sweet corn, early tomatoes and green beans. Graves County must dispose of its fifty thousand bushels of peaches and peaches grown in McCracken and Calloway Counties will add thousands more to this total.

Kentucky fresh fruits and vegetables will be superior to any fruit or vegetable from any other State because they are closer to market and, therefore, the grower can permit them to ripen before harvesting. Fruits and vegetables that are shipped long distances are picked green and they do not have the natural taste and flavor of the plant ripened products.

Ask your grocer for Kentucky fruits and vegetables. "Buy Kentucky Products for Kentucky Prosperity."

Commissioner of Agriculture, William H. May stated that this year Kentucky has one of the best growing crops in history and that every housewife should take advantage of this opportunity by canning large amounts of this delicious fruit.

The Marketing Division of the Kentucky Department of Agriculture is aiding the farmers throughout the State in selling their crops, but Kentuckians must buy them if Kentucky is to prosper.

### Cameras Allowed In Mammoth Cave 1st Time This Year

### Change In Cave Policy Allows Amateur Photographers To "Snap Away"

Amateur photographers who have hitherto had to leave cameras on the surface when they descended into Mammoth Cave will welcome a change which went into effect this week permitting the taking of pictures at designated places on each of the four scheduled cave trips.

In keeping with National Park Service policy which encourages

### Elwood Allen Is Enjoying Army Life At Camp Shelby

Private S. E. Allen, Jr., of Headquarters Battery 38th Battalion, 138th Field Artillery 38th Division, Camp Shelby, Mississippi, has been in school almost every day since he came to Camp Shelby. He is the son of Mr. and Mrs. Sam Allen, Sr. of Morehead, Kentucky, and lived in California for a number of years before entering the service in April of this year.

Going to school is routine work in the new army but Private Allen has been taking the advantage of the opportunities offered the soldiers now in active service. During the first few weeks, he studied survey and instruments in field work, then communication and cryptology and is now in the new Divisional Radio School after passing the regular army aptitude test this past week. Soldiers attending school must have field work half of the time and the 138th Field Artillery is noted for its excellent equipment and training equipment in fast trucks over rough terrain.

Schindler and Field work do not take all of Private Allen's time as he plays with the best of them in the recreational hall and has joined the staff of the camp newspaper which has over seventeen thousand readers. One of his new stories test this past week. The story, "Shelby broadcast from WHAS, Louisville, two weeks ago.

Points designated by the recent order are as follows: River Hall and Mammoth Dome on the Echo River Route; Oxeye and Dome and Frozen Niagara on the Frozen Niagara route; the Bridal Altar and Violet Cave on the Historical route; and Snowball Dining Room and Frozen Niagara on the all-day trip. All of these attractions except River Hall, Mammoth Dome and the Bridal Altar are electrically lighted. The other three points, shown under gas light or illuminated with fares thrown by the guides, will challenge the skill of the cameraman.

Bimwies has recommended the detailed information suggesting proper exposure, speed for camera shutters and the proper method of focusing. The camera to be photographed or relayed by the guides to help visitors get good pictures.

Approximately one-half of all accidents at highway-railroad grade crossings in 1940 took place in the four months period of October and January.

### Army Air Corps To Test Robot Trainer At Ground Schools

### "Aerotractor," If Successful, May Be Used At All Basic Training Schools

Fifteen Ohio, Indiana and West Virginia Aviation Cadets named today will be among the nation's first future Army pilots trained by "robot" instructors. It was disclosed at Fifth Corps Area Headquarters, Fort Hayes, Columbus, Ohio.

Officials said the fifteen would be enrolled in an experimental class for testing the "robot" or mechanical pre-flight trainers designed to speed up the Air Corps pilot program.

The experimental class will report July 6 at the Spartan School of Aeronautics, Tulsa, Oklahoma, two weeks ahead of the regular flight school which will join later.

Although a similar device, the "Aerotractor," is believed to be the first machine developed to meet the problems of instruction for beginners.

It was given preliminary tests at Randolph Field, Texas, with a class of twenty-four cadets, but the Tulsa experiments will be a regular primary training school. If the tests are successful, the device may be used at all primary schools. The machine, equipped with

standard control levers and instruments, is intended to orient beginners to actual flight conditions without their leaving the ground. The student "rides" either solo or with an instructor and by manipulating the controls produces the illusion and all the sensations of an actual airplane flight, even to wind, sound and visual effects, including a moving horizon.

The student's mistakes can be analyzed and corrected while the machine "spins," stalls, or executes other routine or emergency maneuvers. The records and performances of these "Aerotractor"-trained students will be followed closely during their future primary training and will be compared with those of flight-mates, as a guide to the extent to which Aerotractors may be adapted in training future Air Corps pilots.

### Driver's Licenses Must Be Procured In Home County

### Law To Be Strictly Enforced To Check Evasion Of Suspensions

Kentucky motorists must procure their operator's licenses in the county of their residence under a new law which will be greatly enforced for the first time this year. It was announced by the Department of Revenue. The present licenses began on August 1, during which county officials and motorists had little time to become acquainted with its provisions.

Another instrument which helps to safeguard the issuance of a license is a person whose right to drive has been suspended or revoked is a booklet containing approximately eighteen hundred names of persons whose licenses

### Demonstration Of Home Coming To Be Given July 14th

A canning demonstration will be held at the Courthouse on the afternoon of Monday, July 14. The demonstration will be given by Miss Clinnard, a representative of the Ball Canning Company. Miss Clinnard gave a demonstration in Morehead last November on canning of meats that was attended by a considerable group of Rowan County women, who received a lot of very valuable information on meat canning.

The demonstration is open to the public and should be well attended. Home canning of foods will play a very important part in National Defense. This demonstration will show how to can foods so they will keep and also can them to retain the maximum food value. More detailed plans of the meeting will be announced within a few days.

measures designed to keep persons whose licenses to drive had been suspended or revoked from procuring one, and since several licenses are required to process licenses in the Department of Revenue, the subterfuge was late in being discovered.

Reeves pointed out that the Department withheld rigid enforcement before the licensing period last year because of the short time between the effective date of the law and the licensing period which began on August 1, during which county officials and motorists had little time to become acquainted with its provisions.

### NOTICE OF APPLICATION FOR LICENSE TO SELL BEER

This is to notify all persons that the undersigned has filed his application in the Rowan County Court Clerk's office for a license or permission to sell beer at retail, at a building located about one half mile west of Morehead on Route No. 68 at the intersection and corner of the Clearfield Road.

Respectfully,  
HARLAN ACRE

have been taken away. It is issued at six weeks intervals and sent to county officials and law enforcement officers for their review. The period about 25,000 more licenses have been issued so far this year than were issued during the entire 1939-40 year.

Triplett announced that circuit court clerks would start issuing licenses on July 1, and urged motorists to procure them early in order to avoid the last minute rush.

Farmers in Grayson County used 2,400 pounds of Tennessee Valley Authority fertilizer on gardens.

Two-thirds of the accidents at highway-railroad grade crossings in 1940 took place when weather conditions were described as "clear."

New England's early prosperity, the origin of the capital invested in her factories and industries today, is based on the cod fishery.

J. G. Stamper of Letcher County has more than five hundred jars of home-canned products left over from last year.

## Flip Washday OUT OF YOUR LIFE!

You Can With A **BENDIX** Automatic HOME LAUNDRY

A sure of the Bendix control dial stop a Bendix—and "washday" is done! Automatically your clothes are washed, rinsed and damp-dried ready for the line. Bendix "tumble-washing" principle removes all dirt gently. Clothes last longer. Laundering becomes a pleasant household task—quickly, easily finished, with no strain on your energy!

FROM CLOTHES-BIN TO CLOTHES-PIN YOUR HANDS NEVER TOUCH WATER! No more lifting heavy soggy clothes—no more bending over scrubbing and soaking hands in water! Your clothes are clean and sanitary—automatically washed without your even being present! The dial does all the work!

WASHES—RINSES—DAMP-DRIES All Automatically!

Clothes are lifted and dropped through soaps, scrubbed gently by this "tumble" action—then gently scrubbed as they move about in the cylinder—then rinsed three separate times in fresh, clean water.

THERE'S A BENDIX FOR EVERY BUDGET

You can buy a Bendix for the price of a good ordinary washer. Ask about our Free Trial!

Your Old Washer MAY MORE THAN COVER THE DOWN PAYMENT!
