**"WELL, I ALWAYS STAY AT THE BROWN"**

The first guest ever to register at The Brown Hotel in Louisville was England's great ex-Premier, Mr. Lloyd George. From that day to this, The Brown has been Louisville's favorite hotel for busy men who want the comforts of home when they travel.

What's the reason for this preference? We can try to tell you but, it's hard to put into words. Here at The Brown, we don't regard our patrons as some kind of "freight in transit". The men and women who stop here are our guests—nice, friendly people who, like ourselves, simply want to be treated courteously, and made comfortable while they're away from home. So that's what we try to do for them, and they like it!

That sounds almost too easy, doesn't it? But, believe us, lots of people say it's practically unique! Next time you're in Louisville, see if you don't agree. We hope you'll give us a trial.

that they should love him.  
"Mr. Ramey, as a member of the Board of Regents, served Morehead State Teachers College devotedly and well from the date of his appointment in April, 1940, to his untimely death on January 14, 1942.

This service was no ordinary one, but service envisioned by a purpose which consecrated his very best to the present and future growth of this college and the service which he rendered at all times with an inspiring enthusiasm and unlimited energy. Mr. Ramey not only showed his loyalty and his love to the college through his untiring work as a member of the Board of Regents but evidenced further proof of his loyalty and support by sending deserving students to the college at his own expense. In the passing of Mr. Ramey, the president, the Board of Regents and the entire college have suffered a great and an acutely felt loss.

"The president and the Board of Regents of Morehead State Teachers College express their deep sympathy to Mrs. Ramey and each member of his family.

"President Vaughan is hereby designated to send a copy of this Resolution to Mr. Ramey's family, also the press of this section of Kentucky, and it is ordered that this resolution be spread upon the Minute Book of the Board of Regents of Morehead State Teachers College."

WBP is recommending construction of 350,000 defense housing units to the National Housing Agency. This more than doubles the defense home program of last September. Home owners and prospective builder landlords must comply with regulations to obtain the high preference rating for the materials. Among other things, they must keep the same rent for one year, charge no more than \$30.00 a month rent, and sell the house for no more than \$6,000.

**BOOK NOTES**

By STITH M. CAIN  
Assistant Librarian, M.S.T.C.

New Books On Music Acquired By Our College Library Recently  
Some of the new books recently acquired by our college library in the field of music will be discussed in this week's article. They are as follows:

1. Buck, Percy C. (The Scope of Music). Oxford Publishing Company, 2nd edition.
- It is an attractively and humanly written study of the general background of music, rather than of any one particular branch of the art. For the teacher and student it provides material for immediate use as well as for permanent consideration. For the ordinary reader it offers a summary of the whole range of music, from its purely scientific aspect to its relations with human psychology.
2. Taylor, Deems. (The Well-Tempered Listener). Simon and Schuster, Publishing Company.

\$2.50.  
Deems Taylor treats music as a living source of enjoyment and has the rare ability to project his personality through the printed page as never the microphone.

The book is divided into three sections: The Makers, The Givers and the Hearers. In the first section, which deals with composers, Mr. Taylor allows himself some provocative conjectures on what part careers Bach, Beethoven, and their fellows would have were they living today. The section answers many questions about the performance of music. In the third section of the book, dealing with the listeners, Mr. Taylor offers comfort to the perplexed millions who wonder if they are musical literates because they can't guess that a certain piece of program music represents an evening round-up of cattle.

avoid a brush with him. Once I narrowly escaped with my life when approaching an apparently all clear corner in a Deluxe (foolish of me) only to find him peering through a Sizeable Knot Hole that had the vicinity

well covered. Then there was my old friend Percy Fleetwood, the best friend I ever had through a wayward chap. Poor Percy! Percy was never seen nor heard from since he ducked in a manhole when run down by a white-vested Drug Store Emasculator in Topeka, N. J. The blood-thirsty pursuer went right in at-

ter him. It is believed he was overtaken and devoured in an underground passage through which Percy sought to escape. But Percy had only himself to blame, good pal that he was, for we had all warned him of the risks he had been taking. If he had listened to us and tonicked himself up with some good old Home-made blood and iron with maybe a little Hickory, instead of risking his life as he did—why, he could have given that Trouble Maker a real chase. And he would be here today proclaiming the Remarkable Virtues of the Home Grown Herbs.

You can just class me for a coward...None of your patent medicines for me. No I'm a family man. I like home things and the security that goes with it. "Home is my castle." A nice cold toddy with a sprig of mint from the family mint (or vines whichever you happen to have). If I crave a little adventure I just take the family bull dog out for a little stroll to smell the flowers.

Then again if you feel all run down and notice your bile turning a little sour, why, that is just what you're looking for, make a little brew and live up the home life. There is always a different brew to go with the different temperaments a man has from day to day. Like in the afternoon you may notice you have a touch of rising gas or falling hair or undulating pancreas with a tendency to drift sideways when out walking. Fine! A warm foot glow will pass over you with a few well iced sips of elixir of henlock or belladonna (taken

hot), as you prefer. So far as I care you Bull Fight-ers and Steel Helmeted Plugs can doze yourselves at the apothecary shops and be satisfied with what you get. I'm a little retiring and I guess I'll take a nice toddy and tuck myself in bed.

N. B.: I want to state that this column is devoted to good wholesome fun, or an attempt at such, and if in the past anyone has been piqued I sincerely regret it, and I shall do my utmost hereafter not to give displeasure to anyone.

We know that if the public is asked to defer to military needs they'll do it gladly, as a contribution to America's victory. Chessie's railroad has a big job on its hands. Our rails are humming 24 hours a day... with trains hauling raw materials to war industries in The Chessie

Corridor... with trains taking war goods to ports and camps and supply depots... transporting troops—and always trying to keep commercial shipping and regular passenger service up to Chesapeake and Ohio's high standards.

So, if your shipment is a bit late, or your passenger train waits a few minutes for troops and war materials... just say to yourself, "These bring us a few minutes closer to final VICTORY."

**AIR-MAIL FOR ADOLF!**

When that special delivery bomb drops on Berlin, it will probably be marked "Made in U.S.A." No other country can compare with America's war production, now that we're really rolling. No other has the men, the machines—or the electric power. It takes a tremendous lot of power to turn the wheels that turn out tanks, planes and ships for all the United Nations—but America is power-full.

You can thank the men and management of America's electric companies for that.

They looked and planned ahead. They were really ready when war came—with more electric power than Germany, Japan and Italy combined. They were able to meet sudden military and industrial demands all over the map.

Here is a business built the American way—by local enterprise and individual investment—dedicated to defending the American way until the last bit of air-mail has been delivered to the last dictator!

Our own electric power stations and transmission lines now supply more than one million kilowatt-hours every day (over 30,000,000 kilowatt-hours a month) to make planes, guns, tanks and other weapons to whip the Japs and Nazis.
