BIBLE STUDY

Written By Rev. B. H. Kaeze

The writer greets the friends of this column again after a vacation during which he has found rest and help. He hopes to find even greater interest in the discussions this year, and would appreciate more questions or suggestions for discussion.

He has written and published a twenty page tract on the subject, "The Bible, the Judgment, and you." It is neatly put up, with a beautiful drawing on the front cover and with all scripture passages printed in large, legible letters. There is a limited number for free distribution, and one copy will be mailed free of charge to any person sending in a question or subject for discussion. If you send in a question which cannot be properly discussed in this column, you will receive a copy of the tract any way. Please send your requests in early as the supply is limited. It may be that you do not have a question or subject. If not, send in a request for the tract any way, and when those who submit questions have been supplied, you too may have one free of charge.

I shall use the rest of this space telling you of impressions I have had from the summer's vacation. I was not merely playing around all the time. I preached here and there, attended a number of associations of varying groups, and talked with many preachers and church people.

My observations lead me to feel that this is more an age of the day of Satan. My own feel-

ings is that we are rapidly nearing the coming of our Lord, and that Satan, knowing this is imminent, is turning loose upon the earth his mightiest forces, and is going all he can to defeat God in the rescue of lost souls. I do not set dates for the coming of the Lord, but I go believe the fig tree is putting forth her leaves. World conditions agree with this.

There is iniquity of every kind going on, with the moral conscience of people so weakened as to make them refuse to fight these conditions. It is a day when every one is willing to let others go their way in sin, provided they themselves can be let alone in their own sins. Selfishness triumphs, and any who would speak out against the wicked activities of Satan immediately became the victim of Satanic attack. There is meager victory in the personal living of Christian people. The spirit of resistance against our prayers, against our appeals, the wall of coldness and hardness that arises against the preaching of the Word of God, and the unconcern of lost people who refuse to believe the Word of God, all combine to bring a mighty front of Satan that is mighty.

Of course, God is mighty. But God tells us that the day is coming when Satan will have his day, and that the church will become a remnant. Today it looks as though this is coming to pass. Still, I am unconquered in the fight. God has triumphed, and those who follow will triumph with Him. In these dark days let the people of God stand and withstand.

With The Schools

THREE LICK SCHOOL NEWS

On Sept. 5, the Three Lick P. T. A. sponsored a trip for the pupils to the new state capital at Frankfort. There were 27 people in the group and an enjoyable and educational day was spent in visiting the House, Senate, Court of Appeals, Reception Room, and the Governor's Mansion. The group also visited the Museum in the Old State House, and the pupils became very interested in the stuffed birds and animals as well as the colonial relics and antiques there.

The pupils are still working on their nature projects and are very enthused because a little when his bull object in a flower pot in the school room and is now busy each day feeding her young.

A pie supper in August brought the school over eleven dollars in spite of a rain which occurred that night and an ice cream and candy supper is to be held September 20, to raise funds to build a cement form over the school spring.

Rev. Leeper is visiting the school and all are interested in his Bible Program.

WORKING FOR FAIR

All schools are now working on the Fair Rings. Some schools are hoping to enter an exhibit under each ring. Ever school is planning a banner and many are planning floats. It is the opinion of the school officials that the year's parade will be the most colorful and the biggest of any in the history of the Rowan County Board of Education. The teachers are to be

congratulated in the interest shown in this year's Fair.

The checks are now ready for the rural teachers for the second month of teaching.

The attendance officer has visited every school in the county this year and has found conditions as a whole very good. Superintendent Corneette has visited approximately one-third of the schools and will make an effort to visit all of them during the year.

School officials hope that as many schools as possible will have a float in the parade at the Fair. The parade is the most colorful part of the Fair and the floats help to make it colorful, interesting and complete. All schools are expected to have a banner.

Many improvements are being made on the rural school buildings, such as covering buildings, cleaning walls, painting roofs, putting in window glass, furnishing stoves, painting inside of the school rooms, etc. Every effort is being made by the Superintendent and Board to make the children and teachers as comfortable as possible.

The Principals of the four consolidated schools report that the Bus Schedule is being worked out satisfactorily and that the buses are being used to the best advantage. The transportation facilities furnished by the Rowan County Board of Education are being well used.

FINANCIAL OPPORTUNITIES

Between 20 and 27 years old who are normally physical and who can pass an educational examination through the United States Army's Flying Cadet program. Candidates who have completed two years or more of college work are exempt from the day by a survey of earnings of college graduates.

The survey, based on data supplied by the Department of Interior's office of education, revealed:

1. That Flying Cadets while in training receive in pay and allowances practically the same salary paid the average male college graduate in his first year out of school.
2. That graduate cadets, commissioned Second Lieutenants in the Army Air Corps Reserve and accepting active flying duty, draw a beginning salary more than twice as large as that of a typical college alumnus in his first year in the business world.
3. That cadets who continue Army flying for more than three years are paid a salary 37.5 percent greater annually than that drawn by the average college graduate after eight years.

A further breakdown of survey statistics disclosed that graduate cadets on active flying duty receive \$2,949 annually—or almost \$60 weekly—as compared with \$1,314 for the typical college graduate beginner. Promoted to First Lieutenants after three years, the graduate Cadets draw \$1,089 annually, as compared with the average college graduate of eight years' experience who gets \$2,383.

The survey also showed that additional opportunity is afforded Flying Cadets who are more interested in the long-range view of future success in private business than in immediate financial advancement. In addition to flying instruction, Cadets have ample chance to specialize in allied subjects, including air navigation, engineering and radio. These, the survey indicated, are the best paid occupations for college men.

The Flying Cadet scholarships are available to any unmarried citizen of the United States between 20 and 27 years old who are normally physical and who can pass an educational examination through the United States Army's Flying Cadet program.

ing and encouraging the formation of cooperative marketing organizations. There are many fruit trees set in the spring. Apple trees should be set 35 to 40 feet apart; peaches and plums, 20 to 25 feet, and cherries and pears, 25 to 30 feet.

Ordinary writing ink which children get on their clothes at school can be removed with lemon juice and salt. Keep the spot moistened until the stain disappears, and then rinse well. Water alone will remove spots made by sugar, gum, milk paste and eggs.

Kitchen shelves only wide enough to accommodate one row of dishes equipment or supplies make it easy to find articles without unstacking pieces or reaching over others. Place them as close together as materials on them will permit.

Additional information concerning application for Flying Cadet scholarships may be obtained at any Army recruiting office.

At the last session of the Kentucky Legislature a Division of Markets was created in the State Department of Agriculture.

At the end of the course he is in mind of helping the Kentucky farmers market their products more effectively. Before the enactment of this law there was no agency in the entire State that could actively and aggressively attack this problem with the interest of the farmers in mind.

It is not the idea of this Division to tell the farmers how to market their products or how to grade them, but to consult with them and render whatever assistance possible. A great deal of its time will be spent in promoting and encouraging the formation of cooperative marketing organizations.

Lemon Juice Recipe Checks Rheumatic Pain Quickly

If you suffer from rheumatic arthritis or neuritis pain try this simple, inexpensive remedy. Get a package of R-U-E Compound today. Mix it with a quart of water, add the juice of 4 lemons. It's easy. No trouble at all and pleasant. You get only 2 tablespoons two times a day. Often within 48 hours—sometimes overnight—stiff joints are loosened. If the pain does not quickly lessen if you do not feel better, R-U-E will cost you nothing to try as it is sold by every drug store under an absolute money-back guarantee. R-U-E Compound is for sale and recommended by BATTSON'S DRUG STORE

Women's "Build-Up"

Women's headaches, nervousness, cramp-like pain may be symptoms of functional dysmenorrhea due to malnutrition, so often relieved by CARDUI. CARDUI is a mild but effective dietetic food which helps to build physical resistance. Another way you may find CARDUI helpful in reducing periodic distress. Take it a few days before and during "the time." Used for 50 years.

Spent Week-End In Lexington
Misses Roberta Btshop and Nola Jayne were weekend guests in Lexington, visiting with Miss Leora Hogge.

Are Lexington Visitors
Mr. and Mrs. F. P. Blair and Elizabeth and Katherine Blair spent Friday in Lexington.

Spent Sunday In Lexington
Mr. and Mrs. Claude Brown and Mr. and Mrs. Noah Hall spent Sunday in Lexington with guests of Mr. and Mrs. Festus Hall.

caused by such a fire reaches out to distant cities, touching other factories, other businesses, other workers and their families. Commercial history shows that many of the business institutions suffering serious loss by fire are unable to survive. They can't come back.

Big fires such as this hypothetical case are not so rare as you might think. During the first five months of this year alone there were 53 fires causing damage of \$200,000 or more each. One of them took a toll of \$1,000,000 and another of \$700,000. And such tragedies will be repeated again and again before the year ends, if past precedents hold.

This year the cause of fire prevention, always vital, is of even more direct importance to all of us—to everyone with a job, everyone with an investment, everyone who wants to ward off a family. See our defense program go forward as National Fire Prevention Week, which is being nationally observed from October 6 to 12, are carried on in the interest of every family. Enlist today in the battle against fire. And enlist for the duration of hostilities.

The RECORD SPEAKS
During July, sales of life insurance showed the remarkable increase of 22 per cent over the same month last year.

There's no ray of proving what caused this increased demand for the ordinary citizen's Number 1 agency of protection and investment. But a good guess is that today's unsettled world and domestic conditions were an important factor. No one knows what next month, much less next year, will bring. And when that is true, it is natural and logical for us to turn to life insurance as a haven for savings.

That doesn't mean that life insurance is impervious to any kind of economic or social upheaval. But it does mean that life insurance has a far better chance of coming through safely than any other investment open to the average man and woman. Orders are cancelled. An so the local depression disasse.

It may be necessary to feed bees in the fall, so they can go into the winter in good condition. The feed usually consists of equal parts of sugar and water by measurement. Using honey from another hive may spread disease.

THE RISING TIDE OF FIRE WASTE

The rising tide of fire waste, writes W. E. Mallalieu of the National Board of Fire Underwriters, threatens national defense. During the early months of this year, fire loss was substantially higher than it was for the same period last year or the year before. And that is taking place at a time when America's intricate industrial machine must be geared to maximum efficiency and maximum production in turning the defense program blueprints into actual tanks and airplanes and warships and guns.

On top of that, even disregarding the defense factor, fire is the arch enemy of the public welfare. Mr. Mallalieu cites a hypothetical case in which a great factory is destroyed. Men are thrown out of jobs, and are no longer able to pay their bills. Local merchants, professional men and landlords suffer. Taxes go unpaid. Orders are cancelled. An so the local depression disasse.

More Power, per Gallon

and more miles

WHEN BETTER AUTOMOBILES ARE BUILT BUICK WILL BUILD THEM

YOU'LL like the size of this trim new Buick SPECIAL for '41—its room, its softer ride, its Permi-firm steering, its fresh smart style and all that.

But what you'll go for is what happens under that broad bonnet—the thrill and the thrill you get from that husky, big, 115-hp. Buick FIREBALL Eight.

For in each flame-packed cylinder of that silk-smooth power plant a flaring ball of fire is set off with each spark-leap.

Packed to higher compression than ever before, fuel gives up more power and more mileage—power when you need it, economy throughout the whole driving range.

Indeed, so great is the power at your command that at 30 you use only one-eighth of the energy at your disposal.

All the rest is there waiting for pick-up, hill-climb and sudden getaway.

Even at 50 you use less than one-quarter of your available power, and at 75 still have nearly a half "on call" for emergency use.

More than that, to this engine you can likewise add Compound Carburetion—and step up both power output and your mileage. At 30 you'll get nearly one and one-half more miles per gallon, at 50 almost two, and at 70 an extra mile and one-fifth.

But that's just one side of the story—the facts side. Only one thing will give you the stirring feel of Buick's thrill-packed behavior on the road.

That's a demonstration—and it's yours for the asking. When will you be in to ask for it?

"Best Buick Yet"

According to the Encyclopedia Britannica, a super motor which travels with a series of explosions like the shock waves of a great projectile is called a "FIREBALL."

Highlights Club Have Sight-Seeing Trip

The nineteen members of the "Higtown Highlights" Club and six guests spent a full day last Sunday on a sight seeing tour. The first point of interest was Sky Bridge, where lunch was eaten. The next stop was Pine Lodge. Several of the group climbed to the top of the high-est look-out tower of the cumber-land National Forest, on the summit of Slide Hill. They stop-ped at a picturesque spot farther down the hill. The whole group "took in" the Natural Bridge and the surrounding park. Supper was eaten just out of Mt. Sterling and they all attend-ed a show in Morehead. Then home—to rubbing alcohol and a soft bed! Each and everyone had an enjoyable time, and arrived home tired, but happy. At the next meeting this Fri-day night, further plans are to be made for raising funds to wire the Elliottville High School. Our aim is to do all that is pos-

sible to get the building wired and lighted. We need your co-operation in doing this.

Battsons To Open

(Continued From Page One) four pages of special advertising carried in today's issue of the

Rowan County News.

The new interior of Battson's Drug Store was furnished by some of these advertisers, while others serve Battson's with drugs, toiletries and the stock with which they serve you. Still others are local merchants, interested in promoting any movement, whether private or public that tends to aid in build-ing up a better community, and indirectly for every individual in the community.

By hard work and strict at-tention to business, Battson's have during the long period they have been in Morehead, built up a steady and extensive patron-age. They have become known during that period for their high class service and their de-pendability.

"Doc" and Mrs. Battson and the entire force of the Battson's Drug Store, invite you to visit the store during the two days of the reopening. And we wish to add, that only by visiting the store can you actually realize the vast improvement that has been made in one of Morehead's leading business places.

Eagles Play Marshall

(Continued From Page One) Marshall schedule a good tough battle.

About the game, The Eagles got off to a jittery start, not to be unexpected in view of the circumstances. They had had special mention, Ruskinas at but two real scrimmages and were naturally excited as the under-dogs are apt to be. A costly fumble on their own 19

yard line, netted the first Mar-shall touchdown shortly after the game began. The second came on the run back of a punt. The Eagles then settled down after two costly breaks, but it was too late to do much more. In the third quarter they opened up and drove over the goal line for their six markers. In view of the fact that the fans both from Huntington, Ashland, and Morehead are all apparently agreed that the Eag-les outplayed Marshall, the statistics of the game are inter-esting. Here they are.

First downs: Morehead, 13. Marshall 6.

Yards gained rushing: More-head 180, Marshall 95.

Unfortunately they don't pay off on yardage, and for that reason the Eagles failed to win. Coach Johnson, while he wanted to win, is not dissatis-fied with his team. He feels that they have been tried and have proven that they have the stuff of which real football teams are made. The game last Saturday was a try-out, not only for Mar-shall but for the Eagles, and in morale, at least the Eagles did not come off second best. They proved that they could take it and that they could push it out.

The back field in particular drew the attention of the sports writers from Huntington and Ashland. Varnelis and Lastic and Walker all receive special mention. Ruskinas at guard showed especially well. However in mentioning names, we are apt to do an injustice to the other players, as apparently

the entire squad did themselves full justice, with their brilliant showing.

The Eagles lay off this week, meeting Murray at Ashland in a night game on Saturday of next week. One sad piece of news for the Eagles was the fact that Aster Collins' revived notice to report to the army. Collins, who was one of the regular ends on the varsity had taken the avia-tion examination early this sum-mer, but did not expect to be called until after the close of the semester.

He left Monday to report for duty. Johnson is experimenting to determine the best combina-tion to take his place. It is prob-ably that Paul Adams will be taken from his regular assign-ment at center and converted into an end.

PIE SUPPER

There will be a pie supper at the Holy School Saturday night, September 28, at 7:00 p. m. Everyone is invited to come and bring a pie and join in the fun.

Meeting At Perkins

(Continued From Page One) ed on Alfalfa. The potash pro-cessing plant to be very beneficial. Mr. Perkins will use Potash on all Alfalfa seedlings in the future, and as a result of this demon-stration. A demonstration on Seriseca was visited by the farmers, who expressed considerable interest in this Lespedeza plant.

Announcing the big NEW FORD 1941 FORD
In some years, some cars take a big jump ahead. The Ford does that for 1941.
It has jumped ahead in size. It's the biggest Ford we've ever built, inside and out. It's wider. It has a longer wheelbase. Its seating room is wider by as much as 7 inches. It has new wide doors and semi-concealed running boards.
You'll notice also a new beauty, achieved by a skillful blending of mass with longer flowing lines. Larger windshield and windows give better vision all around.
One of its biggest advantages is the new soft ride.
New, slower-action springs give a slow, gentle, gliding movement. A newly designed stabilizer helps absorb road shocks, and maintains balance on sharp curves and in cross winds.
More rapid acceleration to match its familiar speed and power makes this new Ford an even livelier car to drive.
These are only a few of this new car's outstanding features. It represents all the rich experience gained in building more than 28 million motor cars.
Any Ford dealer can give you many good reasons for making this your 1941 car.
Get the Facts and You'll Get a Ford!
