## Mrs. E Hogge Issues Ringing Challenge

Once again the battle of the oldest subscriber wages, at this time both Mr. J. T. Evans and Mr. Howard Turner will be obliged to be polite. For the latest contestant to enter the war is a lady, and with the evidence she is able to present, we believe that she is entitled to the record as established up to date.

The lady is Mrs. E. Hogge, and her evidence is undisputable. She has facts and figures and clippings that far out date and outdo any previous claims. Mrs. Hogge remembers the Midget, a small paper published by the Pavers, now a jeweler in Ashland, which while not a forerunner of the News, anti-dated the Morehead Advance which was, by several years. Before the Advance was established by William Schooler with whom Mrs. Hogge was well acquainted, she and her husband the late E. Hogge had subscribed for the Mountain Scorch, which was the forerunner of the Advance. According to Mrs. Hogge, the record shows that the forerunners of the Rowan County News were the Mountain Scorch, the Morehead Advance, the Morehead Mountaineer and the Rowan County News. She is certain

Mr. Bates has made an unusually satisfactory record during his service in Washington, and he is making his race for Congress strictly on that record. He is heartily in sympathy with the efforts of the administration to bring the British to the extent with all the ships, material.

There will be another exhibit this year and prizes will be given to the child receiving the most creative drawings and also to the room having the best creative unit. ## BIBLE STUDY

By Rev. B. H. Kazee  
Pastor Baptist Church

Question: How do we know the Bible is true?  
Answer: This does seem to be a question not asked by many rural people, but of course there are those who doubt the truth and accuracy of God's Word. I cannot go into much detail on any of these points in this space but I can set forth the general proofs.

1. It has stood the weeks of time. No book could have stood the criticism it has had and still remain the dominant book in the world unless it was of divine origin. Every generation, with its best brains, has tried to destroy the Bible. Thomas Paine wrote that was thought to be a famous book called "The Age of Reason". When he launched that book he said "in one hundred years you will not be able to find a volume of the Bible." He thought his book would put the Bible out of existence. That was about one hundred and fifty years ago. Today the Bible is a minister friend of mine searched all of Louisville for a copy of "The Age of Reason" and was able to find only one copy in that city. No body now knows what about the book, but the Bible sells more and more copies every year. The Bible has withstood all criticism through all its life in the earth.

2. Everything that the Bible predicts comes true with amazing accuracy. That has been true from the beginning. The prophecies of old told when certain cities or countries would be destroyed, and these prophecies have been fulfilled with astonishing accuracy. Whatever the Bible has predicted has fallen upon the world exactly as the Bible said it would. Other prophecies and prophecies are rapid ly being fulfilled right now. The Old Testament is a monumental record of prophecy and its fulfillment, and in many cases the exact time was prophesied and the event took place at that time.

3. There are many other ways in which this one especially is true. We can know the truth of the Bible by testing its message in our hearts. It is the only book in the world that can give us the answer to our hearts' longings. Of course we cannot know this proof without applying the message of the Bible to our hearts. "Taste and see that the Lord is good" is the invitation of the Bible. If there were a spring of water near you that could heal diseases, the fact that you failed to drink of it and thus failed to be healed, is no proof that the water was not healing. That was claimed for it. To drink of it would be to know. Thus, the Bible sends forth a message to men's hearts, with the claim that it can give the longing of the heart and satisfy the soul. That claim can be known only to those who will taste and see.

The fact that men who have never tried it stand off and say it is not so, does not prove the weakness and falsity of the Bible. It must be tested by experience. And those of us who have tasted the good Word of God know, and will testify before the world, that it has brought us a blessing no other book can bring. Thus we can know.

## SCHOOL NEWS

LITTLE PERRY SCHOOL

We held a PTA and affair meeting at the school. Mrs. M. F. Fraley, president presided and Mabel Alfrey gave a lengthy discussion on Parent Teacher work, also discussed the various phases of the Fair.

Refreshments were served during the pleasant afternoon. The school made \$7 dollars at the pie supper. Mrs. Chester Reeder, won the cake for the prettiest girl and Virgil Sparks won the prize for ugliest man. Dan Parker sold the pie.

The money is being used to pay the PTA dues and to take the children a trip to some historical place. Also to purchase supplies and equipment for the school.

## Social Security May Be Paid In Lump Sum

Authorities Set Fourth Times When Such Payments Are To Be Made

Lump-sum payments are made in certain cases to survivors of workers who are covered by the Social Security Act. These payments are made in cases where an insured worker is not surviving, or in the case of a widow with children under 18 in their care, or children under 18, or in certain cases to aged, dependent parents. If there is no such survivor in any of the above groups the lump sum payment may be made to the executor or administrator of the estate of the deceased worker. Reimbursement for burial expenses is paid by the executor or administrator. Where burial expenses are paid, the claimant is not to be supported by a homestead statement properly accepted by the funeral director. This statement should show total charge and the amount and date of payments, also by whom made.

Social Security Board field office will aid claimants in preparing these claims and will give information regarding proof which is required. Mr. James A. Chaney is manager of the Asheville branch office, which is in the Second National Bank Building.

**Financial Statement Of Fair Published**  
Money Received from the Merchants Club, Concessions, and the Amateur and Advertisers, amounted to \$688.10. Amount paid out for prizes, publicity, labor, materials and \$50.00 note left from the last Fair. \$578.05.

### Leading Non-Fiction Books

Today we are going to discuss the Non-fiction books that are being read and talked about so considerably in our country. They are as follows:

1. Brush, Katherine. "THIS IS ON ME". Farrar and Rinehart Publishing Company. \$2.75  
"THIS IS ON ME" is one of the most entertaining books in many a year. It is the autobiographical narrative of the author or of such feature novels as YOUNG MAN OF MANHATTEN and is written and illustrated in the most sprightly fashion. Every one in a while, too, Katherine Brush drops in a short story, paragraphs from one of her novels, or extracts from her diary or letters, to illustrate something that happened to her, a stage in the development of her writing, or just for variety's sake.

2. Gilbert, George B. "FORTY YEARS A COUNTRY PREACHER". Harper and Brothers Publishing Company. \$2.75  
"FORTY YEARS A COUNTRY PREACHER" is the homespun career filled with sermons, anecdotes, and a nationwide search by Harper and B. THE CHRISTIAN HERALD, as best typifying the "Country Preacher". It contains some good instructions.

3. Johnson, Osa "MARRIED ADVENTURE". Lippincott Publishing Company. \$3.50. The lives of Martin and Osa Johnson who for twenty years, faced life and adventure in dangerous jungles in all parts of the world.

"MARRIED ADVENTURE" is a richly illustrated with photographs and was the Book of the Month Club selection for June, 1940. De luxe, signed edition costs \$10.00. A copy of this book is on the rental shelf of the college library.

## Rangers Inspect Cumberland National Forest

Land Purchases In Forests Act Curtailed By Lack Of Appropriations

H. L. Borden, Supervisor of the Cumberland National Forest, left today with I. T. Yarnall, Assistant Regional Forester from Washington, D. C. and R. E. McAvoy, Director of the Appalachian Forest Experiment Station, with Headquarters at Asheville, North Carolina, for a routine inspection trip of the National Forest.

Visits will be made to each of the four District Ranger headquarters, after which the inspectors will be in Winchester and vicinity for approximately one week.

Mr. Yarnall, who is in charge of the land purchase program for the Forest Service in this Region, stated that the Cumberland National Forest is the newest of all National Forests in his Region, and that the Forest Service is anxious to continue the land purchase program but has been obliged to curtail this activity very materially this year because of reduction in appropriations for land acquisition. No change, however, is contemplated in any of the other regular Forest activities.

Gardens on land that does not wash may be plowed in late fall and manure applied. Rains and snows and freezeings and thaws then start the manure breaking down and it becomes of immediate value in supplying humus, which most gardens need.

Announce For Board Of Education Member

TO THE VOTERS OF SCHOOL DISTRICT NUMBER TWO:

I take this method of announcing to the voters of Farmers 2, Farmers 11, McKenzie 13 and Peary 3, Precincts, that I am a candidate for election to the office of Member of the Rowan County Board of Education at the November election. I am making this announcement after considerable study of the present situation, and with the belief that I can serve the people of my district and of the county as a whole by making this race.

At this time I wish only to say that I am opposed unalterably by the present administration in the conduct of the school of the county board to finance, by the system of Rowan County. I am opposed to the methods of force employed by the administration on the teachers of the county,

in obligating the teachers to contribute money to finance the campaign for Members of the Board of Education, in order to hold their positions as teachers in the county school system. If I am elected, I pledge them that I will oppose any system that requires them to put up a part of their earnings in order to obtain a teaching position or to hold a job.

I am in favor of the establishment of a four year high school in Farmers, so that the children of this community may have equal opportunity with those of other communities and that they may be educated at home. The present system of hauling these children to Morehead works a hardship on them and on their parents and is not necessary as can be seen from the fact that the expense of a local high school would not be beyond the power of one family and will not receive an unfair majority of the jobs and where the teachers are employed on their merits, where one family will not receive an unfair majority of the jobs and where the teachers are employed on their merits, their rights as American citizens without fear of losing their positions or their rights, then I invite you to give me your support in the election in November.

ed to the system that permits one to hold down a number of positions and to draw a large share of the county's money while other families equally capable and equally worthy are refused consideration because they have failed to support the present board and county superintendent in their races.

I propose to see to it that I am elected that politics is taken out of the schools and that teachers are employed not because they belong to this family or political clique, but through their merit and education only.

If you the voters of this district agree with me, in my effort to do away with the Hitler-like actions of the present administration and to establish the American system as can be seen from the fact that the expense of a local high school would not be beyond the power of one family and will not receive an unfair majority of the jobs and where the teachers are employed on their merits, where one family will not receive an unfair majority of the jobs and where the teachers are employed on their merits, their rights as American citizens

MONEY IN TURKEYS IF YOU KNOW HOW

"There's money in turkeys, but..." This attitude is one of the things to be faced by Kentucky farmers who want to make money from the big birds, says W. M. Insko, Jr., head of the poultry section of the Kentucky College of Agriculture.

After all, says Insko, turkey raising is a million dollar industry in this state. By meeting certain specific conditions, most farmers regularly could get a good profit from turkeys.

For one thing, most people prefer "open sized birds" rather than the large turkey. They want the birds to fit into the small ovens in many homes. On the other hand, large birds may be sold to hotels and restaurants. Then selling time is important. The holiday bird idea has been lost to some extent in the realization that well-fleshed, tender turkeys can be sold through out the year.

To consider these matters, and also incubation, management of the flock for utmost profit (breed long, etc., turkey tours will be held over the state. October 17. Rocks in Hart county will be visited October 18. These in Harrison, Meade county will hold its turkey tour day October 24, and the following day Breckinridge farmers will view the birds and hear discussions. Nicholas, Bourbon and Owen counties also will have tours.

BILLIONS FOR PROGRESS. As accustomed as we are to astronomical figures, here's a fact that should impress anyone: the life insurance industry has reserves and assets totaling \$28,000,000,000.

That money is largely invested in industrial securities—in government bonds—in home and agricultural loans in everything that keeps this country going and its people working. That money, in short, is helping to keep America ticking. And not one cent of it came out of a government treasury. That is part of life insurance's vast contribution to the welfare of this country as a whole. It is an example of what private enterprise means to us all.

On Friday of this week, the fans who are expected to crowd Jayne Stadium to capacity will see the Eagles meet one of the strong West Virginia teams, when Salem College of Salem West Virginia comes to Jayne Stadium for an encounter. Salem has one of the strongest teams in West Virginia, their last years record including a game with Davis-Elkins which resulted in a 30 victory for Davis Elkins. The Eagles are undoubtedly in for a tough battle but, with the rest they have had, should be ready to give out everything.

Salem is a Seventh Day Adventist School and their religion does not permit them to play on Saturday, hence the scheduling of the game on Friday afternoon. This will actually be the first time the local fans will have the opportunity to see the Eagles on the local gridiron in action at their best against an opponent worthy of their metal. The stadium should be packed to capacity for the engagement.

Dr. Miller Has Another Article In Magazine

"Curriculum Far From Final" Is Title Of Latest Discussion

Dr. Frank B. Miller, Professor of Education, has another article in "The Journal of Education" magazine, published in Boston, Mass. The journal is one of the oldest in the educational field, being established in 1875.

Dr. Miller's article appears in the September 1940 issue and is entitled "Curriculum Far From Final."

"Our Educational agencies have been found lacking in desired results, and the curriculum continues to be inadequate," says Dr. Miller. "If democracy means a way of life in which people participate in the management of their own affairs--social, economic, and political--and in which the common welfare is kept above the selfish interests of special groups, education must accept the challenge and provide a program that will meet the situation. It may be that the problems of democracy can only be solved by making democracy more effective, by attaching new importance to the school and to the educative process," writes Dr. Miller. Indicates that our curriculum are enumerated in the article.
