"ONE OF KENTUCKY'S GREATER WEEKLIES"
MOREHEAD, KENTUCKY, THURSDAY MORNING, AUGUST 27, 1942

VOLUME IX

NUMBER THIRTY-FIVE

Local N.Y.A. Boys Assigned War Jobs

Among the ten workers who left the Ashland NYA shop August 18, for jobs in war industries in Eastern states were two local boys; Kenneth R. Cox, Haldeman, Kentucky, and Sam Crum, Haldeman, Kentucky. Cox and Crum are expected to arrive at Hartford, Connecticut, August 19. They will remain at the Center until placed in war industry jobs by the U. S. Employment Service.

More than seven hundred boys who were trained for war jobs in the Ashland shop are now working in Eastern states. A large number of these youth were sent East through the inter-state transfer plan developed by National Youth Administration officials in cooperation with the United States Employment Service to bring trained workers to war production centers and experience a shortage of qualified personnel.

NYA shops offer training in such trades as machine shop, sheet metal, welding, foundry and pattern making. While in training the youth are paid \$24.00 per month and upon satisfactory completion of their training are provided with free transportation to war industry centers.

All youth interested in receiving NYA training should contact the United States Employment Service, 125-13th Street, Ashland, Kentucky.

Junk Rally Will Be Held Saturday

Scrap Iron, Rubber, Rags, and Other Materials Vitrally Needed

A Junk Rally for Morehead and vicinity will be held on Saturday, August 29, beginning at 2:30 p. m., on the lawn in front of the county courthouse, here. The rally is being sponsored by the Local Salvage Committee, of which Russell Barker is chairman.

Junk helps make guns, tanks, planes, ships and ammunition for the men in our fighting forces. Now more than ever before we are faced with a desperate need for scrap metal, rubber, rags and rags that we can secure. That is the purpose of the Rally to be held here Saturday. Anything in the way of scrap iron and steel, copper, brass, lead, zinc, babbit, old rubber, tires and tubes, batteries or old radiators, is needed NOW. Donors will be paid for the scrap in cash on the spot. Sixty-five cents per hundred pounds will be paid for scrap iron and steel if delivered to the local dealer; fifty cents per one hundred pounds, if it is to be picked up by the dealer's truck.

Local Rowan County Schools are participating in the Junk Drive in

Enrollment Decline In Men Students Expected At College

This business of predicting an increase or decrease in college enrollment isn't so simple—take it from Ralph E. Johnson, dean of the University of Louisville.

"Last year we expected a decrease, but we were one of the few schools to show an increase in enrollment, amounting to nearly seven percent," he said yesterday. "Possibly there will be fewer men students—but on the other hand the U. S. Naval Reserve, Army Reserve, Air Force and Marine Corps Reserve colleges generally remain on the inactive lists until graduation and then are inducted into the services as engineers or second lieutenants."

According to a survey of fifteen Kentucky institutions of higher learning made by an advisory agency, colleges generally expect a decrease in men student enrollments compared with a year ago, but for women students as in the autumn of 1941, or even more.

War Production Training Program For Rowan County

Will Be Financed By Funds Appropriated To The U. S. Office Of Education

Superintendent of Schools, Roy E. Cornette and Woodrow Wilson, vocational agriculture instructor attended a meeting at Paintsville, Kentucky, Monday, August 24, for the purpose of securing information on the new Rural War Production Training Program for 1942-43.

The Rowan county Board of Education will sponsor the program in Rowan county, and the local agriculture teacher will act as supervisor of the program.

Good Tobacco Crop Expected In County This Season

The Rowan county tobacco crop looks good and most farmers expect better than average yield this year. Only a few isolated crops have been severely damaged by late frosts and heavy rains. The crop is unusually large and full of moisture and if we can have some dry weather during the next two months, we will expect a crop and yield that is better than average. During the last ten years, over twenty-five farmers have built ventilators on their barns to keep the tobacco from getting too light tobacco even though the weather outside may continue to be foggy and damp. A number of farmers are planning to heat in their barns this season to prevent damage often caused by damp weather. Mr. Russell Hunt, county specialist for the University of Kentucky, will assist the county agent in holding a tobacco curing demonstration in the Whitesville community, Wednesday, September 2nd, and Sharkey community, Wednesday, September 3rd. All tobacco growers are invited to attend either of these meetings.

Hunters Urged To Purchase Ammunition Now

All hunters should buy their ammunition for shotguns for the coming hunting season as soon as conveniently possible, S. A. Wakefield, Director of the Division of Game and Fish, pointed out today. Ammunition is in short supply from federal officials in which they stated that there would be no point in hunters and shooters dropping their sport because of the war.

Wakefield urged all Kentucky hunters to lay their supply of ammunition for the 1942 hunting season and the 1943 season also.

Sergeant Deward Hall Assigned To Camp Polk

Sergeant Deward Hall, son of Mr. and Mrs. Charles Hall, of Haldeman, Kentucky, has been assigned to the 491st (A) Field Artillery Battalion, of the 11th Armored Division, at Camp Polk, Louisiana.

50 Applicants Take Civil Pilot Exams At MC, Thursday

Fifty applicants for Civilian Pilot Training were given entrance examinations at the Science Hall at Morehead College, Thursday morning. Successful applicants will make up the September and November programs, which will be a minimum of ten students to each program, with a possible twenty if the program is doubled and additional equipment is secured.

General Fund Receipts Up; Others Decline

"The new fiscal year is starting on Monday and will end on September 30th with an increase in general fund receipts and declines in receipts to the road fund and other funds," the State Revenue Department reported.

Gov. Johnson Delivers Main Address On Navy Program

Estimated 2,000 Airmen Christened Here

An estimated 2,000 persons attended the official christening ceremonies at the Naval Training School (Electric) at Morehead State Teachers College, here, Friday.

Tire, Tube Quotas For September Reduced Sharply

Price Administrator Leon Henderson, announced sharply reduced tire and tube quotas for September, today called upon all vehicle operators to intensify conservation efforts as the only means of providing for essential needs.

Allotments for September have been reduced below the August level in all classifications, new and recapped, with the exception of grade 2 passenger tires, which are available to war workers who qualify under a special provision in the regulations.

Vetch Makes Good Substitute For Fertilizer

A recent announcement by the fertilizer companies; they would not offer for sale fertilizers containing nitrogen for the fall, started Rowan county farmers making plans for next year's tobacco and corn crops.

W. H. Wilson Of Eadston Succumbs

W. H. Wilson, of Eadston, Kentucky, died at the home of his daughter, Mrs. Charles Stevens, Saturday, August 22, at the age of sixty-two.

Captain E. A. Lofquist, USN Reviews Navy Personnel

concern is the mobilization of all the resources of the nation for the high and holy cause of defeating the Dictators who seek to destroy us, we in Kentucky are happy as we make available the facilities of this fine institution as a training center for the nation's great Navy.

"We are glad that here are to be organized the great pride of our Navy. Many Kentuckians have served with distinction as naval commanders. In recent years three Kentuckians have attained the topmost rank of admiral. We rejoice that, our Navy has become the greatest in the history of the world and entertain great hopes for its future."

"Our comrades in arms, the British, have great pride in our Navy. We as Americans are well on the way toward creation of a comparable pride in a Navy whose exploits are destined to make a major contribution to winning the war."

Feed Wheat To Be Supplied To Any County

Feed wheat will be supplied to any county in the United States either directly by the Commodity Credit Corporation or through the customary channels of trade, the Department of Agriculture has announced.

Any producer may have wheat delivered to him at his customary shipping point upon proper certification that he will use for feeding stock and poultry. If a producer desires to purchase his feed wheat at some delivery point outside his immediate community he may do so by securing proper approval from the county Agricultural Agent or A. A. A. committee.

Local dealers and processors of feed wheat should be notified of the program so that they may designate the areas they propose to serve and a nominal feed-wheat price will be established for the points at which C. C. C. makes delivery. Such distributors and processors will be permitted to file claim for a refund if the county feed wheat price is less than their feed cost plus appropriate transportation.

43 Receive Degrees At MSTC Tuesday

Dr. Frank Kingdon Delivers Commencement Address

Forty-three members of Morehead State Teachers College received degrees at the commencement exercises, held in the College Auditorium, here Tuesday night.

Candidates awarded the degree of Bachelor of Arts in Education included: Mary Jane Beattie, Blanch Counts, Edna Pearl Coyle, Lena R. Crenshaw, Anabel Dickerson, Gaythe Euseman, Leona V. Johnson, Grace E. Jones, Arminis Joynes, Sarah Agnes Maloney, James Lerand Payne, Iris Marie Prather, Hattie Rogers, Pruthi, George Lamb Rattloff, Mary Turner Rawlings, Edith Roberson, Genevieve Elizabeth Rogers, Elsie Lorraine Sanders, Martha Scott, Charles Lewis Seawick, Celestine Durham Smart, Enda Mae Smith, Jewell Irene Taulbee, Charles Malcolm Thomas, Jeanette Ann Thomas, Madeline Turner, Dorothy Marie Turner, Robert Sanders Wellman, Jessie Alloway Woods and Una Lawson Woodard.

Mrs. A. J. White, 82, Dies Wednesday At Home Of Son

Funeral services were held Thursday morning at ten o'clock at the home of Mrs. A. J. White, 82, who died Wednesday morning about four o'clock, at the home of a son, Allie White. Death was attributed to the infirmities of old age.

Mrs. White is survived by four daughters: Mrs. Lydia Parker, Mrs. A. L. Lending, Mrs. J. D. Rugg, Plummers Landing; Mrs. Stanley Withrow, Solders, Kentucky; and Mrs. Stanley Ashland, four sons, Andrew White, Grover White, Allie White and Willie White, all of Morehead and residing in the Eastern States.

Picture Display At Citizens Bank Growing Rapidly

A number of the parents of men in the fighting services of our country have complied promptly with a request from the Citizens Bank to bring in pictures of their sons, for a patriotic display in the window of the Bank.

An inspiring display of Rowan County's manhood, now serving on the fighting front and in the rear, by a patriotic display in the window of the Bank.

The Bank is giving a Service Record Book, a handy, profusely illustrated book in which promotions, transfers, battle records, photographs, autographs, etc., may be recorded permanently in return for a photograph of the son (or daughter) in the service. Parents who have not yet contributed to this display are heartily urged to do so as soon as possible, in order that the display may grow rapidly, and become more and more impressive.

F.P. Blair Succumbs To Heart Attack, Saturday, Aug. 22

Had Lived In Rowan County Fifty Years

Franklin Pierce Blair, 82, pioneer citizen of Morehead, retired business man and farmer, died at his home, here, Saturday morning, August 22, about 7:00 o'clock, of a heart attack.

He was born December 30, 1858, at Blair's Mill, Kentucky, (Morgan county) the son of David C. and Clara Blair. He was in the army for the past two years, and had recently returned from a Lexington hospital, where he underwent extensive treatment.

He was born December 30, 1858, at Blair's Mill, Kentucky, (Morgan county) the son of David C. and Clara Blair. He was in the army for the past two years, and had recently returned from a Lexington hospital, where he underwent extensive treatment.

He was a member of the Morehead Christian Church, and his residence here, and at the time of his death, was a member of the Official Board. When the new building of the building committee, supervising its construction and spending much time in its proper care. He was a member of the Masonic Order. He served as Mayor of the city of Morehead and was Representative from Rowan county in the Legislative district for one term. He exerted his influence to the utmost in helping to locate Morehead College here.

SALES REPORT MOREHEAD STOCKYARDS

The sales report for the sale of Thursday, August 20, at the Morehead Stockyards, follows:

Hogs: Packers, \$14.30; Mediums, \$14.05; Shoats, \$7.15-7.25; Sows and Pigs, \$9.40-54.50. Cattle: Steers, \$8.00-9.50; Heifers, \$10.25-12.50; Cows, \$7.50-9.55; Cows and Calves, \$7.50-8.50; Bulls, \$10.55.

Calves: Top Weights, \$15.70; Medium, \$12.50; Umman and Large, \$10.50-11.00.

Souley and Spence, stock dealers of Flemingsburg, Kentucky, had more than \$200,000 worth of livestock at the Morehead yards Thursday, August 20, 1942.

This is outstanding evidence of the rapid growth of the local yards, which is one of the leading yards in Eastern Kentucky. It is widely known as one of the highest markets in this section of the state.

and Drug Administration will not hesitate to use them. Cream that has been allowed to spoil cannot be made good again and to avoid a possible run-in with the law, state or federal, the farmer must make clean milk, rather than cleaned milk, his goal, according to Mr. Clarke. Particular care must be taken to prevent particles of any kind from dropping into the milk or cream, during milking or separation or while being held on the farm. While much of the foreign matter which may enter can be strained out of the milk, the full wholesomeness of an exceptionally delicate food product, once harmed, can never be wholly restored.

The days of the poor cream producer are numbered, Mr. Clarke believes, because more and more creameries are learning the wisdom of buying cream on grade and rejecting any that is unfit. He suggests this simple test for farmers wishing to check on the quality of their cream even before it leaves the farm. If you taste it and want to swallow it, that's good cream; if you taste it and spit it out, that's poor cream, if you won't even taste it, that's bad cream. Ultimately the law will catch up with the producer and the buyer of bad cream but even those who produce or buy the doubtful product are on pretty dangerous ground.

Signal Corps Needs Radio Trainees At Various Ky. Cities

Employment Schedule Lists City And Number Needed

The United States Army Signal Corps needs qualified civilians to play a vital role in communications radio trainees. Captain W. Gayle Starnes, Officer in Charge, Army Training, Lexington Signal Depot, today announced the training schedule for the mechanic learner courses which will start in the respective cities within the next few weeks. Men, and some women, accepted for training will study elementary principles of radio in repair and maintenance. Before an applicant can be hired, he must have passed a civil service examination to test his mechanical ability, and a physical examination to show that he is in sound health.

Men with mechanical aptitude, if accepted for training, will be given the opportunity while they earn \$100.00 a year during the preliminary course, to study overhaul, repair and inspection of miscellaneous radio equipment. They will assemble, reassemble and test radio equipment and in general learn this type of work in communications. When the student completes the basic mechanical learner course he will receive a promotion and will become a junior repairman trainee. Those who graduate in this division are eligible to become students in Field Radio, Lexington, Kentucky. Men are urged to make themselves available in the war effort and persons who are interested may file applications with a representative of the Sixth U. S. Civil Service District, postoffice box 831, Lexington, Kentucky, or at their nearest U. S. employment service office.

Those who complete the prescribed training may be assigned anywhere the flag of the U. S.

ties, according to Captain Starnes. Captain Starnes further emphasized that "men who are qualified and eligible for military service can't stay out of the Army by being trained at the Lexington Signal Depot. It seems to be the erroneous impression that men won't be taken into military service if they enter training here. This is not the case. Students subject to induction may enter the Enlisted Men's Reserve and complete their training with the U. S. Signal Corps here, but they will be taken into the army just as soon as they complete the course of study."

The hiring schedule follows, as announced today by Captain Starnes. This includes the number needed at the present time at the various centers.
Lexington, August 4, 90; Louisville, August 28, 95; Lincoln Institute, August 4, 60; Madisonville, August 11, 90; Covington, August 11, 120; Paintsville, August 11, 200; Owensboro, August 18, 90; Somerset, August 18, 90; Harlan, August 18, 120; Louisville, August 18, 150; Paducah, August 25, 90; Ashland, August 25, 120; West Kentucky, August 27, 30.

New High Records For Agricultural Production Is Set

Food Requirements Mount In Proportion For Military. Lend-Lease Uses

Evidence accumulates of new high records for agricultural production this year, but food requirements also continued to mount for military, lend-lease and civilian use, the United States Department of Agriculture reported today. Total output of food is expected to be nine percent more than in 1941, and twenty-five percent more than the average for 1935-39. Total requirements are up by at least equivalent amounts, and in some cases will draw upon reserves, if civilian consumption is to be maintained at the high level of 1941. Biggest increase in production is

in fats and oils, to help make up for reduced imports and increased exports. But total disappearance will be much larger than in 1941 if civilian consumption is to be maintained after meeting requirements for lend-lease and military use. A similar situation applies to feed grains for the production of meats, milk and eggs during the coming year. Production of feed grains promises to be larger this year than last, but there are many more animals on farms and ranches, and a heavy draft must be made upon reserve feed in the ever-normal granary.

As for meats, there is a seasonal decline in the supply at present and the biggest summer demand on record. Total supplies will be bigger this fall and winter than last, but there will be heavy government buying for lend-lease and military needs.

Looking into 1943, the department said numbers of livestock on farms and ranches at the beginning of the year will be the largest on record. This stock will include milk cows, beef cattle, hogs, sheep and poultry. Milk production continues to set new high records for this time of year. Earlier this year, but supplies of evaporated milk and cheese were accumulated. The emphasis is on butter and dry skim milk for the last half of the year. By reason of more cows, the output of milk and dairy products should be larger in 1943 than in 1942.

Vegetable growers put in a bigger acreage this year, and yields have been even better. Plenty of fresh vegetables are in the picture for this summer and fall, and the bigger pack of processed vegetables ever turned out in this country. A large part of the commercial pack is earmarked for military use, but the home pack in American kitchens will set a new high. Cereals—the bread grains—are abundant. The nation has a two-year supply of wheat, and indications are this might become a three-year supply. The rice crop this year will be the largest on record. Production of poultry and eggs also stands high in total volume, enough for all requirements—civilian, lend-lease, military. Total

production of fruits is expected to be about as large as in 1941 when some high records were made. As in the case of vegetables, the big quantities of small fruits are being canned in American homes.

Ashland Oil Firm To Construct New Refining Plant

Will Make High Octave Aviation Gasoline

An announcement of great interest to every resident of eastern Kentucky and adjacent counties of West Virginia, was made last week by Paul Blazer, president of the Ashland Oil and Refining Company, when he revealed that his company is preparing to start construction of a new refinery for producing high octane gasoline.

This new plant will produce aviation fuel in huge quantities and be an important factor in the nation's war effort. Located near Cannelburg, Kentucky, its construction will soon employ a large number of men, many of whom will undoubtedly come from Rowan county.

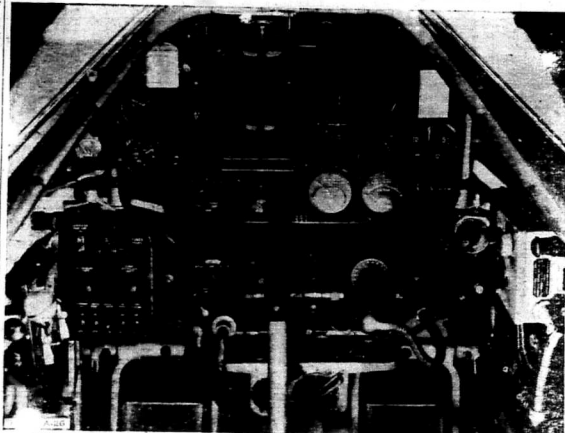

It is conservatively estimated that this new refinery will cost over \$6,000,000 and require about a year for construction. While the financing is being handled thru the Defense Plant Corporation, a governmental agency, the Ashland Oil and Refining Company will have the entire contract for its design, erection, and operation.

According to Mr. Blazer, Senators Barkley and Chandler and Congressman Joe B. Bates of Kentucky and Congressman Geo. W. Johnson of the Fourth West Virginia District, were most helpful in working out the many important details involved in locating here a government project of this magnitude.

Upon completion, the refinery will be operated by the Ashland firm and be a steady employer of labor, mostly of the skilled type. Training schools will soon be inaugurated in its present plants to teach the hundreds of men required for the new refinery.

After the war, the contract provides that the entire works can be bought at a reasonable price by the Ashland Oil and Refining Company. Consequently, as Mr. Blazer points out, this new refinery constitutes a permanent addition to the industries of Eastern Kentucky, and thus is important news to residents of this city and nearby towns. It appears certain that after the war the Tri-State

What Aviation Cadets Dream About

Above is shown the "installation" (or instruments) of a BT-9, the basic training airplane which U. S. Army Aviation Cadets fly to win their wings. Its 79 gadgets, of which only 65 appear in the picture, range from a simple clock to a "selective gyroscopic instrument drive control" and are a fine example of why Uncle Sam's pilots cannot "fly by the seat of their pants" as early pilots used to say. Instead, they must be highly educated and thoroughly trained so that they understand the functions of this maze of instruments, each of which is concerned with some highly technical phase of the science of flight.

Region will become one of the important oil refining centers of the United States.

Commenting upon the greatly increased demand for aviation gasoline and other products essential to the war effort, Mr. Blazer pointed out that oil refining is becoming more and more a chemical industry making use, also, of hydrocarbons from natural gas and coal. The Ashland Oil and Refining Company plans to take full advantage of the fact that its plant is located close to important coal fields and natural gas reserves. Plans now being developed call for an important program of research for further coordination of the chemistry of petroleum, bituminous coal, and natural gas. The same factors which have made the Charleston, West Virginia district the center of the chemical industry of the United States should

contribute to similar developments in the Ashland-Huntington area.

Mr. Blazer also revealed that new production records were being set by the present refinery at Leach, Kentucky. Recently 19,000 barrels of oil were refined in a single day, and it is expected that within thirty days, daily production will exceed 20,000 barrels.

U. S. Recommends Enriched Flour

Experts Answer Fourteen Questions About Flour

Uncle Sam recommends enriched flour and bread. Government flour experts answer fourteen

questions about enriched flour and bread.

1. What is "enriched" flour? White flour to which certain vitamins and minerals have been added to improve its food value is "enriched" flour.

2. What vitamins and minerals are added? Two vitamins "B" vitamins, a much-needed mineral, iron. Another vitamin (riboflavin) and calcium may be added. If so it will be stated on the label.

3. Why are these vitamins and iron added? Many people lack these vitamins and iron in their diets. The vitamins help to keep nerves steady and so prevent digestive disturbance and constipation. Iron makes good blood and gives vitality.

4. What is the difference between bread made from enriched flour and that made from plain white flour? There is no difference in looks or taste, but the bread made from enriched flour has more food value.

5. Do you have to use more baking powder, soda or yeast with the enriched flour? No. The baking qualities are the same. The home-maker can continue to use her

same recipes.

6. Are all white flours now enriched? No, though it is hoped they soon will be.

7. Is enriched flour or bread more expensive than white flour and white bread? Very little, if any. You get more food value for your money in enriched flour and bread.

8. Are these vitamins and iron in wheat before it is milled? Yes, but the germ and outside layers of the kernel, which contain most of the vitamins and iron, are removed in the process of milling white flour.

9. Does enriched flour or bread have the same food value as whole wheat? No. Whole wheat contains all the vitamins and minerals added in enriched flour and certain other valuable minerals and wheat flour in addition. Whole wheat flour or bread does not need to be enriched.

10. Should enriched bread be used instead of whole wheat? No. But if you prefer white bread, be sure it is enriched bread.

11. Can home-produced wheat be made into enriched flour? Yes. Thiamin, niacin, and iron are available to every miller, ready mixed in the right proportion to add to the flour. Should your miller refuse to enrich your flour, it would be to your advantage to have part of the wheat ground as whole-wheat flour, sell the rest, and buy enriched flour.

12. How can I be sure I am getting enriched flour and bread? Read the label. All flour and breads that are enriched have the word "enriched" on the label.

13. If my grocer does not carry enriched flour and bread, what shall I do? Buy only enriched bread or whole wheat. Urge your grocer to carry the enriched products. If he will not, then buy somewhere else. Most merchants will change to "enriched" lines of breads and flour if the patrons insist.

14. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

15. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

16. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

17. Is it important that I use flour and bread?

18. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

19. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

20. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

21. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

22. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

23. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

24. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

25. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

26. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

27. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

28. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

29. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

30. Is it important that I use flour and bread?

Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

ine makes explosives for us and our allies; explosives to down Axis planes, stop their tanks, sink their ships. We need millions of pounds of glycerine and you housewives can help supply them—every kind you use. After you've got all the cooking good, pour them out through a kitchen strainer into a clean, wide-mouthed can. Keep in a cool, dark place. Please don't use glass containers or paper bags.

3. Take them to your meat dealer when you've saved a pound or more. He is cooperating patriotically. He will pay you for your waste fats and get them started on their way to the war industries. It will help him, if you can deliver your fats early in the week.

4. Does enriched flour or bread have the same food value as whole wheat? No. Whole wheat contains all the vitamins and minerals added in enriched flour and certain other valuable minerals and wheat flour in addition. Whole wheat flour or bread does not need to be enriched.

5. Should enriched bread be used instead of whole wheat? No. But if you prefer white bread, be sure it is enriched bread.

6. Can home-produced wheat be made into enriched flour? Yes. Thiamin, niacin, and iron are available to every miller, ready mixed in the right proportion to add to the flour. Should your miller refuse to enrich your flour, it would be to your advantage to have part of the wheat ground as whole-wheat flour, sell the rest, and buy enriched flour.

7. How can I be sure I am getting enriched flour and bread? Read the label. All flour and breads that are enriched have the word "enriched" on the label.

8. If my grocer does not carry enriched flour and bread, what shall I do? Buy only enriched bread or whole wheat. Urge your grocer to carry the enriched products. If he will not, then buy somewhere else. Most merchants will change to "enriched" lines of breads and flour if the patrons insist.

9. Is it important that I use flour and bread? Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

10. Is it important that I use flour and bread? Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

11. Is it important that I use flour and bread? Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

12. Is it important that I use flour and bread? Yes. In these days, every man, woman and child owes it to his country to build up his health and strength for the tasks that lie ahead.

Towers of Truth

Chinese, Finnish, Tagalog, Dutch, Spanish—programs in more than a dozen tongues, from the towers of General Electric stations WGEA and WGOE, Schenectady, and KOFI, San Francisco.

1. They provide authentic war information for news-starved peoples around the globe, entertainment for U.S. forces abroad. These G-E short-wave stations...

2. ...have special antennas "pointed" at Australia, South America, China, Europe—making reception there almost as strong as from local stations.

3. They provided the only U.S. programs that reached Batavia. People in conquered lands risk their lives to listen. Smuggled letters say they bring hope of release.

4. Some announcers are regular G-E production employees, working on war work. They tell people in their native lands that America is determined on victory.

General Electric believes that its first duty as a good citizen is to be a good soldier.

General Electric Company, Schenectady, N. Y.

GENERAL ELECTRIC

To Speed Victory

ANNOUNCING NEW SCHEDULES

EFFECTIVE AUGUST 26TH

New Schedules will soon go into effect on Southeastern Greyhound Lines... another contribution of this Company to the War effort... to speed Victory.

With every desire to provide adequate service for all essential travel, Greyhound maintains its policy of serving the War effort first.

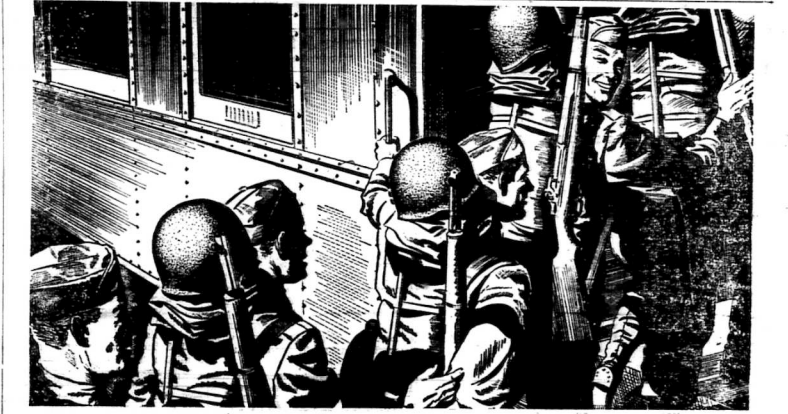

Reduction of running time conserves tires, gasoline and wear on irreplaceable parts... all acute wartime necessities. Our government has requested it; we are glad to comply.

HOW TO TRAVEL IN WARTIME

- 1) Check on schedules in advance;
- 2) Buy your tickets early;
- 3) Carry minimum luggage;
- 4) Travel early in the week.

Your Co-operation Will Help to
"KEEP 'EM ROLLING... Safely"

SOUTHEASTERN
GREYHOUND
LINES

To get there "fast"...

—with the most men! That was Major General Nathan Bedford Forrest's formula for winning battles in the horse and buggy days. How much more vital in today's age of speed that troop transportation be carried out quickly and smoothly!

That's why Chesapeake and Ohio Lines, along with all other railroads, give the Services first call... why we see that their supplies and munitions take precedence over all other traffic!

Yes, soldiers, sailors, marines and coastguardsmen have unofficial "priority." For we know you want your railroad constantly alert to serve them... the men whose service is beyond price. So, if this important railroad job sometimes means your personal travel plans are interfered with, we know you'll say, "O. K. Soldier—after you!"

HOW YOU CAN HELP YOUR COUNTRY AND YOURSELF

Travel during mid-week, rather than on congested weekends. Plan your trip, and purchase railroad and Pullman tickets, in advance preferably at our city ticket office—and avoid delay at stations.

If your trip is postponed, please make immediate cancellation. When your customary Pullman space is not available, accept other accommodations or use coach service.

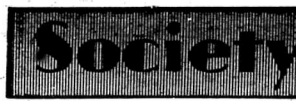

Travel "light"—there's no room on crowded trains for extra luggage.

Buy round-trip tickets—save time for the ticket-seller and yourself.

Skip your conveniences. Special troop trains are more important than convention trains.

Avoid unnecessary travel—buy WAR BONDS instead!

CHESAPEAKE AND OHIO LINES

MRS. C. U. WALTZ, Society Editor—Phone 146

Mrs. Anna B. McCullough, of Tyrone, Pennsylvania, arrived on Thursday for a visit with her son, C. B. McCullough and family.

Reverend Buell H. Kagee has been vacationing in North Carolina for the past two weeks.

Miss Betty Jane Bucher of Lexington, is the guest of her grandmother, Mrs. Mima Dillon, this week.

Miss Nan Hayes, of Easton, spent Monday with her sister, Mrs. E. E. Maggard.

Mrs. Warren Lappin was in Lexington, Tuesday, on business.

President and Mrs. W. H. Vaughan was in Lexington, Tuesday, on business.

President and Mrs. W. H. Vaughan were in Louisa, Saturday and Sunday, attending the funeral of Mr. Vaughan's uncle, J. B. Clayton.

Mr. Leo Davis Oppenheimer, of Louisville, spent Tuesday and Wednesday with his parents, Mr. and Mrs. Leo Oppenheimer, Sr.

Reverend and Mrs. A. E. Landolt and daughter, Betty Rae, are spending ten days in Lexington, with Mrs. Landolt's grandmother, Mrs. Rosa Rae and friends.

Misses Doris and Margaret Penix spent Tuesday in Lexington.

Mrs. Hartley Batten and sons, Don and Bill, were in Flemingsburg, Tuesday, on business.

Mr. and Mrs. Brady Taber, of Philadelphia, spent last week with Mr. and Mrs. W. J. Miller.

Mr. and Mrs. Arnold Williams, of Sandy Hook, are the guests of Mr. and Mrs. W. J. Miller, this week.

Mr. and Mrs. Arthur Bradley, of Ashland, were the week-end guests of Mr. and Mrs. Leo Oppenheimer.

Mr. and Mrs. John Paul Nickell, and daughter, Kay, were the week-end guests of his father, Dr. H. L. Nickell.

Miss Joyce Walford left Friday evening for a two week's visit with friends in Ashland.

Mrs. Hugh Bucher, of Lexington, is the guest of her mother, Mrs. M. T. Dillon, this week.

Mr. and Mrs. Wurtz Jayne, of Grayson, spent Sunday with his mother, Mrs. W. L. Jayne.

Mr. and Mrs. Wilfred Waltz spent Sunday at Park Lake, the guests of Don and Bill Batten.

President and Mrs. W. H. Vaughan entertained the senior class at a six o'clock dinner, Monday evening.

Miss Betty Jane Wolford is in Grayson for a two week's visit with her grandparents, Judge and Mrs. Wolford.

Mrs. Hayden Carmichael had as guests last week: Misses Kay Dameron, M. Sterling, Dorothy Conley, Wheelwright and Mary Jane Puckett of Morehead.

Miss Kathleen Miller spent a few days in Muncie, Indiana, the guest of her aunt, Mrs. Eugene Holden, returning Sunday. Miss Dorothy Whesley, of Muncie, returned with her for a week's visit.

Mrs. G. W. Bruce is in Erlanger, this week, visiting her daughter, Mrs. Lewis Higgins and new grand daughter, Betty Bruce Higgins.

Mr. and Mrs. Frank Havens and Mr. and Mrs. Will Havens, of Indianapolis, visited their sister, Mrs. Carrie Havens, in Washington, Saturday and Sunday.

Lieutenant Commander George Walker, Mr. Ike Noe and Dean W. C. Lappin are in Chicago, on business.

Dr. Frank Kingston, of New York, was the dinner guest of President and Mrs. William H. Vaughan, Tuesday.

Mr. and Mrs. Virgil H. Wolford were in Lexington, Tuesday, on business.

Mrs. Cora Carter Wells has returned from Richmond, Kentucky, where she has been nursing Mrs. Ida Sample.

Mr. Charles Terry, Miss Martha Mae Hixon, Miss Jane Frey, Miss Louise Loving, Miss Leora Hogge and Mrs. Billie Hogge all of Lexington spent the week-end at the home of Mr. and Mrs. T. F. Hogge.

Among those from out of town attending the funeral of Mr. F. P. Blair, Monday, were: Dr. and Mrs. L. Blair, Blaine Lewis, Mrs. Marie Blair and Mr. and Mrs. Harlan Blair, of Ashland; Mr. and Mrs. McKinley Lewis, Whitesburg; Mr. and Mrs. E. T. Lewis, Whitesburg; Mrs. Ernest Lewis, C. Lewis, of Wrigley, Kentucky; Joe Houston, Soldier, Kentucky; Mrs. Sally Foster, Kenova, West Virginia; U. Blair, Blaine, Kentucky; Mrs. Will Hinton, Mr. and Mrs. Ed Hinton, Mrs. Adrain Lewis, Mrs. Lillie Harmon, Mrs. Erva Adams and Mrs. M. T. Dillon; Fred Hinton and daughter, Flemingsburg, Kentucky; Mr. and Mrs. Frank Hinton, Plummers Landing, Virginia; Mr. and Mrs. T. Davis and Mr. and Mrs. F. M. Cook, Winchester, Kentucky; Mr. and Mrs. Woody Hinton and son, Thomas, of Hopkinsville, Kentucky; Mr. and Mrs. Lewis Hopkins, Mason county, Kentucky; Mr. and Mrs. Ollie Ward, Maysville, Ky.; Mrs. Fiem Muse and Mrs. Russell Muse, Lewisburg, Kentucky; George Lathrum, Owingsville, Kentucky; Luther Blair, Mr. and Mrs. Stanley Blair, Mr. and Mrs. Boyd Blair and Mrs. Marie Nickell, of West Liberty, Kentucky.

The advantages it offers for those of this section who seek higher education have not been curtailed in the slightest by changing its facilities with the Navy.

"I am about to forget that I was a subject. I was directed to speak about the 'Adapting the Educational Program to Needs of a Nation at War.'"

"The need for skilled workers in defense industries and for specialized positions in the armed forces has made large demands upon the vocational schools. In Kentucky the vocational school, an integral part of the total school program, are training the persons employed by the NYA and WPA, Superintendent Brooks and Dr. R. J. Woods, director of vocational education, has so organized and readjusted vocational training facilities as to bring them to the maximum usefulness. More than 43,000 persons were enrolled in the regular program of vocational education the past year. In the War Production Training Program, training has been provided to make 738 auto mechanics; 7,000 welders; 7,119 radio workers; 6,301 machine shop workers; 2,475 sheet metal workers and hundreds of others whose instruction increases their efficiency in the industry. They have been prominently employed in war industrial plants.

"Our schools in Kentucky have been asked to train more than 20,000 radio technicians in the Signal Corps. There are about 6,000 now enrolled in radio training courses.

"For generations now our educational system has been training boys and girls to enjoy a richer and happier life. The schools have been the center of raising the standard of living of all the people. In this respect our school system has been a success and has added immeasurably to the great wealth of the land. This is as it should be for ours has been a land of peace, where the creation of a new world has been without parallel in the history of mankind.

"Now, that all of this is in jeopardy and every other cherished principle of our way of life is endangered, we must quickly adjust our schools to military needs. Most of us are only vaguely aware of the fact that every fifth person in the United States is in school or college. It is an understatement to say that the role of the schools in our national crisis is a major one. If the power of the schools and colleges can be properly harnessed in the war effort, a great victory will be won.

"Some of the services already rendered by the schools:

"1. The schools are called upon to train mechanics for defense plants. Within the past two years, thousands of men have received special training that has fitted them to take their places in airplane industries. In addition to this, stenographers, accountants and other specialists have been trained in our schools to take specific places in the war effort. This is in itself a major contribution to the war effort. Thousands more are being trained now for that service. Thousands of schools are open twenty-four hours daily preparing such workers.

"2. The colleges and technical schools have trained thousands of officers for the armed forces. College graduates, school teachers and other professional trained men have been called into the Army and Navy in ever-growing numbers and they have proved to be good officer material.

"3. School teachers and school administrators have served efficiently and faithfully as rationing and registration agents. This service bids fair to increase as the war effort becomes greater.

CHURCH NEWS

Services at Christian Church During the absence of Reverend Arthur E. Landolt during the next two weeks, Sunday morning services at the Christian Church will consist of hymns, prayer and communion.

Sunday School will meet as usual.

Governor Johnson-- (Continued from Page One)

"We were impressed with the intelligent plan by which the Navy is mobilizing and training the chosen personnel for the grim tasks ahead when she comes to the opportunity to avenge the treacherous attack at Pearl Harbor.

"This war requires many men of highly developed technical skills. It requires a higher order of intelligence and a higher degree of specialization than in any previous conflict. That has necessitated a vast system of Navy and Army schools in which are given intensive training. It is that circumstances which prompted the Navy in making use of the facilities at Morehead State Teachers College. We confidently expect that the men chosen for training here will acquire themselves with credit and uphold the high tradition of the Navy.

"I had another memorable experience recently when I accepted an invitation to visit Camp Shelby, Mississippi, and reviewed the 38th Division. This Division is composed of Kentucky, Ohio, and Indiana National Guard troops. You can imagine the pride which stirred within me when General Easley told me of the astounding record of marksmanship that has recently been made by the 149th Kentucky Infantry Regiment, and composed almost entirely of Kentuckians. They had only recently completed the firing of the course on the rifle range. Out of 2,381 men in the Regiment, all but sixteen qualified as marksmen.

"It reminded me of a story told of a mountaineer father whose bright ambitious boy was eager to attend high school in the country seat after finishing the country school. Story—Take this boy and teach him trigonometry—he's the poorest shot up our hollow.

"Because the impression prevails in some quarters that Morehead State Teachers College has ceased to function as a college since naval training started here, I want to help dispel that impression. Morehead is only sharing its facilities with the Navy. It has not ceased to function as a college in service of the Commonwealth.

Feed Wheat-- (Continued from Page 1)

Any producer or local dealer may secure prices and other information regarding the feed wheat program by consulting his county A.A.A. committee.

War Production-- (Continued from Page 1)

While the services so far rendered by the schools are impressive, we have only begun to serve. The unfinished task so far surpasses the completed that we must turn to it.

"Additional services that may be expected of the schools:

"1. We must provide more technical and professional training. The machine age of which we are a part calls for an ever increasing amount of technical and professional education. The schools must be reorganized to provide for more industrial and scientific education.

"2. We must teach the "Democratic Faith." The American boy of life is a great social faith. We have been prone to take our democracy for granted and have neglected to teach the duties and responsibilities of citizens.

"3. The schools should be organized and equipped to cope with the propaganda campaign of the enemy. One of the most powerful weapons in America is false rumor and baseless propaganda. No other agency is in such position to fight this battle for democracy as the schools.

"4. The schools must enlarge and enrich their programs of civics, international politics, and American history. The school program has a vital place in community life and in the war effort.

"5. The schools should expose America's present world affairs. We Americans today face a great decision. No other nation ever had such an opportunity for world leadership as America does today. Wherever we will it or not we must play the role of chief actor in one of civilization's greatest dramas. Are we prepared for such responsibility? Here again the schools must rise to the occasion. There must be new emphasis on foreign languages, world geography, international politics, sound economy, and world-mindedness. The knowledge of the world must be brought to our classrooms. We have heard too limited in our outlook and ideals. The rationing has taught us world geography that should have been taught in our schools. We are an enlightened country. This is but one example of the limitations on our educational program in the past. In short, we must know more about world conditions than we now do, if we are to take our place in world affairs."

War Production-- (Continued from Page 1)

According to best estimates, one old disc harrow will provide enough scrap steel needed for 210 semi-automatic light carbine rifles. One old plow will help make one hundred 75-millimeter armor-piercing shells, one useless old tire will provide as much rubber as is needed in the manufacture of twelve gas masks and one old shovel will help make four hand grenades. These are but a beginning of the many excellent uses that scrap materials help provide.

Junk Rally-- (Continued from Page 1)

The county, and it is planned to have school children to bring any junk they may secure to an assembly place at each school. The junk may then be delivered to the dealer or the dealer will call for it.

According to best estimates, one old disc harrow will provide enough scrap steel needed for 210 semi-automatic light carbine rifles. One old plow will help make one hundred 75-millimeter armor-piercing shells, one useless old tire will provide as much rubber as is needed in the manufacture of twelve gas masks and one old shovel will help make four hand grenades. These are but a beginning of the many excellent uses that scrap materials help provide.

Enrollment Decline (Continued from Page 1)

uation, Morehead State Teachers College losing forty percent of its 1942 class, the survey showed.

"About four percent of the women who would have graduated in 1942 left before commencement to enter war industries," the survey continued. "Paduch Junior High School, Murrays State Teachers College, Murrays State Teachers College, Morehead State Teachers and the University of Kentucky each lost an average of five percent of women graduates in this year."

"Forty-three percent on the average, of the June male graduates, expect early military careers if they have not already joined the colors—thirteen percent hope for war industry employment, and 30.6 percent anticipate indirect war work, much of which, however, plays an important part in the war, such tasks including farming and the teaching of various defense skills.

"Almost a quarter of the women graduates expect to enter war industries. Sixty percent of the re-

Bumper Pig Expected This Year

The number of pigs farrowed and raised in Kentucky in the spring of 1942 was about double the number raised in 1941. It is estimated that there has been a twenty-five percent increase over the country as a whole. These figures were disclosed today by C. B. Turner, Chairman of the United States Department of Agriculture War Board for Rowan County.

"Farmers in this county," Mr. Turner said, "are urged to hastily feed out all hogs that are to be marketed this fall and get them sold before September 1, if possible.

"This will help the packing houses, a locomotive burn about twenty pounds of air.

For every pound of fuel consumed, a locomotive burns about twenty pounds of air.
