

September 1, 2021

**MSU Faculty and Staff:**

During the month of September we will be asking our entire University community to assist us in increasing our Covid-19 vaccination rates. Beginning today, we are asking all faculty and staff to take part in the “**30 Day Challenge**” to get MSU vaccinated. Our goal is to get 75-80% of our employees vaccinated by September 30.

If you have been vaccinated that is great! If you haven't, we encourage you to speak to your medical provider and then hopefully obtain a vaccination – they are available at our campus Health Clinic in Allie Young, St. Claire HealthCare, and just about all pharmacies.

In order to assist us in documenting our goal, we are asking that employees voluntarily upload a picture of their vaccine card so that we can verify our vaccination rate. During the first week of October we will be counting our rates, and also drawing names from the total list for ipads, stipends, etc. as part of an incentive to participate.

I hope that you will join us in uploading a picture of your vaccination card by September 30 using the following link:

Many thanks for helping.
