MOREHEAD STATE COLLEGE, MOREHEAD, KY., WEDNESDAY, NOV. 3, 1948

VOLUME XIX — Number Four

## Council Of Students Is Formed Here For First Time

**Malone Elected As President Of Newly Organized Group**

head Student Council was held Thursday of last week in the junction with the first annual clean-up day on the campus.

The Council will consist of two representatives from each class as well as the class officers, who are regular officers.

Out of the total enrollment there was a total of only 223 votes cast. Fields Hall cast 50 Thompson cast 41 and about five commuters and city students voted. The remainder of the voter came from Men's Hall and Mc Village.

For the clean-up day and election, classes were dismissed and attendance taken. This was an effort to have the campus in the best of appearance for the Homecomers who arrived here Friday.

Officers elected were:

President, Jack Malone; vice-president, Earl Scantlinse; secretary, Pauline McKenzie; treasurer, Mary Lee Elam; reporter, Bill Clarkson.

Votes by districts for each group were not available.

## Band Officers Announced By Mr. Thoman

According to a recent announcement from Mr. Thoman, director of the Morehead State College marching band, officers for the present year were elected at a recent meeting. They are in charge of various groups of the present.

The following is a list of band officers for this year: Tom Bell, assistant Assistant Director and Section Heads are appointed.

The sergeants and corporals were elected by the above appointed officers.

Student Assistant Directors: '75Sgt. Thomas Dobyns.

Staff Sgt.—Nell Fair, secretary; Carl Fair treasurer; Miss Joan Wheeler, librarian.

Sergeants: Norman Dale Meeks, Gay Banks, Dick Wilson, Art Crocker, Robert Banks, Carroll Hall, Howard McCann.

Corporals: Donald Graham, Evelyn Moore and Clayton Liggett.

## Physical Exams Are Thorough, Baird Declares

The most thorough physical examinations ever given Morehead State College students have been completed, according Dr. Theodore Wm. Baird, Jr.

"We want to recognize," said Dr. Baird, "with special thanks and appreciation, the physicians and dentists who so generously served us in giving these splendid examinations."

Those who did the work are: Dr. E. D. Blair, Dr. C. Louise Caudill, Dr. J. M. Garred, Dr. S. E. Reynolds, Dr. Charles Milton Caudill, Dr. Harold F. Holbrook, Dr. O. M. Lyon and Dr. C. C. Mayhall.

Dr. Baird said there will be a follow-up on these examinations, and urged students to take any appointments with physicians and dentists to correct defects which were found.

## U. S. Soil Conservationist Is Guest Speaker

C. D. Luttrell, Conservationist with the U. S. Soil Conservation Department was guest speaker at the Agriculture Meeting Monday evening, Oct. 25. He discussed the importance of soil conservation in its social and economic relationships. He illustrated his lecture with actual examples and maps of the area and explained the classification of land according to use and the type of farming that should be practiced on each classification of land. He stated that would give greatest land use with least amount of soil erosion.

The Agriculture Club is bringing each meeting night some outstanding man to lecture on agriculture work that is being done in the eastern part of Kentucky and how this work is set up and operated.

The next meeting of the club will be Nov. 13. Dr. Ralph Nietzold, Ranger for the U. S. Forestry Service, and headquarters in Morehead,will be the next speaker.

## Conservation

**By Henry C. Hagens**

"This nation will be strong and powerful only as long as its natural resources exceed the needs of its people," stated Prof. Henry C. Hagens, head of the department of Agriculture, in the morning convocation, Oct. 28.

Prof. Hagens went on to say, "Save the soil to make American industrially strong."

Mr. Haggan cited from Dr. Vernon Kellogg's article in Collier's Magazine of May 16, 1947, somewhere in the world there are two acres of land keeping you alive. They may be fine, fertile, productive, or they may be skimpy, eroded acres—but whatever they are, two acres yours and they are all you will ever have—save for gifts or loot men. Only 11 per cent of the world's land area is arable, or fair food production, a total of 4 billion acres. The world has 2 billion people, divide the 4 billion increased to three-fourths of the people. In America we have slightly more than 2 acres per person to grow our food and is why the world is looking to America for food.

The article mentions is breaking records in crop production as it did all through the war. Soil was pushed to the limit for food and industrial crops alike. The corn crop for 1948 is estimated at 3,258,000,000 bushels and the wheat production scarcely over 1,000,000,000. Add to this drain on the soil for plant food that which is lost each year through erosion and the sum is appalling. Bennett states we lost 65,000,000 tons of plant food annually through erosion and this has a present day market value if it had to be purchased of approximately $2,000,000,000.

Mr. Haggan also mentioned that it takes nature about 500 to 1,000 years to form 1 inch of soil and more than this is often lost in one heavy rain in the poor farming practices. He also mentioned that the United States has been organized last April by Tom Dobyns had furnished the music for this year's Homecoming at the College gym.

The band, a strictly volunteer group, organized as an independent group last spring and has since played to some of Eastern Kentucky's largest dance groups.

The organization now has a more complete library of music and modern arrangements which they plan to offer to the public at future dates.

Much work in this group are: Tom Dobyns, Dublin, Va., Jack Dick Watson, Louisville; Reigo Shipley, Huntington, Ind.; Bill Hall, Ashland, trumpet; Carroll Hall, Ashland, trombone; Dale Mercer, Huntington, Ind.; Piano; Carl Fair, Morehead, string bass; Howard McCann, Ashland, drums.

## Many Earn As They Learn At Morehead

According to the records in President Baird's office, there are 29 students employed in extra-workships at the beginning of this month. However, this number has been diminished by two and two stands at 31.

These students have the opportunity of earning a part of their college expenses by their room rent, or both. The work which is available is found in cafeteria, dormitories, offices and other buildings.

Some students can work no more than 29 hours per week on outside work and carry 12. Their previous record must give promise of successful college work. They can only work as he per and their average mark is "C" or better. Any student's employment may be terminated at any time if his or her assignments are unsatisfactory or he is required to report for work regularly and no substitutions are allowed.

## Mr. Caudill Reports On Publicity Work

W. M. Caudill, Director of Public Relations, spent last week in Pike County visiting high schools and attending teachers' meeting. He gives a glowing report of the organization and high type school work done in that county. He is convinced that a higher percentage of the present seniors will enroll in college next fall than any recent record shown for the county. He thinks Morehead College will have by far the largest enrollment from this county in its history. They are convinced that this is their college and are determined to make it the best.

The high school principals and teachers are doing an excellent piece of work. They are so sincere in their work that the students realize the need of higher education and seem to be determined to continue their training after high school graduation.

Mr. Caudill has visited high schools in other counties and finds the same spirit prevailing there. He says the principals and teachers seem to be more interested than ever to do a real constructive job. The students have accepted the challenge and are just as determined to climb to the top. They realize they must be well qualified to successfully cope with the leaders in this complicated and changing work of ours. They are determined to answer the next question of 1960 in the affirmative, "Are you a college graduate" This is what the world will be demanding of all who occupy influential positions at that time. The "must" question is beginning 21 years ago. "Why consider other colleges when you can enter Morehead State?"

## Tomorrow Offers $500 For Story

**Purpose To Encourage Creative Writing**

A story contest for college writers will be conducted this semester for the third year by the literary magazine, Tomorrow. Purpose of the contest is to encourage new creative writing talent and to give young writers the opportunity to have their work in print. The best story will win $500 as first prize, the next best a second prize of $250. Prize winning stories will be published in the May and June issues of Tomorrow. Stories will be considered for publication at the magazine's regular rate of $125. In providing additional opportunity for college writers, Judge of the contest will be the editors of Tomorrow. Judges are the editors of Creative Age Press, book publishers.

The high caliber of Tomorrow's fiction has won the approval of literary critics such as Harold Bridcell and Harrison Smith of Saturday Review of Literature, and for the third consecutive year Martha Foley has selected Tomorrow's stories for inclusion in collection of The Best Short Stories. The 1947 volume, just published, includes 20 of Tomorrow's stories published by Tomorrow during that year.

Rules for the contest are simple. It is open to all officially enrolled undergraduates in the U. S. and Canada. Length of number of manuscripts a single contestant may submit is unlimited. Manuscript should not exceed 5,000 words, and the phrase "College Contest" on the author's first page. College and mailing address must appear on both manuscript and envelope. All entries must be accompanied by a self-addressed stamped envelope. Closing date for the contest is December 31, 1948, and entries must be postmarked prior to that date for consideration.

*Beach Lots*

The 320 Florida beach lots, lying largely between Lake Powell and the Gulf of Mexico, offered for sale by the Government last summer, have all been spoken for by veterans, according to the Bureau of Land Management. The public was to have been given a chance to bid on the lots Oct. 22 if veterans did not claim them all.

RECALLING "NUTS" TO NAZIS AT BASTOGNE . . . Military Order of World Wars convention brings together Brigadier General Anthony McAuliffe of Bastogne, who are re-fighting the old battle at Miami Beach, Fla. In center is Maj. Gen. Anthony McAuliffe, who commanded the 101st Airborne division at Bastogne and who won immortality when he replied to a German surrender demand with a single word, "Nuts!" At right is Col. Robert A. Ballard, and left, Maj. St. Julien Rosemond.

## Homecoming Attracts Many To Campus

**Cecil Crowned In Highlights Of Day's Activities**

The traditional Homecoming was held Saturday, November 31, at 1 p. m., in the college gym. The dance is an annual feature of the Homecoming Festival which begins with registration.

Always one of the highlights of the social season at Morehead, this dance upheld former traditions.

The honor of Homecoming Queen was bestowed upon Miss Cecil Crouch of Olive Hill.

Music for the occasion was furnished by the well-known Blue and Gold orchestra.

Hundreds of graduates and former students of Morehead returned to the campus Saturday, Oct. 30, for celebration of the 21st annual Homecoming.

The gathering was estimated to be the largest to attend as many reports.

The opening convocation got under way Friday evening with the "M" club dinner held in the Greyhound restaurant.

The campus was a beehive of activity Saturday morning as hundreds of old grads milled around the campus hand-shaking and renewing acquaintances. Saturday's program also included the Eastern-Morehead soccer game here cafeteria at 11 a. m.

Climaxing the event came Saturday afternoon when the Morehead Eagles met the Eastern Maroons on the football field in the battle for possession of the Governor's Cup. The Eagles battled the hard-fought till to see Eastern hand Morehead a 7-0 defeat and thereby blow with the coveted relic.

The Alumni Banquet was held at 6:30 p. m. in the college cafeteria.

## Contrasts In Education By NEA Journal

The American Way—
In Democracies
1. A school for democracy.
2. Faith in education.
3. Respect for differences of opinion.
4. Critical students of propaganda.
5. Premium on originality and thinking.
6. Personal freedom exalted.
7. Enlightment through radio and television.
8. Variety of reading encouraged.
9. Teachers free to teach the truth.

The Totalitarian Idea—
In Dictatorships
1. A school for dictatorship.
2. The dogmatist decreed.
3. Planned hatred for those in doubt.
4. Blind followers of propaganda.
5. Glorification of docility and intolerance.
6. Personal freedom denounced.
7. To secure uniformity of opinion.
8. Unapproved books banned.
9. Teachers required to propagandize.

(From N. E. A. Journal—Oct. 1948)

Usually when the man has the last word with a woman it's when he apologizes.

## AAUW Gets Results From Elephant Sale

The 11th annual White Elephant Sale, sponsored by the A. A. U. W. was held Saturday, Oct. 23.

Some years ago the A. A. U. W. decided it should do something for the community each year that would unite the organizations of the community, both rural and town, and the school organizations. Mrs. W. H. Rice and Mrs. Mary Claypool, instructors of the A. A. U. W. Art Department, thought of the idea and put the project over. Now practically every organization in Morehead contributes to this annual sale. The proceeds of which go to buy art supplies for 34 Rowan County schools.

The sale this year was reported as one of the largest ever held. All types of things, including furs, clothes, and miscellaneous were donated for the sale by the people of Morehead and Rowan County. The proceeds of the sale were approximately $250.

In connection with this project, Mrs. Claypool, head of the Art Department of Morehead State College, has conducted night classes for mothers and teachers in the teaching of art.

This year The Courier-Journal took over fifty pictures of the sale. Pictures were also taken of the Consolidated School where Mrs. Rice worked with an application donated by the A. A. U. W. Viola Campbell, part-time art supervisor and student at Morehead State College worked with them. Rowan County is the only county in Kentucky having an art supervision for public schools.

On the basis of interest which Mrs. Claypool has done with the art project of this chapter, Miss Viola Campbell was employed to aide A. A. U. W. appointed Mrs. Claypool as State Art Chairman.

## Rader At Meeting Of Civic Group

**Political Science Association Meets Lexington Oct. 21-23**

Dr. Clifford R. Rader, head of the Department of History and Political Science, attended a meeting of the Southern Political Science Association at Lexington, Va., Oct. 21-23.

The meeting held on the campus of Washington and Lee University, was in connection with the celebration of the 200th anniversary of the college. The meeting began on Thursday through Thursday, during which time talks were given on problems to improvement in the south and the general trend of the south country manager plan of government was given. Also among the topics for discussion were the political implications of the Marshall plan and the world organization and the possibility that the movement might lead to an eventual breakup in the south. A paper on "Recent Trends of State Government in Virginia," was read. The executive editor of the Arkansas Gazette gave a talk on "The Not So Solid South."

The business program of the association consisted of the election of officers for the year.

After the conference the University was host to the association at a dinner given in the Robert E. Lee Hotel.

## History Of FTA Given By Dr. Walter

The FTA movement grew out of the Horace Mann Centennial in 1937, and on recommendation of the Centennial Committee was established by a vote of the NEA Representative Assembly. As it is carried on cooperatively by local, state, and national associations.

FTA works in both high school and college. High school programs are provocational and exploratory. They are known as FTA clubs College groups are definitely professional and are known as FTA chapters. They are open to students seriously preparing themselves to be teachers. The FTA National Committee has concentrated its efforts largely in the college field where it provides literature and gives encouragement calculated to stimulate the activities of the various local chapters.

FTA is unique among college organizations in two ways: first, the FTA chapter functions as a local education committee, and the student becomes a junior member of the state and national education associations which will serve him during his active professional life. He receives the journals of these associations and gives encouragement calculated to stimulate the activities of the various local chapters.

FTA is unique among college organizations in two ways: first, the FTA chapter functions as a local education committee, and the student becomes a junior member of the state and national education associations which will serve him during his active professional life. He receives the journals of these associations and gives encouragement calculated to stimulate the activities of the various local chapters.

The Morehead College FTA chapter will meet Monday at 7 p. m. Election of officers and plans and projects for the year's work are being planned. Students preparing to teach are cordially invited to remain the splendid opportunity to hear discussions of problems and civic leadership which members in this organization give.

## Mrs. McClain Speaks In Assembly

**Discusses Problems Of Stricken Europe**

Mrs. Raymond F. McClain, wife of the president of Transylvania College, addressed the student body in the regularly scheduled assembly program, Oct. 21. Her subject dealt with the European tour which she made in Europe with a group of American students.

In her talk she told of her trip over and back, of her visits in the various countries and of the opinions the Europeans have of the United States. She emphasized the fact that the European people are not desirous of being a country of immense wealth in every home and automobiles as typical American can town.

She also explained the various hardships which confront the Europeans of today and the things which must be eliminated before these things can be corrected. She ended her talk by explaining the need for a closer exchange between American and these stricken countries. She also explained how America would learn the truth about America if it were not for students exchanging and that the Americans could help the difficulties facing the Europeans.

## Campus Eagle

Frank Gallenstein has been chosen by the Eagle Committee to be the Campus Eagle for the size of the Trail Blazer. Mr. Gallenstein is a graduate of the Patrick High School, Maysville, and attended Ohio State as a student of the Newman Club, member of the Newman Club, and a member of Kappa Delta Pi and Phi Sigma Pi honorary fraternities the year 1946-47. Mr. Gallenstein has majors in mathematics and physics and will complete his work at Morehead State College in January 1949. He has been employed by Kentucky Electric college work, Mr. Gallenstein lives in Vet Village and is married to the former Miss Maysville. He is also the father of a seven-month old daughter.

## Eagles Scare Eastern In Year's Best Game; Lose Tilt By 7-0

### Wing's Attempt To Score Foiled On Maroon 5-Inch Line

The Morehead State College Eagles gave Eastern's Maroons a great scare and a thrill to the fans in the Homecoming game at Byrne Stadium last Saturday.

The Eagles held Eastern to a scoreless tie through the first half by making more yardage, and also by keeping them on the right side of the goal-stripe. Although the Maroons had been given a margin of two or more touchdowns, they failed to show an equal value in the first half where they almost lost the game. The Hilltoppers outplayed Eastern's 11 by all counts except the 37 yard run for a touchdown. Their entire point in actual yardage gained, Morehead stretched out by a total of 386 while Eastern had a grand total of 249 yards gained. Indeed, 14 first downs to Eastern's 2.

Morehead missed opportunities to score in the first and third periods by bringing the ball to the one yard line. The first opportunity to be halted started as Wing attempted to Maupin on the one yard line. Maupin only held the ball for a few seconds and according to the officials, fumbled. Eastern recovered in the end zone.

The next chance for six points came when Wing, Piketon, Ohio fullback, plunged over the left from the Eagle 30 to the Eastern six inch line on a touchdown. However, the Morehead fullback Weaver, to correct a mistake in the backfield drew a 15 yard penalty. They failed to score from the last down.

The only score of the game came in the third period when Bill Emmett, an Eastern quarterback crossed the goal line through all the Eagles. The extra point was made. In spite of the fact that Eastern scored only a game solitary point, their statistics showed that they were better than anyone had expected of them. But the Eagles were outplaying their best.

A record $1,800,000,000 worth of new construction was started in Pennsylvania, according to the Bureau of Labor Statistics. New construction for the first month were $381,000,000 or 37 per cent higher than for Sept. 1947.

## Our Training Department

Barbara Tolliver, president of the Senior Science Club of Morehead College, has announced vice-president of the Kentucky Academy of Science and will be sponsor-delegate conference which will be held Nov. 19-20, Oct. 23. Following the installation services, a business and social meeting was held at the other delegates from the club were Dorothy Walters, Jenny Lou Patterson, Jerry Lou Patterson, Miss Hazel Nollau.

Failure to a list of high school pupils who made A's and B's in their subjects for the first six weeks period: 7th grade, Carroll Craithwait, Patsy Lane, 8th grade, Mary Ann Hamilton, Bert Hall, Carolyn Jean Harlow and Jimmie Ruth Hall; 9th grade, 10th grade, Lida Lou Clayton, Harold Lancaster, Mary Ann and Nellie Jean Lewis; 11th grade, Jimmie Lou Patterson, Clayton and Paul Dickerson; and 12th grade, James Hall, Ruth Phillips and Bill Rice.

Cheerleaders, three from the Junior High School and three from the Senior High School have been elected by the student body to lead the cheering at athletic events this year. Lida Lou Clayton and Jimmie Lou Wells represent the Junior High. Girls representing the Senior High are Patsy Mobley, Barbara Tolliver and Janet Lewis.

Block plays 12 basketball games, including seven at home, all games to be played in the Morehead gym. A schedule of the home games:

Nov. 5—Georgetown
Nov. 12—Flemingsburg
Nov. 16—Clark County
Nov. 26—Morehead High
Dec. 7—Owingsville
Dec. 18—Winchester
Dec. 21—Male High
Jan. 8—Ashland
Feb. 11—Olive Hill
Feb. 18—Flemingsburg
Feb. 22—Maysville

Games will also be played with Grayson, the date

to be announced later.

Season tickets for high school students will be sold for $1.50 each while during the coming week. Season tickets for adult games, may be purchased for $2.50.

Pre-season basketball practice has already begun, Coach Lindquist reports a good response from all the boys. Although he is losing the entire starting team, he foresees a group of boys who will be good by mid-season. Count of themselves at every practice. A few boys who are reported for practice are the following: Jimmy Lou Patterson, Tom Holbrook, Roy Clemons, Bert Hall, Jimmie Ruth Hall, Calvert, Dickie Staggs, James Lowell Ellington, Jimmie Lou Wells, Jimmie Lou Hill, Tom Wells, Jerry Riddle, Lucien Bess, Harold Lancaster, Eddie Clemons, Bill Clarkson, Jimmie Lou Clayton, J. H. Boyd, principal of the Junior High School and Coach of the county, was a speaker in our assembly last Wednesday. He told the pupils on the subject, "Why Are You in School?" Mr. Boyd's talk appeared before our supervising teachers, representatives of the Board of Directors of the Education Department and the Senior High School. He explained in a very interesting manner the duties of the various members of the school in operation in the Demonstration School. A file will be kept on each of the boys in the system, and Mr. Boyd said the records will be available to the leading educators of our state. Mr. Boyd explained the system upon guidance and education before the group. Mr. Boyd is expected to be taking the lead in Kentucky in the near future.

It is regret that Miss Bonnie has been unable to be with us for the past week because of the recent death of a loved one. Miss Bonnie and fourth grade pupils are temporarily being taught by Miss Ruth Hall.

## EAT PRESIDENT

Presidential campaign is over. The weary candidates have gone to sleep and the voters in the American system of what the old politicians tell us, this has been but a dull campaign. True, a lot of the traditional mud and flowery phrases have been omitted, but modern need necessary that a candidate for public office resort to tricks to gain the favor of the public. Such clean should have little effect on the voter today.

one country such as ours it is not for any one man to decide the suitability of public office. This decision is left of body of people living in a free country. Such is the essence democracy.

ly will know who has been selected as our standard bearer next four years. We will soon know the choice of the public.

ardless of who is selected to lead us through the next four responsibility that rests on him is probably greater than ery president has been in many years. It will probably ever decades before we know how well he has faced onsibilities. But no matter who it is, we owe him our ence or failure of the president we know that such was of the people.

ow not yet how the next administration will fit into of government. There will be successes and failures as our dent performs the functions that have been entrusted to ere are still many unsolved problems that confront the ry which might develop, we should keep in mind that s vested with as much strength as President of the United ould be asserted all the powers due a top ranking official.

## GOOD TEAM—WIN OR LOSE

spectators attend a game of football or basketball and for the home team if it is winning. If it seems to lose they e a clam and talk over the problems of the world, the and the odds on the second race at last year's running ircbill Downs.

s just the trouble. Most people feel that a team must be ad team to be worthy of support, and a team which stands a winning team should not be in sports at all. If the only when there is a chance of victory and there is very little competition. This would really take the sport game.

likes to see a hunter shoot ducks on a pond nor does one traps used. Neither does one like to see a team play which e sure thing.

ckets are positive that no one has enjoyed a game we did the Hawg Rifle tilt. They played a swell game, in ent of the season, and were proud of them. Our team is and we pull no punches to make it known that we can of the Eagles when they are down as well as when they ntend a team which is getting the breaks and one which gles played Saturday is not luck. It is the result of hard and fine teamwork.

he point is that if the team is our team it is a good team. stand up for our things even if they do not measure up to standards of other teams.

## RESTRATION CENSORSHIP

time we ask anyone to write for the Trail Blazer they e stock response, "I would like to but I am afraid that about having the Administration cut most of the meaning ticles." Such a fear is unfounded. We want to know ichools. The fact that it is so common caused it to be the Dr. Pollard, head of Ohio State's School of Journalism at of the Ohio Library. He addressed the librarians at the opening remarks he stated that there should not be adership, but . . . He later said that the editor should ion of policies in the paper, but should be capable of doing did not require censorship by members of the faculty, etc. ed the fact that many college papers were subject to this indirectly by the state. In this case the writer should ed. If he writes things which are contradictory to the gov- ion he is working for, he should be fired by the editor, positive by the students and not an official organ of the ed by the faculty, the administration or the governor, school does not sponsor. If the paper is not a part of the editor is responsible for all things which are said. In our ve the right to stand behind the editor and support him paper of our school must censorship . . . Well, you've gment either! You should have censorship! Censorship ave actually not had an article turned back for the ve do ask that people write things which say nothing ch is controversial and it is really the hand that hands which keeps us going.

## Extra News

If veterans taking advantage of the training under the G. I. Bill of Rights are receiving subsistence allowances to which entitled, it is necessary for VA to receive the essential training reports promptly. VA said the reports must be maintained by the educational institutions or submitted by their employers. VA said one institution in Michigan has a total approximately 20,000 in training, but only 12,000 in Michigan 7,000 in Kentucky.

VA said that subsistence allowances will be suspended for every trainee for whom a report is not received by the 15th of each month. If the report is received after the 15th, payment of the subsistence payments will be withheld until the first of the next period of succeeding months. Trainees entitled to subsistence allowances as of days will be remitted for the days withheld.

# This Collegiate World

New to the squad, fresh from high school, this embryo athlete gave it everything all day. He wasn't the zero, flashing star on the horizon but he tried.

Into the dressing room and the boys were collapsing wearily. Our hero was fresh as the proverbial daisy.

"Heck, I feel as good as I did at practice this morning."

Baleful glances turned on him and the new recruit shuddered inly. "Boy, did I feel awful this morning," said Dally Devotee, Louisiana State University.

Overheard at freshman football practice. A player, after receiving a pass and being thrown by tackled, turned to his tackler and asks: "Are we scrimmaging?"

Freshman courses, like the old gray mare, ain't what they used to be.

"Take for instance, the opener in Philosophy this week. Einstein's theory of relativity was the topic, and the professor had perhaps the shortest definition on record. "When you sit on a hot stove for three minutes, it seems like three hours. But when you sit with your girl for three hours it seems more like three minutes. That's relativity!"—The Daily Orange, Syracuse University.

*Ode to a Borrower*

I think that I shall never see
A fiver that I loaned to thee
A dollar that I could have spent.
For interest of money sent.
The one I loaned to you so gladly,
The same which I now need so badly.
For whose return I had great hope,
Just like an optimistic dope.
Farewell my dollar for like thee
Art not returned to fools like me.
—The Spectator, Macpherson College, Kansas.

Throughout your life, never forget those people who, with one-half your opportunities, would be glad to change places with you; field. (Robert Angus) from the Statehood of "The Magnificent," University of Mississippi.

# Club Notes

*Y. W. C. A.*

The Y. W. C. A. saw a film Thursday, Oct. 28, showing how the missionary work is conditions in present day China. Rev. Kenner, pastor of the Methodist Church and Dr. Miles showed the film. Rev. Kenner made a brief talk to the club. In the business session, Josephine Hill was voted to replace Suzie Robinson Gray as club secretary.

*F. T. A.*

The F. T. A. held its regular meeting Monday, Oct. 18. Short business session was followed by a very inspiring and well delivered speech given by Mr. Wolfe, Director of the Training School. Some of the ideas which he touched on were pointed out by Mr. Wicker.

*Kappa Delta Pi*

The Kappa Lamda Pi held its first meeting of the year Tuesday, Oct. 26. Officers had been elected the last semester of the summer term. The officers are: president, Harold Rose; vice-president, Herbert Rose; treasurer, Walter Price; secretary, Nell Fair; reporter and historian, Sara Mahan; sponsor, Dr. Graves. At the business meeting Tuesday night, Jean Blair was elected secretary to replace Nell Fair who is resigning from the office. At the business meeting, Dr. Witt of the Language Department, of the college gave interesting comparison of the educational system of the United States and Latin American countries. After the program, refreshments were served to the members and guests.

*Beaux Art*

The Beaux Art Club met Tuesday night, Oct. 26 to work on the Hallowe'en party to be held the coming game. Ford Fielding, president, presided over the business session that was held while the crowd worked.

*Attention Club Reporters*

The club editor would like to suggest that the club reporters turn in their club notes immediately after the meeting so that they will get the news of the club published when the Trail Blazer comes out. Too many of the club notes in Box 211, College P.O. at any time and they will be nearly when the last issue comes out. This cooperation will be appreciated.

Tickets, a ten-dollar bill to the grocery these days it about like Confederate money. Let's forget. Once it's broken, it's

"A neighbor's house has just burned and a big crowd came to see the blaze. It was a little worse for the safety of our little newspaper but luckily the fire trucks kept the flames from spreading. Of course, there is another thing of interest just this minute. The Courthouse bell is ringing and hundreds are standing in the circuit court room to hear a murder trial—some in my opinion, just habitually gather there to hear the gossip and perhaps to keep warm."

The above is the first paragraph in a letter from W. P. Hanlan, who with Mrs. Nolan as business manager, runs the Nolan County Eagle at Whitesburg, Fulkey, isn't it?

Whitesburg in Whitesburg and Letcher County? Let me think. Yes, we have three extension outlined lines coming into these districts and hills, one of them a television station of the L. & N., the other two being built by the C. & O. The two railroad companies seem to be striving with each other to get in rich untapped coal fields first.

"As you may already know," dictre rivers, the Kentucky, the Cumberland and the Big Sandy head in this county . . . We do not have any too much land available. Most of it is hilly in the mountains. Valleys are too restricted. hillsides are too steep. But despite the scarcity of good building lots, many new homes of modern design have been built in the last couple of years. Also good business houses. And Neon has a new bank that's doing nicely.

"Local bank deposits are over $2,000,000. Our county population is 42,000. Five high schools. Fleming, Jenkins, Stinnett, Pound (fine settlement school at Pound), and Whitesburg. Corn. And farming! You ought to see the grades shown by the 4-H Club boys and girls at the county fair here by the 4-H Club boys and girls at the county fair here. We take pride in producing fine stuff.

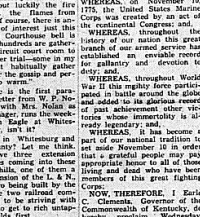
"Oh, by the way, the folks voted last year to build a $25,000 hospital here. It will be completed in the spring.

"We have four civic clubs in Whitesburg, Kiwanis in Jenkins, Lions in Pound and Rotary headed by an undertaker who believes in burying 'em elaborately. Seriously, I have a great liker to crucify 'em (his opponents in politics). He's the fellow I told you who claims he is not getting enough publicity as well as the merchant who thinks the progress of a county paper depends upon how many clubs are doing whatever they do. Also, we have an active unit of Pindergarten, crippled children, community fairs, athletic activities, the usual things.

"I mustn't overlook the fact that we have a fine club room in the basement of the county courthouse, the individual interest in which for good home keeping is fine.

"FLASH! That murder trial I mentioned? Case called off. Changed venue, to Pike County."

The individual, or nation, unwilling to fight for its rights is doomed to slavery.



## Proclamation by Governor

PROCLAMATION
by the
GOVERNOR
OF THE
COMMONWEALTH OF KENTUCKY

To All To Whom These Presents Shall Come:

WHEREAS, On November 19, 1775, the United States Marine Corps was created by an act of the continental Congress; and,

WHEREAS, throughout the history of our nation this great branch of our armed service has established an enviable record for gallantry and devotion to duty; and,

WHEREAS, throughout World War II this mighty force participated in battle around the globe and added to its glorious record of past achievement; other victories whose immortality is already legendary; and,

WHEREAS, it has become a part of our national tradition to set aside November 10 in order that our people may pause in appropriate honor to all of those living and dead who have been members of this great fighting corps;

NOW, THEREFORE, I Earle C. Clements, Governor of the Commonwealth of Kentucky, do hereby proclaim Wednesday, November 10, 1948, as

MARINE CORPS DAY IN KENTUCKY and call upon all Kentuckians to observe this day and participate in fitting ceremonies in honor of these American heroes.

Done at Frankfort, Kentucky, this the twenty-first day of our Lord one thousand nine hundred and forty-eight, and in the year of the Commonwealth, the one hundred and fifty-seventh.

EARLE C. CLEMENTS,
Governor of Commonwealth of Kentucky.

# Ups and Downs

We are thankful to those who made the Homecoming such a success. We are thankful to the return to such a warm welcome when we have graduated.

oOo

Let us suggest that the report cards have various clubs try to keep their news free of adjectives. It is difficult enough to get all the news straight without the added confusion of news from ads. And ads cost money.

oOo

Remember that there are severe penalties for an absence immediately before or after a holiday. So be sure to be absent.

oOo

The souvenir of the Trail Blazer which was available at the Eagle-Eastern game was made possible through the efforts of the editor and Mrs. Parker. We spent several hours in the Blazer worked until the half hour before the game, in order to get things ready. Thanks for the cooperation.

oOo

An advance sale of students' tickets to the Louisville Philharmonic String Quartet will start in a week or so. Don't be afraid of losing your ticket. We plan to keep a complete record of all the tickets sold and those that will cost only one dollar and that fee will be collected when you call for the Trail Blazer Queen. And she is entitled to no orchid from Bradley's Greenhouse. They are donating the orchid as a contribution to the Trail Blazer.

oOo

For a summary of the cleanup day see next issue and picture which were not available for this issue. There have been and they are good.

# Poets Squared

*Edited By Wm. Vanhoose*

Sometimes we get discouraged with life here and us to think that we are going through one of the worst periods in the history of mankind. It often seems that we are supposed to perform miracles in order to meet the challenges of life. Often we do perform miracles. When things look dark and the going gets rough, we roll up our sleeves and go to work. We are all like that. But the world is in a crucial and the tempo slow and something inside us goes bump.

Why? we ask. It seems to me that life is never to be like this. The homo sapien is not meant to have too much peace, security and happiness.

We need challenge! Challenge from the tops of the highest mountain; challenge from the depths of the deepest. We give lifeless, useless, stale if nothing stirs us.

In my collection of verses is some across these lines that may help you to move when you are wallowing around in the depths of despair. Perhaps life is without title, or author will help you to remember that you can shape your own destiny if you will.

oOo

Here in the teeth of this triumphant wind
That shakes the naked shoulders of the ground,
From the high mountaind,
Making a keyboard of the earth it strikes
From clattering tree and hedge a separate sound.

There witness for me that I live and die!
All things that hurt me
And all things that healed.
Here in the edge of this new day in March,
Here at the edge of this new broken field.

# Mrs. Vet

When buying oysters be sure they are absolutely fresh. For this reason a cup of tomato catsup is often preferred, while the large size best for cocktails. In preparing oysters, run them through the fingers to detect any bit of the shell may be removed, then rinse in cold water.

*Oyster Cocktail*

Mix together 1 finely chopped onion, 1 finely chopped green pepper, finely chopped with 4 teaspoons of lemon juice, 1 cup of tomato catsup, adding salt, pepper and paprika to taste. A little horseradish and 2 drops of tabasco sauce. This amount will be sufficient for 2 dozen oysters. Serve deviled crackers with the cocktail.

*Fried Oysters*

2 dozen oysters
2 eggs
Fine bread crumbs
Seasonings

Wipe each oyster dry and sprinkle with salt. Beat the eggs just enough to mix. Dip oysters into the egg, then drop each oyster into the bread crumbs and should be spread on a plate. When coated with crumbs fry in deep fat. Drain on paper, and serve with the following sauce:

Sauce—

Rowan County is in the large glass land belt extending from Greenup County through Carter and Rowan to Pike. Many fine glass sandstones are suitable for crushing into molding and glass sand. With coal, limestone, and cheap power available, glass manufacturing should prove a success.

Sandstone—

There is a great quantity of sandstone in Rowan County. Bluffs, chimneys, fireplaces, walls for dwellings, schools, court house and rough structures in the area are all there in much fine grained sandstone which could be used for glass or molding. Much of it is feldspathic and micaceous, and much is fairly uniformly grained. However, freshly cut blocks season well and become resistant. The most important is the Buena Vista member of the New Providence quartzite at Farmers, which outcrops at Morehead and Stone Route 32.

Development Possibilities—

1. Glass manufacturing, using sand deposits or crushing friable sandstones.

2. Sandstone quarries, building stone; crushed for building or glass sand.

3. Quarries of limestone, for road metal, R. R. ballast, various construction uses, and theoretically lime. Portland Cement.

4. Portland Cement plant, using limestone from the Mississippian.

5. Sand and Gravel Company, for road material, R. R. ballast, building material, molding sand, and glass sand. Material from these deposits is unassorted and weathered overgoes of the Pottsville.

6. Furniture Factory, lumber and labor in quantities.

7. Veneer Factory, shirts, pants, socks, shoes. Easy to secure labor and building materials.

8. Paper Mill, at Cave Run where the dam is to be built on the Licking River at that point.

9. Power plant to generate fuel and raw materials are in relatively close proximity. Demand for much of the products is now sufficient; capital is available. Labor is cheap but not present to be the massing element.

# Library Notes

*By Ione M. Chapman*

Last week I was privileged to attend a meeting of the Southeastern Library Association held in Louisville. I learned some rather interesting and helpful facts that I think it would like to pass on to you.

First, the statement was made by Ralph McGill, editor of the Atlanta Constitution and one of the officials of the Federal Reserve Bank (of which I am not sure, but I remember it) have worked out a plan whereby the cost of financing the educational level of a given community can be paid with a loan to be repaid, with accuracy the savings, the bank officials say, in increased living standards of living. Next seems to be a great deal of interest and challenges for those of us who are working with adult education. That being true, our efforts to reach out into all corners of the world should be unrelenting.

Then, from the state department, the following facts have been released. The 10 southeastern states have seven million children in the 6-18 of the elementary and secondary age. A school census of 1940 showed which shows that about one million of these children have the benefits of a library, thus leaving six million without. So the challenge is there for some library development. Can there be? Yes, there can be, but we need federal aid to education! Let's write our letters and be looking for a challenging proposition, that can be put over. Another fact that is of a librarian. American Library Association has set up and presently 16,000 library positions open. Approximation, there is sufficient money for industrial uses for building, but not for educational uses. It is very possible the making of Portsmouth, Cement.

Petroleum—

Productive "Salt Sands" of Mississippian are not present in the county.

Mississippian lime is the first sand encountered in the "Big Lime" underlying the Pottsville. Next comes the "Berea" sand and with oil and gas present in some times gas. Then the porous Bedford cherty-oolitic limestone containing the Big Injun sand, a well known producer of oil and gas. Then comes the Corniferous 2,000 to 2,800 feet below the top of the Mississippian strata.

The Clinton sand of Silurian time is very productive in parts of Eastern Ohio but unproductive in Kentucky. Trenton rock in Eastern Kentucky. Few wells to date have penetrated this deep Silurian horizon no other important, oil or gas horizons are now known.

# Luttrell Tells Of Advantages For Rowan Development

*The following is the second and concluding article by C. D. Luttrell, concerning the natural resources, business outlook and development possibilities of Rowan County and its people.*

Location—Morehead is located 110 miles east of Cincinnati; 65 miles west of Ashland; 70 miles northeast of Lexington. It is in latitude north 38 degrees and 38-30; longitude 83-15 and 83-42. Elevation between 800 and 1,000 feet above sea level.

Transportation—Morehead is located on the Ashland-Lexington-Louisville Division of the C. & O. Railway. It has rail connection at Ashland with the Ohio River via the Big Sandy Division of the C. & O. to the Atlantic seaboard or Newport News; the Cincinnati Division to Chicago and the west and northwest; via Columbus to Lake Erie.

Freight rates—Freight rates are to advantageous to most industry.

Taxes—Questionable, Intangible high.

Population—Morehead has approximately 2,500 population. Foreign born and Negro population negligible. Additional labor is available from nearby towns and from rural districts. There is no industrial employment for labor.

Industries—Clay products and lumbering.

Living Conditions—The city possesses public schools, a state college, adequate hotels, churches of the usual denominations, paved streets, sewers, and other utilities. Drinking water is of good quality and adequate quantity. Doctor and dental service is adequate. Several restaurants might be listed as: No good quality meals. Adequate quote for home heating and none for industrial use; and high prices for staple merchandise.

Natural resources developed in the Cumberland National Forest Preserve which is within the large area of timber lands of Eastern Kentucky. Coal deposits are near; coal is near at large power plants and can be within easy piping distance; and there is fuel oil and natural gas near-by.

Clays and Shales—

Along the Salvation outcrop on Christy Creek are fine clay deposits and Estille shales, of high quality, excellent for refractory purposes. Fine clay in the Pottsville Cross is found abundantly above Pottsville, and in the vicinity of our genial president at Lee Clay. There are salvage reserves of small amount of coal that outlie the Big Lime. Fine clays found in the Sunbury were once distilled for oil near Morehead, and still have a potential value if and when.

Iron ore oil supply dwindles

Coal—

Coal is found in Rowan County because the upper Pennsylvanian rocks are represented in the county. Some No. 1 and 2 gas is found in association with the Pottsville fire clay.

Gravel—

Gravel maybe secured in abundance from stream beds, and from Pennsylvanian and Mississippian outcrops of the Pottsville.

Iron Ore—

Iron ore may be present in the county. It occurs in the Maxville member of the upper Mississippian and in the Vanport limestone of the Allegheny lime contains high grade ore in Lawrence County, but not present in Rowan, being from 10 to 40 feet above the Pottsville.

Limestone—

Limestone deposits in Rowan County deposits in Rowan County Salvation deposit along Christy Creek and Pottsville is being quarried for road metal. The Mississippian above Clearfield and Sandy formations in Carter and State Route 60 is worked by my Kentucky Geological Survey. The only Service for road construction. There is sufficient limestone for industrial uses for building, but not for educational uses. It is very possible the making of Portland Cement.

Petroleum—

Productive "Salt Sands" of Mississippian are not present in the county.

Mississippian lime is the first sand encountered in the "Big Lime" underlying the Pottsville. Next comes the "Berea" sand and with oil and gas present in some times gas. Then the porous Bedford cherty-oolitic limestone containing the Big Injun sand, a well known producer of oil and gas. Then comes the Corniferous 2,000 to 2,800 feet below the top of the Mississippian strata.

The Clinton sand of Silurian time is very productive in parts of Eastern Ohio but unproductive in Kentucky. Trenton rock in Eastern Kentucky. Few wells to date have penetrated this deep Silurian horizon no other important, oil or gas horizons are now known.

## So I Am Told

By Edgar Meade

Morehead hit a losing streak after they defeated the Georgetown Tigers Oct. 1, for a score of 30-12. The following week the Western Hilltoppers visited the Eagles and handed a defeat at the score of 19-14. Jerry Wing, Eagle wingback, made a gain of about 82 yards on a runback (the most spectacular event of the game) when he was pulled down on the Western 4 where he fumbled the ball, but big John Mericle, 235 pound tackle was right on hand to recover for Morehead. On the next play the time ran out before the Eagles could get the ball over the goal line. This was Morehead's unlucky break that cost them the game.

October 23, the Eagles showed outstanding maneuvering when they were visited by the Cedarville 11, by defeating them by a score of 49-0. Morehead scored in each of the first two periods and added two more six pointers in each of the last two.

The Big Blue team scored its first marker in the early part of the first quarter when Joe Barnes passed to Merle Nichols in the end zone. Another pass late in the first half from Jerry Wing to Homer Bickers, who was downed on the Cedarville two, led to the second touchdown. Bickers plunged through the line on the next play. Wing's hurling arm accounted for the third marker after he and his teammate marched to the Cedarville 17 with three successive first downs. Bob Walthers took the ball over for the touchdown. In the same period, Jim Fraley, 209 pound freshman got through the Cessnine line to block a punt, the ball rolling dead on the Cedarville three on a fourth down which gave Morehead the ball. Tommy Chrisler, 175 pound junior, carried the ball over for another Eagle score.

Fitzhew scored early in the fourth from the two yard line after carrying the ball most of the time from the Cedarville 44. A fumble-filled game later in the fourth quarter when Bobby Perkins, 165 pound freshman of Newport, intercepted a pass from a Cedarville fullback and lateraled to Tom Griffin, one of Morehead's finest backs, who picked up a key block from Corky Kirtley on the 30 yard line, and carried the ruskin 90 yards for a touchdown. With this final score the game ended.

Harold Mullins kicked four of six placements for the Eagles extra points.

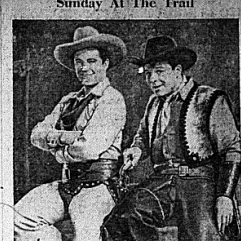
Coach Johnson says the boys that have been practicing basketball will be cut down to about 18 boys. He says "at the present, we are overcrowded. After the football season ends, we will come all boys that have possibilities of making the squad to return for try-outs. We will definitely have a freshman team this season. I will be able to use about six more men, for a total of about 23 on the squad this year."

During practice on the hardwood, "Big Bill" Martin is showing considerable improvement in his footwork over last season. "Sonny" Allen and Don Hutton show expert marksmanship from around the midstripe this year as in previous years, which will prove to all of Morehead's opponents that forknife bookeepers are not to be underestimated.

A brief word on the cheering section. The Pep Rally Friday night was a great improvement over the previous ones. There's no doubt about it, we have one of the finest pep bands in the state of Kentucky. I think I can speaking for myself and many others on the campus that we owe the most powerful exhilarating cheerleaders in the history of the college. We find great cheering talents in Betty Carroll of Morehead and Carole Sue of Louisville, Joan Oertel of Morehead, Bernie Lewis of Wurtland, Lois Carter and Dorothy Swinford of Morehead and Carole Farkes of Ashland. We dolf our hats to you, girls. Keep up the splendid work through the basketball season.

What has become of the man who believed everything he saw in print?

About half of the people of the world are busy trying to direct the lives of the other half.



DENNIS MORGAN and JACK CARSON as their users, farsighted, Warner Bros.' Technicolor musical, "The Gays From Texas," brimful of girls, songs and fun. Coming next Sunday at the Trail.

## Eagle Quint Schedules 19 College Foes

The Morehead College Eagles have 19 basketball games scheduled this winter, according to Coach Ellie Johnson.

Additional hardwood battles may be carded before the season opens.

The Morehead College schedule:

Nov. 15—Cedarville Here
Dec. 4—Berea There
Dec. 13—Wesleyan Here
Dec. 15—Centre There
Dec. 17—Evansville Here
Dec. 19—Georgetown There
Jan. 5—Eastern Here
Jan. 10—Maryville Here
Jan. 12—Georgetown Here
Jan. 17—Wesleyan There
Jan. 19—Georgetown Here
Jan. 20—Berea—Berea-Ashland
Jan. 24—Centre Here
Jan. 26—Eastern There
Feb. 4—Berea Here
Feb. 14—Bethel There
Feb. 16—Bethel Here
Feb. 18—Evansville There

## Breckinridge Has 24-Game Basketball Card

A 24-game basketball schedule for the Breckinridge Training School Eagles was released today by Coach Rodger Loughlin. Thirteen of Breck's games will be played on the college gymnasium floor in Morehead.

The schedule:

Nov. 8—Holy Rosary Here
Nov. 15—Farmington Here
Nov. 20—Clark County There
Nov. 22—Owen County There
Dec. 2—Olive Hill There
Dec. 4—Mt. Sterling There
Dec. 9—Owen County Here
Dec. 11—Carlisle There
Dec. 16—Farmington There
Dec. 18—Raceland Here
Dec. 21—Ravine There
Jan. 6—Olive Hill Here
Jan. 8—Grayson There
Jan. 13—Grayson Here
Jan. 20—Maysville There
Jan. 22—Mt. Sterling Here
Feb. 3—Maysville Here
Feb. 5—Morehead State Here
Feb. 17—Mt. Sterling There
Feb. 19—Mt. Sterling Here
Feb. 24—Raceland There
Feb. 26—Ashland There

## Army Needs 35,000 More Officers

### Full Information May Be Obtained At Martindale Building

The Department of the Army has announced that it is urgently in need of an additional 35,000 officers between now and June 1, 1946. The failure to meet procurement goals, if continued will soon result in this situation becoming critical. It is believed that one of the chief reasons for this shortage is due to the lack of information on the part of the men who are graduating from service.

One reason that has been put forth repeatedly by reserve officers as their chief reason for not volunteering for extended active duty is that they have no guarantee of civilian re-employment upon completion of their three years tour of extended active duty. This request has been answered by the Division of Veterans' Re-employment Rights of the Department of Labor. Reserve officers who volunteer for recall to extended active duty for three years are entitled to re-employment rights.

The chief legal officer of the Department of Labor, has prepared a statement, interpreting the rights of enlistees or persons called to active duty. This will, of course, apply to officer personnel as well as enlisted personnel.

It establishes a similar three year limit of the reservists' tour of duty (involuntary extensions excepted) if he is to retain re-employment rights.

Any reservist entering service between June 24, 1948 and June 24, 1950, will have re-employment rights so long as he is released from service within three years after entering, or as soon thereafter as he is able to obtain his release.

The Morehead Recruiting Station office will be glad to undertake the responsibility of informing employers of their responsibility and reservists of their potential, re-employment rights. Either employers or employees may be referred to this office for information or assistance. All inquiries should be addressed to Mr. John W. Bowers, Division of Veterans' Re-employment Rights, 331 Republic Building, Louisville 2, Ky. For further information contact the U. S. Army and U. S. Air Force Recruiting Station, Martindale Building.

## SS Benefits Ignored By Many People

### Godbey Says Eligible Persons Are Not Filing Applications

"Many people eligible to receive Social Security payments are not getting them, simply because they fail to fill out the necessary application forms." This statement was made today by Horace Godbey, manager of the Ashland office of the Social Security Administration.

"There is a widespread belief that Social Security payments start coming automatically when an insured worker retires or dies," said Mr. Godbey. "This is not true. Since millions of workers are insured under the Social Security Law, it is not possible to set up a system which would record automatically the retirement or death of any insured individual. The retiring worker, or his survivors in a death case, must get in touch with the nearest Social Security office and actually apply for benefits.

"Some people think that employers look after the filing of applications for retirement benefits for their aged workers and that funeral directors take on the responsibility of filing applications for the survivors of deceased workers. This is not correct. The worker or his survivors have this responsibility," Mr. Godbey stated.

"When a worker reaches 65, he should inquire at the nearest Social Security office about his rights, whether he continues to work or not. Once a worker reaches 65 and is fully insured in the system, he is entitled to benefits for any month he is ill, unemployed, or taking an extended vacation. When an insured worker dies at any age, his family should inquire immediately. Delay in filing an application promptly is quite likely to result in lost benefits, since they can be made retroactive for only 3 months," he said.

Employees of the Social Security Administration assist in the preparation of claims applications without charge.

## Size Is Main Problem In Cyclo Counties

### Rader Tells Of "Small County" Difficulties Here

In this column in the last issue of The Trail Blazer, attention was called to the fact that in so far as area is concerned, the counties of Kentucky are among the smallest in the nation. It was further noted that this is mainly a consequence of the fact that the county system as it exists today was established well before the days of modern means of transportation and communication. The prevailing idea of that time was that no county should be so large as to make it impossible for a citizen to travel from the most distant part to the seat of the government and back without the necessity of "paying for a overnight's lodging." That of course, was a perfectly good and just principle, as indeed it still is, but without violating that principle the number of counties could be reduced to a third of their present number today.

The smallness of Kentucky counties becomes even more impressive and significant when untasured and compared in terms of population. On the basis of population, just how do the counties in Kentucky appear when held up alongside the counties for the rest of the nation? Based upon the United States Census of 1940, the average population of the 3,069 counties within the United States was 47,202. The same census sets the population of the State of Kentucky at 2,845,627. On the basis of this figure, the average population of the 120 Kentucky counties is 23,713, or not a great deal more than half of the average for the entire country.

Measured by the population estimate as of July 1, 1946 by the Bureau of Census, the most recent population figures available, Kentucky counties fare even worse in comparison with the national average. This estimate places the total population for the state at 146,114,000, an increase of 11 per cent over the 1940 count. This figure raises the national average of county population to 46,616. The same estimate places the population of Kentucky at 2,819,000, a decline since 1940 of close to 1 per cent. On the basis of this estimate, the Kentucky average stands at 23,492, almost exactly half the average for the nation as a whole.

But this situation in Kentucky is even more striking than the simple comparison between the state and national averages would indicate. Actually the average for the state creates an erroneous and misleading impression because it can hardly be considered as typical of the counties in the state. Actually 85 or close to 75 per cent of the counties are below the average for the state, and 22 of them have a population of less than 10,000. The largest county in the state is Jefferson with a population of 383,129 and the smallest is Robertson with 2,419 inhabitants. Government, like most types of business enterprises, is most efficient and economical when operated in units of sufficient size to make the maximum use of all its officials, agencies and facilities. Certainly this state is too small in both area and population to require 120 separate sets of county officials, school systems, courthouses, jails and the like. There is no evidence that the quality of county government is any better in the small counties than in the large ones. On the contrary, the general feeling of the close observers of local government throughout the United States is that the highest degree of economy and efficiency is to be found in the larger units.

*U. S Payroll*

The Government's civilian payroll now costs more than $500,000,000 a month and was still climbing in August, according to the Byrd joint congressional committee on governmental economy. A total August personnel of 2,130,383 persons, an increase of 13,332 over July, was reported.

## On Fashion Now

The suit of this season can be worn for all kinds of occasions. It can be dressed up or down with different accessories, dress blouses and hats.

If the budget is limited, a good suit, basic dress and all-purpose coat will provide the necessary items for a wardrobe.

*Rocket-Missile Tests*

The Navy has disclosed that it has a sta-going rocket laboratory from which 14-ton V-2 missiles can be launched. The vessel, the converted sea-plane tender, Norton Sound, will be used "to widen the horizon of upper atmosphere research through rocket-firing experiments far out at sea in safe, isolated areas at various latitudes, extending from the Equator to the Polar regions, that are not feasible for land tests."

There are rackets that are legal so far as the law is concerned.

## The Draft

A pool of more than 2,000,000 young men is now available for drafting into armed forces of the nation. These are the non-veteran, single men between 19 and 25 who signed up for the draft between August 30 and Sept. 16. Registration of all men 18 through 25 totaled 8,584,983, but the big gaujority of them are ineligible for military service.

It's a funny world. Prices keep going up on things we can't get, and labor keeps demanding more pay for doing less work.

You can tell a courteous person by the way he, or she drives an automobile: or can you?

## World Affairs Club Is Formed Here

### Students Organize For Civic Work

The organization of the World Affairs Club was completed at a meeting held Monday, Oct. 25. This was the third of a series of meetings called to get the club organized and the programs under way.

The World Affairs Club is founded on the principle that well informed, active citizens are a good citizens. It is the purpose of the club to promote interest in current events with emphasis upon those of political and historical importance. The discussion of such events and their relation to our country and its policies shall make up the programs of the club.

In order that a student may become a member of the club, he must be pursuing a course of study leading to a major or minor in history or political science or an area of concentration in social science. He is required to have six semester hours credit in history or political science or a combination of the two. He must have an average scholastic standing of 1.5 in his field of study.

The co-sponsors of the club are the Professors of the History and Political Science Departments: Dr. Rader, Dr. Exelbirt, and Mr. Fowler. The officers of the club are Eugene Fox, president; William VanHoose, vice president; Charles J. Palfrey, secretary; Frank Burns, treasurer; and Howard Hall, sergeant at arms.

## Schools To Close For EKEA Meet

### Kermit Roosevelt Is One Of Speakers

The 25th annual meeting of the E. K. E. A. will convene in Ashland Nov. 4 and 5. Kermit Roosevelt, grandson of President Theodore Roosevelt, will be one of the speakers. Others will include, Dr. H. L. Donovan, president of the University of Kentucky, Kenneth M. Gould, editor and writer, historian, New York City, Dr. Joy Elmer Morgan, editor of NEA Journal, Washington, D. C., Boswell B. Hodgkin, state superintendent of public instruction, Frankfort and the Ebonaires, the original Deep River Singers from Redpath, Chicago. All the above celebrities will appear on the program. In addition, each day, there will be departmental meetings for all teachers.

Morehead State College, Breckinridge Training School and the Consolidated and Rural Schools of Rowan County will be dismissed Thursday and Friday so the teachers can attend the E. K. E. A. sessions

## Our Training—

(Continued From Page 1)

ween programs they presented Thursday and Friday. We were pleased with the many parents who were present for these programs. It was observed that many of the parents went to the rooms after the programs to view some of the work the pupils have been doing. We welcome every parent to visit us and many, many times if they will.

Watch for the school safety patrol which we hope will be in action soon. The Student Council which is under the sponsorship of Mr. Black will soon draw plans for the operation of our patrol. The equipment for a five member patrol which consists of Sam-Browne belts, patrol badges, and school patrol signs have already been secured.
