

Seventeen thousand men go on strike in the Philadelphia Ship Yard. These are the headlines that hit you in the face every paper. They are read by every ear by every person in the street. It is terrible and very unparliamentary of those men to strike. They just absolutely quit and refuse to work. Not one of us asks ourselves this question, "I wonder why they quit?" Let us stop and realize that each and every man working in the war plant is working there for the pay he gets, he needs that money that he is earning honestly to support his family, pay his rent, buy food and clothing from Hi-Jackers and Bootleggers that are waiting for him when he gets his paycheck. Most of them pay from ten to twenty-five cents for getting their checks cashed. They are spotted by specially trained clerks in our stores who are schooling in methods as to how to depart the dollar from the defense worker. War workers do not walk out of a plant without a cause, unless a political labor leader is having a little trouble getting something over in Washington and that is very unusual, for they get what they want most of the time. Strikes are caused in war plants by crooked management who are hiding something from the men. What I mean by hiding something is for instance sleepers, kinkolas, and sons and daughters of some political so called big wig. Men working in a defense plant will give a good day's work if they are satisfied with their pay. They will face any kind of weather and work until they drop if they are satisfied. At the present time I am in a plant where the men are liable to be trouble at any time, and when there is the headlines will be the same, "Ten Thousand men Walk Out on Defense Plant that is Vital to Our Winning the War." This is a plant that has hidden union leaders and is using organized labor to get the men in order to get men. But now that the management knows that labor is not taking the headlines, the men are not in major things but the little things. It reminds me of my early school days when I would finish the lesson and if I knew the teacher was on my side.

Breck Smothers Morehead High Vikings, 34-17

Coach Bobby Laughlin's Breckinridge Eagles—ran rough-shod over a fighting, but obviously outclassed Morehead High School Viking squad, Tuesday evening, in the College Gymnasium, 34-17. At the half-time, the Eagles had run up a 21-7 lead over the Vikings, who did much better in the last half by racking up ten points while Breck was making 13. Ellis, Morehead Hi guard, found the range of the basket in the last stanza, to account for three field goals, a total of six points, which made him high-point man for the Vikings. Hicks and Cox, Viking forwards, accounted for 5 and 4 points, respectively. Bill Banks, Breck center, set the pace for the Eagles with 11 points, five field goals and a free throw; and for the Vikings, a close second with four field goals for a total of eight points. In the preliminary, the Breckinridge "B" team of Japan, Morehead High's second string, 29-10. Official was Warren Cooper, ace basketballer for the Morehead College Eagles.

Dr. Sherwood Eddy To Address MC Lyceum Audience

Dr. Sherwood Eddy, who will appear in the lyceum lecture series at the college auditorium on January 13th and 14th, this morning and evening program, is a man of wide experience as a traveler, lecturer, writer and religious worker. He was born in Kansas, and he was young man he became very unusual, for they get what they want most of the time. Strikes are caused in war plants by crooked management who are hiding something from the men. Agromony Field Day To Be Held Here

Rowan County farmers are now planning a one day Soils and Crop School at Morehead, Monday, January 17. Mr. William Johnston, of the Agronomy Department of the University of Kentucky, will lead the morning discussion and will discuss in detail the best varieties of corn and small grains adapted to Rowan County. Varieties are being improved every year, and few farmers continue to use the corn, wheat, rye, barley and oats that they used ten years ago. Mr. Johnston will discuss the present fertilizer situation and will explain how Rowan County farmers can raise 2000 pounds of tobacco per acre. Five new varieties of tobacco have been developed, and Mr. Hunt will recommend the best ones to use in Rowan County. The AAA has announced that all tobacco growers will receive a 20% increase and Mr. Hunt will explain how the farmers can take advantage of this increase so they can get the most dollars from their acreage. Rowan county farmers are well acquainted with both Mr. Johnston and Mr. Johnston as both gentlemen have visited the County on previous occasions.

wanted to get on here and that he was tired of working across the road. The P. D. looked at his badge and informed him that he was all ready working here. It all summed up that the man had been working at one plant for three months getting his checks every pay day, when he had hired in at another plant. What the outcome was, I don't know.

Then we blame labor for not some but all the things that are happening. Labor under the right guidance would be the backbone of the nation. Labor as it is, is not entitled to one tenth of the blame that falls upon it.

DRAFT DEFERMENT

(Continued from page 1)

directed to continue to give grave consideration to deferring men over 22 even though they are non-fathers if they are engaged in critical occupations. Fathers in the 18 to 22 bracket will be considered last in that group, he said, but nevertheless will not enjoy the same liberal deferment consideration as older fathers.

The manpower outlook from Selective Service's viewpoint, Hershey said, leaves no room for optimism. The fact must be faced, he said, that the dividing supply of men available for military service makes the continued induction of fathers essential.

He estimated that about 90,000 fathers were inducted in the last quarter of 1943, which would increase the view of previous selective service statements—that about 40,000 fathers were inducted during December.

General induction of 18-to-22 registrants, Hershey said, will not greatly relieve the drain by the armed services on the Nation's manpower resources, he estimated, 25 per cent of this group probably will be rejected for physical or other reasons. Further complicating the situation, he said, is the fact that inductions have been

running about 100,000 men short of quotas in the last three months.

One change in the deferment status of students, Hershey said, will require that the national register of scientific and specialized personnel of the War Manpower Commission must include the certification of students deferred in special fields.

The deferments of students who will be graduated by July, 1944, will require that they are in medical, dental, veterinary, osteopathic or theological schools, while those graduating after July 1 will be deferred only if they are in chemistry, engineering, geology, geophysics or physics, Hershey said.

From where I sit...
 by Joe Marsh
 Never laughed so hard in my life as when Ben Ryder's white-faced steers broke through the fence out on the pike, with Ben dodging this way and that—trying to get 'em back on the pasture all by himself.
 Ed Carey, Lem Martin and I were headed for town in Ed's car.
 "Hold on there!" I yelled to Ben. "There's three good men here to give you a hand!"
 Well sir, by a little coaxing and cooperation, we got those steers back in the field all right, and the fence fixed, in about order.
 Ben was mighty grateful to us. And it just goes to show how cooperation does it, every time.
 The brewers here in Kentucky have proved cooperation works. As an industry, they make it a point to see that beer is sold the way folks want it, in decent, law-abiding surroundings.
 From where I sit, they're doing a good job. They're mighty jealous of beer's reputation as a beverage of moderation.

AGAIN LET FREEDOM RING

The drive for the Fourth War Loan begins January 18. The goal is \$14 billions. It is the desire of the government that the money come largely from individual investors to help to prevent disastrous inflation.

You have bought War Bonds before, but it costs as much as 20 million dollars to make a single air raid on Berlin, and there are campaigns on many fronts. War is costly, but every Bond you buy hastens the day of Victory.

Buy EXTRA War Bonds now. Back up our boys at the front. Place orders here. We shall be pleased to serve you.

"Ships are essential to Victory, and we shall continue our job of building them at record pace in 1944." — E. G. GRACE, president, Bethlehem Steel Company

SHIPS FOR VICTORY
A WORLD'S RECORD IN SIZE AND DIVERSITY

Bethlehem in '43 built 380 fighting and cargo ships.

Value of the year's program equivalent to 1,000 Liberty ships.

"A SHIP A DAY," with a number to spare, was the record production delivered by Bethlehem in 1943 to the United States Navy, the British Navy and the U. S. Maritime Commission. This program was the greatest in magnitude and diversity ever accomplished by a private builder in the world's history. It marked the fulfillment of a promise made by Bethlehem a year ago to build in 1943 an average of "a ship a day" of major fighting and cargo craft.

The list of ships includes aircraft carriers, cruisers, destroyers, virtually every type of fighting craft, as well as a large number of Liberty ships and other cargo vessels. In addition, Bethlehem ship repair yards covered, repaired, and serviced over 7,000 vessels, a vital contribution toward keeping the Allied fleets in fighting trim.

Measuring the program by Liberty ships, a battleship is equal to forty Liberty ships; and the value of the year's work in Bethlehem's shipbuilding division was the equivalent of over 1,000 Liberty ships.

Part of National Program — Bethlehem is permitted to publish these facts as part of our country's total program. Led by the U. S. Navy and the U. S. Maritime Commission, America's shipbuilding in 1943 has been a national triumph of production.

We salute our fellow shipbuilders and their distinguished records.

We thank our thousands of suppliers whose efforts have been essential to our contribution.

We congratulate the men and women in the Bethlehem organization, in shipyards, steel plants, factories, mines, and in every division, all of whom have had a part in this effort.

Harder Task Ahead — The year's work in Bethlehem's shipyards, steel mills and other departments has been done by 300,000 men and women. More will be needed. Already a larger shipbuilding task has been assigned to us for 1944. We shall undertake that job with the knowledge that it must be done, at maximum pace, to hasten the day of Victory.

38 TYPES OF SHIPS
Program 70% Fighting Craft; 30% Cargo

Bethlehem's total wartime shipbuilding program includes approximately 1,000 fighting and cargo ships, 70% of the program being in fighting craft, and 30% in cargo. These are of 38 different types including the following:

FIGHTING CRAFT

35,000-Ton Battleship	2,100-Ton Destroyers
13,000-Ton Heavy Cruisers	1,620-Ton Destroyers
