Auxiliary Plans Pie Supper To Help Meet Need of County

Each year at Christmas time the American Legion has a pie supper and given to the needy families of the county a huge Christmas basket and this year the Legion Auxiliary is taking over. They are planning a pie supper to be held at 8:00 p. m. on Friday, September 25 at the Morehead High School gymnasium. Everyone, whether a member of the Legion or Auxiliary or not, is invited to come, the ladies bringing pies. Every cent taken will be used to buy supplies for the needy of the county, and Christmas boxes to be sent to the men from Rowan county who are in the service.

County Agent Discusses Cover Crops

12 Rowan County farmers are seeing new cover crops for the first time this year. Barley is being grown as a substitute for corn. Much has been said because they will help build up the nitrogen supply in the soil. Barley is being seeded on these 12 farms because it furnishes more pasture than any other cover crop. Fulwiler winter oats will come out next year, and any other variety known farmers are sowing more cover crops this year than ever before because they have found that these crops prevent erosion and leaching, furnish a large amount of pasture when most needed, and help build up the soil.

Navy To Turn Guns On Clearfield

IT ALL DEPENDS ON ME. The other day a friend who had just returned from England showed me a poster he had picked up. The background is a community story sky, through which the sun has broken to illuminate the figure of a woman standing with outstretched arms, her hands giving up that which can be used as crutches for others on for war-effort and am I buying each side. The other figures are no more than is absolutely necessary, in order that my dollars be used to help fight the battle. Money single links, emphasizing the feeling of uncountable thousands holding hands across the poster on the line "It All Depends On Me."

I have felt humble ever since I saw that poster. This was no challenging "It's Up to You. This is Your War." This was a confession of personal faith, a recognition of personal responsibility. Am I facing the facts that this is my war? It is my way of life that is at stake. I would not want to live in a world that denied those simple virtues in which I believe, freedom of conscience and speech, the honor of the individual, the governing of action by right to worship my God according to my own beliefs, the sanctity of this home rather than might. This is my way of life. It is to be retained, it all depends on me.

Am I working where I can be most useful in this, my war? Am I shirking the job that I should do because it is tedious, or because it will interfere with my accustomed routine? Am I serving in the place where I can be of most good? I must make the most out of my working strength and time, for it all depends on me.

Am I mobilized for this, my war? Or am I clinging to nones

AMERICANS ALL

(Continued from Page One) walks one of the boys and stumbles over the top of a bed which one of the other boys has placed in the floor. You know after he picks the lights go out. After he quits cussing and falling and gets his bed put back up here comes another one which has been to the show. He comes in and sits down on his bed and he doesn't get much more than sit down when down comes his bed, which some one has drawn the head or the foot of his bed. He gets up in bed, here comes another one and goes straightened out and in bed, here comes another one and jerks out his harp and of on the fox chase which I like to hear. I often listened to Curley Bradshaw and De Fourt Bailey play when I was at home.

You know I used to go and see a girl when I was at home put some of my own money in still I was there every day I tried to figure that out one whole night and that was the night I ate too much ice cream and couldn't go see her. Well she didn't say nothing but I couldn't keep from saying something to myself but I knew she would call me down. I went with this girl two years two months and twenty eight days and we never quarreled nor had any trouble at all.

Well I had better get back to the problems of Fort Me Clellan. I have done been through the Michigan training and the score I got would make you laugh and I have also been through the rifle bayonet hand grenades and I like the MI the training and I like the MI the best of all not talking about Uncle Sam's rifles but I just like it best. Well folks that we have had marching training also we were out on the field the other day well it was Saturday which was today and the sergeant which was training screamed out to the rear march three times so fast when they got done turning around I thought he was going to have to untangle the march. Well so long to all the funny stuff I guess there wouldn't be any enjoyment in life if there wasn't any body to act like he had a little life in him but down here they have to have life in them if they haven't they will soon put some in you.

Well mom they feed good down here and it's better the here they have been feeding the last five days or six than they the rest of the time I reckon they think we are leaving and which I think so myself. I don't guess I will be here much longer maybe two weeks and maybe not so long here had a good time down here since I have been here although they are not any girls around here which a soldier hasn't an home with his own. If he can't wait till he gets back he hasn't vice.

It has been reported that a number of citizens have large accumulations of scrap which they are holding for higher prices. These people are unfair and will not be paid more than the price established by the government. Uncle Sam has set the price and you MUST sell at that price. If you know of any

CRUSH THE AXIS!
Here's how we can all help
Hitler and his gangster pals must be crushed, or they will destroy our way of life. The fighting will be done by the armies, navies and air forces of the United Nations. But we civilians can help. We must help.
How? By staying on the job. By doing an honest day's work every day. By not buying or using anything needlessly. By not wasting food, or clothing, or fuel, or other necessities. By driving our cars only when we must. By saving every cent, every dime, every dollar, that we can and investing them in War Bonds and Stamps.
We dare not forget even for a moment that Dictator Hitler, with his National Socialist government, controls business, industry, the press and radio, the life of every individual, in all occupied Europe. There is no personal freedom and privilege. Wages are low. The level of living is far below the American standard.
The free enterprise system which offers every American, rich or poor, opportunities for success cannot exist under the National Socialist form of government. So we must see to it that such government never gets a foothold in our land.

All America Knows Budweiser... but Few Know This

FROM GLACIERS TO GLIDERS

Thousands of retailers of ice cream and frozen foods are using equipment made by our Refrigeration Division—a manufacturing activity which was developed from our years of experience in making ice in glacier-like quantities needed for the brewing of Budweiser.

This equipment is helping to keep America's foods fresher and more nutritious. Today, however, orders for ice cream and food cabinets will have to wait, for this Division is working all-out on glider wing and fuselage assemblies for our Army Air Forces.

Year after year, we have striven with research and resources to better the methods and facilities for brewing Budweiser. To do this, a laboratory specializing in fermentation and nutrition was necessary. Discoveries made in the laboratory and in the plant have led to the development of products contributing to human necessity and progress. Some of these products would appear to have only a remote relationship to brewing, yet, they are the result of scientific research into many allied fields.

Endless research in making the world's leading beer has led to other products

- VITAMINS, B COMPLEX**—Our plant is one of the world's largest sources for manufacturers of pharmaceutical and food products.
- VITAMIN D**—Anheuser-Busch produces enough of the basic material for Vitamin D to supply the entire American market.
- BAKER'S YEAST**—We are one of America's biggest suppliers of standard and enriched yeasts and malt syrup used to make bread.
- CORN SYRUP**—many millions of pounds annually for America's candy industry.
- SYRUPS**—for food, table and confectionery uses and special syrups for medicinal purposes.
- STARCH**—for food, textile, paper and other industries—millions of pounds annually.
- VITAMINS FOR LIVESTOCK**—We are America's biggest supplier of yeast vitamins used to fortify animal feeds.
- DIESEL ENGINES**—Adolphus Busch, founder of Anheuser-Busch, acquired the first rights to manufacture this revolutionary engine in America and thus started our great Diesel industry on its way.
