Pulpwood Now More Precious Than Gold

A member of Congress has made an observation that is more profound than he probably realized. It was that pulpwood is more important to this country now than gold.

The congressman was Rep. Shafer of Michigan, and he was making a proposal that the government's gold policy with regard to Canada be changed so that Canadians would transfer from gold mines to pulpwood cutting and thus increase the production of newsprint.

The ancient legend of Midas illustrates the worthlessness of gold as a substitute for living things or for the food we eat or the clothes we wear. It might well be brought up to date to include pulpwood.

No amount of gold could take the place of the thousands of military articles made of pulpwood. Gold cannot be made into gun powder. It would be wholly unsuitable as containers for food and medical supplies, or as shell cases.

And imagine the discomfort of a flier with a vest of gold, or a soldier with a helmet lined with gold. No, as military men have observed, paper is a substitute for many things, but there is no substitute for paper. And pulpwood makes paper. Gold is but a medium of exchange or an ornament, while pulpwood is a fighting weapon of war.

FSA Administrator Gives Advice To Rowan Committee

Says Human Destinies Are Involved In Their Actions

"Human destinies are involved in your decisions," Frank Hancock, North Carolina lawyer and former Congressman who recently was appointed national administrator for the Farm Security Administration, has stated in letters to W. H. Click of Route 3, Morehead, W. F. Wells, Route 2, Morehead, and George Ellington, Scranton, farmers who are members of the Rowan County FSA Advisory Committee.

The administrator, outlining his plans for the FSA, stressed the importance he attaches to the county committee's part in the job of increasing the production of essential war foods through the rehabilitation of low-income farm families.

"In addition to the tasks of certifying the eligibility of farm ownership applicants, and the issue of farm ownership farms which you have performed so well in the past, you have recently been added the duties of passing upon the eligibility of applicants for rehabilitation loans and of reviewing the progress of borrow-

ers who shall be considered for rehabilitation, or to be unable longer to profit by FSA assistance. Human destinies are involved in your decisions."

Administrator Hancock told the committee that with today's wartime emphasis upon food production, "it is particularly important that we confine rehabilitation loans to those worthy low-income families who are best able to produce and who will benefit most from the credit and supervisory services which the Farm Security Administration is in a position to supply."

Barring conditions beyond the family's control, failure to keep its loans current is justification for dropping a family and selecting another in its stead," the Administrator stated. "Families should be graduated as rapidly as consistent with the true principles of rehabilitation. We should avoid

competition with local credit agencies and be particularly alert in helping borrowers who do not need our supervision to obtain necessary financing from established local sources.

"I want to see our help extended in a way that will make the recipients independent of help and able to carry on without assistance in the shortest possible time. I want the loans that we make to go to family-type operators who are unable to get loans elsewhere at reasonable terms. I want them to be kept within the limits of good business practice and I want them to be repaid."

Stating that he considers FSA's supervisory services to a certain extent even more important than loans, Hancock said he wants to see these services "so rendered that our borrowers everywhere may be found doing a good job of farming and homemaking and a good job of managing their business affairs."

The task of the Farm Security Administration, he declared, is to provide family-type farmers with the type of assistance they need to overcome their handicaps, and to enable them to obtain the credit, the managerial guidance and the services that bring to farms and home efficient methods and machinery, health, and sanitation, so that they can increase their production, improve their living, and rehabilitate themselves.

"Along such a road," he stated, "those who persevere can expect to achieve self-made security with its ultimate goal of farm ownership. We cannot accept the low living standards of a large group of our farm families as representing the best that America can offer or the most that these people can achieve."

Hancock expressed his confidence that the committee will guide the farm security program in a successful and valuable manner in Rowan County.

No Sugar Available For Curing Hams

While the sugar situation remains as it is at present, there is no possibility of Kentucky farmers being able to obtain extra sugar for the curing of hams, the Lexington OPA Office announced this week.

In response to inquiries regarding the possibility of obtaining extra allotments, the Office of Price Administration pointed out that the sugar situation has not improved to any appreciable extent during the past year. In 1943, the over-all supply of sugar was only 5 per cent greater than that available in 1942, while production in this country was greatly decreased.

Best sugar production was only 15 per cent of the 1942 production because of labor shortage. Sixty-five per cent of all sugar supply in this country is coming from the Caribbean, which means transportation made under the most difficult of circumstances.

The sugar surplus in this country must be conserved to protect our civilian and industrial users, and for this reason the Lexington Office, after giving consideration to allowances for meat curing, has decided that persons wishing to cure hams will have to use commercial compounds.

Stunned German prisoners, captured during the battle near Sidon in the final stages of the Tunisian Campaign, first asked to be shown the 34th Division's "automatic artillery." The Germans got the automatic artillery idea after the Division's artillery laid down an 80-minute barrage that placed enemy positions with 8,500 rounds. About 125 truck loads of ammunition were consumed in this 80 minutes of intensive fire.

Stunned German prisoners, captured during the battle near Sidon in the final stages of the Tunisian Campaign, first asked to be shown the 34th Division's "automatic artillery." The Germans got the automatic artillery idea after the Division's artillery laid down an 80-minute barrage that placed enemy positions with 8,500 rounds. ABSOLUTE AUCTION

OF 297 ACRE BATH COUNTY FARM AND PERSONAL PROPERTY

As Agents for John W. Bair, we are authorized by signed contract to sell his farm located 8 1/2 miles from Owingville and 4 1/2 miles from Salt Lick, near Olympia Springs, on Highway No. 36, on

Saturday, March 4, 1944, at 10:00 A. M.

About 225 acres of this farm is level land and about 175 acres is cleared. It has good fencing and is well watered by three never-failing springs, extra good well; creek through the farm. All the cleared land is in grass, except about 20 acres.

IMPROVEMENTS consist of a good 8 room house with front porch, screened in back porch; six bent tobacco and stock barn combined, good heavy warm smoke house, hen houses, garage and vooder house. Electricity on farm and property is on a mail and school bus route. This is a real nice home and good farm, so be sure to look it over before the sale. It will be offered in two tracts and as a whole, and the best bid or bids will be accepted.

PERSONAL PROPERTY includes extra good pair of 5-year-old mares, good workers; 3 good grade cows; 7 good grade springer heifers; a white-faced bull; some nice stock horses, garage and vooder house. Electricity on farm and property is on a mail and school bus route. This is a real nice home and good farm, so be sure to look it over before the sale. It will be offered in two tracts and as a whole, and the best bid or bids will be accepted.

FOLLOWING THE ABOVE SALE we will sell for Willie Bair his well-improved, 50-acre farm only one quarter mile from the John Bair Farm. This farm has a five room house, good barn, and all necessary outbuildings. Farm is well fenced and well watered, and is in a high state of cultivation. Will also sell a good pair of mares, one Chevrolet car, 3 springer cows, 7 shoats and some farming tools.

For further information about the above farms, see the owners on the properties or call Ray Rowland, Winchester, Kentucky.

ACT FAST WHEN A COLD THREATENS

As the very first sniffle, sneeze, or any sign of a cold, just try a few drops of Vicks Vapo-Rol up each nostril. If used in time, Vapo-Rol's quick action helps prevent many colds from developing. And remember that when a head cold makes you miserable, or when a sore throat, "fills up" nose and gives you a hard time, Vicks Vapo-Rol's soothing, penetrating action (1) helps clear clogged nasal passages, (2) relieves throat irritation, (3) helps clear clogged ears.

Tests Show Fertilizer Does Not Cause Tobacco To Fire

Many farmers think that moderately heavy applications of fertilizer to burley tobacco cause it to fire. By this they mean that the

lower leaves yellow and die, particularly during hot, dry weather. Studies made at the Kentucky Experiment Station indicate that just the opposite is true. Used on land only moderately productive, heavy applications of fertilizer containing a high percentage of nitrogen produce a more vigorous growth of tobacco and cause the

lower leaves to remain green for a longer period, even in dry weather. The idea that fertilizers cause tobacco to fire probably comes from the fact that a small application in the row starts the plant into rapid growth, with the result that the plant gets too large for the fertility of the soil and may then fire worse than unfertilized tobacco.

In tests on the Experiment Station farm, 1,500 pounds of fertilizer containing nitrogen and potash were applied broadcast per acre and disked in with no injurious effects to burley tobacco but with marked increase in yield and quality. These experiments were made on land high in phosphate, but which for experimental reasons had been cropped hard, and which had received no manure.

For soils low in available nitrogen, phosphorus, and potassium, an application of 1,000 or more pounds per acre of 8-8-8 can be applied safely to tobacco with the expectation of large increases in yield and quality. Yield may be further increased by side-dressing the crop with 100 pounds of ammonium nitrate or 300 pounds of sodium nitrate per acre.

F. F. A. Seed Campaign Is Success

The sale of subscriptions, tobacco and garden seed has reached a height beyond the highest expectations of the Future Farmers. The two agriculture classes had goals of \$40.00 each and after the first class passed they made another goal of \$100.00. This has been passed and both classes have sold a total of \$131.00 worth of seeds and subscriptions. With the

sale of tobacco seed being our best bet, we should at least raise this to \$150.00. We must warn the farmers however that if they expect to buy 41A seed from us they will have to act immediately due to the scarcity and demand.

EVERY EXTRA CORD OF PULPWOOD BRINGS VICTORY NEARER

Right now one of the critical war-material shortages is pulpwood. And this shortage can be overcome. There is plenty of pulpwood to be cut. The woods are full of it. The only problem is to get it cut.

Cutting Pulpwood Is An Essential War Job

If you are in a position to get out some pulpwood—and every cord helps—you can contribute that much to an early victory and be well paid for your work. The nation looks to you for help! For information, ask your local pulpwood committee.

TO THE PUBLIC: The Jefferson Standard presents to policyholders and friends its annual report, which reflects outstanding successful achievement along all lines. President Julian Price, in his annual message to those insured in the Company, points out several important facts relating to its service, growth and strong financial position. Facts in brief are given here. The detailed annual report booklet is available upon request.

- INTEREST EARNING MAINTAINED**
★ The gross rate of interest earned on invested assets for 1943 was 3.23%. Jefferson Standard maintains its national leadership in this field.
- INTEREST PAYMENT MAINTAINED**
★ In 1943, as in every year since organization, 5% interest was paid on funds held in trust for policyholders and beneficiaries.
- ASSETS SHOW INCREASE**
★ Assets now total \$128,246,325 — an increase of \$13,230,309. For each \$100 of liabilities there are \$110.32 of assets indicating an unusually strong financial position.
- BENEFITS PAID**
★ The Company paid policyholders and beneficiaries \$4,305,910 in policy benefits during 1943. Total benefits paid since 1907 — \$137,771,775.
- SURPLUS FUNDS INCREASED**
★ Surplus, capital and contingency reserves total \$12,000,000. This is \$23.38 surplus for each \$1000 insurance in force — an exceedingly high surplus ratio.
- SPLENDID INVESTMENT RECORD**
★ Less than \$25,000 interest is paid due on Mortgage Loan investments of \$7,342,910. Only one-half million dollars is owned in foreclosed real estate.
- INSURANCE IN FORCE**
★ Jefferson Standard's 200,000 policyholders now own \$502,533,041 life insurance. The Company has very proudly announced having over a half-billion dollars life insurance in force. This was a gain of \$32,202,404 for the year.

A POLICYHOLDER'S COMPANY

The reputation of being "A Policyholder's Company" is based upon 36 years of effort directed toward providing maximum benefits to meet the life insurance needs of policyholders and beneficiaries. The record of interest earned has established the Jefferson Standard as the national leader in this field.

Julian Price, PRESIDENT - GREENSBORO, NORTH CAROLINA

Mrs. Ed Williams spent the week-end in Lexington.

Mr. James Clay is in Pikeville this week on business.

Wathan Gullett of Louisville, visited his family last week-end.

Mr. and Mrs. James Clay were shopping in Lexington Saturday.

Wilfred Waltz is in Pittsburgh, Pa., on an extended business trip.

Mr. J. T. Evans, who has been quite ill with pneumonia, is improving rapidly.

Mrs. Maggie Hogue and daughter, Mary, were in Lexington Monday and Tuesday.

Miss Opal McNear will spend this week-end with friends in Indianapolis, Indiana.

Mrs. C. U. Waltz was in Mt. Sterling Monday and spent Wednesday in Lexington.

John Eldridge of Haldeman, is confined to his home this week on account of illness.

Mrs. Walter Calvert and Miss Ruth Messer were shopping in Lexington Wednesday.

Mrs. A. B. Bowne and children, Jane Bennett and Carolyn, spent Friday in Mt. Sterling.

Mrs. Boone Caudill and Mrs. John Keck, of Sandy Hook, were in Lexington Tuesday.

Gay Garred is visiting her grandmother, Mrs. George Curtis of Lexington, this week.

Ralph Holbrook of Lexington,

visited his parents, Mr. and Mrs. Roy Holbrook, on Sunday.

Claude Clayton and Clarence Allen spent several days this week in Cincinnati on business.

Mrs. Harold Crosthwaite recently reported by overseas service. He is stationed in England.

Mrs. O. P. Carr was in West Liberty several days this week to attend the funeral of a friend.

Mrs. C. B. Lane and daughter Betty, and Mrs. C. B. Dougherty were in Mt. Sterling Saturday.

Mrs. Andrew Benson of Chicago, Illinois, is the guest of her daughter, Mrs. R. W. Carlson.

Mrs. Hayden Carmichael and Mrs. Hayden Carmichael were shopping in Charleston, W. Va., Monday.

Mrs. Earl May and son, Jack, of Lexington, were guests of Mr. and Mrs. J. R. Wendell last week-end.

Mr. and Mrs. Bob Laughlin were guests of Mr. and Mrs. Howard Canan of Mt. Sterling, last week-end.

Mrs. William DeForest and two sons of Albany, are visiting her parents, Mr. and Mrs. Lee Stewart, this week.

Seaman Cleo Williams is spending this week with his parents, Mr. and Mrs. A. J. Williams, of Elliottville.

Mrs. Jack Robey of Hurricane, W. Va., was the guest of her parents, Mr. and Mrs. Sam Allen, last week-end.

Mrs. Hayden Carmichael of Booneville, was the guest of her parents, Mr. and Mrs. Leo Oppenheimer, last week-end.

Ensign and Mrs. Beverly Varney of Fort Schuyler, New York,

visited Mr. and Mrs. Len Miller on Tuesday and Wednesday.

Miss Amy Irene Moore will entertain with several tables of bridge in the home of Mrs. C. U. Waltz on Saturday at 1 o'clock.

Mrs. Hallie B. Baumstark of New York City, N. Y., is at the home of her parents, Mr. and Mrs. Paxton Davis, recuperating from an operation.

Corporal and Mrs. Robert Elam spent a few days this week in Paintsville. Corporal Elam returned Wednesday to Buckley Field, Colorado.

On Thursday evening at 7:30 the Navy wives were entertained at the USO. Mrs. Harry Goldberg and Mrs. John Kelly contributed and served the refreshments.

Mrs. Milton Evans will spend this week-end with her husband in Akron, Ohio. She will be accompanied by Miss Joan Blanton, who will join her parents there.

Private Hubert Allen of the meteorology school at the University of Chicago, is spending several days' furlough with his mother, Mrs. J. A. Allen, and family.

Miss Lydia Marie Caudill is spending a few days this week in Huntington, W. Va., with her brother, Private Ezra "Shady" Caudill, who will leave soon for California.

W. W. Coleman, en-route from Kansas City to Morehead, where he is stationed at the Naval Air Base, stopped in Morehead Sunday to visit his aunt, Miss Amy Irene Moore.

Rev. Roscoe Snowden, Rev. Ramah Johnson and Mr. B. W. Moore returned today from Lexington, where they attended an annual ministers' meeting of the Church of God on Tuesday, Wednesday and Thursday.

Aerographer Mate C. Bobb's Hoge is spending several days' furlough with his parents, Mr. and Mrs. Lester Hoge. Bobby has been stationed in Clinton, Oklahoma, and on March 1st will transfer to a V-12 Naval unit school at Fayette, Missouri.

The Geometry class of the Breckinridge Training School enjoyed talks on Tuesday by the following Breckinridge graduates who are in aviation: Bobby Hoge, Navy, of Clinton, Oklahoma; P. Wheeler, aviation instructor, who has been ferrying planes from Texas; Hubert Allen, of the Meteorology school at the University of Chicago; Marie Ramey, who is leaving this week for Des Moines, Iowa, where she will be a dental technician in the air division of the WAACS.

Lieutenant and Mrs. Ellis Johnson and daughter, Barbara Len, and Miss Myrtle Boothe returned Saturday to Iowa City, Iowa, from a week's visit with Mr. and Mrs. O. P. Carr and other friends. They were accompanied to Indianapolis, Ind., by Mrs. Jaul J. Reynolds, who is visiting Mr. and Mrs. Creed Patrick of Muncie, Ind., this week.

Mr. and Mrs. D. B. Caudill, Boone Caudill and daughter, Susie, of Sandy Hook, will spend the week-end in Lexington at the home of Mr. and Mrs. Paul Little, Miss Louise Caudill and Milton Caudill of Louisville, and Miss Patty Caudill, who has been their guest in Louisville for the past week, will join them in Lexington for the week-end.

(Continued from page 1)

(help after they had been shot.)

The Kentucky participated in the invasion of Taiwan and spent five weeks at the front on Guadalcanal. Wounded, he was sent to the rear to recover. Of the Guadalcanal campaign he said, "It was nothing like this—This was the worst I've ever seen."

Eagles Win KIAC ---

(Continued from page 1)

Most of the season.

The Eagles have hit consistently all season long, amassing 960 points in 17 games for an average of 56 points a battle. The opposition has been limited to 600 points or 38.6 a contest.

Cooper of Brooksville, led the Morehead attack with 315 markers. In 15 games he has an even 21-point average to lead the state and south.

Salvage ---

(Continued from page 1)

Contributions to blood plasma and bandages. So acute is the shortage that some paper mills in this area are known to be buying waste paper in cities many hundreds of miles away.

Not usable are processed papers, such as waxed, oiled or parchment papers, and very dirty or greasy papers such as meat or wax wrappers.

The Salvage Depot, on Fairbanks Avenue, is open every Saturday afternoon, from 1:00 to 5:00 o'clock, for a commutation to start saving waste paper regularly, and have it ready for the Scouts, or deliver it at the depot.

per and aluminum, said Borden, is considered among the essential war materials. Some idea of the quantities of wood needed may be had from the fact that Uncle Sam wants fifteen billion board feet of help ship food and supplies overseas and to meet essential domestic shipping requirements. Crates for food shipments are already scarce and furniture production is being limited.

According to Admiral Clark H. Woodward, Forester Borden said, the Navy has utilized more than forty billion board feet of lumber since June, 1943. He quoted Woodward as saying, "The Armed Forces regard the men in the thirty to forty thousand lumber producing units in the United States as front line fighters in this conflict. Every skilled job in the woods and mills is, in every sense, a battle station. Every tree of fighting age and size is wanted in the battle of freedom."

Among outstanding uses for lumber and pulpwood, Forester Borden pointed out, included cellulose for explosives, paper parabolite for dropping supplies, cardboard containers for medicine and shell cases, struts and beams for airplane gliders and cargo ships, oak for ship knees, wood for yachts, bodies, for hangars for aerodromes, for landing barges and PT patrol boats, for crates and boxes, for pantoms, for portable line hats, and for at least 1,200 other military uses, many of which the public seldom realizes.

State Director McConnell urged the cooperation of every Kentucky citizen in seeing that the timber made available for the war effort and the growth of additional trees to replace these being cut.

Ceiling Auction Prices Set On Farm Machinery

Many Farmers Need To Replace Equipment

Because many farmers need to replace or add to mechanical equipment they require to produce this year's crops, the Office of Price Administration is endeavoring to keep prices for used farm machinery sold at auction in line with established prices for dealers. S. J. Yearly, Price Specialist of the Lexington Office, announced this week.

The Office of Price Administration has set ceiling auction prices on nine of the larger-type farm implements, which comprise some 60 per cent of the total dollar volume of sales used farm machinery sold at auction, Mr. Yearly said. These items are combines, corn binders, corn pickers, farm tractors, (except crawler types), motor or tractor operated hay balers, hay loaders, manure spreaders, side delivery rakes, and combinations of two or more of these with other items of farm equipment designed for mounting thereon, when the combination is sold as a unit.

Mr. Bowles also called attention to the requirement in Maximum Price Regulation No. 133 that every auctioneer shall file a notice of every public or private auction sale of used farm equipment at least six days before the sale. These notices should be sent to the Lexington District Office.

In spite of difficulties in enforcing this regulation, the Office of Price Administration has found that for the most part auctioneers are willing and eager to cooperate, Mr. Yearly said.

UK Tells How To Buy And Use Fertilizer

The University of Kentucky has recently published a new leaflet telling how to buy and use commercial fertilizers. Some of the statements of interest in the leaflet

are as follows, the percentage of nitrogen is always stated first, phosphoric acid is second, and potash last. A 4-10 grade for example contains four per cent of nitrogen, ten per cent of phosphoric acid and six per cent of potash.

The important thing to have in mind in buying commercial fertilizer is how many pounds of plant food you are getting for the money. In general, nutrients are cheaper per pound in the higher grade mixed fertilizer than in those in lower grade.

On row crops commercial fertilizer, unless applied heavily, "more than six hundred pound per acre" is most effective applied in two bands, one on each side of the row three to four inches below the surface of the soil. The application should be made shortly before, during, or shortly after planting or setting, except that often nitrogen will be just as effective applied later.

MONEY WILL WORK FOR YOU

You can hire money to work for you much in the same manner as you would employ an individual. A loan may be secured here and wages for the money may be paid in the form of a very moderate rate of interest.

You will have the advantages of dealing with a local bank and with those who fully understand your requirements. You will establish a credit for later -- and possibly larger -- financial operations.

If plans for the new year call for additional funds, come in and have a confidential friendly talk with our officers. Have money work for you in 1944... with profit. See us for loans of all kinds.

120 Million Tons Of Pulpwood Used During Past Year

Forester Says Every Tree Of Fighting Age And Size Needed In War Effort Now

More than 120 million tons of wood products were used last year for the manufacture of war material, according to figures compiled by the United States Army. Area Forester H. L. Borden stated today in a communication to K. G. McConnell, Director of the Kentucky Division of Forestry.

This exceeds by at least twenty million tons the total amount of steel used. Wood, with steel, copes with the total amount of steel used.

This Is The Way Your Frozen Food Locker Will Look

Interior View of a Frozen Food Locker Plant

Do you need a locker? If so, you must sign your application and deposit for it. There is no other way to get one. The Government has made that ruling. Your application and deposit must be on file at the bank to prove that Morehead and the community needs the system.

A few more applications must be obtained before Morehead will be assured of the Food Locker Plant. DON'T DELAY --- DO IT TODAY!!!

DOOR TYPE ---- \$12.00 Per Year

DRAWER TYPE ---- \$15.00 Per Year
