

"Getting Around" The Library

Library Staff

Our assortment of subscriptions is extensive. The library also provides for recreational reading. The Brown Book Store, located on the corner of 10th and Main, is a place that caters to that purpose. An attractive feature of the store is the large display of new books with easy chairs makes a nice place to sit and read a beautiful book for an hour. In here you can find the popular, non-fiction, popular magazines, newspapers and periodicals. The books and magazines can be checked out just as easily as the books.

Our library staff takes special care to help students find the material and learn their way around the library. We are glad to give you the opportunity to serve you.

Home Economists Speak

Dr. and Mrs. Clyde F. Reed this week. Miss Carpenter is now em-

ployed in Connecticut in super-
vising music.

Miss Irene Chapman held an open house party for Miss Carpenter on Sunday evening at her home. The faculty visited the party from 7 p. m. on.

Those of you who know Miss Carpenter know her as one of the "Ridge Runners." This past week-end Miss Carpenter, Dr.

Whether you are one who has time and endurance to work all

day or whether you can spare one or another or two at a time stretched over several days. By work plan, we mean the allotment of available time for specific jobs, and for good reason, write it on paper! You may wonder why I do all of the same thing (such as closing the windows) in every room before starting something else. Here are some tips for saving time on that work plan:

1. A window cleaner that

Stonks Meeting

Twenty-six persons from Morehead and Clearfield attended the annual Kentucky State South Convention of the Church of God which was held in Louisville, Ky. April 13, 14, and 15. The convention was well attended.

ended by around 300 young people, together with their pastors and educators from all parts of Kentucky.

The theme of the convention was "The Resurrection." Rev. Eugene L. Berner, pastor of the First Baptist Church, Ohio, built his inspiring messages around this motto. He stressed the importance of facing the problems of the future in this chaotic world by improving the help of the omnipotent.

1. Immediately remove gum spots on paint can with a sharp razor blade. Clean with whiting. Glue was served this purpose and eliminates the rim spew.

2. Clean unfinished wood with damp cloth using a solution of 1 quart boiling water, 3 tablespoons of ammonia and 1 tablespoon of turpentine.

3. Remove grease spots from wallpaper with small piece of

Christian way of life being "the more excellent way of life."

A lovely banquet was served Friday evening. Rev. Emmitt H. Smith, of Peoria, presided. The program was of a faith-fuly taken on our new-ly our vo-lation, in marriage, and God.

Other interesting things to occur-rence were the main-tenance of religious conference, special religious films and a tour of the

ply with pressing motion, let dry and repeat with solvent on clean cloth. Do not rub.

Strong soaps or alternatives are hazardous. Wash with soft brush using mild soap. Waxing prolongs life of linoleum.

3. You may feel it is sufficient to vacuum your rugs or necessary to remove them. Vacuum and give them a thorough brush and seasonal airing. If rain-

The convention closed Sat.

the convention closed Saturday afternoon at 5. Stearns' message entitled "Face the Sun," told students that their minds have already begun to think ahead many months into the thoughts of next year's convention and that they should hold the convention in the heart of Elkhorn City, Kentucky.

Those students from Morehead College who attended were Virginia L. Smith and Cecily L. Smith, Elizabeth Roberts, and Ruth Roberts. The students from the Elkhorn City High School arranged before breakfast to

eckinridge Training School

The Science Club of the Weckivridge Training School attended the annual state meeting of the Kentucky Jr. Academy of Science last Saturday, April 22, at the Old Kentucky Home High School in Bardstown, Ky.

The Junior Club presented an exhibit on "Fire and Fuels" while the Senior Club made demonstration on the "Importance of Electricity in Our Present Civilization."

Mr. Phipps and Mr. Corbett attended the KRA meeting in Louisville on April 14. They reported that the National Vocational Guidance Association at the Brown Hotel. The main speaker was from the Department of Education in Washington.

Mr. Hooker, chief of Guidance Center in Lexington, gave a report of the national meeting in

Repare Banquet

The Home Economic's Club is now preparing to serve one of its famous dinners. This time, it is the annual Kappa Delta Phi dinner, which will be held at the Wednesday, April 23, following day, Thursday April 27, the club offers diversion from the accustomed type of meeting for a change of a luncheon for all members are urged to be present.

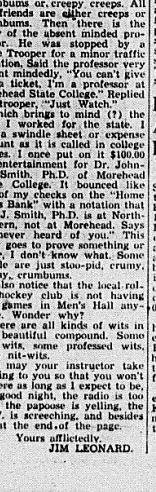

The Home Economic's Club is to have more programs to serve on its famous dinner. This time it is the annual Kappa Delta luncheon. The luncheon will be held on Wednesday, April 24. The following day, Thursday April 25, the Home Economic's Club will have an accustomed type of meeting in the form of a luncheon. All members are urged to be present.

The election of officers for the coming year will precede the regular business meeting and announcements. The program will follow with Barbara Williams presenting "A Look Backward at the Home Economic's Club." A Look Forward.

Mr. Wesley, director of the Center here, gave a talk, suggesting that "What Employers Want." Rice, the editor of the Men's Club, describes the talk as for employers and employees.

Employer and employee
Whatever their aims
You will find the net result
Must be exactly the same.

And be happy to boot.
The other must cooperate
And the result will be
The rights and privileges
That are their rightful share
And the result will be
Without trials hard to bear.

"I often wondered what professors carried in their brief cases!"

Morehead Eagles Edged Out In Baseball Opener 5-4

The Morehead Baseball Eagles, playing very impressive ball with a minimum of practice sessions, dropped their opener to the Tennessee Tech Eagles at Cookeville, Tenn., 5-4 in 11 innings.

Walt Prop, starting hurler for Morehead, threw for nine full innings and allowed 7.E.P. six hits. Lin Lagomarrino replaced Prop in the tenth, gave up four hits and was the losing pitcher. Thompson of T.P.I. was given credit for the win.

Prop also came through with a perfect day at the plate, hitting safely three times for three official hits. In addition, he batted in three runs with a triple in the second and scored Morehead's fourth run in the ninth. Jerry Allen led off the second inning and gained first on an error by the third sacker. Jack Daner was hit by a pitched ball and Jerry Wing forced to lead the bases. Bill Goble forced Wing at second, gained first on the pitcher's choice. Don Hester fanned, and with two out and the bases full, Prop belted out his triple, driving in three runs. Mills ended the inning with a fly out to center field. T.P.I. came back in their half of the inning to score a run on two singles and an error.

The pitchers buckled down and allowed no more runs in the bottom half of the eighth inning when Tenn. Tech again came through with a lone run. McCurray led off the inning with a single and a single on a bunt by Holder. Holder was thrown out trying to steal second and McCurray scored on the put-out.

Morehead came through with another run in the ninth when Prop singled, went to second on a walk given to Mills, and scored on a base hit by Bob Plaker. This run gave the Eagles of Morehead a 4-3 lead going into the

Three Intramural Softball Teams Still Undefeated

The weatherman finally gave in to a certain extent, that is with a couple of nice days and we bucked the low temperatures of a couple other days to bring our softball schedule up to date, except for the games that were scheduled for April 20, which were postponed because of the intramural football games.

Three of the seven teams in the tournament still have clean records. The Freshmen "Rinkies" the winners of the intramural basketball tournament, have disposed of two teams rather handsily. They went on a homerun spree against the Eight Balls, winning 9-0. John Hoffman and Frank Bloss with one home-run each, and Bill Collier with two, were the batting stars for the Rinkies. The heavy-hitting Rinkies also downed Morgan County by a very comfortable margin, 9-3. In this game, home runs were hit by "Rabbi" Herms and Sam Lam-bert by the Rinkies.

The second undefeated team in the tournament, the Steamrollers, made their debut in the 15-0. The third inning was beginning for the winners as they batted. The first inning was a homerun for the winners. The Steamrollers also downed a Morgan County team, 15-0. The Steamrollers collected home runs and extra base hits. The Morgan County team, 15-0. The Steamrollers collected home runs and extra base hits. The Morgan County team, 15-0. The Steamrollers collected home runs and extra base hits.

Football Opener Promises Exciting Season Ahead

Before approximately 200 rooting spectators who hoped a better cold and threats of snowfall, the Gold team played all of the 26-20 victory over the Blue team in the first Eagle football intramural game of the season, practice last Thursday, April 26.

Both squads came through with some fine play as some mid-season running, blocking and tackling was exhibited. More than once the freezing crowd gasped as the sound of a hard driving tackle or block carried high into the stands.

The Blue team recovered a fumble by Jim Carter, Gold half-back, early in the first period, and played 45 yards with Izzy Porter, Blue quarterback, kicking over from the one yard line for a tie score. Milan Perpel, running from the fullback drove over for the P. A. T.

The Gold team came right back, and two plays later Matt Pryor carried for 28 yards and a T. D. The P. A. T. failed and the Blue team led 7-0. The next score came in the middle of the second quarter with fine defensive play in the interim. The Blue squad took over on the 20-yard marker and drove the distance with Perpel finally going over for the point and the Gold led 14-0.

The Gold team fighting right back and went 60 yards without relinquishing the ball. John Hoffman, quarterbacking for the Gold, connected on two passes, one to End Bill Wade for 30 yards and the other to Matt Pryor for 20 yards. But, it was Gold fullback, Ray Pendergrast, who went into pay dirt from the two yard line. The Gold team took over and scored now read 14-13 with the P. A. T.

In the second half the Blue started off again and this time 60 yards for the score. Now running by Frank Bloss and Perpel and two completed passes by Pryor put the ball on the Gold 13. Bob Pitakos sliced over from there for the score. The try

'Charm' For The Teacher

Philadelphia Opens School To Make Their Faces Prettier, Voices Softer, Pay Checks Fatter

A charm school designed to make teachers prettier and their pay checks fatter was announced today in Philadelphia. The board of education thought it up and printed a sales talk in the state of the newest fashions in clothes.

"Would you care to glimpse some of the newest fashions in clothes?"

"Would you like to know some of the newest fashions in different types?"

"Does your voice have that quality which makes pupils want to listen? If not, join the class in voice culture."

Agriculture Offer Many Opportunities

The Department of Agriculture offers a two year course in meeting Smith-Hughes and County Agent requirements in conjunction with the other departments in the college. There is also a Major in Agriculture for those who do not want to meet the above requirements at this time. Many of the students who have taken agriculture at Morehead are now in good agricultural positions.

Work in agriculture offers numerous avenues in which positions can be obtained. Many of the former students are now employed with large Cooperatives such as Southern States.

Among the positions open to Agriculture majors are:

- Soil Conservation Service with the United States Department of Agriculture, Agricultural Extension, and Smith Hughes work, field men for large manufacturing and collecting plants, with banks in the farm credit division, and field men for inspection work with city health departments. Some students are combining farming with teaching at home and do this to supplement their teaching at school. There is a splendid opportunity in all phases of agricultural work where a student prepares for his life's work.

A philosopher is a man giving other people advice about troubles he hasn't had.

Science is organized knowledge. —Herbert Spencer

Sports Roundup

By BILL BALL, Sports Editor

In the sixth inning of Morehead's opening 5-4 loss to Tennessee Tech the Eagles had Jack Daner on second base and Jerry Wing on first. Shortstop Don Hester, at bat, ducked away from a fast in-base pitch. The ball hit the small end of Hester's bat, bounded into the pitcher's hands and the pitcher then threw to first to complete a double play and retire the side. ... about the breaks.

The softball intramural league is now well under way, and for many of you who are wondering what players are represented on the various teams here is the info. Someone asked the other day, "Who are the Steamrollers?" Well, to that all we can say is they are a bunch of athletes who exclaim, and probably justifiably so, that they are unbeatable. The Steamrollers include such players as Ed Mudd, Milan Perpel, John Hoffman, Matt Pryor, Bill Schneider, Jim Fraley, R. T. Lee, Bill Parrott, Gus Sturgess, Jack Hickey, Bill Mulligan, and Frog Eyes Orme. The current leaders of the league, the "Fence Busters" boast such softballers as Cal Lyons, Jerry Bledsoe, Larry Johnson, Harold Bault, Jack Cochran, Walter Gray, Ray Kring, and Jack Baker. The Mystic Club is represented in the league and on their team is Don Betz, Leonard Layne, Eddie Cox, Bill Carriethers, Ray King, Jack Osborne, Ray Rammelsburg, Jack Woburn, and Joe Smith. For the latest on how these teams and their players are doing read Paul Kennedy's "Intramurals, In Review."

Another pennant contender is a bunch of "0's" Yankees, namely the Connecticut Yankees. Represented are Easterners Jack Hickey, Matt Stevenson, Don Kardok, Bill Noonan, Dick Howerman, Joe Heav, Bob Yarmannick, Joe Corbett, Don Davis, and Harry Welch. The only team carrying three coaches is the Rinkies. Gene Balch is head coach with Jim Coe as assistant coach and Jack Spencer as asst. assistant coach. The team includes Frank Bloss, Art Weller, Harrison Hamer, Bill Collier, Ray McPherson, Don Hester, Dave Adams, Jim Hoffman, and Izzy Porter. The Eight Balls, who have taken out behind the eight ball by dropping two straight are Bill Cann, Bob Poppe, Jack Whitehouse, Charles Taylor, Charles Cox, Jack Howard, Elza Whalen, Don Thompson, Dick Fredricks, and Ken Kesinger. The Morgan Maulers, originated from Morgan County include: Merle Nickel, Aris Wheeler, Elmer Lister, Shirley Howell, Pary Johnson, Harold Bault, Jack Cochran, Walter Gray, Ray Kring, and Jack Baker. The Mystic Club is represented in the league and on their team is Don Betz, Leonard Layne, Eddie Cox, Bill Carriethers, Ray King, Jack Osborne, Ray Rammelsburg, Jack Woburn, and Joe Smith. For the latest on how these teams and their players are doing read Paul Kennedy's "Intramurals, In Review."

Social Security Reminds Workers About Cards

Who Needs a Card? You will need a social security card if you get a job in a store, in a factory, mill, mine, office, bank, beauty parlor, laundry, gas station, repair shop, hotel, restaurant, or any other place of private business or industry.

Where to Get One If you already have a card, you don't need another. If you have lost your card, ask the nearest office of the Social Security Administration for a duplicate. Don't ask for a new card. Get a duplicate with the same number on it.

What to Do With It Show your card to your employer, to every employer, part-time or full-time. If the job is covered by the Social Security Act, see that he copies your name and address as they appear on your card.

An exhibition of Morehead State College in Brown Hotel, Morehead, Ky., left, graduate of Morehead and Fleming County home economist teacher, and Billie Caudill, future teacher, discuss art show with Betty Jane Shannon, future teacher now at Eastern Kentucky State College.

Science Hall Bristles With Exhibitions

Science Hall of Morehead State College literally bristles with exhibitions of the various activities and collections housed there. Every visiting high school senior is cordially welcomed to visit and study these showcases and exhibits.

Home Economics

On the fourth floor the Home Economics Department presents two displays. Live white rats may be seen in one of the showcases, demonstrating the nutritive value of varying milk feeds. In the other showcase there is a display of Toys for Children prepared by the class in Nursery School practice.

Chemistry

At the other end of the fourth floor are two exhibitions by the Chemistry Department. One exhibit shows the Periodic Chart, some of the elements and a set of standard weights. The other exhibit is a flow chart of one of the qualitative groups which shows some of the products formed during analysis.

Biology

On the third floor the Biology Department is displaying drawings by Dr. Clyde F. Reed of the ferns found in Rowan County as well as of Eastern Kentucky. Another exhibition is made up of "Red Algae" of the Pacific Ocean from along the coast of California and Mexico. This is a collection from the Reed Herbarium and shows some of the novel types of deep sea algae. A third exhibition of the Biology Department presents some of the interesting birds of Kentucky from the extensive museum collection of birds in this department.

Also on the third floor is an exhibition by the Organic Division of the Department of Chemistry, showing the Soxhlet Extraction of Nitrogen.

Geology, Geography, Mathematics-Physics

On the second floor there are exhibitions by the Geology, Geography and Math-Physics Department. The geology exhibit shows the "Fossil of Eastern Kentucky." There is also a display of geographic interest.

The two exhibits by the Physics Department show such interesting instruments as those for navigating, optics, X-ray tubes and calculating machines. Among the calculating instruments are several peculiar slide rules — 3 made on the watch pattern and an air speed calculator. There is

also a sundial which was made in 1717. Across the hall is an altitude control for a robot pilot, a military field transceiver, a balloon weather gauge and a spectroscopic showing the spectrum of oxygen.

Agriculture

On the first floor of Science Hall the Agriculture Department has forty minerals and soil along with the products in which they are used. Some of these are of commercial importance in Kentucky and others are important soil forming minerals.

In the same showcase there is a display of seeds, grasses and legumes used in Eastern Kentucky. Some of these show the application of genetics as shown by the corn display.

Another display shows the chemicals used in sprays for various plants varying from apple to flowers. The use of these chemicals on plants controls insects as well as many plant diseases.

In each showcase there are many books and pamphlets which a teacher may obtain as an aid in teaching, or the students learning about these matters.

Industrial Arts

The Industrial Arts Department has a beautiful display in the main display case on the first floor, exhibiting the work of various classes. These include items from the woodwork department as well as the metal working department.

Inlaid table lamps, stools, book ends and miniature airplane propellers are included in the display. The metal display includes everything from tools to etchings on copper, aluminum and tin.

Everyone should make at least one trip to Science Hall to see these varying and interesting displays.

Professor: "Did you miss class yesterday?"
Student: "No, sir, not at all."

Why Should You Go To College

After a few months' after your graduation, you will find that a great and basic reason for going to college is that you will be able to do the job that you want to do. You will be able to do the job that you want to do. You will be able to do the job that you want to do.

College education is a more realistic one is to place yourself and the situation in which you are in. You will be able to do the job that you want to do. You will be able to do the job that you want to do.

College education is a more realistic one is to place yourself and the situation in which you are in. You will be able to do the job that you want to do. You will be able to do the job that you want to do.

Employment Outlook For School Teachers

Graduates trained for elementary school teaching should find a wide choice of employment opportunities in most states, this spring. On the other hand, prospective teachers at the secondary level will find a highly competitive employment situation in all but a few subject fields. Last year, only one student completed training for elementary teaching for every three who were needed; this year, the shortage will be nearly as acute. The number of students completing preparation for high school teaching in 1949 was four times as great as the demand; the oversupply in 1950 is expected to be even greater.

The need for teachers in elementary schools will continue to increase over the next several years. According to a recent study by the Department of Labor's Bureau of Labor Statistics, enrollments in grades 1 to 8 will probably rise sharply for the next 7 years in most States and then level off. The total number of elementary teaching positions will therefore increase considerably, perhaps by more than 300,000 in the next 7 years. The number of new teachers required annually will be greatest about 1953, the year when the sharp increase in enrollments is expected.

Many more new teachers are required each year as replacements than for new positions, even in the current period of rapid growth of elementary school population. On the basis of a conservative rate of 7 percent, it is estimated that over half a million elementary teachers will be required in the next 10 years to replace those who die, retire or leave the classroom for other reasons. In addition, a sizeable number will be needed to replace some of the persons now teaching on emergency certificates.

The number of young people taking training for elementary teaching will depend, in the future as in the past, chiefly on the other employment opportunities available and the relative growth of elementary school population. On economic conditions should become less favorable and there should be considerable unemployment, the supply of elementary teachers might become such that keen competition would develop.

Secondary Teachers
Strong competition for high school teaching positions is expected in the country as a whole for the next few years at least. However, the distribution of teachers both locally and by subject field is such that some schools suffer shortages while others have many applicants for each job. With few exceptions, shortages are now limited to rural areas and such special subject fields as home economics. The greatest oversupply in most states is in men's physical education, the social sciences, and English.

It is likely that education and experience requirements will be raised in line with the prevailing trend. Students taking training for high school teaching should plan to get master's degree in order to qualify for the best employment opportunities.

Enrollments in grades 9 to 12 are expected to decline until about 1952. Therefore, the need for high school teachers will be limited largely to replacements for the next few years. After 1952, enrollments will probably rise slowly for the following 3 years and then increase rapidly into the 1960's. Over the 1950 decade, close to 85,000 new teachers may be needed to handle increased enrollments. In addition, from 17,000 to 20,000 replacements may be required each year during the 1950's. However, unless high school enrollments are considerably greater than seems probable on the basis of past trends, a training rate as high as that of 1949 would continue to produce an oversupply of secondary school teachers even in the years of greatest need.

Berea Will Admit Negro Students

Negro students will be admitted to Berea College at its fall term.

The board of trustees took this action at its meeting Thursday. Berea thus is the only college in Kentucky voluntarily admitting members of the Negro race. The University of Kentucky was ordered last year by a federal court to admit Negroes.

The Kentucky General Assembly, at its 1950 session, passed a law allowing colleges in the state to admit Negro students if the schools desired, so long as the same courses were not available at Kentucky State College for Negroes at Frankfort.

According to the action of the trustees, the students will be limited to a specially designated mountain territory from which Berea takes students.

Student Art Acclaimed At KEA Meetings

One of the main attractions at the KEA meetings in Louisville, in the Brown Hotel, was the student art exhibit from Morehead State College.

In the picture shown above are some of the fifteen oil paintings, five water color paintings and pastel drawings on exhibit. These pictures are the products of art majors at Morehead.

Due to the favorable comments given by several art critics the work done by Frank Proffitt ranked about the best of the amateur art presented. Josephine Hill's work was also considered outstanding.

If you should be wandering past Dr. Baird's office sometime stop in to see the paintings made by Frank Proffitt, Maxine Oppenheimer, and Ford Fielding and presented to him as gifts by them.

Why You Should Go To College

By Alfred Fuller
In a few months, after your high school graduation, you will be faced with a great and basic problem. What shall I do with my life? There are several solutions to this problem.

One way to approach the situation is to drift aimlessly from one job to another, without trying to set a goal. This method has several disadvantages and eventually failure.

Another approach and a more successful one is to analyze yourself and the situation at hand and then determine the course of action that would be most likely to result in success.

A college education and the superior level of achievement that it provides are the most thorough available to you.

College offers you an opportunity to help yourself. In college you will make contacts with many other students both older and younger than yourself. You will find men and women on the teaching staff who, have years of experience in their field of college work to their credit and who can help you in your studies.

Most colleges have designed their programs so that the first two years of work are general in nature and give the student time to find himself and to discover his interests. After this time, the student moves on to his specialization in his field of interest. In addition to this, the student is given a broad background of knowledge in his field of interest.

Over and beyond helping the student to find himself, college offers him many other opportunities. He can take part in many extracurricular activities, which in turn enable him to develop his personality more fully than he could in high school.

College, however, is not all study and recitation. There is a lot of fun and many other opportunities to develop your mind and personality and to acquire the education that is required at most other places.

When you come to college, you need education and education needs you.

Art
All high school seniors are given a visit to the Art Department and the Big Art Room in the Camden Library Building. There they see the various art exhibitions in the halls of the Art Department.

The Art Department offers twenty-eight courses in various fields of art which can prepare the college student for a career in art, art supervision, teaching of art, interior decorating, or textile designing.

If you have a natural inclination toward art or artistic endeavor, by all means let a college education in this field give you a head start for the next four years.

Agriculture
The Department of Agriculture offers a two-year course in meeting Smith-Hughes Act requirements in conjunction with the work in the college. There is also a Major in Agriculture for those students who have taken agriculture in high school and are now in good agricultural position.

Work in agriculture offers numerous avenues in which positions can be obtained. Many of the former students are now working with large Co-Operatives and other agricultural organizations.

Among the positions open to Agriculture majors are:

1. Soil Conservation Service with the United States Department of Agriculture, Agricultural Extension, and Smith-Hughes Act, field men for large dairy management and collecting and with banks in the farm credit inspection work with city health departments. Some students are combining farming with education at home and do this to supplement their teaching income.

2. A student preparing for all phases of agricultural work who is a student preparing for his life's work.

Teaching Always Good Career For College Graduates

Education is the largest public enterprise in the United States and the country's most important business. It employs more than one million teachers and over thirty million pupils are enrolled in various types of schools in our country today.

At the present time the field of elementary education offers unlimited opportunities for well trained young people. As our economy gets back to normal the emergency teacher will gradually pass out of the picture. School officials are demanding better trained teachers and the public is becoming aware of the need. Compensation for teaching is gradually becoming more adequate.

Our college offers excellent facilities for young people who wish to make teaching a career. Students may complete courses for credit in two to eight years of the elementary or secondary field, as well as in physical education, and supervision and administration. Our educational library is adequate and the college offers facilities for practice teaching.

Young people in this area wishing to qualify as teachers, may do so by entering Morehead State College.

English Offers Innumerable Opportunities
It is a rare bird that does not feel that high school left him pretty well in "English." Very often, though, he finds out in English 101 that his teachers did not tell him everything he thought. These first English courses in college are supposed to work out the kinks and to stand the student in good stead for the rest of his life.

It is a rare bird that does not feel that high school left him pretty well in "English." Very often, though, he finds out in English 101 that his teachers did not tell him everything he thought. These first English courses in college are supposed to work out the kinks and to stand the student in good stead for the rest of his life.

Another common feeling is "I am so good at writing, and I can't wait to make a speech." There again, the English instructor says, "You are wrong. If a man has something to write, he can say it, or write it, too, for matter."

Literature begins in the sophomore year. From then on one may read in various areas though sometimes unfortunately he registers for the course he least likes. He is expected to read more than he can handle and must people whether they are interested or not.

Now, just what is poetry? Does a writer have to be poetic? Does a writer have to be poetic? Does a writer have to be poetic? Does a writer have to be poetic?

It is an odd question to read, for who thinks they need to read? It is an odd question to read, for who thinks they need to read? It is an odd question to read, for who thinks they need to read?

It is an odd question to read, for who thinks they need to read? It is an odd question to read, for who thinks they need to read? It is an odd question to read, for who thinks they need to read?

HOW A MODERN COLLEGE IS RUN

From MATRICULATION to GRADUATION

Yes, college today is more than it may have been in "Old Days." It is a composite of experiences. Laughter, work and play.

Morehead State is keeping abreast of the educational field. Her physical plant is unrivaled, her teaching and administrative staff capable and efficient.

Every year she grows stronger in the many fields she serves. More than one graduate holds administrative jobs. Many, grounded in their pre- and pre-law work, are now efficient states and lawyers.

A College of unlimited opportunities in "Old Kentucky," a state of unrivaled history.

Morehead State College
Morehead, Kentucky

Basic Preparation For Careers In Home Economics Offered At MC

The social science department at Morehead State College has two principal purposes. The first is to give to all students of the college a general background of knowledge that will enable them to form intelligent opinions concerning the many problems of social and economic issues which now exist and which arise in the days and years ahead. The American system of government operates on the assumption that every citizen is sufficiently informed and qualified with regard to matters of public consequence to be able to arrive at sound conclusions and to use his vote and his influence toward the constant improvement of the conditions under which the people of this nation, and indeed of all nations, work and live. Courses offered in the departments of history and political science, economics and sociology, and geography are designed to familiarize the students with the many complex and related elements that underlie the world which we face. The citizens of this generation and the generations to come have responsibilities that rest upon all citizens in a democratic society.

While it is not the purpose of the college to offer a business course which prepares the student for short courses offered in schools other than four-year colleges, a number of students are enrolled in business courses which are designed to give them a background of knowledge in the social sciences, mathematics, science and English which will enable them to develop and grow into a more responsible position in his field of employment.

These programs include not only subjects in the business fields such as typing, shorthand, office procedure and practice and accounting, but general background courses as well. The student will not only have acquired marketable skills with which he can obtain initial employment in business or a teaching position, but will have had broad training through a variety of background courses in the social sciences, mathematics, science and English which will enable him to develop and grow into a more responsible position in his field of employment.

For these students we have provided both a one-year and a two-year curriculum in business. Special emphasis is given to typewriting, shorthand, business English, business arithmetic, accounting, filing, office machines, office management and general secretarial procedure and practice. This work is all on the college level and credit on the degree level is given on the completion of all courses.

At Morehead State, Morehead is equipped with the best and latest style office equipment. Business and secretarial training and the procedures and techniques used require specialized training on many new types of office machines. Employees must know how to use modern equipment. In order to acquire the business students with these machines and procedures are given the college has purchased and made available for class use the most modern and efficient office machines.

Over 50 typewriters of different makes, with manual and electric; duplicating machines, such as the Mimeograph; Ditto; and other equipment are placed on the program. An addressograph machine; Dictaphone; and a typewriter with a transcribing unit; filing practice sets and equipment; 10-key calculators; and other equipment are also available.

Psychology Open Field For College Grads
The American Psychological Association, founded in 1882, is the major psychological organization in the United States. With approximately 6,700 members, it includes most of the qualified psychologists in the country. It is the purpose of the psychological association to further psychology as a science, as a profession, and as a means of promoting human welfare. It attempts to further these objectives by holding annual meetings and publishing psychological journals, conducting a personal placement service that underlies the working toward improved standards for psychological training and service.

There are seventeen divisions of interest in the association. The divisions are General psychology, teaching of psychology, evaluation and measurement, childhood and adolescence, personality and social psychology, psychological studies of society, ethics, Clinical and abnormal, comparative psychology, industrial and business psychology, Educational psychology, school psychology, counseling and guidance, psychologists in public service, military psychology, maturity and old age.

Those interested in psychological services will find many opportunities in each of the divisions listed above. Reports say that it is essential to have a doctor's degree in psychology to rise very high in the profession, but still there are many opportunities for job placement with those trained in the other specialties such as, secretarial, business, engineering, etc., with a knowledge of the principles of psychology.

There is always a need for college graduates in the field of psychology. The need is in Chemistry, whether it is dealing with metals from the earth, medicine, the new antibiotics, fertilizer, water purification or many other professions or jobs that require a basic education in Chemistry.

The salaries are good and there are many openings in this area of Kentucky in the industrial, medical, and other local industries.

At the grill, in class, Plans
It is hoped in the near future to be able to offer an area of concentration in the division. All being planned is a minor in Speech and Dramatics.

HIGH SCHOOL SENIOR DAY PROGRAM
April 28, 1950
9:30-11:30—Registration and Visiting of Campus and Buildings.
Guides will be assigned.
11:30-12:00—Band in Auditorium.
12:00-1:15—Free Lunch (Cafeteria) Myrtle Club in Cafeteria.
1:15-1:45—Music and Wagon.
1:45-2:00—Welcome, President Baird; and a Senior Greeting, Mr. Caudill.
2:00-2:30—Puppet Show—Tom Young.
2:30-3:00—Tuning—Mr. Boys and Girls.
3:00—Reception—Gymnasium.

Much Ado About Something As MSC Prepares To Be Host To High School Seniors

Science Hall Bristles With Exhibitions
Science Hall of Morehead State College literally bristles with exhibitions of the various activities and collections housed there. Every visiting high school senior is cordially welcomed to visit and study these showcases and exhibits.

Home Economics
On the fourth floor the Home Economics Department presents a display of a Living Room. Among the highlights of this program are a band concert, a puppet show by Mr. Tom Young and an informal luncheon. Concluding this program will be an informal get-together at the gymnasium.

Chemistry
At the other end of the fourth floor are two exhibitions by the Chemistry Department. One exhibits the Periodic Chart, some of the elements and a set of standard weights. The other exhibit is a flow chart of the qualitative groups which were used in the products formed during analysis.

Biology
On the third floor the Biology Department is displaying drawings by Dr. Clyde F. Reed of the various plants and animals of the state of Kentucky. Another exhibit is made up of Red Cross blood donors from along the coast of California. A collection from the Reed Herbarium and shows some of the new types of deep sea plants. The third exhibition of the Biology Department presents some of the most interesting and valuable specimens from the extensive museum collection of birds in this department.

Geology
Also on the third floor is an exhibition by the Organic Division of the Department of Chemistry, showing the Soviet Exhibition of the Soviet Union, Geology, Geography, and Meteorology.

On the second floor there are exhibitions by the Geology, Geography and Math-Physics Department. The Geology exhibit shows the "Fossils of Eastern Kentucky." There is also a display of geological specimens, including minerals, rocks, and fossils. The Math-Physics exhibit shows a collection of mathematical instruments, including a slide rule, a protractor, and a compass.

The two exhibits by the Physics Department show some interesting instruments, including a navigation, optics, X-ray tube and a collection of electrical instruments. The Mathematics exhibit shows the calculating instruments, including a slide rule, a protractor, and a compass.

There is also a display of a collection of birds from the Reed Herbarium and shows some of the new types of deep sea plants. The third exhibition of the Biology Department presents some of the most interesting and valuable specimens from the extensive museum collection of birds in this department.

Band On Tour
The college band has been on its usual spring tour since April 18th through the week. This tour, which has been an annual tradition since 1928, went to Ashland, Berea, Russell, Wartland, and other places.

The band left Morehead on April 18 at 8 a. m. and returned to Morehead on April 25. The band will present a special performance of their concert in the college auditorium on Tuesday evening.

PEM Club Sponsors College Play
The Industrial Arts Department of Morehead State College is sponsoring a play in the main display case on the first floor, exhibiting the work of various classes in the department. The play is titled "The Metal Working Department."

In addition to the play, the display includes a collection of metal working tools, including a lathe, a drill press, and a grinding wheel. The play is titled "The Metal Working Department."

The play is titled "The Metal Working Department." It is a play about the metal working department of Morehead State College. The play is titled "The Metal Working Department."

Sexiety To Attend Kiwanis Dance Meet

The Kiwanis Club of Morehead is sponsoring a dance and social affair under the auspices of the Kiwanis Club of Morehead. The dance will be held at the Morehead State College gymnasium. The dance will be held at the Morehead State College gymnasium.

Morehead Alumni Elected To Head KEA This Year

Miss Clara Clark, a Morehead graduate, was elected to head the Kentucky Education Association for the coming year. The association is the largest of its kind in the state. The association is the largest of its kind in the state.

Employment Outlook For School Teachers

Graduates trained for elementary school teaching should find a wide choice of employment opportunities in most states, according to the Bureau of Labor Statistics. The number of students completing preparation for high school teaching in 1949 was four times as great as the demand, the survey in 1950 is expected to be even greater.

The need for teachers in elementary schools will continue to increase over the next several years. According to a recent study by the Department of Labor's Bureau of Labor Statistics, enrollments in grades 1 to 8 will probably rise sharply for the next 7 years in most states and then level off. The total number of elementary teaching positions will therefore increase considerably, perhaps by more than 260,000 in the next 7 years. The number of new teachers required annually will be the greatest about 1953, the year when the sharpest increase in enrollments is expected.

Many more new teachers are required each year as replacements than for new positions, even in the current period of rapid growth of elementary school population. On the basis of a conservative rate of 7 percent, it is estimated that over half a million elementary teachers will be required in the next 10 years to replace those who die, retire or leave the classroom for other reasons. In addition, a sizeable number will be needed to replace those who leave the field for other reasons.

The number young people taking training for elementary teaching will depend, in the future, on the extent to which the other employment opportunities available and the relative salaries offered. If general economic conditions should become less favorable and there should be considerable unemployment, the supply of elementary teachers might become such that competition would develop.

Secondary Teachers
Strong competition for high school teaching positions is expected in the country as a whole for the next years at least. However, the distribution of teachers both locally and by subject field is such that some schools suffer shortages while others have many applicants for each job. With few exceptions, shortages are now limited to rural areas and such special subject fields as home economics. The greatest oversupply in most states is in the physical education, the social sciences, and English.

are expected to decline until about 1952. Therefore, the need for high school teachers will be limited largely to replacements for the next few years. After 1952, enrollments will probably rise slowly for the following 3 years and then increase rapidly into the 1960's. Over the 1950 decade, close to 85,000 new teachers may be needed to handle increased enrollments. In addition, from 17,000 to 20,000 replacements may be required each year during the 1950's. However, unless high school enrollments are considerably greater than seems probable on the basis of past trends, a training rate as high as that in 1949 would continue to produce an oversupply of secondary school teachers even in the years of greatest need.

Morehead WAA Represented At U. K. Play Day

Emphasizes 'The Modern Cow' In Weekly Assembly

At the weekly assembly program on Thursday, April 20, Mr. Henry C. Haggan, head of the U. S. Department of Agriculture, emphasized the importance of the dairy cow in the national economy and in the lives of the citizens of the country.

According to Mr. Haggan, the dairy industry is a six billion dollar industry nationally and is worth approximately one hundred and fifty million dollars in Kentucky. He also stressed the importance of the dairy cow in the national economy and in the lives of the citizens of the country.

The audience found the material informative and the presentation interesting and it is hoped that he will be able to give more talks in the future.

Professor: "Did you miss class yesterday?"
Student: "No, sir, not at all!"

Mystic Club Request

The Mystic Club has issued a special request to all its members to attend a very important meeting on Wednesday night, April 26, at 6:00 p. m. in Room 15 of the Art Building.

The club hopes to set up next year's program and to talk about a picnic for club members to be held next month.

Reed Attends Ky. Academy Meets At Murray

Dr. Clyde F. Reed will attend the spring meetings of the Kentucky Academy of Science on April 28-29. The main discussion which Dr. Reed will present to the Academy members will be "The Biological Division with its sub-division of plants in this State for his proposed book on the Flora of Kentucky."

Commerce --

(Continued from page 1)
and full keyboard adding and listing machines; key driven and crank driven calculators and a bookkeeping machine, as well as other equipment found in the modern office are available for class and laboratory use.

Beginning classes in a number of commercial subjects are offered in the summer term which begins June 5. Classes for the regular Fall term will begin on September 14. Classes offered in the Fall include: Business arithmetic, personal finance, beginning typewriting, intermediate typewriting, advanced typewriting, beginning shorthand, secretarial office machines, clerical office machines, filing, secretarial shorthand and practice, introduction to business administration, materials and methods in secretarial accounting and practice, introduction to business law, and advanced accounting.

'Much About Nothing' To Open April 28

The Morehead Stagehands of MSC's English Department will present the "Campus Theatre Guild's spring production, "Much About Nothing," a comedy by William Shakespeare, at 8:00 p. m. on the nights of April 28, May 1, 2, 3, and 4. All performances will be given in the Breckinridge Training School gymnasium.

Seats for all performances will be on a reserve basis. Admission will be fifty cents per person. Tickets go on sale on April 24 at the college bookstore. The college bookstore is located at the Eagle's Nest, Bishop's Drug Store and Holbrook's Pharmacy.

Music Tour On A Fraley Bus

The annual Blue and Gold Music Festival, which was held here on Saturday, April 15, was the colorful uniforms of the Junior High School, along with the eye-catching attire of the band members and the majorettes, and the robed figures of the chorus singers gave the campus something of the air of an opera stage.

Course Offered In Water Safety By Red Cross

The purpose of this course is to teach persons of ability how to teach others swimming and life saving. This is the first time such a course has ever been offered in Morehead. It will include demonstrations on canoeing and the latest life-saving techniques, special skills that Mr. Love has accumulated through 12 years of water safety work for the Red Cross.

Classes will be held for three hours a day on each of the five days Mr. Love will be at MSC. The time of conducting the classes will be arranged according to the wishes of those people taking the course. It will probably be in the afternoon or night.
