

THAT special correspondent at Lexington must have a fertile imagination. Every once in a while the news goes out from the blue grass capital that recent reports from Rowan County indicate that the factions are gathering, and the reading public look anxiously for further information of the expected outbreak. But it comes not. A letter received here from Circuit Clerk Johnson, of Morehead, makes no mention of the warlike preparations telegraphed the other day from Lexington. From this we conclude the festive reporter was only indulging in a little hilarity at the expense of a reading public—and the papers who pay him for his sensational dispatches.
