## Legion Plans Big Parade On July 4

### Hope To Secure Motorized Equipment From Fort Knox

Representatives of the various civic and veterans organizations held a preliminary meeting in the County Attorney's Office in the Court House, on Friday, June 7th, to make plans for the Fourth of July Celebration this year. Elijah Hogue was chosen as the group as general chairman, with Chiles VanAntwerp, as Secretary.

An executive committee was appointed which was to have general oversight of the planning of the day, and which is to also act as the finance committee. This group is made up of Garland Collins, representing the Veterans of Foreign Wars; Woody Hinton, for the Board of Trade; Boyd McCullough, for the Kiwanis Club; Harold Blair, for the American Legion, and Andre Bowne, for the Men's Club.

A tentative program was outlined for the day, and assignment of various organizations to have supervision of the events was discussed and agreed upon. It is proposed to open the celebration at 10:30 on the Court House lawn with a band concert, followed by a patriotic program, including a street dance, the speaker and recognition of the Rowan County Gold Star Mothers.

The parade will form at the Stadium at 12:30 and included in the marching group will be veterans of all our wars, as well as a series of floats to be sponsored by the various business houses of the city.

Following the parade there will be a series of athletic events at the Stadium in which every one will be urged to join, and prizes will be awarded to the winners of these contests. This will be followed by a baseball game between the Morehead team, being sponsored by the Legion, and some other out of town organization.

The night program has not been settled but it is hoped that there may be a display of military equipment, fireworks display, possibly a street dance, and a barn dance or jamboree.

The committee hopes to secure motorized equipment from Fort Knox for the parade.

## Rowan County Budget Drawn For Coming Year

Rowan County's budget calls for a total expenditure of \$46,481.18 for the fiscal year ending July 1, 1946 until June 30, 1946, figures released today disclose.

The budget figures are divided as follows: General Government, \$16,790.75; Protection to Person and Property, \$2,250.00; Health and Sanitation, \$1,300.00; Hospitals, Charities and Corrections, \$1,915.00; Libraries and other Educational Activities, \$1,960.00; Debt Service, General Fund, \$3,375.00; Miscellaneous, General Fund, \$2,267.24; Highways, \$5,000.00; Road and Bridge Bond Debt Service, \$11,162.19.

Never argue with an individual who knows the answers without knowing all the facts.

### Budget of Rowan County

Fiscal Year Ending June 30, 1947

#### SUMMARY ANALYSIS OF APPROPRIATIONS

1. General Government	\$16,790.75
2. Protection to Person and Property	2,250.00
3. Health and Sanitation	1,300.00
4. Hospitals, Charities and Corrections	1,915.00
5. Libraries and other Educational Activities	1,960.00
6. Debt Service, General Fund	3,375.00
7. Miscellaneous, General Fund	2,267.24
8. Highways	\$29,857.99
9. Road and Bridge Bond Debt Service	11,162.19
Grand Totals	\$46,481.18

## Vacation Bible School To Close Friday Evening

The Vacation Bible School at the Morehead Baptist Church will come to a close with a Commencement program on Friday night, June 14th, at 7:30 o'clock. A program of demonstration of the work done will be given by all grades. Parents and friends are cordially invited to this program.

On Friday at the close of the morning period the children will have a picnic at Joe's Place. Each child is to bring a lunch and drinks will be served by the church. Cars and buses will carry children to and from all these engagements, including the Commencement program.

The school reached the high enrollment of 243, which exceeds last year's enrollment by 52. Workers in the school are B. H. Kaeze, Pastor, Clyde H. Smith, Dorothy Turner, Opal McMenar, Mrs. O. F. Patrick, Alice Patrick, Mrs. Erna Thompson, Sue Wood, Mary Denny, Jean Black, Mrs. E. S. Pennington and Mrs. Carl Butcher.

## 8th District Sportsmen To Gather Here

### Meeting Scheduled Tomorrow; Hogan Boosted For Commissioner

Sportsmen of the Eighth District will gather in the auditorium of the Morehead State Teachers College Friday evening at 7:30 for the annual meeting to choose candidates for appointment to the Division of Fish and Game Commission.

The incumbent commissioner is Dr. H. M. Bertram of Vancouver. Friends of Herbert H. Hogan, accountant at the Morehead State Teachers College are boosting his candidacy and it is almost a certainty that his name will be submitted among the list from the Eighth District. The final appointment is made by the Governor.

In order to be eligible to vote sportsmen must have on their person hunting or fishing license for the past two years, 1944 and 1945, exclusive of license for the year 1946. Those who have not retained such licenses may make an affidavit at the meeting, stating they had held licenses for the past two years and giving the place of purchase.

## Prices Continue Strong At Stockyards

Prices continued strong at the Morehead Stockyards Tuesday, with the fairly heavy buyers snapped up price offerings at top prices.

Tuesday's report: HOGS - Packers, \$14.55; Mediums, \$14.55; Shoats, \$5.50; \$9.80.

CATTLE - Fat cows, \$10.50; \$13.30; Baby Beef, \$15; \$17.50; Milk Cows, \$48; \$94; Cows and calves, \$54; \$132; Stock cattle, \$50; \$69.

CALVES - Top veals, \$18.15; Mediums, \$18; Common and large \$12.70; \$17.

## Billy Jackson Will Be Ringmaster At Morehead Horse Show July 10

Miss Billy Jackson, riding instructor at the University of Kentucky, and widely known for her horsemanship, will be the ring-master at the Morehead Horse Show to be held at Jayne Stadium July 10, it was announced by Curt Bruce, manager of the performance.

The Morehead show will also feature nationally known judges. Owners of some of the finest show horses have announced their intention of going after the \$2,000 prize money being offered at the Morehead show. For a one day performance.

## Wet Weather Causes New Drainage Problem

Control of soil erosion caused by the rapid runoff of rainfall from sloping lands and drainage of wet bottom lands are probably the outstanding needs of farmers here, according to the Soil Conservation District, says Herbert J. Webb, county soil conservationist.

The farm plan is made to determine the needs of the farmer to properly conserve the soil and water on his individual farm. The District is now assisting farmers in making such plans. The effect may have different practices such as contour cultivation, construction of hillside diversion ditches, and the farm ponds, open and tile drainage systems and spreading of lime and phosphate.

During the first two weeks of June, plans were made for the farms of H. L. Bowman, Vernon Howard, Willie Brown, R. C. Pennington, and Melvin Eldridge. E. S. Blair, resident in some drainage work and Clinton Morehouse in constructing a diversion ditch needed above the tobacco farm.

Farmers should not hesitate to request assistance by applying at the work unit or district office. The district office is in the George Caudill building in Morehead.

## State Farmers Get Higher Crop Prices

Wheat, Corn, Oats, Barley Show Increase Over Last Year

Kentucky farmers are getting generally higher prices for their crops this season than last, according to price reports published by the U. S. Department of Agriculture at its office here.

A summary this week showed that prices received during May of 1946 compared with the same of 1945 were higher on all farm products except hay, which showed sharp decline, and Irish potatoes, poultry and poultry products.

Prices received as of June first this year, compared with those received at the same time last year included:

Wheat, bushel from \$1.63 to \$1.79 up; Corn, bushel from \$1.31 to \$1.43 up; Oats, bushel from 90c to 1.06 up; Barley, bushel from \$1.15 to \$1.20 up; Rye, bushel \$1.18 to \$1.61 up; Potatoes, Irish, bushel from \$1.85 to \$1.75 down; Potatoes, Sweet, bushel, \$2.15 to \$2.29 up; Cotton, ginned from \$20.00 to \$22.00 up; All Hay, loose, ton from \$25.50 to \$18.00 down; Clover and Timothy hay, 100 lb. from \$14.20 to \$14.40 up; Beef Cattle from \$13.50 to \$14.00 up; Veal Calves, 100 lb. from \$16.20 to \$16.30 up; 100 lb. from \$8.60 to \$7.20 up; Lambs, per 100 lbs. from \$13.30 to \$15.50 up; Milk Cows, each from \$22.00 to \$103.00 up; Chickens, live, lb. from 25.8c to 24.5c down; Turkeys, live, lb. from 33c to 30c down; Eggs, dozen from 31.4c to 30c down; Butter, per lb. from 44c to 45c up.

Morehead prize money is tops in the state this year.

Four championship stakes will feature the Morehead show. They are the H. H. Wheeler 5-gaited stake; the W. H. May 5-gaited stake; the Board of Trade Walking stake; and the W. R. Shafer Fine Harness stake.

Altogether there will be 20 classes shown at the afternoon and evening performances. Lights will be installed at Jayne Stadium for the event, which is expected to attract some 4,000 to 5,000 out-of-town visitors.

## Funeral Services Conducted For John Reed, 88

Funeral services for John Reed, 88, were conducted at the Alfrey Chapel Monday afternoon with burial in the Alfrey cemetery. Mr. Reed died at his home, near Cogswell, Saturday.

The following children survive: Mrs. Joe Allen Jones, Mrs. Gus Utterback, Sanford Reed, Mrs. Charles Ellis and Mrs. Mitchell Armstrong, all of Cogswell; Lulu Reed, living in Indiana; and Mrs. Ethel Alfrey Anderson, Ind.

Mr. Reed was one of Eastern Kentucky's pioneer citizens. He had spent most of his life farming. Arrangements were handled by Lane Funeral Home. The funeral services were conducted by Rev. Herbert Moore.

## Rev. Leeper Will Conduct Baptismal Service June 23

Rev. L. E. Leeper will conduct a Baptismal Service on the Dehart farm on Licking River Sunday, June 22 at 2 p. m. The public is invited to attend.

A representative from the Baptist State Mission Board will take moving pictures of the service in technicolor.

Rev. Leeper will close the revival and Bible School at Elliottville Sunday night.

A revival and vacation bible school will start at the apple house at Farmers June 11.

## DR. PENNEBAKER TO HEAD KANSAS WORKSHOP

Dr. G. B. Pennebaker, Head of the Science Department of Morehead College, left Friday on a two weeks' leave of absence to serve as leader and consultant of workshops to be held at the state teachers' colleges at Emporia and Pittsburg, Kansas, co-operating with the Kansas State Department of Education. The workshops are primarily for county superintendents and their assistants and are a study in the conservation of natural resources.

This is a phase of science education upon which Dr. Pennebaker has received recognition. The past two summers, the summer of 1944 at Columbia University, New York City, and last summer at the University of Kentucky.

He has also been scheduled for talks at the college convocations and before the Rotary Clubs during his stay in Kansas. On July 25 Dr. Pennebaker has been invited to speak at Johnson College, Nashville, Tenn., on "The Impact of Science on the Modern World."

Trade With Morehead Merchants

## Government Gives 'Go-Ahead' Signal On Morehead Housing Units

The 'go ahead' signal on the delivery of 48 temporary family dwelling units for married student veterans and their families is being given by the War Relocation Authority, which has been given the contract by the federal government. The college has furnished and prepared a site on the campus for the buildings and will act as manager for the housing as long as it is needed by student veterans and will be responsible for its disposition.

## Plane Crash Fatal To Veteran Pilot

### Navy Trainer Falls Near Brown Cemetery 2 Miles From City

A veteran Pan-American Airways pilot, James P. Moffett, Jr., was killed Tuesday when a Navy trainer plane which he had purchased at Union City, Tenn., crashed two miles west of Morehead. Engine trouble was held as the cause of the accident.

Richard C. Garnhausen, 23, Port Clinton, Ohio, who was flying ahead of Moffett in plane, he, too, had purchased a few hours before from the War Assets Administration, at Union City, said Moffett told him by radio a few minutes before the crash that his plane had developed engine trouble.

Garnhausen, who damaged his plane in landing near the wreckage, said Moffett apparently crashed while trying to land.

Moffett's plane was strewn all over the field, the crash tearing the engine from the plane. Death was instantaneous as the crash mangled the flier and broke many bones.

Moffett was a veteran with six years service with Pan American one of the world's largest airways. He had been decorated as a civilian pilot, doing military work during the war. He was married and had two children.

The remains were brought to the Lane Funeral Home and later sent to Circleville for burial.

## Guilty Pleas Entered By 2 Boyd Countians

Bert Caudill, Darwin Scott Convicted On Transportation Count

Bert Caudill, 28, and Darwin Scott, both of Catlettsburg, pleaded guilty today in Rowan Circuit Court to charges of illegally transporting whiskey and reckless driving and paid fines of \$300 each.

The state highway patrol tried to stop two automobiles one driven by Caudill and the other by Scott at the intersection of U. S. Highway 60 and State Highway 23 at Rodburn last night. Caudill swung his car on to the Sandy Hook road and the officers were unable to stop him, but later returned to Morehead.

The officers shot a tire off Caudill's speeding car forcing it to overturn. Caudill escaped, however, without injury. The officers confiscated nine cases of whiskey, some of it being Old Taylor and bonded brands which are difficult to procure.

Officials said they believed that Scott had eight additional cases in his car, and that the liquor in both cars belonged to Scott who has been arrested many times in Boyd County on similar charges.

Trade With Morehead Merchants

## Social Security Representative Will Be Here Tuesday

A representative from the Social Security office in Ashland will be in Morehead at the Building on Tuesday, June 18th, at 2:00 P. M., according to James C. Godbey, Manager.

Mr. Godbey stated that workers in employment under the Social Security Act, who have reached age 65, should see the representative about their old age retirement insurance counts and the survivors of workers who have died should call about death benefits.

## Shortage Of Sugar Curb To Moonshiners

### Stewart Predicts Rapid Rise of Illegal Whiskey Making

The present shortage and rationing of sugar is all that is holding up the greatest moonshining era in Kentucky history. State Alcohol Control Agent R. L. Stewart said today.

Agent Stewart believes that if sugar could be obtained the old sledge of a "still on every hill" would just about be true in many parts of Eastern Kentucky.

Stewart and Federal Agents D. R. Keeton and R. E. Bateman conducted three outfits this week.

They found one still on Little Sandy in Greenup County, but did not molest it in an effort to catch the operators. When they returned the next day the still was gone but the operators had left six fermenters, 100 gallon of beer, five gallons of sorghum and miscellaneous equipment which was destroyed.

Two copper outfits, completely destroyed on the head of Fox creek in Fleming County. No arrests were made.

Stewart said that most moonshiners are using sorghum which makes a poor grade of whiskey.

## Senate Race Becomes Mixed Up Scramble

Nine File For Office; 1 Democrat, 3 Republicans Seek Bates Seat

By CLAY W. BAILEY  
U. S. Staff Correspondent

This year's Democratic U. S. Senate nomination race in Kentucky has developed into mad scramble for the key post in Washington, on the basis of the list of candidates entered by the deadline for filing Saturday, midnight, June 8.

Secretary of state Charles O'Connell said nine names were filed and a 10th almost made it. The Republicans listed only two names—that of politically prominent Circuit Judge John S. Cooper of Somerset, and Roscoe Conkling Douglas of Williamsburg.

Another fact stood out this year. There will be Republican candidates in every congressional district in November, and Democrats in eight of the nine districts.

In addition, four Democratic members of Congress — Noble J. Gregory, Mayfield; Earle C. Clements, Morganfield; Frank L. Chelf, Lebanon, and Andrew Jackson May, Prestonsburg—escaped primary opposition but faced Republican opposition in the fall election.

Republican candidates William E. Porter, Hopkinsville, and W. Austin Blackwell, Clay, were unknown for nomination in the First and Second districts, respectively. There will be congressional contests at the other (PLEASE TURN TO PAGE FOUR)

## Milk Prices In Morehead Are Increased

### Dairies Announce 1 Cent Jump On Quarts Effective June 7

The Spring Grove Dairy and Red Rose Dairy, the two firms that supply most of the milk for Morehead and vicinity have announced price increases which become effective June 7.

The two dairies explained that the increase in milk with OPA authorization, and is indirectly passed to the farmer to compensate for the subsidies which caused June 7. Hereafter, dairymen received a 40 cent hundredweight subsidy.

One cent a quart increase in the price of milk was announced. This means that the price of quarts will be 17 and the wholesale price 13 and a half cents will not sell cents retail and 4 cents sale.

Morehead restaurants have complained that the increase in the price of milk is a heavy burden. One restaurant said this morning that they will probably jump their price of milk to 18 cents a quart.

Even with the increase in milk prices will be buying it cheaper than in most parts of Kentucky.

## Industry Urged At Attend USES Meeting Here

The United States Employment Service announces an introductory meeting to present Industrial Training, June 28, 1946 to employers, state and federal officials, and state and federal agencies. This meeting will be conducted by Mr. Joseph M. Hildesheim, Industrial Training Specialist for the United States Employment Service.

Mr. Hildesheim will explain the function of the Industrial Training Program for supervisors. This program is composed of Job Instruction Training, Job Relations Training, and Job Methods Training. This training is a free service. Each training session will require 10 hours for employers in this area.

All employers and other interested persons are invited to hear Mr. Hildesheim in the introductory meeting which will be held in the Administration Building at Morehead State College.

## Enrollment At MSTC Highest In Six Years

The largest student enrollment at Morehead State Teachers College in six years was recorded in the office of the registrar when registration for the first term of the summer session was completed last Saturday.

The figure now stands at 547 students, topping the enrollment of 500 in the Spring Quarter, the largest since the first term of 1940-41. Of that number 229 are men students, 155 of whom are returned veterans enrolled under the GI Bill of Rights.

This enrollment represents a 113 per cent increase over that of the first summer term last year, and an increase of 9 per cent over that of the preceding quarter this year.

## Supreme Court Says Jim Crow State Statutes Illegal

The Supreme Court decided last week that a state cannot enforce segregation of white and negro passengers in buses crossing state lines.

It all started when Irene Morgan, a Negro, was fined \$10 in Middlesex county, Virginia, for refusing to change her seat at the request of a bus driver. She appealed and it ended up in the Supreme Court.

# Has Your Census Been Taken?

The City of Morehead, is now taking a census. Contrary to some rumors, this is not a census to raise taxes, to find out how much money you are worth, how many automobiles you own, or whether you have a dog license. It is purely and simply a census to determine how many bona fide residents the Morehead has. It is to your interest to be sure that you are included in this census.

Your name and address, your occupation and the members of your family are about all the questions that the census taker will ask you. By giving the census taker the information he needs, you are helping him to do his job. The census taker because he is working in your behalf.

In 1940 the Federal government census listed the population of Morehead as slightly over 2,000. At that time the city has continued its rapid growth, while there has always been some question whether this was a full count. In addition, the new territory has been annexed into the city limits.

Under the laws as set up by the Public Service Commission, electric service is based on population. The City Council believes that there are over 3,000 people in Morehead, which is the breaking point in the power schedule. If Morehead has 3,000 or more population the City will receive a reduction of from eight to ten percent in light and power rates. This is the reason the present census is being taken.

It is our belief that Morehead qualifies for the reduction, but in order to secure it, the City Council needs your cooperation to secure a complete census.

# Our New Chief Justice

The appointment of Fred Vinson as Chief Justice of the United States Supreme Court occasioned no great surprise here. Born in Ohio, a Kentuckian in spirit, he has been a resident of this state for many years. In fact, many of our citizens are proud to have him as a resident. He is a man of high character and honor that is bestowed upon this great Kentuckian probably brings less comment here than any place else because the people who know him best take it for granted that the United States has found out what they have always known - that Fred Vinson is one of the greatest men the nation has ever produced.

Fred Vinson has served in high positions in the judicial, legislative, and executive branches of the government. With a brilliant mind, a keen insight into human nature and an inborn passion for public service he has brought honor to himself, his state and the nation. He is the one man in the United States that has the confidence of both Democrats and Republicans - of Capital and Labor.

When President Truman appointed him Chief Justice, he lost the most able man in his cabinet. It may seem surprising that the President would part with his most valuable ally until one analyzes the reasons for the appointment. The President's action of the unprecedented charges that Justice Jackson made. The President probably knew of the dissension in the heretofore dignified court, which made it almost mandatory that he name a man who (1) Had the confidence and respect of the members of the court and (2) had the ability to bring order out of chaos; (3) he had to name a Chief Justice who could secure confirmation, without dissension, in the United States Senate; (4) a man known to be fair to both capital and labor and who enjoyed their confidence. In Fred Vinson he had the man. It was a wise appointment of a man who will, no doubt, make one of the greatest Chief Justices this nation has ever had. When Fred Vinson takes out his "lead pencil" and levels down on the controversy now existing in the nation's highest tribunal we have no doubt but that there will emerge a smoothly co-ordinated group of men striving to maintain, "Justice for All," laying aside personal differences in the interest of common service.

# The Unseen Guest

Is there an unseen guest at your table? Have you ever seen a child who has been systematically starved? Have you ever watched such a child being away with his head down, his eyes closed, his hands clasped, his feet at food with unbelieving eyes? See him reach for a crust of bread and hurriedly devour it as though it might be snatched from him at any moment.

There is an unseen guest at your table. It has a stunted child's body, but there is a look of sadness and bitter wisdom on the face that no child should wear. A wistful look as he watches you eat. A shying off from what is bounty beyond belief which he has never known what it is not to hunger.

He does not ask much - not a share of your food - just the crumbs from your table. The unnecessary waste from the table in the average American home would feed many such as he.

There is an unseen guest at your table. Hunger is a horrible thing. It may kill the bodies of the children overseas. It has killed hundreds of thousands already. But more deadly still is its effect upon the minds of those who survive. Hunger may dwarf the body, but it

warps the mind, twisting it, scurrying thought for life.

There is an unseen guest at your table.

Your children, whom you cherish and for whom you seek your table with the best you can afford, that they may grow strong and healthy to vigorous manhood and womanhood - into what kind of a world will they go?

Will they, in their time, have to face the warped victims of hunger, grown to a twisted maturity, ready to seek out and follow with fanatic zeal the promises of food and loot held out to them by the demagogues or dictators of the moment?

Or, will they go into a world of friends with whom they have shared their bread in childhood? Whom they, through you, have helped give strength to stand alone.

Whether you know it or not, there is an unseen guest at your table. Will you bid him sit with you and eat?

# Inflation And Politics

By THOMAS L. PARKINSON  
Formerly professor of law, Columbia University, President, the Equitable Life Assurance Society of the U. S.

Certainly one must be blind not to realize that today's manifestations of inflation set the economic stage for continued increases in prices and wages month by month for an indefinite period in the future. Unless this course is checked, and it can only be checked by public officials responsible for public policies, we are in grave danger of the ruin which would accompany runaway inflation.

In its early stages inflation may be, and often is, popular with the great mass of the people. Everybody likes to have more money, and that is one of the first results of inflation. It is only when the supply of money has become so great that it has pressed prices to the point where the purchasing power of the currency holds people temporarily at a disadvantage until they can somehow get more and more money, that the average man begins to feel the savage pinch of inflation. Certainly in the long run it is the average man and woman who suffer the most from the decreasing purchase value of money.

It is difficult to define politics. In the past it might be said that politics was the science of leading a free people in those directions which provide the greatest good for the greatest number. Certainly in the past there has been some art of giving the people what they want when they want it irrespective of the ultimate effect on the general public welfare. That used to be called demagoguery. The line is not easy to draw today. Where vote courting ends and sincere public service begins is sometimes hard to determine.

Our public officials have at least been making some effort to stop the inflationary trend by price control. It is obvious that their efforts have not met with much success. This has been due particularly to the lag in production caused by strikes, but surely it does not require much argument to convince anyone that a major part of the increase in price control is the constant increase in the supply of money. The increase must be stopped; it is the job of our representatives to stop it.

When people have plenty of money, it is difficult to restrain them from paying whatever is demanded for what they want. At the moment we Americans want lots of shiny, new luxury items which we have been deprived during the war. With the money in our pockets we naturally grow impatient of any control which prevents our using it to buy those things we want.

More money means higher prices and demands for higher wages; this means constant strife between employee and management. And production does not ease the friction. In the end inflation crushes both management and labor indiscriminately.

There are pending many measures such as loans to foreign countries, absolutely essential provisions for veterans, and the like, which will require more and more expenditures by our Federal Government. These expenditures exceed current income, and are financed as deficits during the war. The Federal Government is now spending \$180 billion money supply of today. If we are not to go on increasing our money supply with almost certain runaway inflation the consequence, if we do not promptly get some of the monetized debt out of the banks. The monetized debt is simply that portion of the Federal Government borrowings for war purposes which is held by the banks. The only way to get that debt out is for the government to pay it off or to refinance it in the hands of the people and their savings institutions.

If our politicians will forget the rules of demagoguery and confine themselves to honest public service, America can be spared inflationary collapse. If the task they face is not simple, but it is not impossible. Stop printing money, stop paper money, refinance some of the monetized debt through the people; cut expenditures; and achieve a balanced budget.

A movie producer has used Orson Welles for \$205,612. The OPA should look into that figure - we don't think he's worth it.

A veteran says his girl returned his picture with a brief note, "We're through." It was a photo finish.

Why all the stress on a safe driving week, and then drive like mad the other 51.

A young girl in England recently collapsed after an embrace with her sailor friend. A sailor, of course, is nothing more than a wolf in ship's clothing.

Pickets paraded before two Chicago taverns last week because they employed a woman. Woman's place, they say, is in front of, not back of, the bar.

June, the month of brides. When the wolf is led like a lamb to the altar.

# Voice of Experience

(WVJ Service)

# IT HAPPENED IN MOREHEAD

(FROM THE EDITOR'S PEN)

Just As Wide

The boys around town are telling this one on Murvel Crooley, the likes President of the Morehead and North Fork Railroad.

The story goes that Murvel went to New York recently and decided he would call on his colleagues - the Presidents of other Railroads. He made his first call on the President of the Pennsylvania.

After some "shop" talk, Murvel pulled out a nicely engraved time pass which he handed to the President of the Pennsylvania.

"I think," said Murvel, "that all of us Railroad Presidents ought to stick together and help each other. Here is a life-time pass for you and your family, which will assure you of the very best accommodations, without any charge, anytime that you ride on our railroad."

The President of the Pennsylvania thanked Mr. Crooley and assured him that anytime he was in Morehead he would take advantage of the generous offer of the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strangely enough, the non-poisonous varicose veins as the water snake, the black snake garter, and even the common garter snake are considerably more pugnacious than either the copperhead or the rattlesnake members of the pit viper family, are both easily identified by their characteristic markings, thick body, blunt tail, and poison fangs. Strang

## Wake Up Kentucky...

By EWING GALLOWAY

Knowing many readers of this column realize that civic advancement, good local government begin at home and that

they are anxious to get started on a constructive program, I addressed a letter to the mayor of Oak Park, Illinois, which for decades has been one of the best governed cities in America, asking him to tell me briefly what makes the town tick. From the reply I learned that Oak Park does not have a mayor, and that it is not a city but a village, though its population is around

70,000. Instead of a mayor the village has a president.

But the term "village" is the only thing quaint about Oak Park, as you will learn by reading the following paragraphs from a letter written by Robert F. Caudill, Controller, to whom the president referred my inquiry:

"In Oak Park we have had Non-Partisan elections since the Village was organized. Men are usually chosen for their business ability and not because of political strength.

"We have a Village form of Government consisting of a President and six Village Trustees.

"At the present time, Mr. Stuart W. Cochran, who is a very successful businessman, is President of the Village and each of the six Village Trustees is a successful business man.

"We have a population of more than 70,000 people, yet the combined salaries of the President and the six Village Trustees is less than \$6,500.00 annually.

"We are immediate neighbors of the City of Chicago, yet our tax rate is far below that of Chicago.

"We maintain first class Police, Fire and Health Departments. Our Streets and Alleys are kept as clean as in the best municipalities in the United States.

"Appointments of department heads are also made on merit and not for political reasons.

"We have a good local newspaper — The Oak Leaves — which gives the readers a true picture of all happenings at the Village Board Meetings and when election time draws near, the newspaper gives its honest opinion and a true history of all candidates.

"For about half a century Oak Park has been known for its high standards in local self-government. It has set a mark few counties, cities or towns in Kentucky may reach in the near future, but Oak Park serves as a splendid example for communities throughout our state.

The difference in governmental form between Oak Park and Kentucky municipalities is not important. Any city, town or county in Kentucky can do what the Illinois city has accomplished if the people make up their minds to put able business men in key offices and then give them the moral support they are entitled to.

Yes, Kentucky communities can do what Oak Park has done!

## Agriculture In Kentucky At Tops Now

Caudill Points Out That Farmers Bank Credit Improved

Kentucky agriculture is currently in a stronger financial position than it was at the close of World War I, according to F. Caudill, Vice President of the Peoples Bank, who has been designated by the Kentucky Bankers Association as Rowan County Key Banker.

According to a national survey on the use of bank credit, which was made by the Agricultural Commission of the American Bankers Association, Kentucky farmers in 1945 used only a sixth of the bank credit available to them from the 353 Kentucky banks which make agricultural loans. During last year the banks served 72,393 or 30.3 per cent of the 242,671 Kentucky farmers by making 124,637 agricultural loans for a total amount of \$61,474,000. Of this loan volume, \$41,059,000 remained outstanding on January 1, 1946. The banks had on that date \$201,578,000 additional for agricultural loans if there had been a demand for such loans.

That the credit extended by the banks to their farm customers is a useful tool of agriculture is shown by a breakdown of these overall figures: Last year 61,535 farmers procured farm production loans in an aggregate amount of \$40,926,000, and of this volume \$18,135,000 was outstanding on January 1. Farm real estate loans were made to 11,558 farmers for a total of \$20,548,000. This brought the amount of long-term real estate paper held by the banks up to

\$22,837,000 on January 1. "The fact that Kentucky farmers have found it necessary to use only a small part of the bank credit, available to them indicate that they are in a far stronger financial position today than in any previous period of their history," Mr. Caudill said. "During the war years farm incomes have been high and farmers have wisely used their earnings to pay down debt and accumulate savings in War Bonds and bank accounts.

"The high level of bank assets and the high degree of liquidity of the banks assure Kentucky farmers of ample bank credit in the future to meet all of their needs. At the end of last year Kentucky country banks had an average of cash and United States Government bonds equal to 92 per cent of their deposits. By contrast, in 1929 the typical country bank in this state had cash and government securities equal to less than 50 per cent of its deposits. Today's high ratio of country bank liquidity is one of the most promising indications for the continued financial well-being of our farm community."

Providing bank credit to meet the needs of agriculture for constructive purposes is only one of the services being rendered by the banks to their farm customers. Mr. Caudill pointed out. Working with the state association and with the American Bankers Association's Agricultural Commission, the banks have been promoting a program which will result in many benefits to the farm community.

One immediate aim of this program, Mr. Caudill said, is to prevent postwar inflation. The banks are encouraging their farm customers to continue to save through purchase of U. S. Savings Bonds, and avoid going into debt to buy farm land at high prices. The average price of farm land in Kentucky is now 127 per cent above the level prevailing before World War II.

This rise is approximately equal to the rise during the World War I period to the boom peak in 1920. Bankers are watching urging their customers to keep this situation closely and are in a safe financial position. "For the long-term, the banks are encouraging farmers to engage in well rounded and diversified farm production, and are placing particular emphasis on conservation of the productivity

ROWAN COUNTY NEWS 5  
MORGANTHAU, SEBASTIAN  
Thursday, June 13, 1946  
Another part of this program is concerned with the education of farm youth through sponsoring activities of 4-H clubs and Future Farmers.  
Recorded history gives no evidence that the "elders" have ever approved the habits of this rising generation.

## To The Citizens of Eastern Kentucky, Southern Ohio & Western West Virginia

We are pleased to announce that we are now in the last lap of our campaign to raise \$40,000 for the purchase of the Carter Caves property for State Park purposes. Having raised more than \$20,000 in Carter County alone, we can not escape the conviction that our neighboring counties desire to share in the promotion of this most worthy enterprise.

If we can transfer to the Commonwealth of Kentucky the title to the Carter Caves property before the beginning of the next fiscal year, July 1, 1946, the State park to be established there will doubtless share more generously in the 1946-1947 appropriation for State parks than we could hope for should the transfer of title be delayed beyond the beginning of the next fiscal year; hence the necessity for immediate action by all who contemplate lending assistance in the fund-raising campaign.

Please make all checks payable to George F. Robinson, President, First National Bank, Grayson, Kentucky, who is treasurer of our association.

Carter Caves State Park Association

W. J. FIELDS, President

Every good farmer plans for the next generation just as every great business is based on the long term ahead.

## SKIRT-TUGGER?

Is your child irritable, fretful-tugging at your skirt? This crossness is often the sign a laxative is needed.

## Triena FOR CHILDREN

Most children have times when faulty elimination makes them tired, sluggish, with a coated tongue. When this happens, remember the quick relief Triena brings. Made with famous senna, it's effective, gentle. TRIENA won't upset your child. It tastes good because it's flavored with pure prune juice. 30c, large size 50c. Use as directed on label.

## FFA Livestock and Poultry Projects

Swine. Nine boys of the Rowan County FFA Chapter completed projects in swine during the past year. These consisted of 6 market hogs and 6 sow or gilt projects. The total labor earnings on hogs were \$465.80. James Robinson and Delbert Kegley had the outstanding swine projects for the year of 1945.

Dairy. Eight members had dairy for their projects during 1945. The dairy program was made up of 8 milk cows and 3 dairy heifers. Total labor earnings from dairy amounted to \$844.70. Lester Evans had the best dairy project.

Poultry. Eight projects consisting of 585 chicks net a total of \$352.08. Wayne Cox was the champion poultry raiser last year.

Beef. Two projects were com-

pleted consisting of 1 beef cow and 3 heifers. The net return from these two projects amounted to \$177.25. Glen Curtis has raised the best beef cattle during the last five years.

## FHA News

Five Future Homemakers from Rowan county were among the 250 persons who attended the first annual state Future Home-maker convention held at Eastern State Teachers College, Richmond, last week.

Joyce Priest, Hubbardsville, was elected president of the state organization. Other officers elected and their schools were:

Doris Lloyd, Mayville, first vice president; Jane Waller, Clark County, second vice president; Virginia Layfield, Campbell County, secretary; Corinne Walker, Alton, treasurer; Doris Turner, Shelbyville, historian; and Shirley Carson, Hazard, parliamentary.

John Fred Williams, state superintendent of public instruction, presented the state charter to Laura Humble, Danville, retiring president. Kentucky was the first state in the nation to qualify for a charter.

The official state F. H. A. song selected at the convention was written by Eileen Chinn and Velma St. Claire. Future Homemakers of Dundee High, Ohio, county.

Mary Bell Vaughan, state F. H. A. adviser, and Mary Lois Williamson, state supervisor of home economics education, were made honorary members of the Kentucky Association of F. H. A.

The Morehead High School Chapter of the Future Homemakers of America was one of the eleven chapters in the State to be presented the Award of Merit in recognition of its work during the year 1945-46.

Miss Mary Lois Williamson, State Supervisor of Home Economics Education, in presenting the awards to the chapters praised their efforts in working together to meet all the goals set forth by the State Executive Council last September.

One hundred twenty two chapters have been organized in the past year with a total of 4,231 members. Kentucky has been outstanding in the Nation being the first to affiliate with the National F. H. A. Around 300 delegates attended the meeting. Those from Morehead were: W. H. Rice, Club Adviser; Virginia Ellington, President; Ashland District and Chapter President; Gwendoline Kissick, Ella Mae Arnette, delegates; Betty Wolford, Breckinridge Chapter President; Janice Dudley Breckinridge delegate.

## Senate Race

(Continued from Page One)

There would have been 10, entries for the U. S. Senate on the Democratic side had the Secretary of state's office consented to the importunities of Lexingtonians who called and asked that such be done to permit Frazier L. Ellis, Lexington, wealthy farmer, to file.

But the Secretary of State's clerical forces declined to be a party to the manipulation of clock-turning back, an old trick frequently employed in legislative circles.

Likewise, Rep. Clements barely escaped opposition, State Rep. G. I. Drury, Morgantown, had papers prepared for filing, but went to Lexington to confer with friends

who dissuaded him. In the Congressional contest, Rep. Spence, Fort Thomas, Fifth District, found himself with last minute opposition from Patrick M. Flaherty, Covington, a local keeper for Democratic renomination.

Likewise, Marion W. Moore, Park Hills attorney, weighed in for the G. O. P. reference in this district. He is opposed by Joseph Kane, Covington.

Spence is chairman of the Blake banking and currency committee. While Kentucky's other chairman of a House major committee—May of Military Affairs—escaped primary opposition, five republicans are contesting for the right to oppose him in November.

Dr. Elmer E. Gabbard, Buckhorn, minister, president of Wetherspoon college and the 1942 and 1944 opponent of May, again entered the fray and is opposed by four other Republicans—Charles F. Trivette, Virgie; C. V. Snapp, Jenkins; Howes Meade and W. T. Stafford, both of Paintsville.

The complete list of candidates as the deadline fell were:

U. S. Senator: Democrats—Philip P. Ardery, Frankfort; Norris Brooks Vincent, Brownsville; John V. Brown, Lexington; Bailey Helm, Louisville; John J. Thobee, Covington; George T. Smith, Beattyville; James Logan Delk, Hopkinsville; Tom Logan, Madisonville; Henry C. L. Stephens, Jr., Cliff; Republicans—John Sherman Cooper, Somerset; Roscoe Conkling Douglas, Williamsburg.

Judge, court of Appeals, third appellate district—Democrat—Joseph O. Polin, Springfield; Republican—Clyde B. Latimer, Glasgow, incumbent.

Representatives in Congress: First district: Democrat—Noble J. Gregory, Mayfield, incumbent; Republican—William E. Porter, Hopkinsville.

Second district: Democrat—Earle C. Clements, Morgantown, incumbent; Republican—Clayton Blackwell, Clay; and Thomas W. Hines, Bowling Green.

Third district: Democrats—Eugene O'Neal, Louisville, incumbent; Richard Harry Hill, Louisville. Republicans—George L. Phillips, Moody Boyd, Louisville; Thurston Ballard Morton, Glenview.

Fourth district: Democrat—Frank L. Chelf, Lebanon, incumbent; Republicans—Don V. Dyes, Bradfordsville; O. A. Durham, Columbia.

Fifth district: Democrats—Brent Spence, Fort Thomas, incumbent; Patrick M. Flaherty, Covington. Republicans—Marion W. Moore, Park Hills; Joseph Kane, Covington.

Sixth district: Democrats—Virgil Chapman, Paris, incumbent; Joseph L. Arnold, Lexington. Republicans—William D. Rogers, Georgetown; Hunter Stratton, Salvisa.

Seventh district: Democrat—Andrew Jackson May, Prestonsburg, incumbent. Republicans—Sanitation, \$1,300; Hospitals, Charities and Corrections, \$1,915; Libraries and other Educational Activities, \$1,989; Debt Service General Fund, \$3,375; Miscellaneous, General Fund, \$2,267.24.

Highways, \$5,000; Road and Bridge, Bond Debt Service, \$11,623.19.

Dr. Elmer E. Gabbard, Buckhorn; Charles F. Trivette, Virgie; C. V. Snapp, Jenkins; W. Howes Meade and W. T. Stafford, Paintsville.

Eighth District: Democrats—Joe B. Bates, Greensburg, incumbent; Harry King Lowman, Ashland. Republicans—Ray Schmauch, W. R. Frasure, Ashland;

Elmer C. Roberts, Campion. Ninth district: No Democrat. Republicans—John Marshall Robinson, Barbourville, incumbent; Pleaz William Mobley, Manchester; Charles B. Candler, Somerset.

**Flight Training**

A veteran may elect to enroll for flight training under the "G. I. Bill of Rights" in any flying school or flight training institution which has been approved by the state. Enrollment in the school must be for a definite course of flight instruction consisting of one unit flight course or a combination of unit flight courses which consist of: (1) Elementary flight or private pilot course (2) Advanced flight or commercial pilot course (3) Flight instructor course (4) Instrument rating course (5) Multi-engine class rating course.

An eligible veteran who, prior to enrollment, has completed the desired certificate or rating, may be enrolled in any unit course for which he is eligible and for a sufficient number of hours to complete the requirements for the desired certificate or rating. Refresher training is available to a veteran who has formerly held a certificate or rating, but has not kept the certificate or rating current. He may enroll in a unit course at any stage in the course for such parts of the course as are necessary for him to qualify for the reinstatement of his certificate or rating.

A veteran holding a current CAA certificate with rating as a private or commercial pilot may, if he so desires, enroll in an appropriate unit course for a sufficient number of hours to qualify him for an additional airplane class rating of single engine land, single engine sea, multi-engine land, or multi-engine sea.

The course may be pursued on a definite schedule, either full-time or part-time, and there is no requirement of the Veterans Administration that the course must provide a minimum of 25 clock hours attendance each week.

The Veterans Administration is not authorized to pay in excess of \$500 for a course of less than thirty weeks. However, courses requiring more than 30 weeks may be paid for in an amount greater than \$500, provided requirements are met as set forth by the Veterans Administration.

Subsistence allowance shall be based upon the anticipated normal program of flight instruction and the number of clock-hours of required attendance at the school.

Bond issues are designed to permit the present generation to wear out what future generations will pay for.

Improved  
Uniform  
International  
SUNDAY  
SCHOOL  
LESSON

By BARBARA L. LUNDQUIST, D. D.  
Of The Moody Bible Institute of Chicago  
Released by Western Newspaper Union

**Lesson for June 16**

Lesson subjects and Scripture texts are  
selected and copyrighted by International  
Council of Religious Education; used by  
permission.

**LEARNING ABOUT  
THE KINGDOM**

LESSON TEXT—Luke 9:21, 24, 46-48.  
7:22, 11:14, 17:20, 21.  
MEMORY SELECTION—Thy kingdom  
come. Thy will be done in earth, as it  
is in heaven.—Matthew 6:10.

Following Christ calls for the best  
in man. Weak-kneed and watered-  
out religious philosophies and activi-  
ties have no right to call them-  
selves Christian.

Let us put away these insipid  
imitations of Christianity, which so  
often masquerade under its name,  
and face our time with a call to  
discipleship which demands every  
fine, noble, manly and womanly  
quality.

I. Denial of Self (Luke 9:22, 24).  
A cross—that speaks at once of  
suffering and death. We may as  
well face it. The Lord never in-  
tended it to be an easy thing to fol-  
low him. A man must lose his life  
for Christ if he is to win it.

Note that the cross we bear does  
not refer to the trials or vexations of  
life. We should bear those as  
Christians, but there is something  
else in mind; namely, the complete  
denial of self-will, and the eager de-  
sire to do only God's will. And note  
also that this is the requirement of  
every Christian, not just of a few  
who are especially "consecrated."

Do you qualify? If so look at the  
next point.

D. Humility of Heart (Luke 9:46-  
48).  
The world looks up to the great,  
the mighty, and the rich. The dis-  
ciples had caught that fever and  
were quarreling about who was to  
be greatest. What a tragic and dis-  
graceful picture! But is it any dif-  
ferent in the church today? Men  
are still determined to be "Mr.  
Big."

The follower of Jesus sees beyond  
the false earthly standard of great-  
ness, and in humility ministers to  
the little child. And lo! he has re-  
ceived and served Jesus Christ him-  
self, and has become greater than  
all the would-be great ones. Those  
about him may not see it, but God  
does, and in due time others shall  
also know of it.

III. Determination of Purpose  
(Luke 9:57-62).  
Following Christ is more than  
singing glibly or carousing. "I'll go  
where you want me to go, dear  
Lord." The one who starts out  
with him is to count the cost (Luke  
14:28-33). He must expect the same  
treatment as Christ (II Tim. 3:12)  
and be willing to take it gladly  
(John 15:20; I Pet. 2:21).

We ought to make this plain to  
professed believers. Tell young  
people the truth and you will see  
that they are ready to respond to  
it. They are willing to give them-  
selves sacrificially for causes of this  
earth—why not for Christ?

Christianity is considerate and  
courteous, and our Lord is not here  
suggesting any neglect of the duties  
or amenities of life. The point is  
rather that the Lord must have first  
place whatever else may call for  
second thought.

IV. Prayer of Faith (Luke 11:14).  
The one who is to follow Jesus  
must know how to pray—and he  
prays in faith. He must know how  
to hold up the world to God, and  
get things from God for this needy  
world.

There is no one who can teach  
us to pray better than Jesus, for  
he practiced what he preached. He  
prayed. It was seeing him pray  
that led the disciples to ask him  
to teach them to pray. Jesus taught  
his disciples a model prayer. This  
prayer opens with a recognition of  
God as Father, followed by a rever-  
ent petition that his name may be  
hallowed; that is, that he may  
have glory as his will is done and  
his kingdom established in the  
hearts of men. Those who have  
that attitude are ready to ask for  
the supply of daily needs, and above  
all, forgiveness of sin and deliver-  
ance from temptation.

Note that verse 4 is not the prayer  
of the un saved for forgiveness and  
regeneration, for that is all of grace  
(Eph. 2:8). "The man outside (of  
the kingdom) gets his forgiveness  
with no condition; but once he is  
in the kingdom of the Son of God's  
love, he lives within the laws of that  
kingdom. Then he does not get  
forgiveness unless he is ready to  
forgive, unless he has forgiven" (Morgan).

V. Recognition of Christ (Luke 17:  
20, 21).

The disciples thought of the  
kingdom in terms of "when"; they  
should have asked "what," or even  
better "who," for the kingdom was  
present and operative right then be-  
cause the King was there.

That is the true meaning of "with-  
in" (v. 21), which really means "in  
your midst." It does not mean that  
the kingdom of God was within the  
hearts of the Pharisees, or within  
the social order, but that it is the  
person of the King, the kingdom it-  
self, was in their midst. They re-  
jected him, and so also his kingdom.  
What about us? Is he your King?  
Or do you also reject him?

Morehead business firms are constantly striving to serve you well. You will find no better place to shop than in Morehead Stores.

## WEEKLY NEWS ANALYSIS

U. S. Acts to Aid Flour Mills;  
Bares Soviet Atom Intrigue;  
Moderates Sweep European Vote

(EDITOR'S NOTE: While opinions are expressed in these columns, they are those of Western Newspaper Union news analysts and not necessarily of this newspaper.)

FLOUR:  
U. S. Aid

From 74 to 100 million bushels of wheat from government relief stocks of 814 million bushels were expected to be distributed among domestic millers to relieve the tight flour situation under a new directive announced by Secretary of Agriculture Anderson.

At the same time, it was disclosed that the government considered a 10 per cent reduction in sugar allotments to bakers to help the diversion of flour from bread to pastries.

The tight supply of flour resulted from the government's extensive foreign relief program. In the crop year ending June 30, the U. S. will have shipped 40 per cent or more of all cereal grains exported by surplus grain producing countries. Continuation of the pinch through 1946-47 is seen in government commitments to deliver an additional 200 million bushels of wheat during the next crop year.

Allocation of wheat to millers from government stocks followed curtailment of operations in many milling centers and was expected to complete shutdown if relief were not provided before the new crop came in. Millers criticized the government for not limiting use of wheat to spread supplies at the time it undertook its heavy export program.

## STATE DEPARTMENT:

## 'Stettin' Bones Out

One of the few big businessmen to enjoy the limelight in government in recent years, handsome, silver-haired Edward R. Stettinius bowed out of the U. S. diplomatic service after a noteworthy wartime and postwar career.

Amid a swirl of conflicting rumors regarding the cause of Stettinius' resignation as U. S. representative on the United Nations security council, President Truman accepted his retirement only after he had failed to persuade him to stick while some quarters whispered that Stettinius had quit because he was permitted to resign.

Stettinius was little leeway in acting on his own in U. N. others said that he had his eye on the senate as a member from Virginia.

Famed for his high positions in General Motors and U. S. Steel while only in his 30s, Stettinius, now 46, served as lend-lease administrator through the war. As undersecretary of state, he played an important part in the framing of a postwar peace organization at Dumbarton Woods, and later as secretary of state he was active at the momentous San Francisco conference which saw the creation of the United Nations.

## LABOR:

## Maritime Threat

Having resorted to drastic action to break the railroad strike, President Truman undertook equally strong steps to head off a walkout of CIO and independent seamen which threatened to paralyze coastwise and overseas shipping.

Making good on warnings that he would use the navy, army and coast guard, if necessary, to maintain operation of the merchant marine, the President called for volunteers from naval reserve officers and inactive personnel to man U. S. vessels in event of a walkout. At the same time, naval stations were ordered to report on the number of

men available for sea duty with or without replacement.

Mr. Truman's action followed the union appeal to the World Federation of Trade Unions to co-operate in case of a strike by asking affiliates to refuse to service government-operated U. S. ships in foreign ports.

Amid the high-pressure maneuvering between the government and the unions, both the CIO and ship operators made substantial concessions in an attempt to reach an agreement.

Originally, the unions had asked for flat pay raises ranging from 22 to 35 cents an hour for seamen along with a 40-hour week and eight-hour day at sea and in port and overtime pay ranging from \$1.25 to \$1.75 an hour. Demands for longshoremen included an increase of 35 cents an hour, overtime for Saturday and elimination of carload differentials.

## ESPIONAGE:

## Bare Russ Intrigue

Alleged Russian intrigue against the U. S. and Britain and Canada was sared before a crown court trying Fred Rose, communist member of commons, for conspiring with other C. O.adians to violate the official secrets act and aid Russia.

Key witness of the prosecution was 27-year-old Igor Gouzenko, former code clerk in the Russian embassy at Ottawa, who reported the existence of an alleged Soviet espionage ring operating in Canada after he became convinced it was in the best interests of the Russian people and the democracies.

Under heavy court guard, the youthful Gouzenko identified what he said was a coded message he had sent to Moscow concerning information of U. S. atomic bomb tests in New Mexico. From information he testified had been furnished by Dr. Allan Nunn May, a scientist later arrested in London, the message read: "... The bomb thrown on Japan was made of uranium 235. It is known that 400 grams of uranium 235 were issued daily at the separation plant at Clinton. ..."

The message was one of a mass of documentary evidence which the prosecution was prepared to lay before the court in substantiation of his charges against Rose. He was accused of being an intermediary between Canadian scientists and officers of the communists. In disclosing the existence of the ring, Gouzenko stole numerous papers from the Russian embassy.

## EUROPE:

## Reds Trail

Moderates continued to dominate postwar European elections but the Communists rolled up impressive votes and maintained their strong position in the politics of the western portions of the continent.

While the rightist Popular Republican movement in France won the most seats in the French constituent assembly and the Socialists continued to hold the balance of power, the Reds picked up 300,000 votes since last October and polled a total of 5,145,325. Indicative of the Red influence, it was reported that the Socialists would refuse to join any government lacking communist representation.

Importance of such problems to the region's economy is indicated by the fact that 75 per cent of all New England is forest land.

In Idaho, reclamation of desert areas is being accomplished by extensive reseeded. Some 20,000 acres of burned-over grazing land have been reseeded already, much of it now providing better pastureage than before grass fires ravaged it two and three years ago. A 15,000-acre tract seeded from airplanes last year is already showing a good stand of grass.

**Veteran's News**

Community Committees  
To Aid Vet Patients

Charitable individuals and organizations now have a greater opportunity to contribute to the comfort and welfare of war veterans in hospitals and domiciliary homes of the Veterans Administration. Realizing the inestimable value of the voluntary activities of numerous individuals and groups in the wellbeing of hospitalized veterans, the Veterans Administration Branch Office in Columbus is expanding the volunteer service program in Ohio, Kentucky, and Michigan.

Committees are being organized in the hospital communities to advise in the planning and coordination of the activities of all voluntary service organizations and individuals desiring to assist in the Special Services program. The Special Services Director of each hospital will act as chairman of the community committee. Represented on this committee will be the American Legion and Auxiliary, American Red Cross, Veterans of Foreign Wars and Auxiliary, Disabled American Veterans and Auxiliary.

## White Top Cab

PHONE 9110

New Clean Cabs

United Service Organizations and other community organizations interested in the program, an advisory committee will function on a three-state basis at the Branch Office.

The committee will encourage individuals and organizations to participate in appropriate phases of the volunteer service program. They will promote a healthful and normal association of patient personnel with members of the local community on the basis that such association is beneficial to the patient.

## Liberalized Insurance

## Not Effective Yet

Veterans in Ohio, Kentucky, and Michigan, were advised by L. C. Cook, Director of Insurance Service at Veterans Administration Branch Office in Columbus, that even though the House of Representatives has passed a bill making certain changes in National Service Life Insurance, those changes are not yet effective.

Upon final passage of the bill by the Senate and its signing by the President, complete information about the new liberalized insurance regulations will be made available to all veterans in this area, Mr. Cook stated. Until then, veterans are requested not to write the Veterans Administration with reference to these changes, as definite information is not yet available.

The pending legislation would materially liberalize the provisions and benefits of National Service Life Insurance held by Veterans of World War II, including a choice by the veteran in the form of payment to beneficiaries.

## Social Service Plan

A social service program, which will provide assistance to all veterans in their readjustment problems, is being established by the Veterans Administration in Ohio, Kentucky, and Michigan.

This social service aid to veterans and their families will be available at all hospitals, regional offices and most sub-regional offices in the three states.

Heretofore, social service has been available only to hospitalized veterans, but under the new plan, trained social service workers will be able to help any veterans with emotional and personal problems involved in civilian readjustment. The program at all hospitals will continue to be emphasized.

## G. I. BILL TIME LIMITS

The World War II veteran, who qualifies under the Servicemen's Readjustment Act for its benefits, has:

4 years from the date of discharge on the official end of the war, whichever is later, to apply for educational benefits;  
2 years from date of discharge on the official end of the war, whichever is later, to apply for readjustment allowances;  
10 years from the official end of the war to apply for a G. I. loan.

## QUESTIONS AND ANSWERS

Q. Is it true that the government pays all the interest on a G. I. loan?

(No, it is not. During the first year of the loan, the Veterans Administration will pay the interest on that part of the loan which it has guaranteed. The veteran pays the rest of the interest himself.)

Q. Am I entitled to a subsistence allowance while training under the law for disabled veterans? I am now drawing a disability pension.

A. Yes. You may receive subsistence of \$63 a month if single, \$90 a month if married, regardless of the amount of your pension.

Q. I am entitled to three years schooling under the G. I. Bill. I want to take a nine-month concentrated course, but it costs nearly double the \$500 the government will pay for one year's training. Can I take the course?

A. Yes. The Veterans Administration will pay the bill at an approved institution. The total amount to which a veteran is entitled may be used in a shorter time.

Q. As a merchant seaman disabled in World War II, may I receive vocational rehabilitation?

A. Not from the Veterans Administration, because merchant seamen are not eligible for Veterans Administration benefits. You may apply for it, however, through the Federal-State rehabilitation program under the Federal Security Administration.

Q. A veteran of World War II I have been laid off because of a strike in another plant, although my plant is not on strike. May I receive readjustment allowance while laid off?

A. Yes, since you are not on strike yourself and are unemployed through no fault of your own, you may receive the allowance if otherwise eligible.

Q. I am a disabled veteran. Can I take a part-time job while

taking training under Public Law 16?

A. You may, with the approval of the training officer, or, if your disability is severe, only if approved by medical authority.

## HOLLY

Pvt. Dan R. Thompson returned home Sunday to spend a 10 day furlough with his parents, Mr. and Mrs. Frank Thompson. He has been stationed for the past three months at Camp Robinson, Ark. He will leave for Camp Campbell, Ky. June 12th to complete his training.

## FLYING IN THE WORLD SPOTLIGHT

### The American Flag

Americans soberly realize and accept the world-wide responsibilities which are theirs today.

The Star-Spangled banner flies now over many lands, and often under dark and lowering skies. It is looked up to with faith by people who have never known justice. It is a flag of hope and healing in disease and famine-ridden countries. It brings the promise of life, education, progress, to millions of war victims.

On Flag Day, June 14th, as we honor the flag here at home, let us resolve to maintain it in the highest honor wherever it flies.

## Announces Engagement Of Daughter

Mrs. W. T. Caudill is announcing the engagement and approaching marriage of her daughter, Miss Leola Margaret Caudill, to Mr. George Alexander Hurst, II.

The ceremony will take place on Saturday, June 22nd, at the First Christian Church in Morehead, at 4:30 o'clock.

Miss Caudill has been hostess at Service Club Number One, Fort Knox, for the past three and a half years. She is now at the home of her mother, having returned to Morehead Wednesday.

Before leaving Fort Knox and Louisville, Miss Caudill was the honor guest at a number of parties and showers.

Mr. Hurst, whose home is in Philadelphia, has been in the service for the last four years, but was recently discharged. He served with the 82nd Army Band of the Armored School at Fort Knox.

## Mrs. T. P. Anderson Hostess at Buffet Supper

Mrs. T. P. Anderson entertained with a buffet supper Tuesday night at her home on Lyons Avenue in honor of her sister, Mrs. E. M. Curry of Pineville, W. Va., who with her children are spending the week in Morehead.

## Miss Kathleen Miller, Mr. Earl Black Married Tuesday Evening

In the presence of a few relatives and friends, Tuesday evening at 7:30 o'clock, Miss Kathleen Miller became the bride of Earl Black, W. T. 1/c. Rev. B. H. Kasey, pastor of the Baptist Church, performed the single ring ceremony at the home of the groom's parents, Mr. and Mrs. Elias Black.

Mrs. Black chose as her wedding dress a light blue wool crepe suit with black accessories. Her flowers were a corsage of pink rose buds.

Her only attendant was her sister-in-law, Mrs. Leo Miller, acting as matron of honor. She wore a blue gabardine suit with a corsage of gardenias. Leo Miller acted as best man.

Mrs. Black is the daughter of Mr. and Mrs. W. J. Miller of 406 Alliance Place, Dayton, Ohio, formerly of Morehead. She is a graduate of Breckinridge Training School and for the past four years has been employed by the Bell Telephone Company in Dayton.

Mr. Black is a graduate of Morehead High School and has been serving in the Navy for over five years. He will receive his discharge next March.

Mr. and Mrs. Black will spend a short time in Dayton with her parents before he returns to his naval duties sometime next week.

## Miss Patty Caudill And Guests Visiting Here

Miss Patty Caudill, who arrived home last week from Ohio State University, Columbus, Ohio, has as her guests, Misses Elizabeth Rogers, Barbara Brown, and Messrs Ted Brown, Jack Tetrick, and Jack Swearing. They will stop over in Lexington and visit her brother, Dr. Milton Caudill, and her sister, Mrs. Paul Little, and her sister, before returning to Columbus.

## American Legion Auxiliary Meeting

The American Legion Auxiliary held their regular monthly meeting last Friday at the home of Mrs. Everett Kegley. After the business was disposed of, Mrs. Kegley took her guests to the log cabin opened by Elwood Dillon, where they enjoyed a chicken dinner. The men also enjoyed the dinner.

## Many Attend Services For Billy Ramey

Those from Morehead who attended the funeral services for Billy Ramey at Ashland Sunday afternoon were Mr. and Mrs. C. O. Leach and family, Mr. and Mrs. Parnell Martindale, Mr. and Mrs. John Green and family, Mr. and Mrs. Luther Fraley and son, Frank, C. B. Lane, C. G. Clayton, Dub Bellamy, Mr. and Mrs. Maggard, Hildreth Maggard, C. P. Duley, R. L.
