

1                   **Resolution on the Revision of Student Course Evaluations**

2                   **Morehead State University Faculty Senate**

3                   **October 8, 2020**

4  
5       Whereas:       The current student course evaluations are biased and provide little to no valuable  
6                                feedback on a faculty’s teaching efficacy, and

7       Whereas:       Evaluation of instructor teaching efficacy is unequally and inappropriately applied  
8                                across campus, and

9       Whereas:       The existing system of peer and chair evaluation is not possible due to current  
10                              staffing and workload levels, therefore,

11       Be it resolved: Morehead State University should investigate alternative strategies for evaluating  
12                              instructor teaching efficacy that are not student evaluation based.
